CURRENT: G0 · PROVISIONAL · NO APPROVAL / FIELD RESULT

06 / JZ-AIOS

A Verifiable Scenario Operating System · Four Gates

An urban problem must pass an auditable state machine; it cannot jump from a demo to public operation.

Mandatory fields in every scenario passport

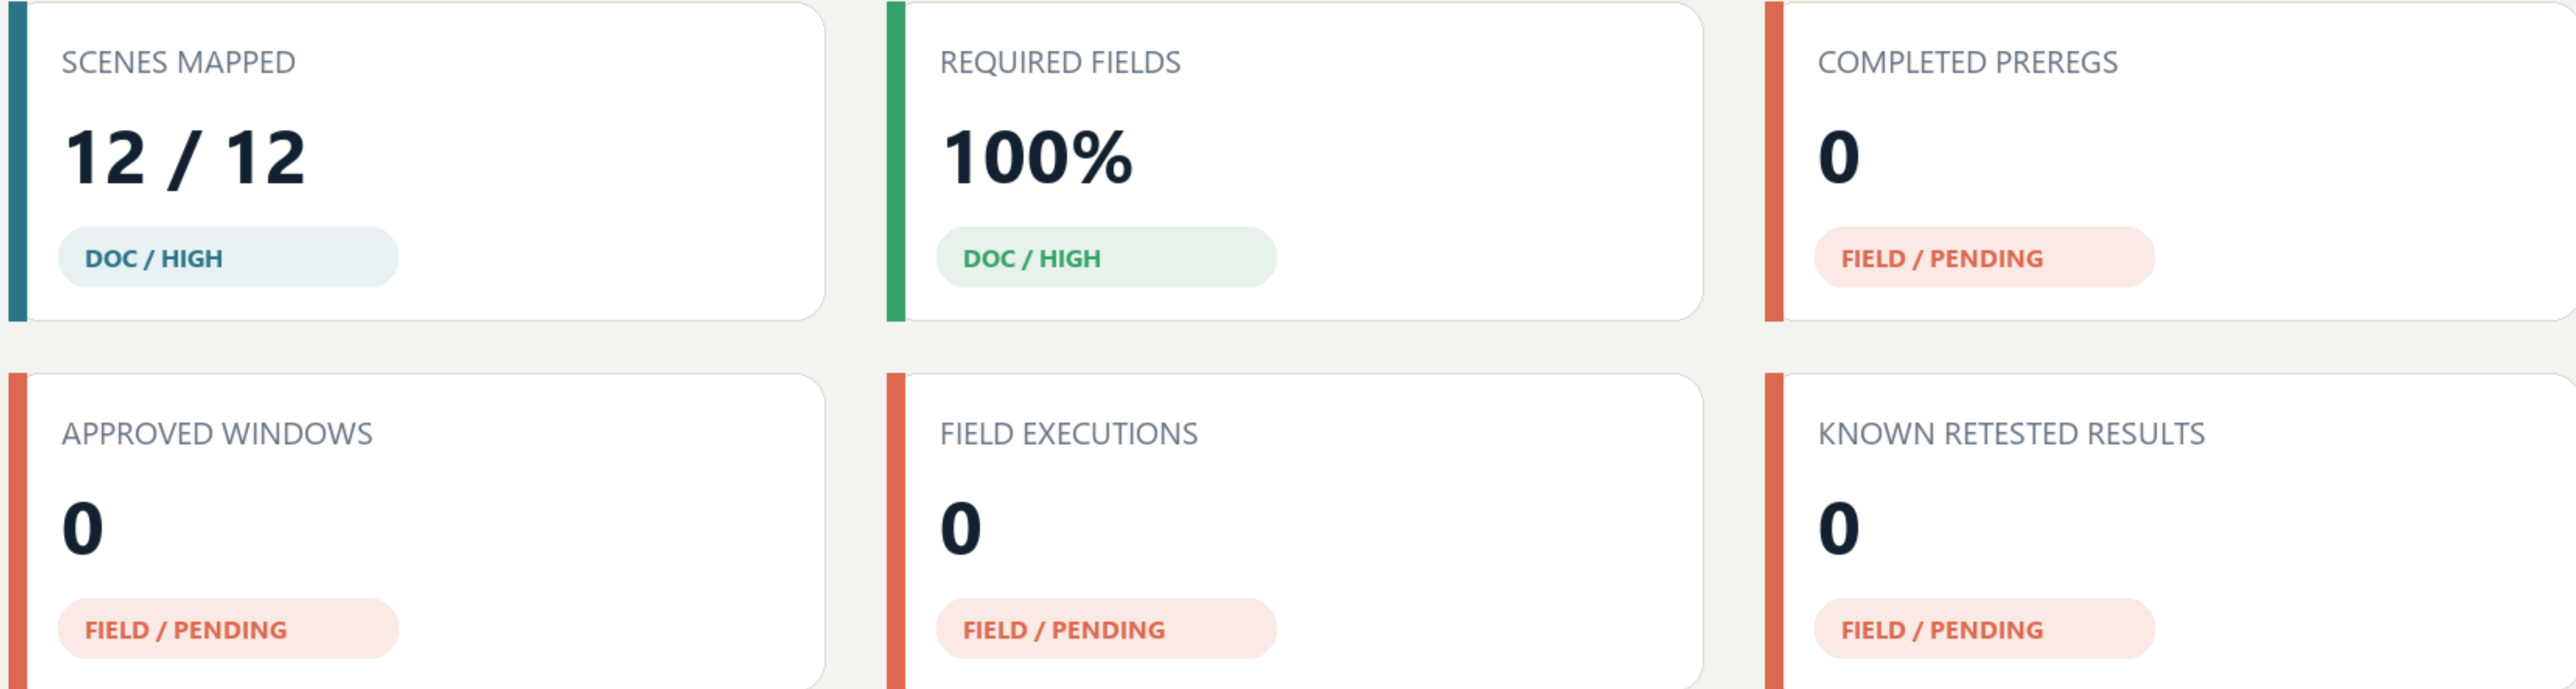

Graduation cube technical maturity × public-value maturity × governance maturity
12 passport nodes · 3 service zones · passport completeness 100% · manual fallback 100%

EVIDENCE LIMIT Any failed dimension pauses, corrects, or retires the scenario; G3 still requires competent approval.

05 / EVIDENCE MATURITY

Move from field coverage to evidence maturity

Blue and green cards are auditable document states. Orange zeros are real-world evidence that does not yet exist.

EVIDENCE LADDER - ONLY THE G0 CONTRACT LAYER EXISTS

BOUNDARY / Coverage proves that a test can be inspected before it starts. It proves no approval, operator, participant, benefit, or safety performance.

It authorizes no trial, procurement, construction, deployment, maturity gain, site/professional approval, rights clearance, or real-world outcome claim.
