

01 JING-ZHANG CIVIC STACK / OVERVIEW

Make each intelligent layer visible, accountable and reversible

JING-ZHANG CIVIC STACK

One evidence line, four care ribs, three stack-yards, five handover-ready layers

The proposal translates the railway heritage of testing and proof into an urban evidence chain: research, controlled validation, public trial, human decision and reversible exit.

11.41 km2

provisional scope

17.27%

design green union

3.06%

design public space

01

EVIDENCE LINE

Heritage, tests and public evidence remain continuous.

04

CARE RIBS

Phone-free, accessible, night-maintained human routes.

03

STACK-YARDS

Validation garden, transfer commons and living room.

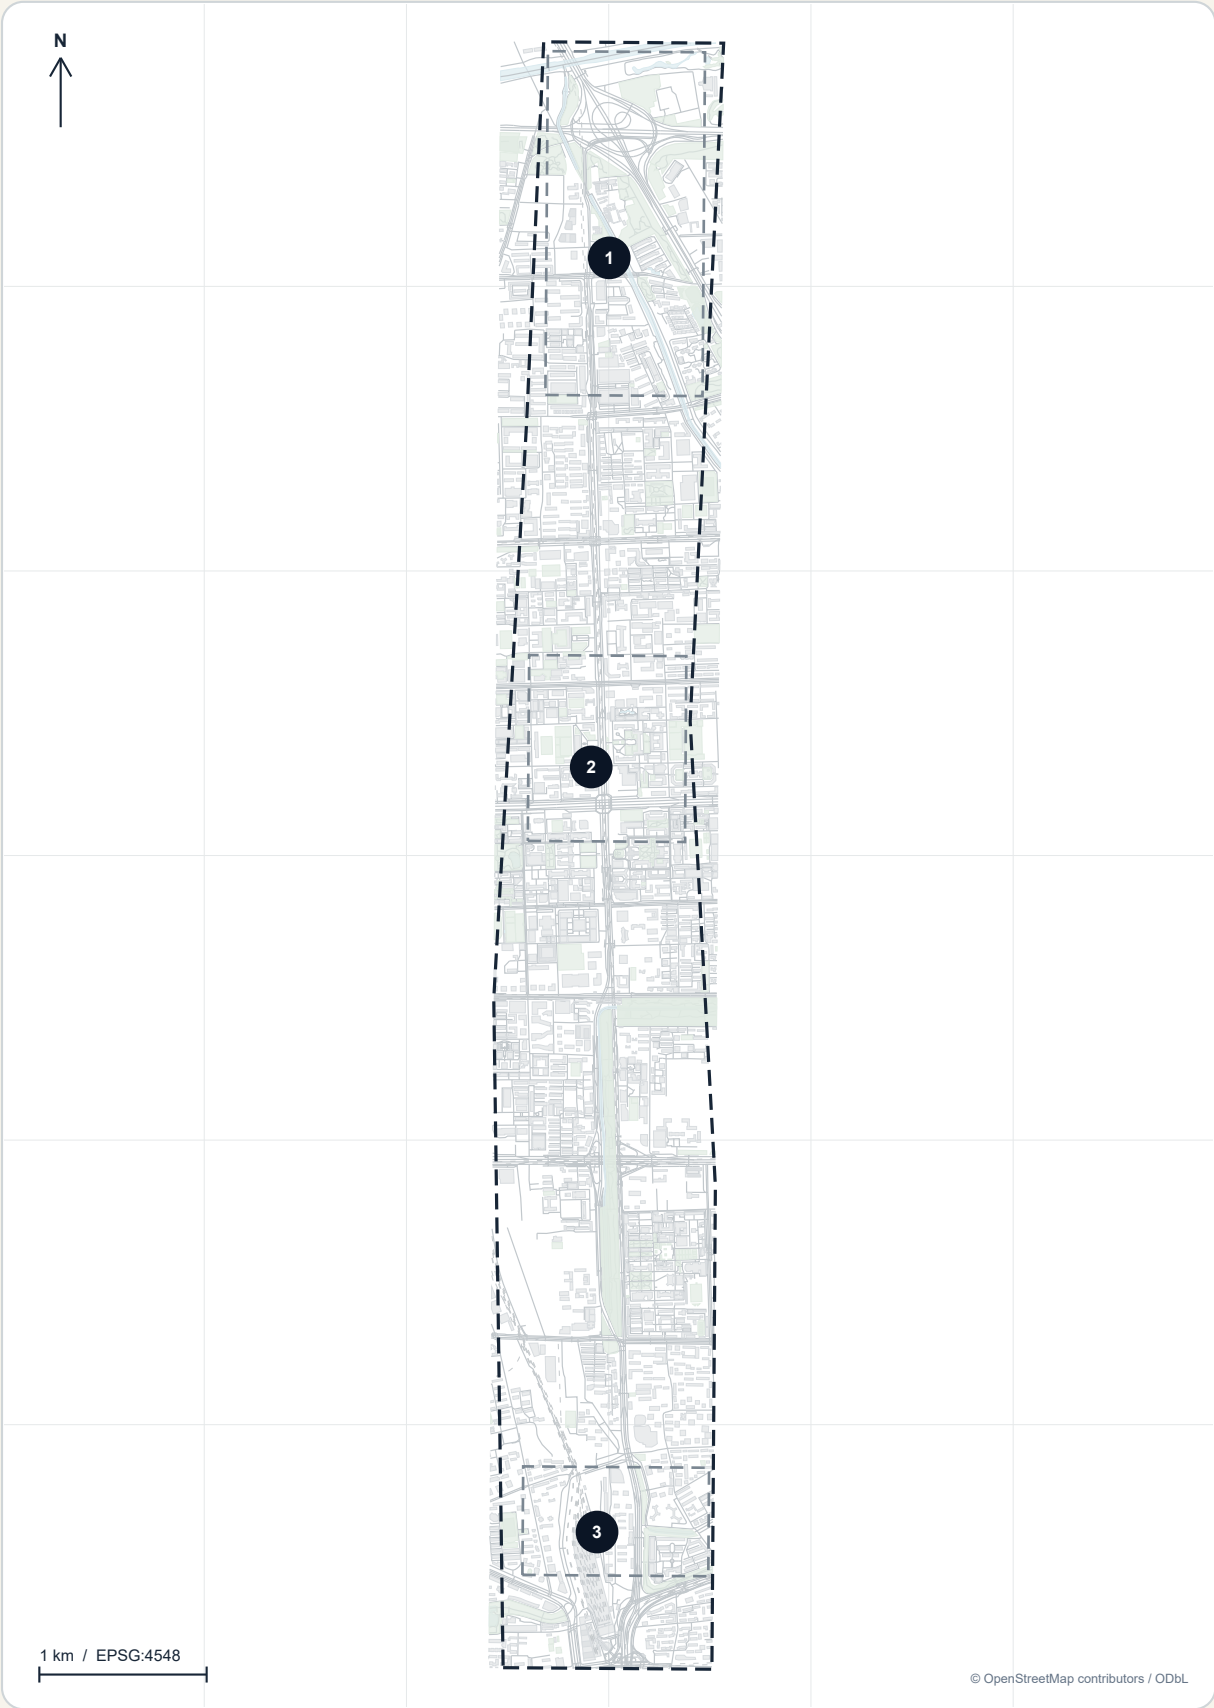

05

CITY STACK

Ground, care, energy, data and governance stay visible and reversible.

