

ZERO MILESTONE · 零号里程碑

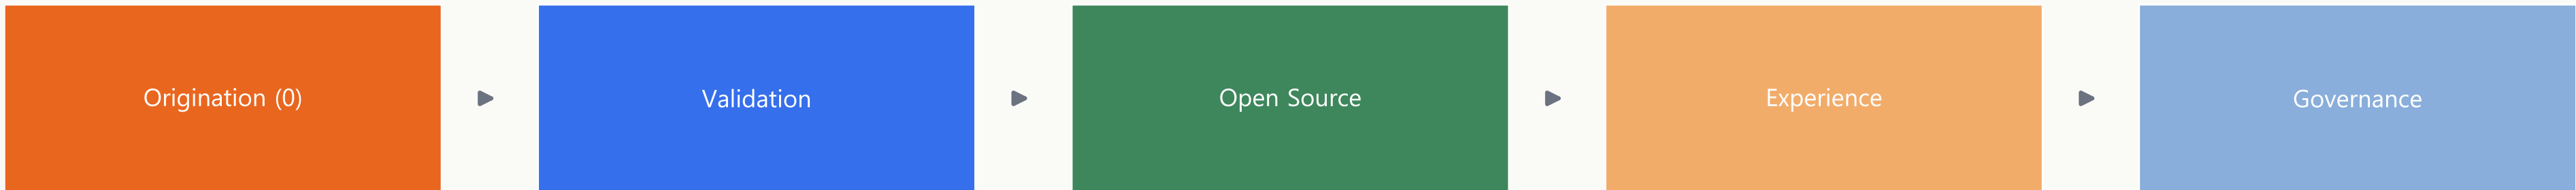

Jing-Zhang AI Origin Belt Urban Design · Board B1 · Overall Concept & Three-Level Scope

The 0 km point of the Jing-Zhang Railway is at Beijing North Station (formerly Xizhimen Station) — the "kilometer zero" of the first trunk railway built independently by Chinese engineers; programmers count from zero, and AI is built on 0s and 1s. The proposal organizes the innovation belt as a Zero-Indexed Axis: from Km 0.0 in the south to Km 6.0 in the north, every node numbered with the dual "railway kilometer post + computer index" language, turning the century-old railway milestone language into the public addressing language of the AI era.

Spatial structure: one axis, seven nodes, three bands, two wings; key areas = Interface (Dazhongsi Km 1.0) · Origin (Wudaokou Km 3.0) · Acceleration (Zhongzhiyuan Km 5.0)

FIVE-STAGE INNOVATION CHAIN

Zero-Cost Factor Wing (Zhongguancun tech-service) · Zero-Barrier Scenario Wing (Xiaoyuehe)

Annual event brand: Zero Hour — launch, open-source co-creation week, controlled test season, release week, governance review week

