

JING-ZHANG CITY COMPLETENESS v0.15.s | AI SIDECAR CITY

The ordinary city is the host. AI is only a reversible sidecar.

AI SIDECAR CITY

The ordinary city is the host. AI is only a reversible sidecar.

ONE SPINE · SIX SEGMENTS · SIX STITCHES · THREE CORES

AI OFF / ON: all three host routes stay fixed; only the orange sidecar interfaces change.

HOST → SIDECAR RULE

ROAD-009 work / rest / public exchange + TEST POCKET
ROAD-010 home / human help / common life + CARE PORCH
ROAD-011 fixed signs / staffed help / waiting + ARRIVAL SIDECAR

3 sidecar types · 9 host features
0 new AI land-use codes · route preservation = 1.0
REAL LEVEL DATA REQUIRED @ Dazhongsi

THREE HOSTS · THREE SIDECARS

AI OFF and AI ON share the same ordinary route; ON adds only a lateral interface.

ZHONGZHIYUAN R&D CAMPUS AI OFF ROAD-009 · SAME ROUTE complete ordinary city AI ON TEST POCKET route geometry unchanged HOSTS: BLDG-012 / BLDG-013 / PUBLIC-006	AI ORIGIN LONG-TERM NEIGHBORHOOD AI OFF ROAD-010 · SAME ROUTE complete ordinary city AI ON CARE PORCH route geometry unchanged HOSTS: BLDG-007 / BLDG-009 / PUBLIC-004	DAZHONGSI STATION-CITY ARRIVAL AI OFF ROAD-011 · SAME ROUTE complete ordinary city AI ON ARRIVAL SIDECAR route geometry unchanged HOSTS: BLDG-001 / BLDG-002 / PUBLIC-001
---	---	--

Dazhongsi: REAL LEVEL DATA REQUIRED

C7 HOST + MOBILITY

C7 LAND-USE HOST

AI is not an eighth land-use category; sidecars attach to ordinary urban functions.

HOME 居 homes	LEARN 学 learning	CARE 护 human care	MOVE 行 ordinary mobility	GREEN 绿 public green	WORK 工 research/work	COMMON LIFE 交 commons
--------------------	------------------------	-------------------------	--------------------------------	----------------------------	----------------------------	-----------------------------

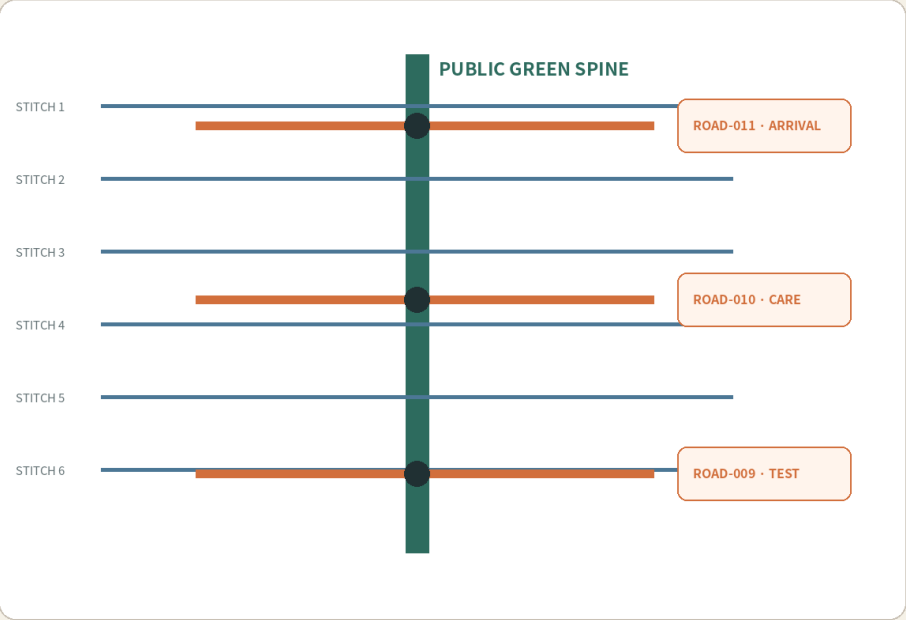

SIDecars attach across C7 without replacing C7

TEST POCKET ZHONGZHIYUAN WORK + COMMON LIFE AI OFF → host remains complete	CARE PORCH AI ORIGIN HOME + CARE + LEARN AI OFF → host remains complete	ARRIVAL SIDECAR DAZHONGSI MOVE + COMMON LIFE AI OFF → host remains complete
---	--	--

NEW AI LAND-USE CODES = 0 AI changes interfaces, not statutory land-use categories.

MOBILITY + BLUE/GREEN HOST

Ordinary routes, the public green spine and six stitches work first; sidecars do not occupy the host network.

NETWORK RULES

- 3 invariant routes
- 6 east-west stitches
- 1 public green spine
- sidecar hosts are lateral
- no AI-only route
- no fabricated station level

DAZHONGSI

**REAL LEVEL DATA
REQUIRED**

METRICS + EVIDENCE BOUNDARY

Locked area metrics remain unchanged; v0.15.s adds only reviewable sidecar design facts.

LOCKED AREA METRICS

SITE 11,412,825.386 m ²	GREEN 2,225,592.728 m ²
GREEN RATIO 19.5008%	PUBLIC SPACE 386,029.358 m ²
PUBLIC RATIO 3.3824%	BUILDING FOOTPRINT 1,024,945.371 m ²

v0.15.s DESIGN FACTS

SIDECAR TYPES	3
HOST FEATURES	9
PUBLIC HOSTS	3
ROUTE PRESERVATION	1.0
NEW AI LAND-USE	0

EVIDENCE BOUNDARY Concept geometry ≠ survey / statutory control / engineering alignment. Dazhongsi needs verified entrances and real level data.