02 SITE READING + DESIGN BOUNDARIES

Identify design space and delivery conditions from the existing park and neighbourhood fabric

01

OFFICIAL ANNOUNCEMENT
43.6 km2 / 11.4 km2 / 368.4 ha

02

REPOSITORY BRIEF + PUBLIC SOURCES
scope, functions, agents, professional depth

03

DESIGN EXTENT
rough working extent; not statutory control

04

SPATIAL STRATEGY
green spine, care ribs, stack-yards and civic units

BASE

DESIGN BASIS
Public site information, everyday needs and legible spatial indicators.

HOLD

HOLD OUT
Title, redlines, utilities, FAR, cost and operating contract.

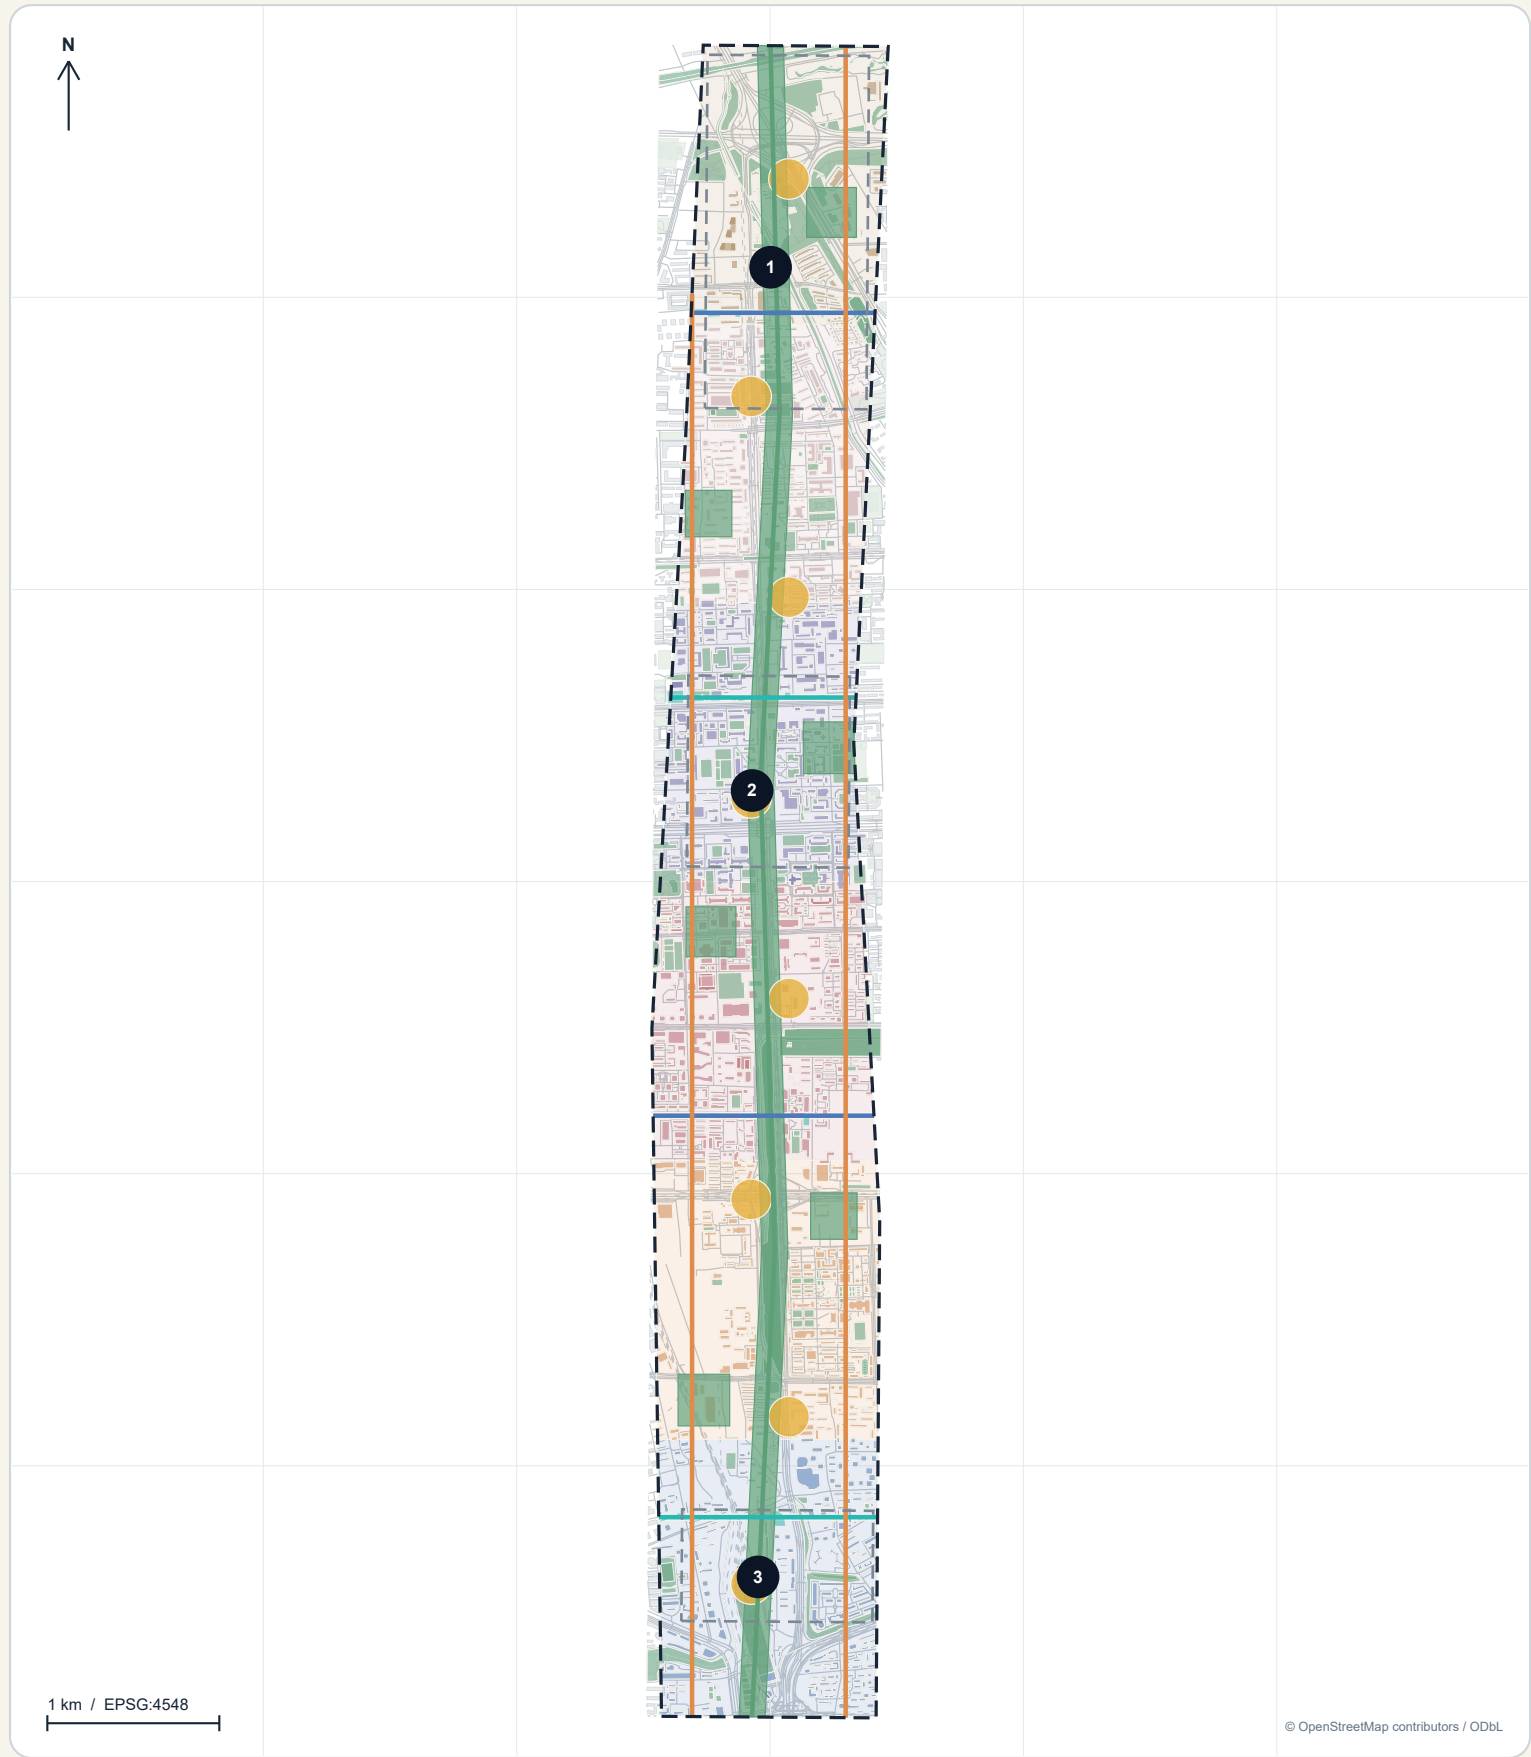

03 THREE SCALES + FIVE-LAYER STACK

Research, overall design and key-area prototypes pass evidence downstream

04 NEIGHBOURHOOD SPATIAL STRUCTURE

A heritage green spine links three yards; four care ribs serve everyday neighbourhoods

LEGEND

- Heritage evidence green spine
- Transverse care-rib mobility
- Validation R&D
- Transfer services
- Community care
- Education collaboration
- Intergenerational housing
- Railway culture

LEGEND

- Existing building grain (OSM background)
- Public-benefit node
- Care rib
- Provisional dashed boundary

01

ONE SPINE + FOUR RIBS

A continuous north-south heritage green spine is tied to neighbourhoods, campuses and jobs by four transverse care ribs.

02

THREE STACK-YARDS

Zhongzhiyuan hosts validation, AI Origin enables transfer, and Dazhongsi anchors everyday service, each responding to its local fabric and users.

03

NEIGHBOURHOOD REPAIR

Public space, slow mobility and ground-floor services overlap at crossings to form a walkable, caring and staff-supported 15-minute neighbourhood.

05 THREE STACK-YARDS + BUILT VISION

Low-intensity, reversible renewal grows from park, block and community contexts

ZHONGZHIYUAN / VALIDATION GARDEN

Use woodland and park edges for a reversible one-storey canopy, rain garden, accessible loop and maintenance access.

AI ORIGIN / OPEN TRANSFER COMMONS

Retain the mature block; activate ground floors, shared workshop, staffed window and phone-free route.