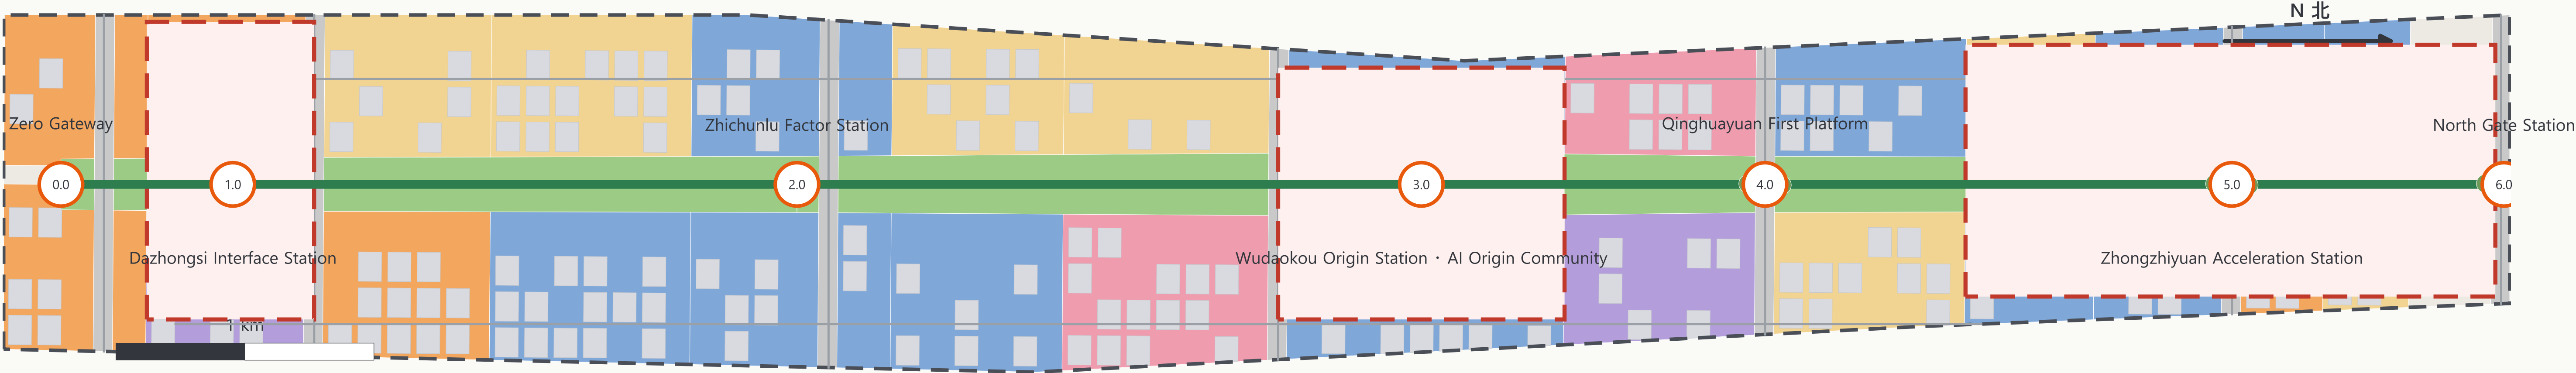

THREE-LEVEL SCOPE

Coordinated Research Area 统筹研究范围 ~43.6 km² 约 43.6 km²	How the AI ecosystem and future city form; an innovation relay chain — origination (0), validation, open source, experience, governance — forming the three-areas-two-wings loop and the global AI event system.
Overall Design Area 总体设计范围 ~11.4 km² 约 11.4 km²	How industry, renewal, transport, municipal services and character land on the map; one axis, seven nodes, two wings, three bands, nodes numbered Km 0.0-Km 6.0, expressed jointly by land-use, building, road, green, public-space and phasing layers.
Key Areas 重点区域范围 ~368.4 ha 约 368.4 公顷	How the three areas reach detailed-design depth; three stations — Interface, Origin, Acceleration — each with positioning, spatial moves, AI scenarios and implementation dependencies.
FIVE-QUESTION GATE Before any AI scenario enters, it must answer: whom it serves, what data it uses, who reviews it, how failures exit, and what public value remains.	