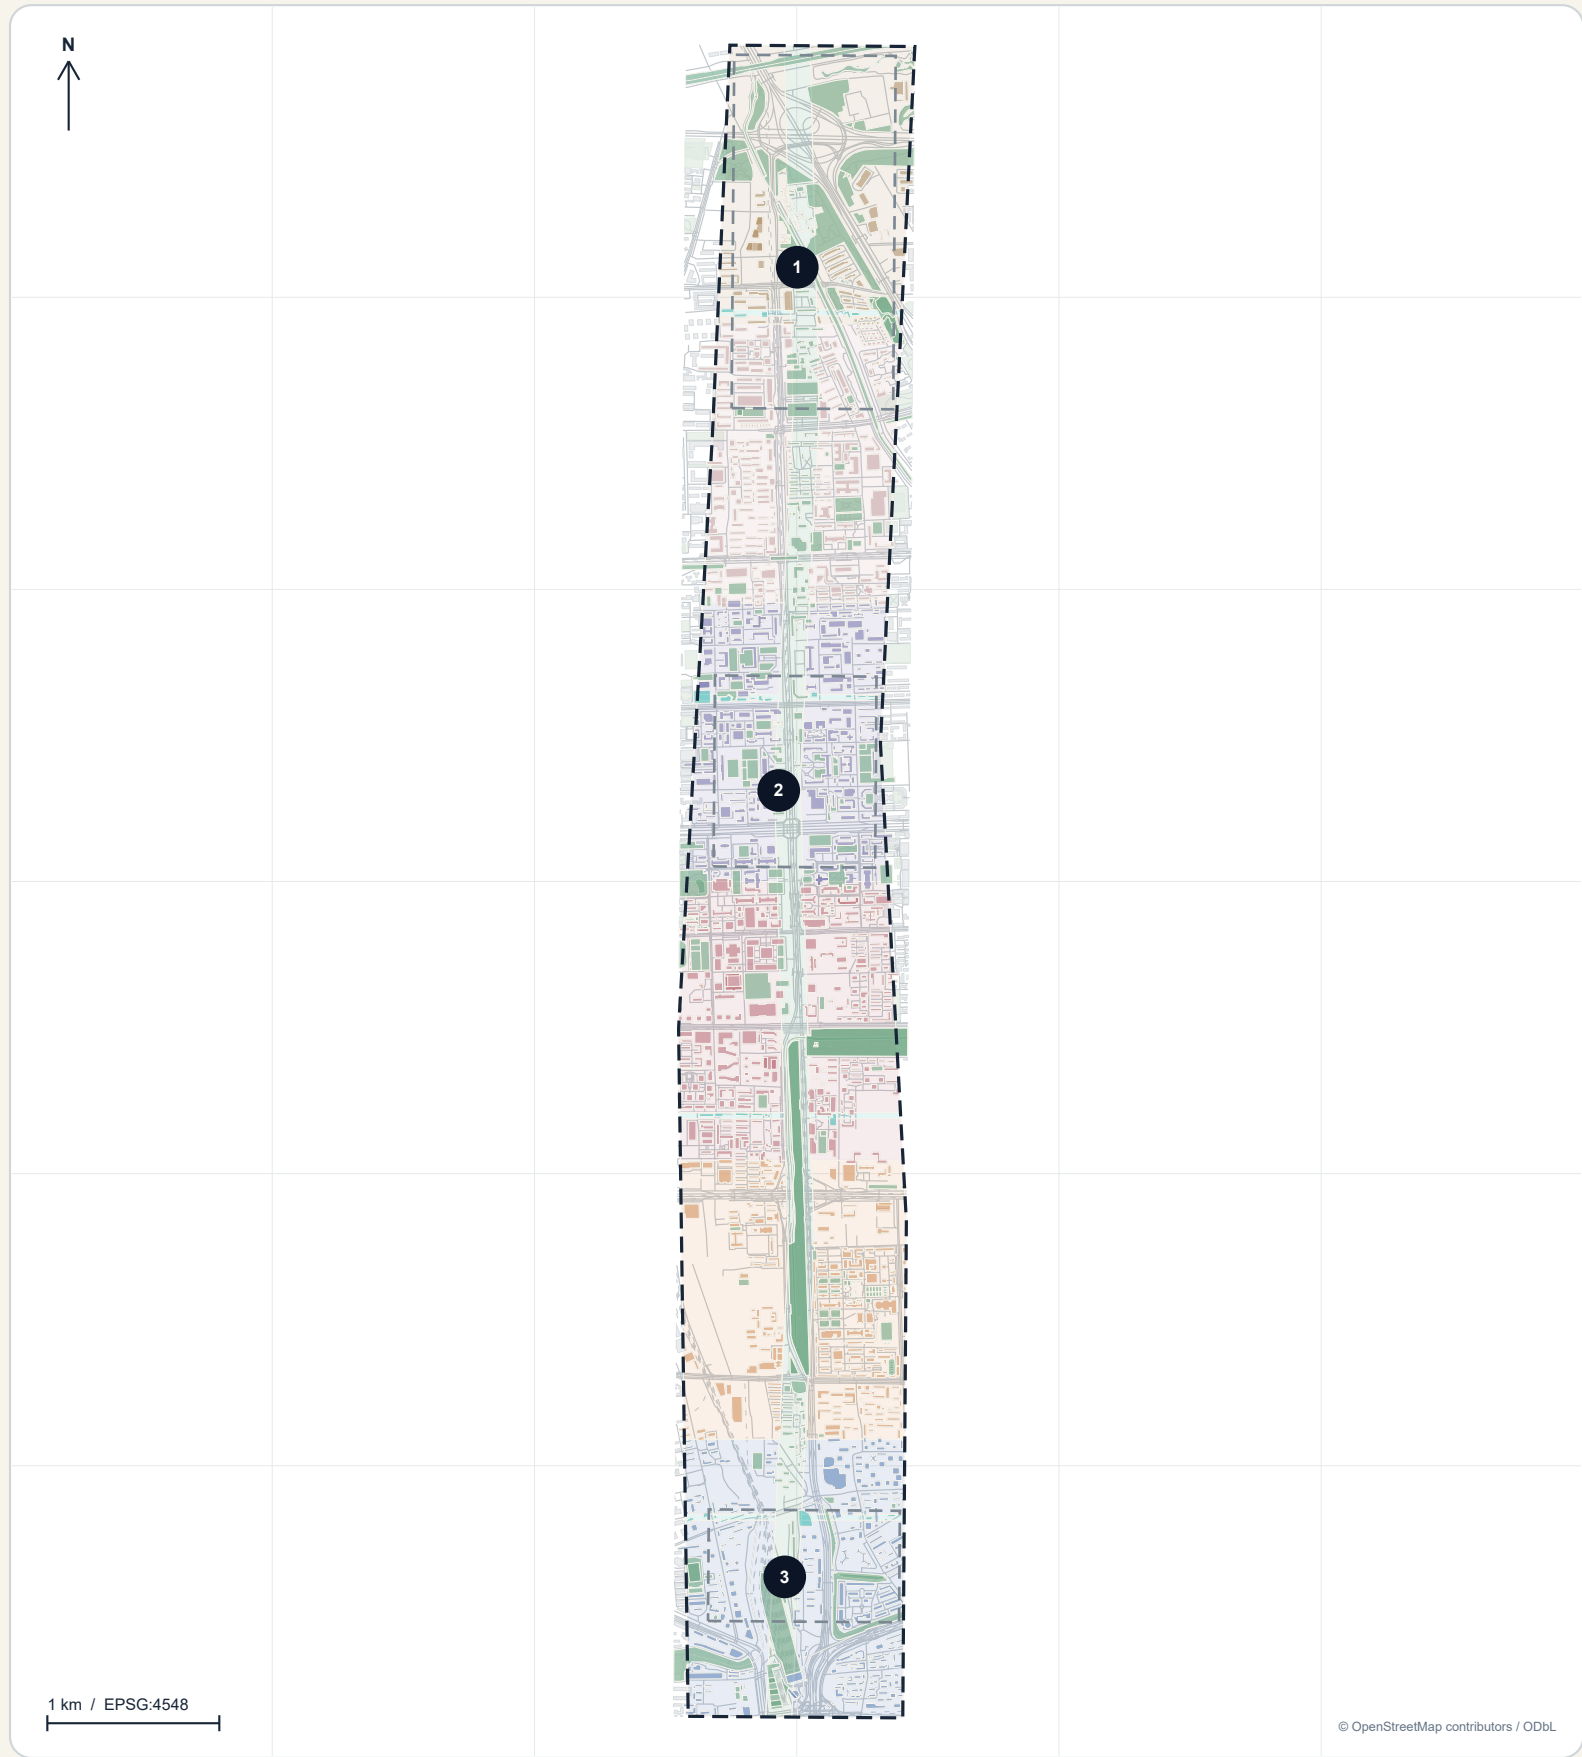

DAZHONGSI / 15-MINUTE LIVING ROOM

Retain mature trees and mixed frontages; add one-storey everyday services, a low-glare canopy, cycle parking and a staffed care stop.

AI CONCEPT VIEWS (NOT BUILT-WORK PHOTOGRAPHS): the scenes draw on official public information for Jing-Zhang Railway Heritage Park phases 1/2 and the AI Origin community. They focus on low-intensity renewal, continuous walking, rain gardens, shared ground floors and staffed service. Location, materials, planting, utilities and dimensions require site-led development.

06 LAND USE + PUBLIC BENEFIT

Programme and public service interlock while green and care routes remain continuous

LEGEND

- Heritage evidence green spine
- Transverse care-rib mobility
- Validation R&D
- Transfer services
- Community care
- Education collaboration
- Intergenerational housing
- Railway culture

DESIGN RULES

01

ROUTE CONTINUITY

The green spine and care ribs stay continuous; programme zones do not sever public routes.

02

PLACE-SPECIFIC YARDS

Validation, transfer and everyday service form distinct yards, not an equal-weight carpet.

03

PROGRAMME, NOT ZONING

Colours represent concept programmes, never statutory land-use classes or approved intensity.

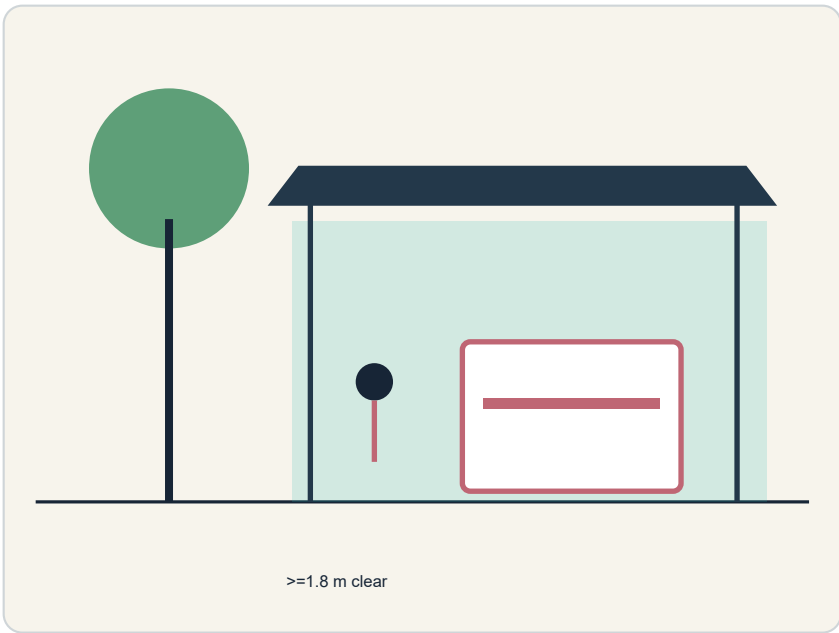

07 NEIGHBOURHOOD KIT + SPATIAL SECTIONS

Three small-scale kits deliver shade, care, water management and shared services

01

CARE CANOPY

A demountable single-storey frame combines shade, waiting and staffed service.