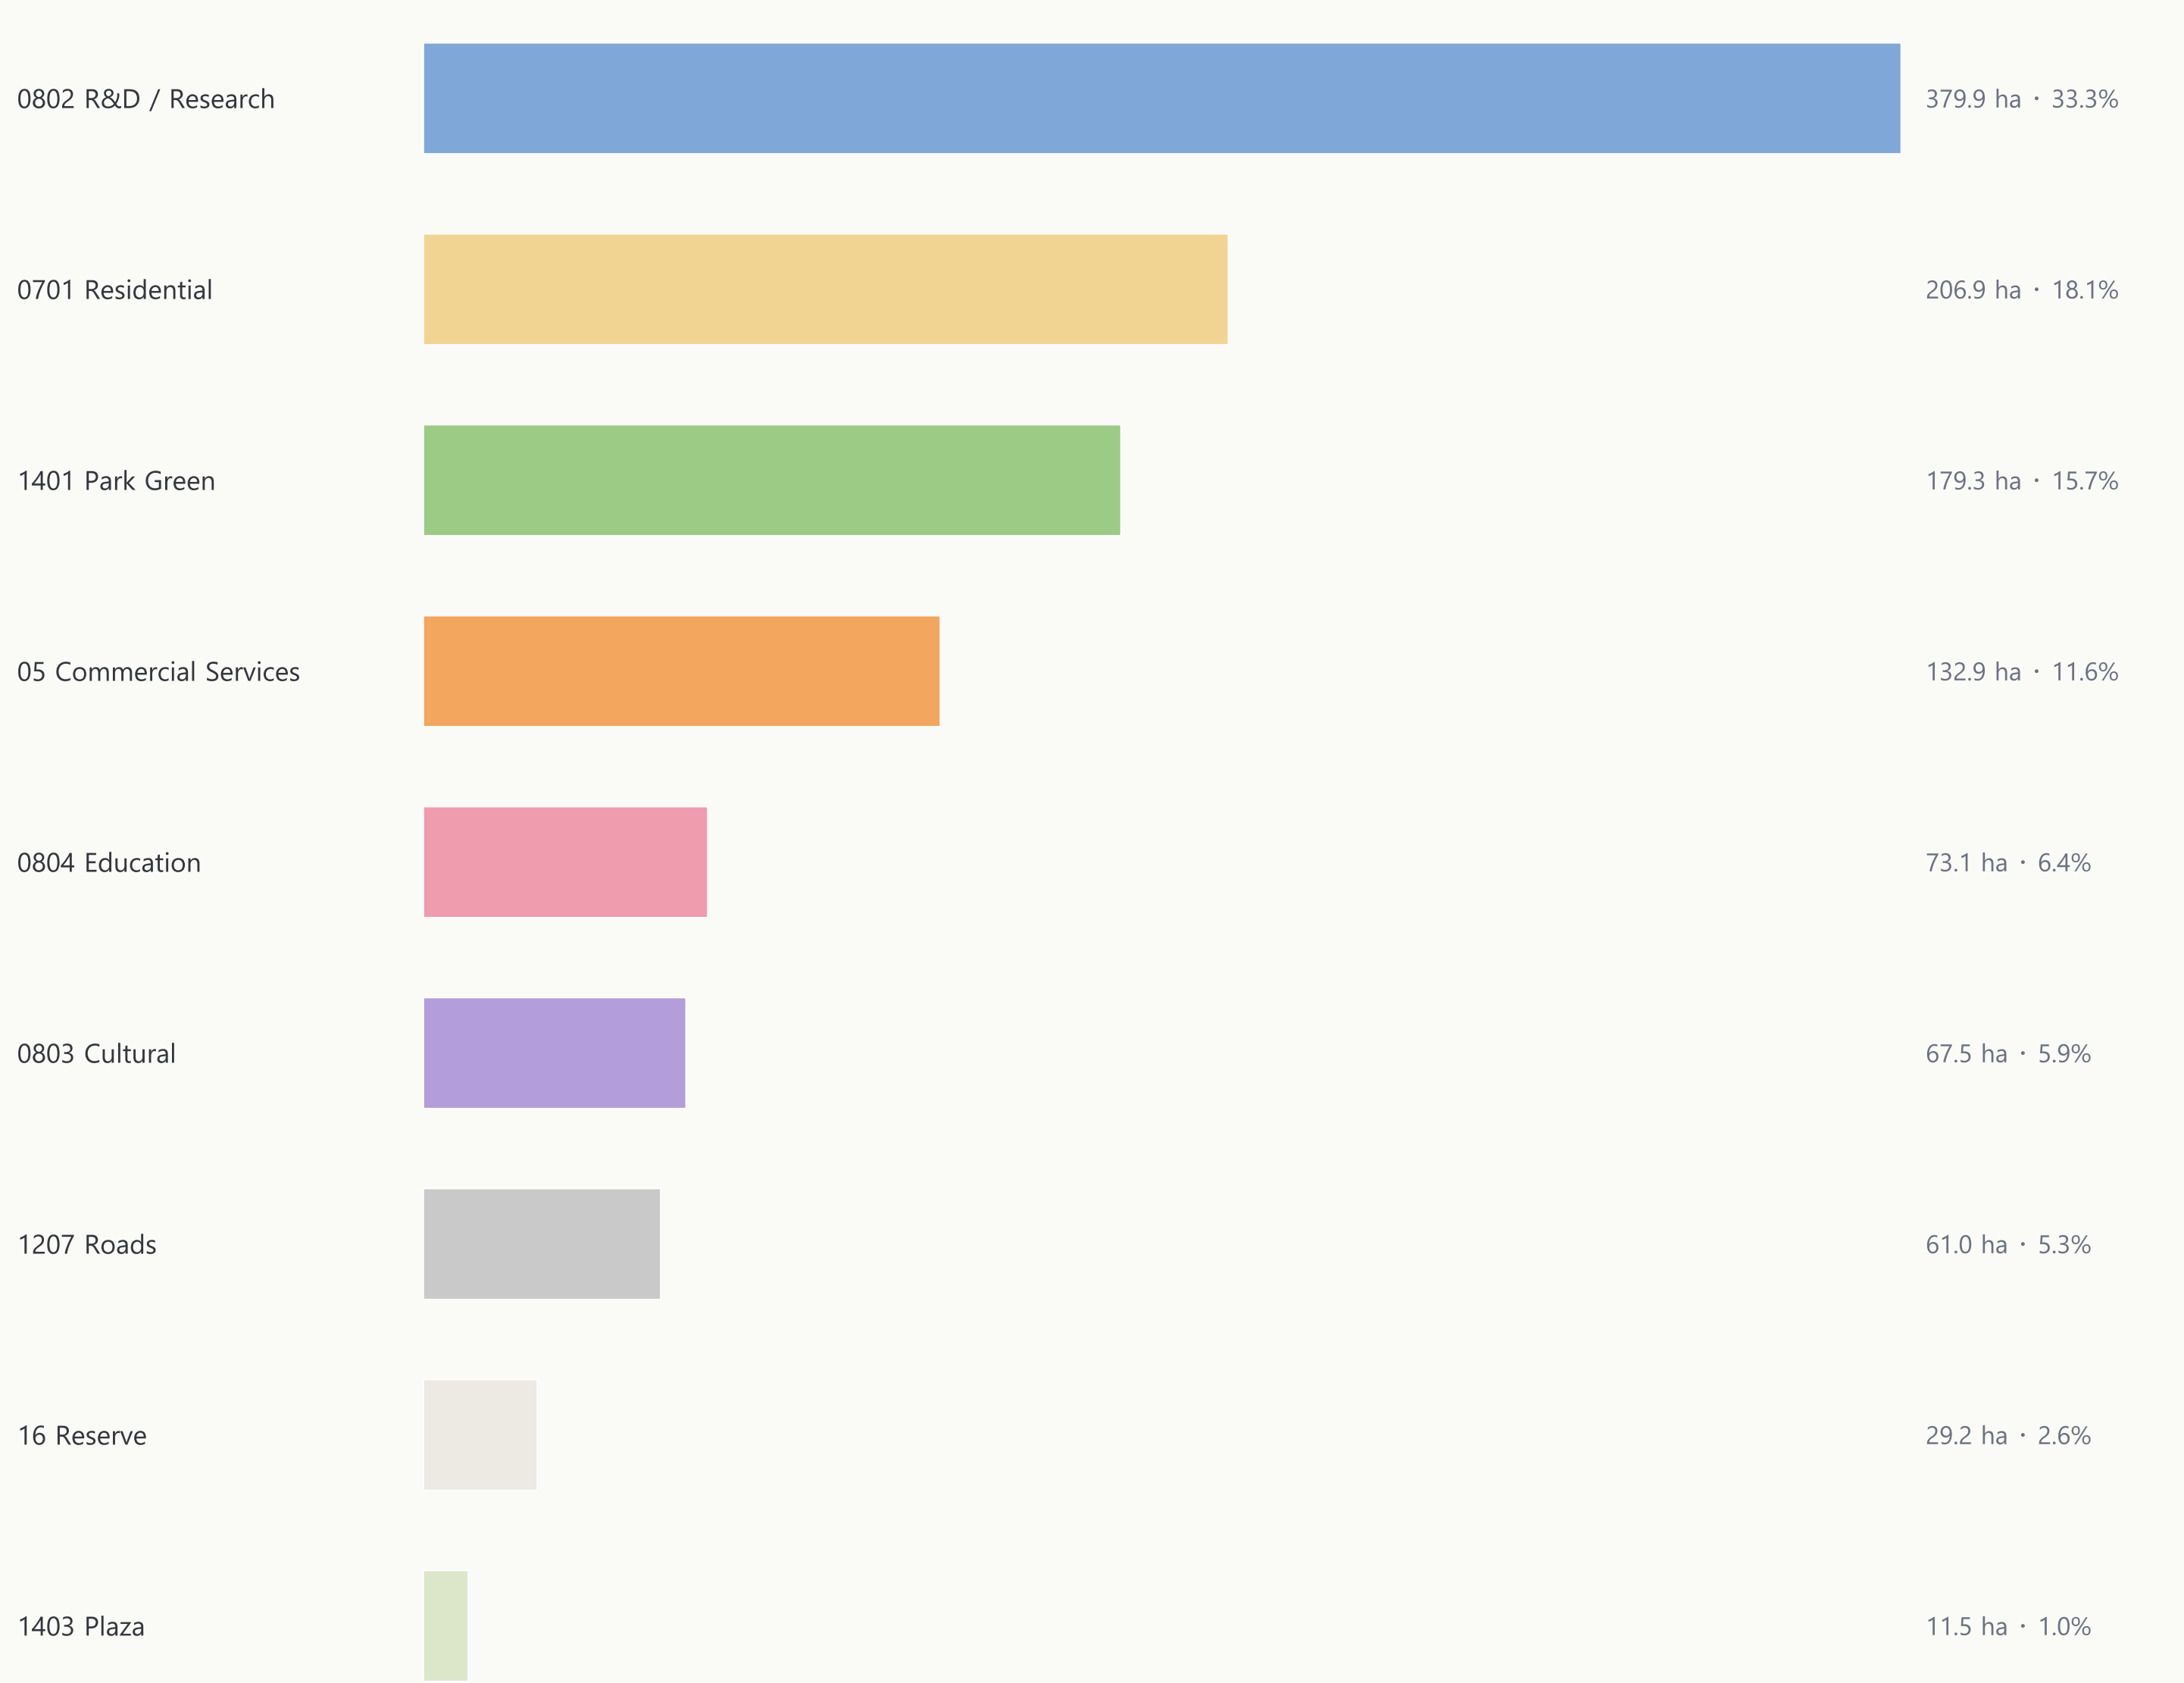

Boundaries and key areas are currently provisional: site recalculation 11,412,825.386 m² (in-package consistency only); the provisional Dazhongsi centroid is ~2.26 km from the real station (Issue #1029); the package is recomputed once official boundaries arrive.

Board B2 · Land Use & Building Capacity

60 shared-boundary land-use units fully cover the provisional site (coverage 100%, no gaps, no overlaps) · 189 conceptual building footprints validate spatial capacity

Land-use structure (ha and share)

BUILDING CAPACITY

189

conceptual building units

1,860,807.668 m²

total footprint area

16.3045%

building density (footprint / site)

Control metrics (unknown): FAR, building height, setbacks —
official regulatory conditions missing, reason registered;
footprints only validate capacity and industry-space supply
logic, not real buildings.