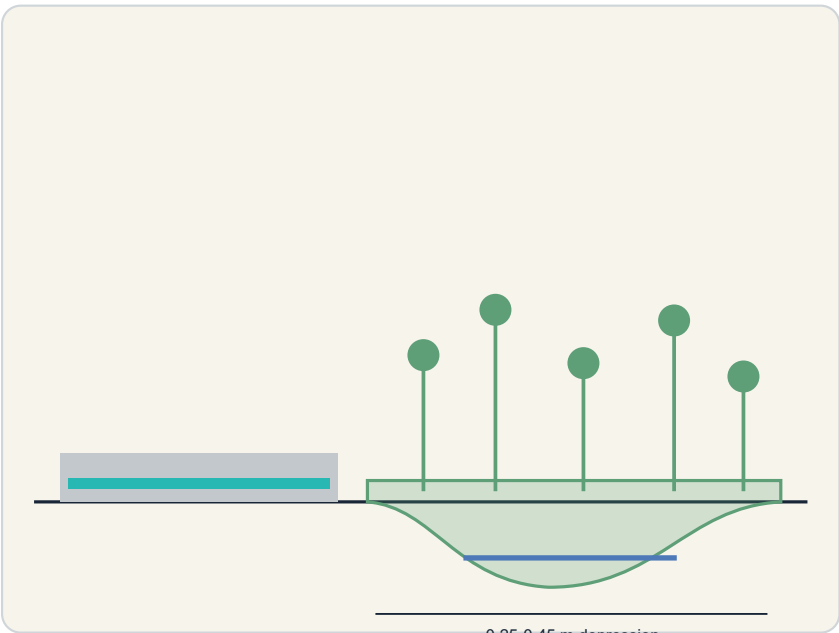

- >=1.8 m clear step-free route
- dry assembly; foundations avoid roots and utilities
- staffed window, seating and low-level night lighting

02

SPONGE WALK COURT

A permeable slow route and shallow planted basin manage everyday rain.

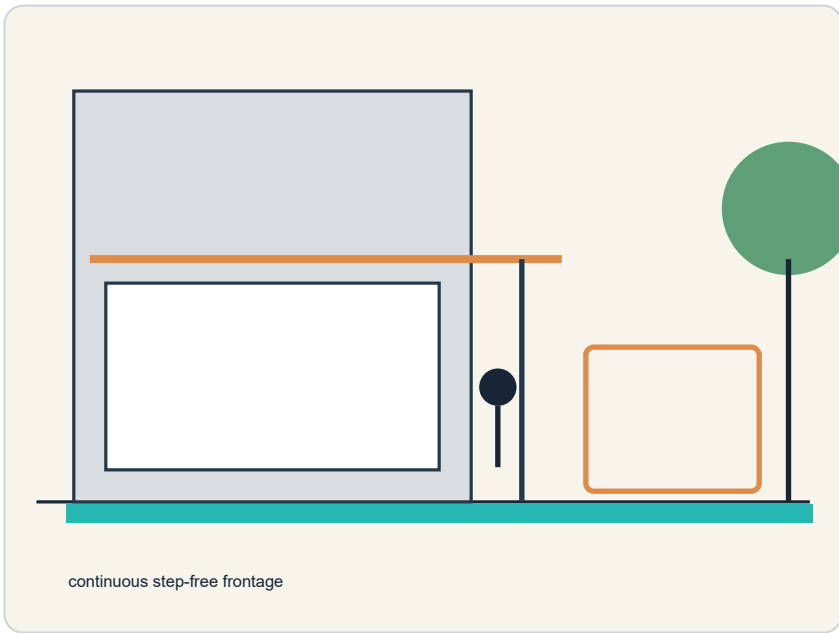

- shared at differentiated speeds for walking, wheelchairs and cycles
- overflow and maintenance edges remain accessible
- locally adapted wet-dry planting; no high-maintenance display

03

SHARED GROUND-FLOOR PORCH

Existing ground floors and forecourts host small shops, workshops and a community room.

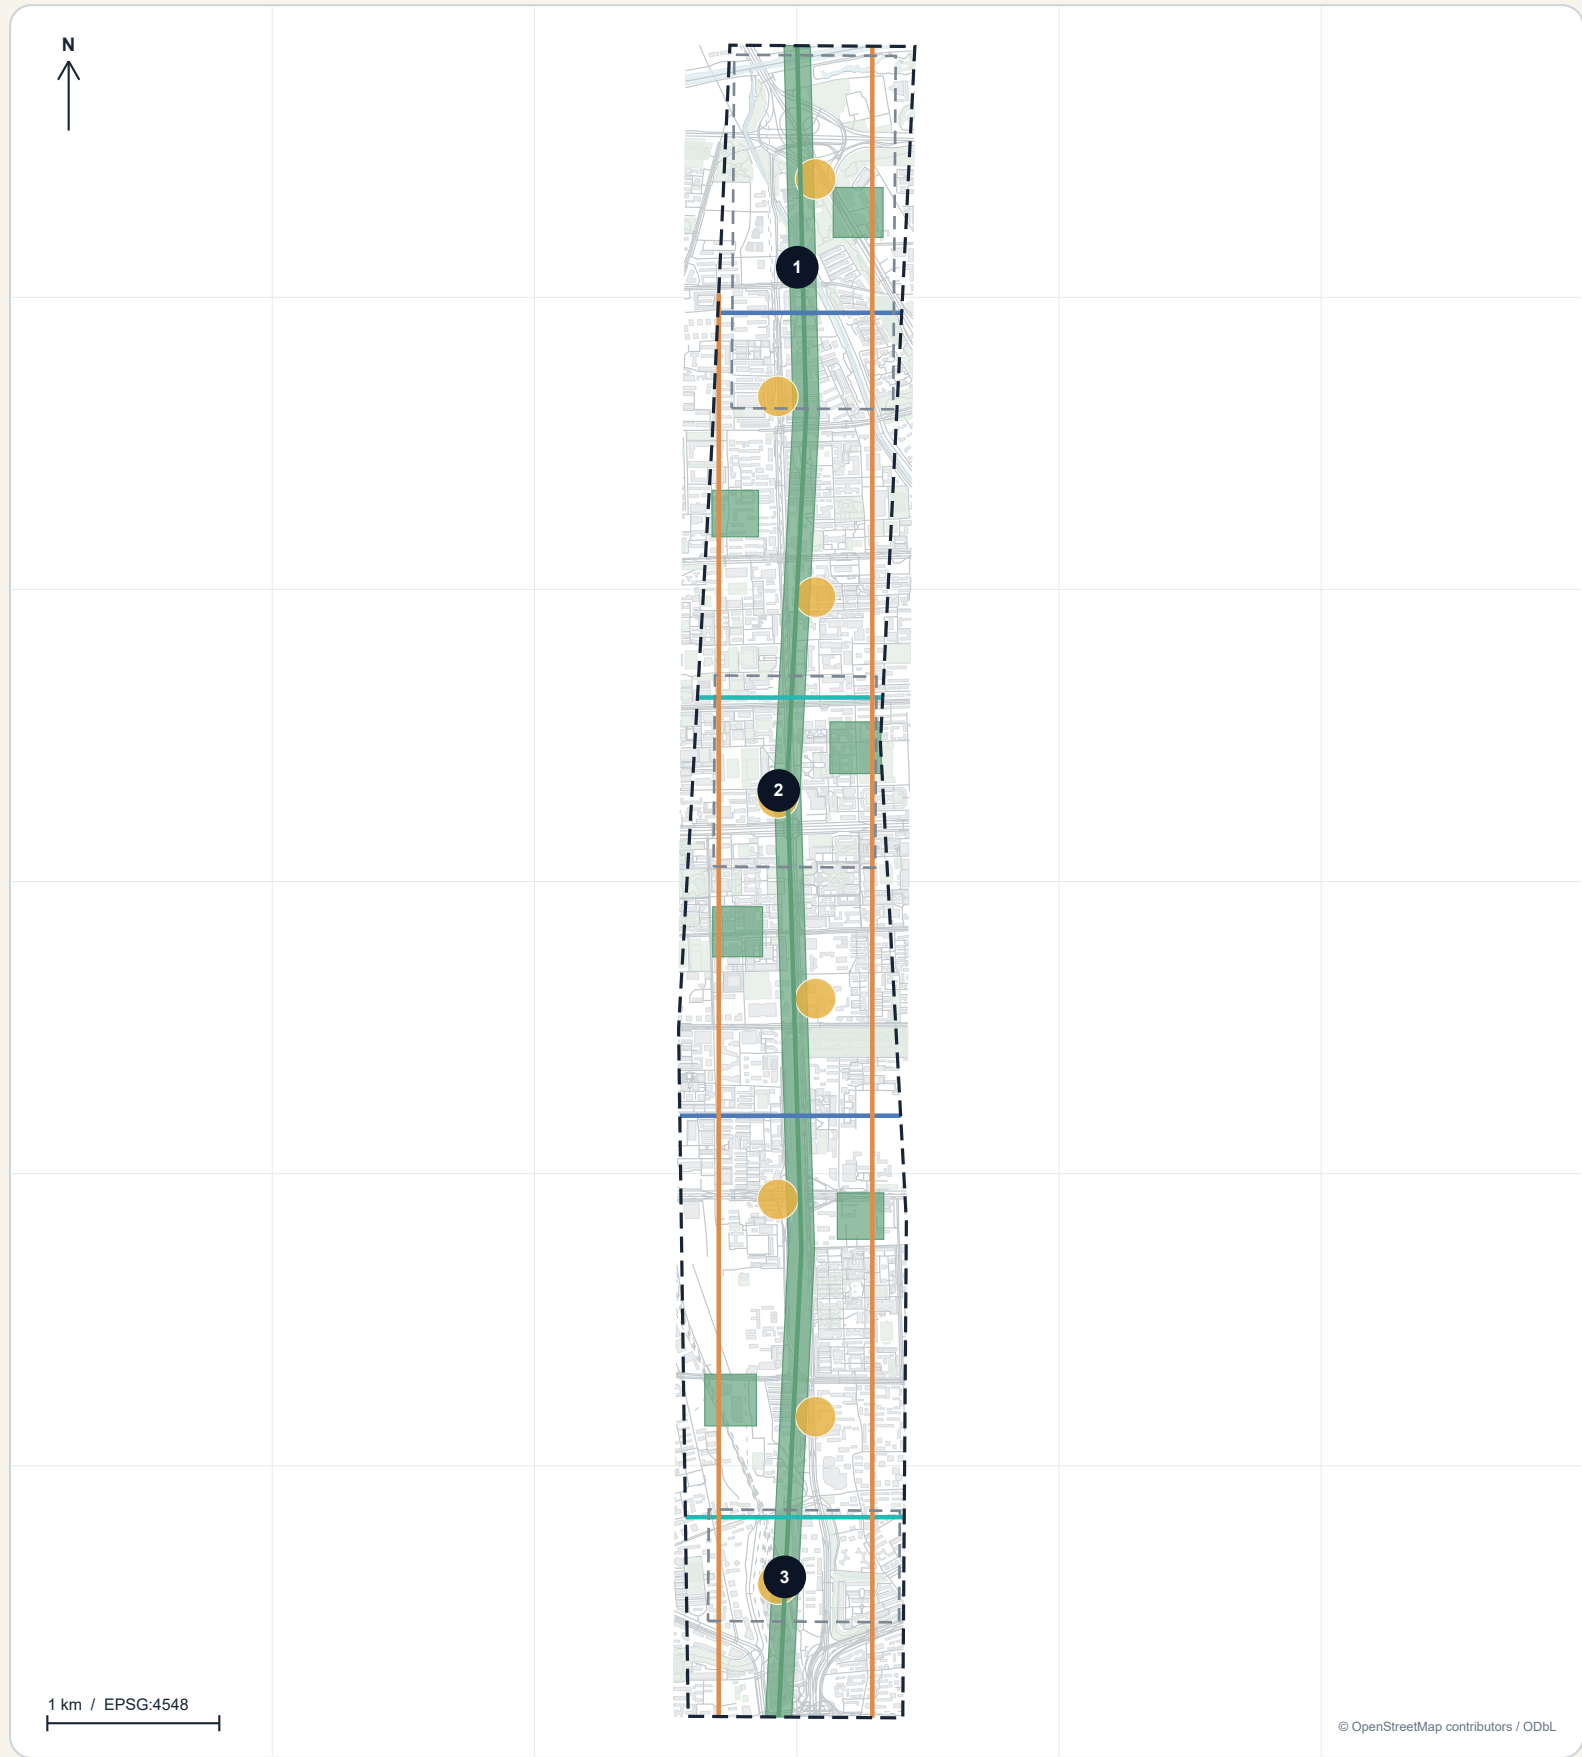

- micro-renewal first; no presumption of wholesale demolition
- continuous weather cover and step-free frontage
- staffed and phone-free alternatives beside digital service

SHARED DELIVERY PRINCIPLE: reuse existing paved areas and ground floors first; safeguard accessible, fire and maintenance routes; develop structure, drainage, services and planting after site survey by qualified teams.

08 MOBILITY, CARE + BLUE-GREEN SYSTEM

Slow mobility first, bypass before connection, maintenance made visible

LEGEND

- Evidence green spine / walk-cycle
- Accessible care rib
- Concept cycle connection
- Concept station relay
- Human-handover public node

01

SLOW FIRST

Walking, wheelchair and cycling continuity precedes cabinets and vehicle switching.

02

BYPASS FIRST

Every digital or automated service retains a staffed and non-digital route.

03

VISIBLE MAINTENANCE

Water, drainage, power, data and cleaning interfaces remain reachable and legible.