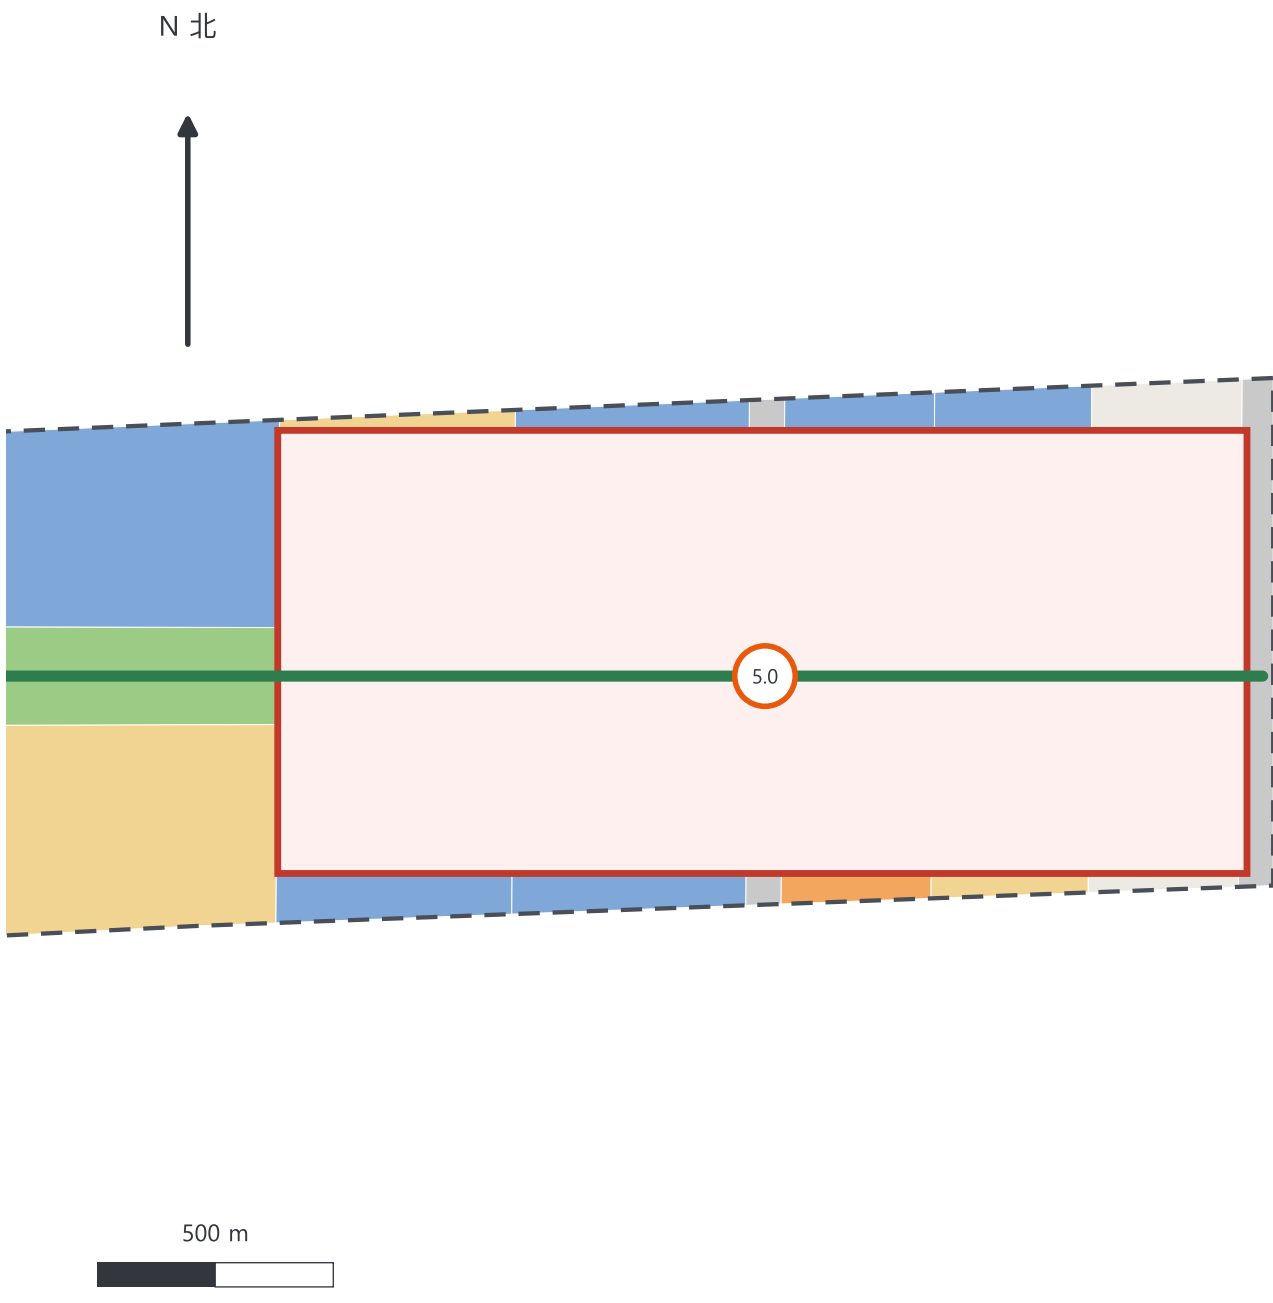

INDEX GRID: SUPPLY BY STATE

0802 科研	validation & origination · long-term stable supply
05 商业	experience & consumption · stable green-light supply
0701 居住	living · no-AI equivalent baseline
0804 教育	talent · campus-park-city stitching
1401 绿地	axis public interface · open all hours
16 留白	elastic carriers · no preset function

Rules: yellow-light time-boxed supply (evaluated on expiry) ·
green-light stable supply (not interrupted by operator
changes) · red-light reclaimable supply (removed when
retired, carriers return to reallocation).

Board B3 · Three Key Areas

The three key areas are the three segments of the Zero-Indexed Axis: Interface (Dazhongsi Km 1.0) · Origin (Wudaokou Km 3.0) · Acceleration (Zhongzhiyuan Km 5.0); all share the Five-Question Gate.