09 TWELVE SCENARIOS + SIX PERSONAS

Every scenario carries a baseline, window, pass, stop and human route

01

Phone-free commute*

BASE / WINDOW / PASS / STOP / HUMAN / RETIRE

02

Accessible walk

BASE / WINDOW / PASS / STOP / HUMAN / RETIRE

03

Older-adult dialogue

BASE / WINDOW / PASS / STOP / HUMAN / RETIRE

04

Child rail memory

BASE / WINDOW / PASS / STOP / HUMAN / RETIRE

05

Merchant test sale

BASE / WINDOW / PASS / STOP / HUMAN / RETIRE

06

12

System retirement*

BASE / WINDOW / PASS / STOP / HUMAN / RETIRE

SIX PRIORITY PERSONAS

RESIDENT

CHILD

OLDER ADULT

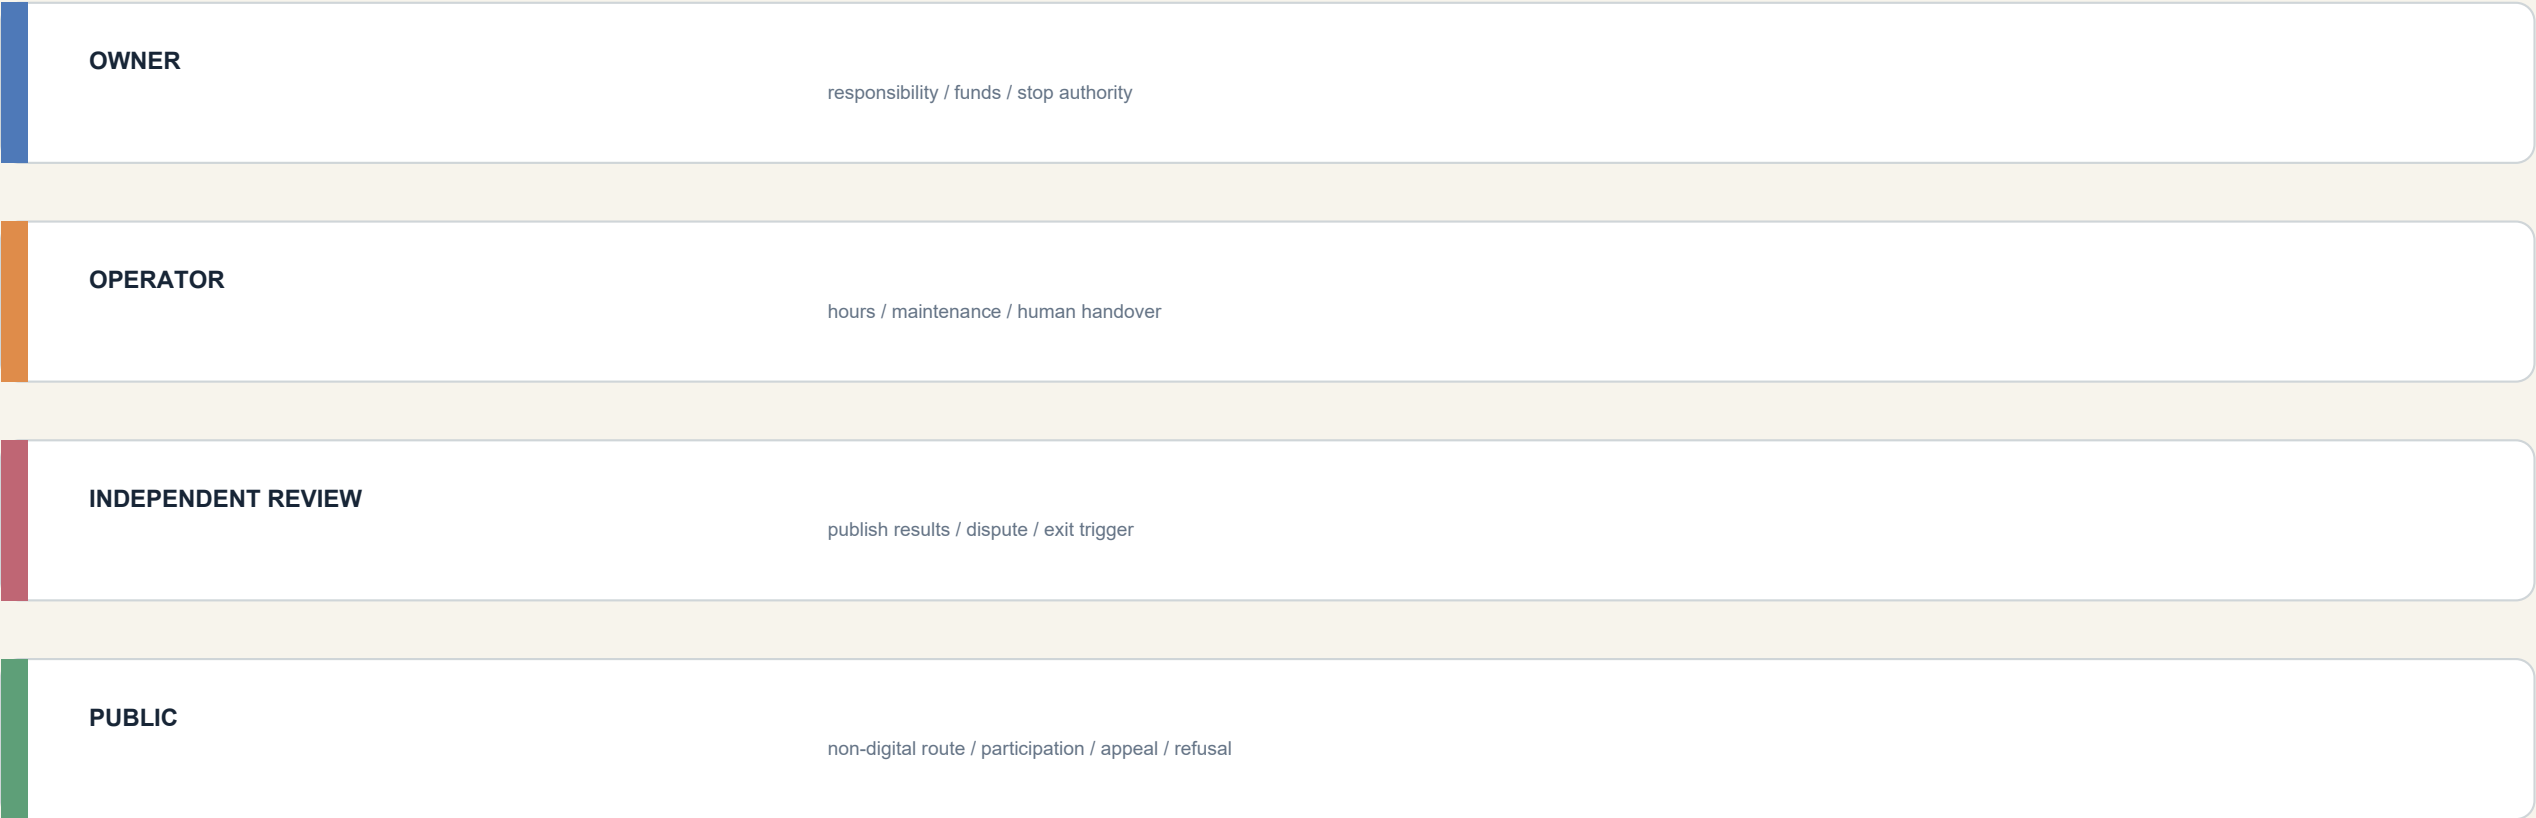

DISABLED PERSON

MERCHANT

NIGHT WORKER

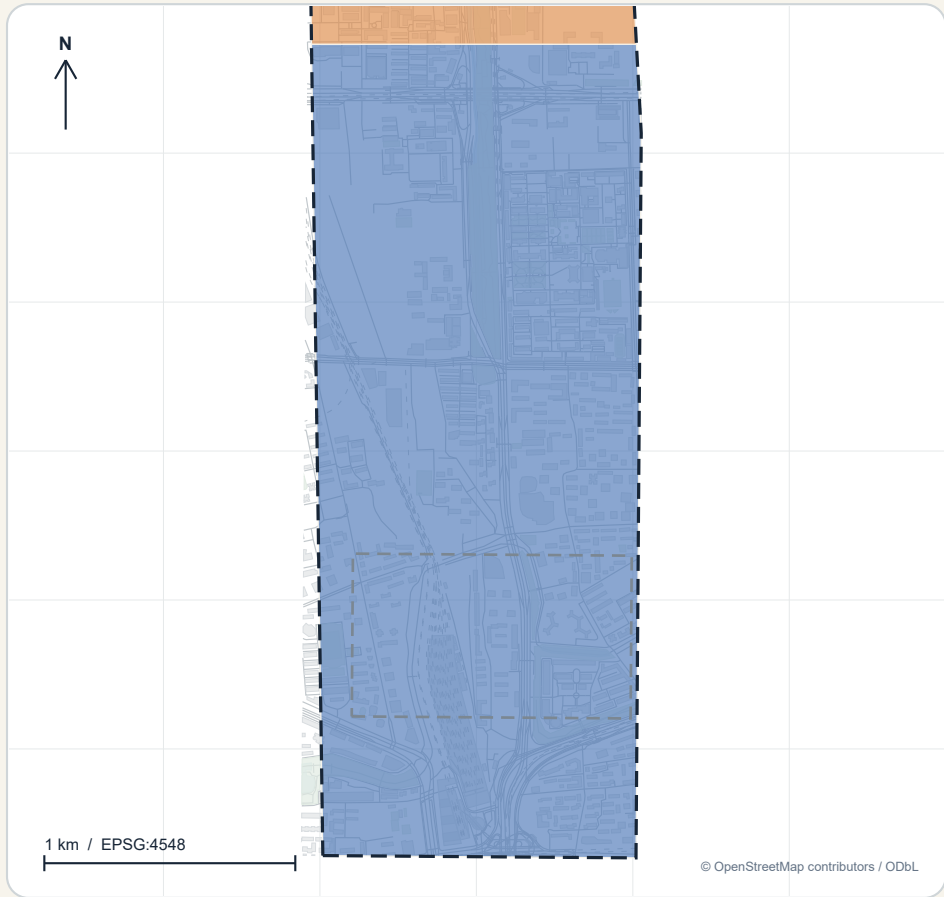

10 EVIDENCE CHAIN, GOVERNANCE + EXIT

Data minimisation, human handover, appeal and retirement are spatial requirements