Zhongzhiyuan AI Acceleration Area

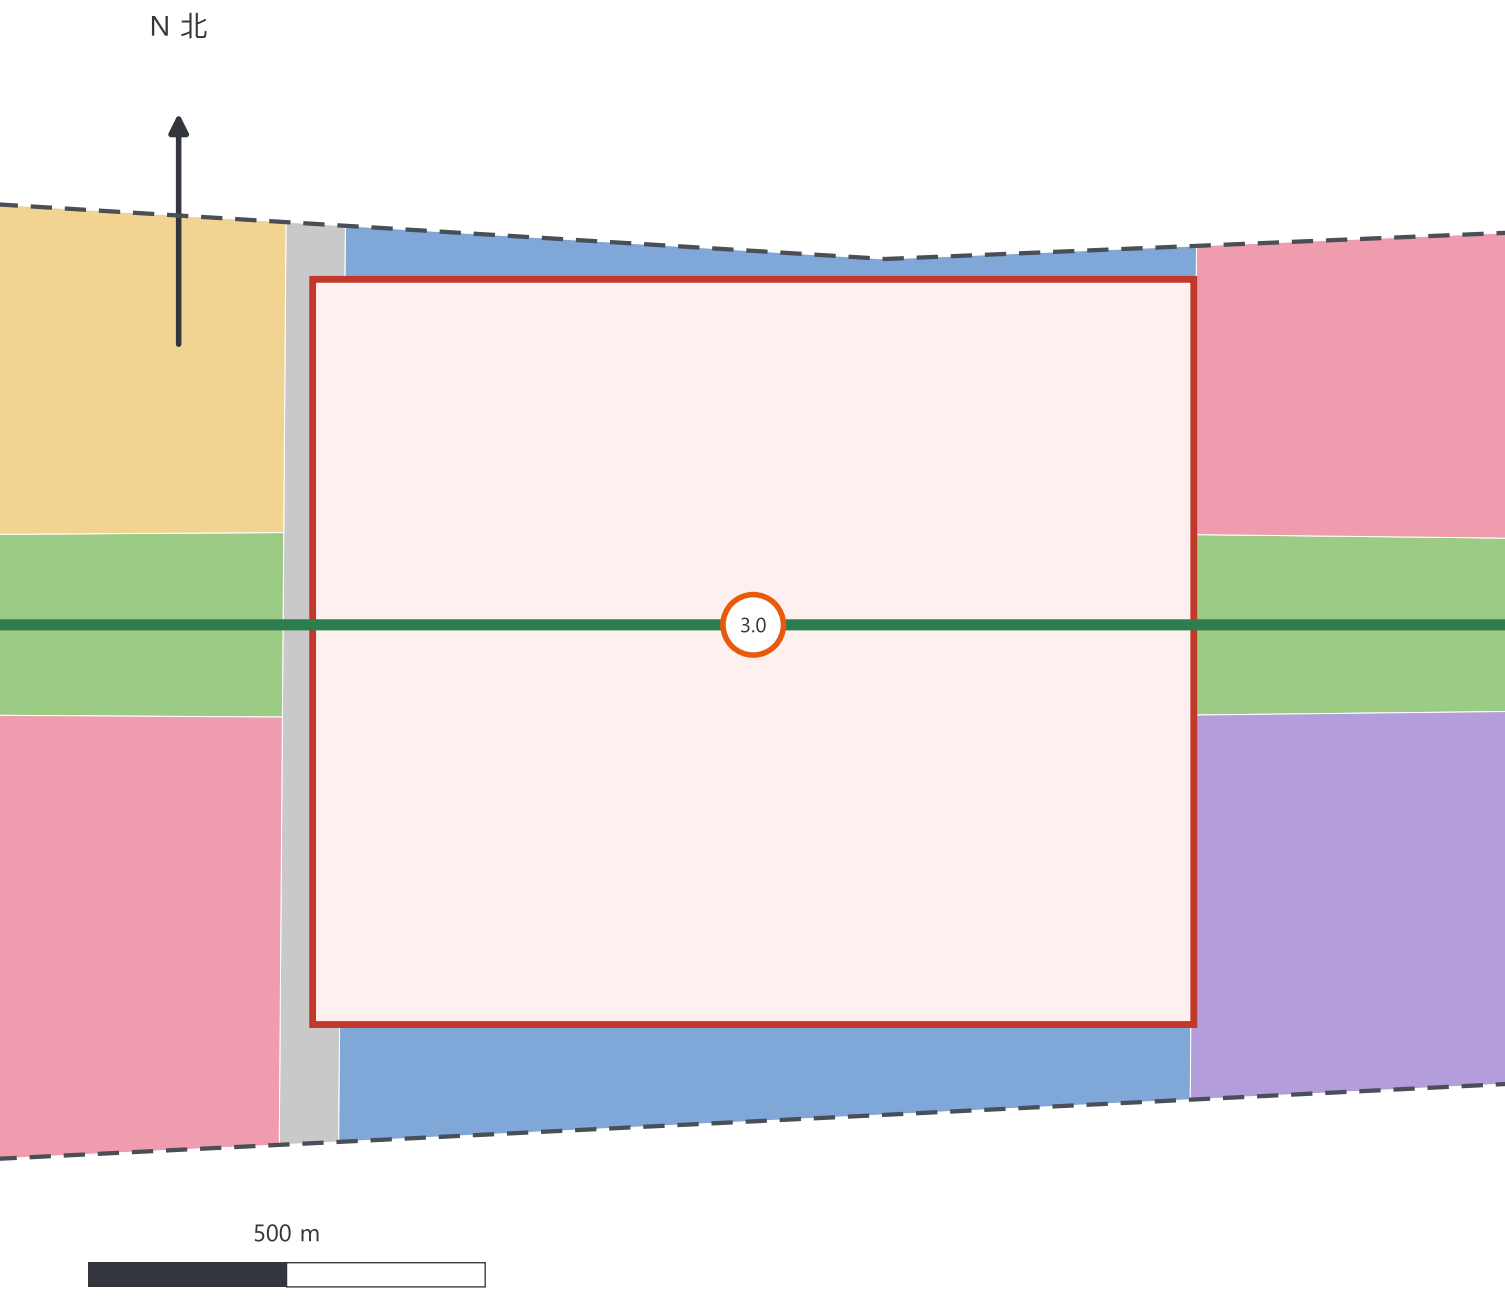

Km 5.0 · 192.9 ha · 1,929,202 m²

AI full-stack autonomous innovation acceleration area

空间结构：Qinghe frontage — acceleration axis — research units

SPATIAL MOVES

- Low-carbon corridor along the Qinghe (SC-06)
- Acceleration Plaza PUBLIC-006: virtual → lab → block pilots
- Research land (LU-044) + commercial services (LU-046)

Beijing AI Origin Community

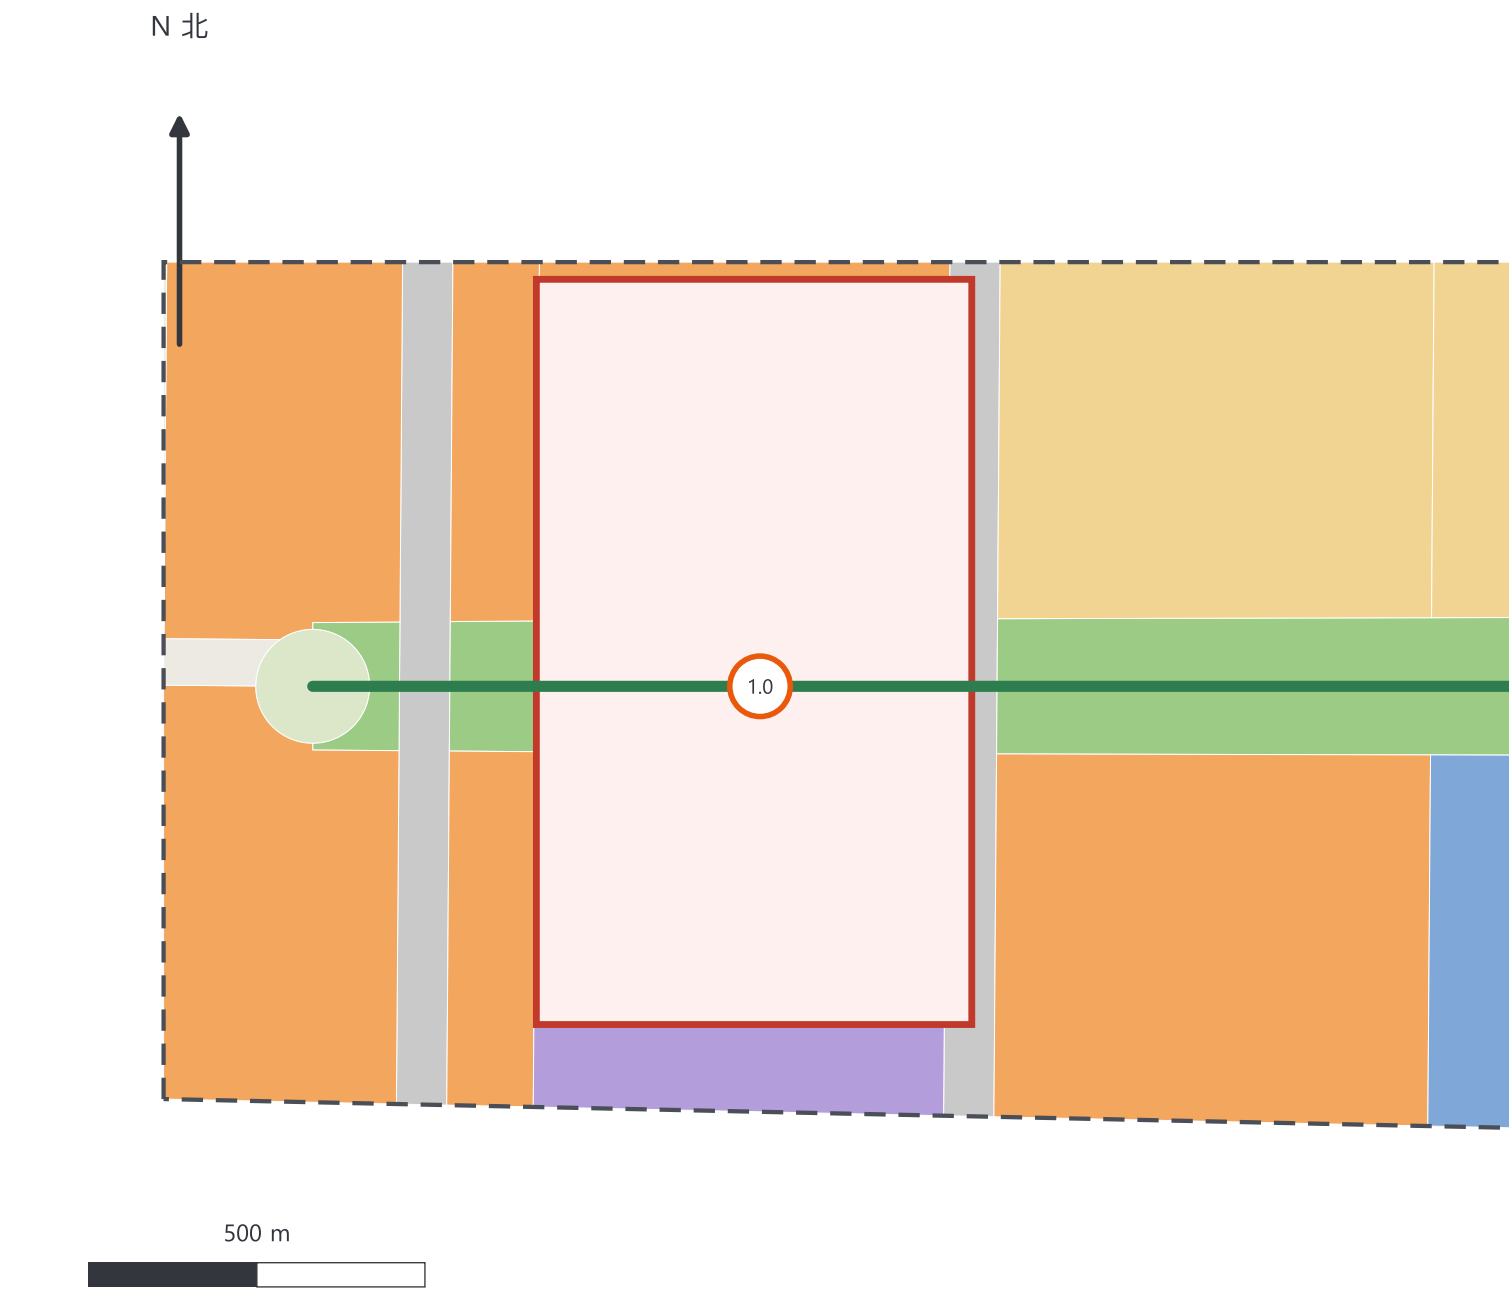

Km 3.0 · 104.3 ha · 1,043,237 m²

World-class AI innovation ecosystem · open-source community

空间结构：Campus—park stitching axis — Origin Plaza — living patches

SPATIAL MOVES

- Origin Plaza PUBLIC-004: releases · contributions · Zero Hour
- Campus—park axis: incubation + living (LU-028 · LU-013)
- Commercialization street: open source first

Dazhongsi AI Industry Cluster

Km 1.0 · 72.0 ha · 720,454 m²

Native-AI experience area · station-city integrated interface

空间结构：Station-front four quadrants — cultural experience patch — commercial service ring