11 PHASING + DELIVERY GATES

Phases are gated by public benefit and delivery readiness

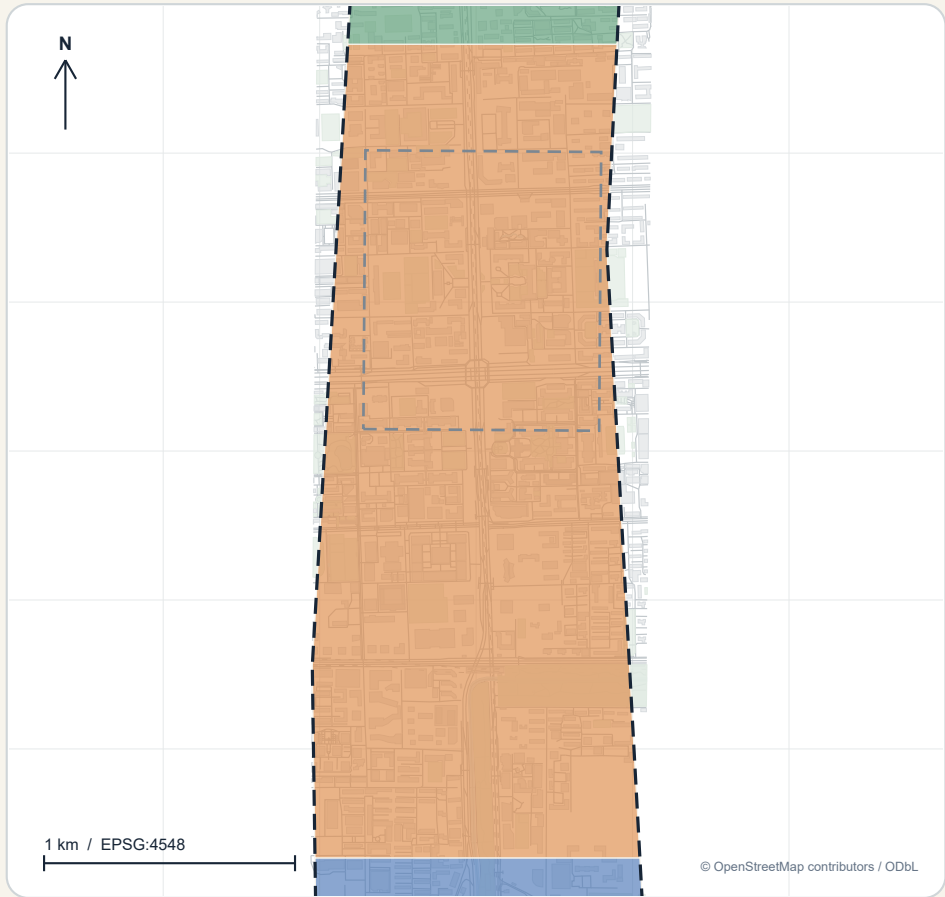

PHASE 1 / Evidence and low-risk pilots

G1

DELIVERY GATE

official baseline + accountable owner + field audit

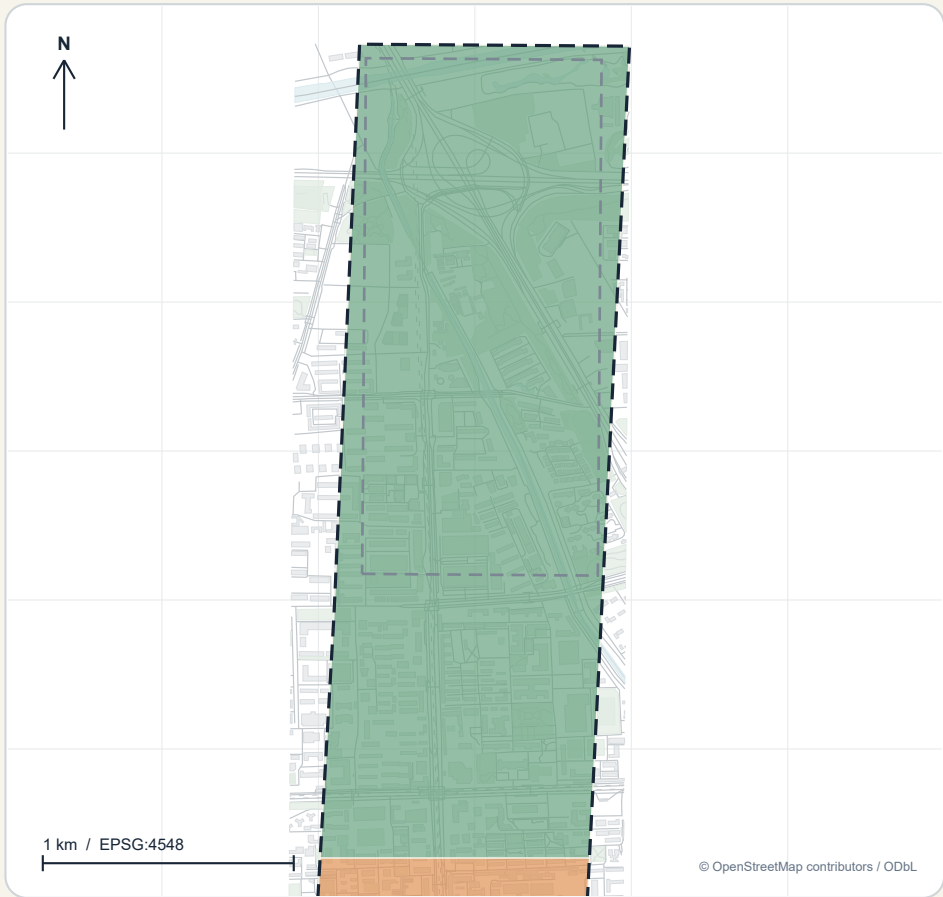

PHASE 2 / Civic-stack unit delivery

G2

DELIVERY GATE

professional design + cost + operations + participation

PHASE 3 / Corridor recalculation and institutionalization

G3

DELIVERY GATE

independent review + public benefit + exit drill

NO CALENDAR OR FUNDING PROMISE: title, quantities, rates, operating agreements and approvals are unavailable.

12 METRICS, RISK + HANDOVER

Green, public-space and slow-mobility continuity test neighbourhood performance

11.41 km2

provisional overall scope

17.27%

concept green union

3.06%

concept public-space union

32.41 km

concept mobility centreline

26

concept building prototypes

12 / 4

scenarios / explicit tests

HOLD

UNKNOWN STAYS OUT

UNKNOWN: statutory FAR, approved height, building density, capital cost, annual operating cost and compute-heat reuse.

NEXT

HUMAN + PROFESSIONAL HANDOVER

HANDOVER: replace rough controls with official data, rerun topology and metrics, complete site/building/mobility/utility/heritage/participation surveys, and obtain licensed professional sign-off.