SPATIAL MOVES

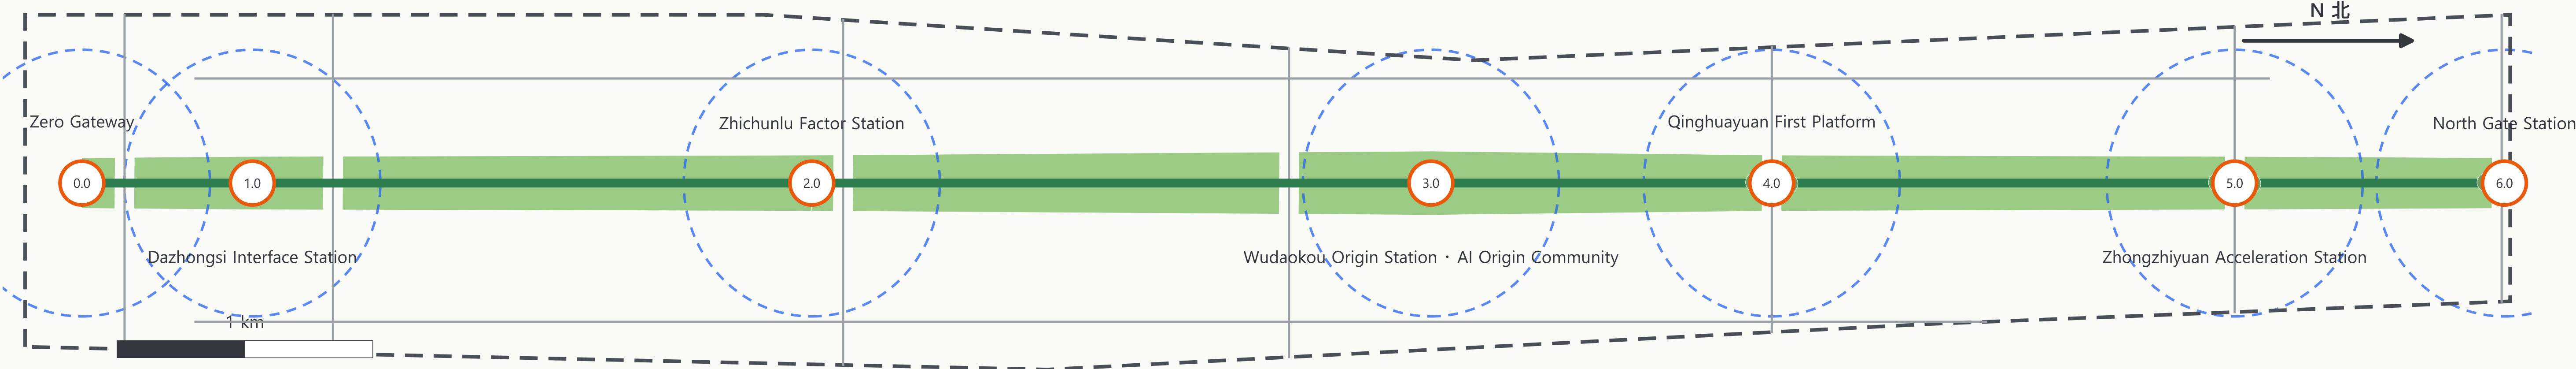

- Four-quadrant walkability · Interface Plaza PUBLIC-002
- Cultural patch LU-020: native-AI content & assets
- Commercial ring LU-018 + station-front green belt

Provisional polygon recalculation: Zhongzhiyuan 1,929,201.877 m² · AI Origin 1,043,236.909 m² · Dazhongsi 720,454.219 m², totalling 3,692,893.005 m² — consistent with the announced ~192.1 / 104.3 / 72.0 ha; recomputed from official polygons when released.

Board B4 · Blue-Green, Mobility & Implementation Metrics

The Zero-Indexed Axis green belt is the backbone: east-west stitching, north-south connection; 10-minute service circles at nodes; all roads are directional strategies pending official data.

32,780.221 m Road length	9,471.589 m Greenway length	15.7112% Green ratio	1.0070% Public-space ratio
2,890,732.911 m² Near-term (Km 3-4 core)	4,745,599.743 m² Mid-term (Dazhongsi-Zhichunlu)	1,515,886.865 m² Far-term (gateway segments)	12 · 3 AI scenarios · test/validation
5 · 4 · 7 Personas / landmarks / cases	3,692,893.005 m² Key areas total	11,412,825.386 m² Site area	189 · 16.30% Buildings · density

Renewal projects (8) and phasing

ID	Project	Type	Phase
ZM-01	Zero-Index Wayfinding & Km-Post System	Public space / brand	Near-term
ZM-02	Origin—Qinghuayuan core segment stitch (Km 3-4)	Urban renewal / slow traffic	Near-term
ZM-03	Zhongzhiyuan Qinghe low-carbon frontage	Blue-green / industry display	Near-term
ZM-04	Dazhongsi four-quadrant pedestrian connectivity	Rail integration / slow traffic	Mid-term
ZM-05	Zhichunlu data-factor reception hall	Industry service / renewal	Mid-term
ZM-06	Seven node plazas implementation	Public space / brand	Mid-term
ZM-07	Milestone Grove & Contribution Wall	Recognition / public art	Far-term
ZM-08	No-AI equivalent service point network	Public service / new infrastructure	Far-term

Far-term · Origin—Qinghuayuan core segment (Km 3-4)

Mid-term · Dazhongsi—Zhichunlu segment

Far-term · north-south gateway

2,890,733 m² 31.6%

4,745,600 m² 51.9%

1,515,887 m² 16.6%

Method: time-boxed pilot, annual review, expand or roll back; green-light opens with appeals, yellow-light carries terms and human review, red-light is remediated or retired (devices removable, data rollback).

EVIDENCE CHAIN · EPSG:4548 recomputable

All spatial metrics are recalculated from the package geometry in EPSG:4548 to the same decimal place; the three matrices and self-checks are formal evidence; control metrics (FAR / height / setbacks) remain unknown pending official regulatory plans.
