

Existing conditions, provisional geometry and data-gap controls

JING-ZHANG SPARK LINE · EVIDENCE READINESS MAP

DATA BEFORE LINES

Existing Conditions and Data-Gap Diagnosis

Known facts, provisional constraints, locked data gaps and deepening triggers are managed separately. No inferred line is presented as an official boundary or statutory control.

01 Known Inputs
PUBLIC / CLEARED FACTS

- The announcement defines three scope levels, three key-area tasks and announced areas.
- Public facts cover the Jing-Zhang Heritage Park, Qinghuayuan Station and nearby rail stations.
- 2025 and 2026-H1 public statistics for Beijing and Haidian support contextual claims.

EVIDENCE STATUS / 证据状态

02 Provisional Constraints
PROVISIONAL GEOMETRY

- The overall boundary and three key-area polygons derive from repository provisional boundaries.
- They support concept generation, layer organization, ratio recalculation and design discussion only.
- official_boundary=false; precision is provisional_rough.

EVIDENCE STATUS / 证据状态

03 Locked Data Gaps
DATA REQUIRED FOR DEEPENING

- Statutory controls, road redlines, river blue lines and heritage protection limits.
- Land/building ownership and existing floors, heights, age, use and condition.
- Utility capacity, rail interfaces, fire/flood safety and geotechnical conditions.

EVIDENCE STATUS / 证据状态

04 Deepening Triggers
RECALCULATION / REVIEW

- Official polygons: rebuild topology and recalculate areas in EPSG:4548.
- Existing-condition and ownership data: verify retain, renovate, demolish and new-build classes.
- Regulatory and specialist files: verify intensity, height, setback, transport and utility capacity.

EVIDENCE STATUS / 证据状态

DESIGN-DEPTH BOUNDARY

Here, 'complete' means a complete submission-stage response, gap diagnosis and deepening method. It does not mean statutory planning controls or engineering design are complete.

CONCEPT DESIGN / OFFICIAL REVIEW PENDING

JING-ZHANG SPARK LINE · Overall Site Overview / 京张·星火带总体设计范围总览

The map illustrates the overall site overview for the JING-ZHANG SPARK LINE. It features a vertical strip representing the site, with various land use zones color-coded according to the legend. The legend includes: 公园绿地 Park&Green (dark green), 科研用地 R&D (dark blue), 文化用地 Culture (purple), 教育用地 Education (blue), 商业服务业 Commercial (orange), 城镇住宅 Residential (yellow), 社区服务 Local Service (brown), 防护/生态绿带 Green Buffer (light green), and 留白用地 Reserve (light grey). Three key areas are highlighted with orange boxes and labels: 北·众智园 FOUNDRY 算力/模型·进发 (top), 中·AI原点社区 SEED 人才/开源·蕴育 (middle), and 南·大钟寺 MARKET 产业/场景·燎原 (bottom). A dashed line indicates the provisional boundary. At the bottom right, a box provides site statistics: 基地面积 Site 11.41 km², 绿地率 Green 21.7%, 公共空间 Public 3.7%, 建筑基底 Buildings 191 千m², and 重点区 Key Areas 3.

Provisional boundary (dashed), concept-level design intent only; Spark-Line spine and three zones

DESIGN JUDGMENT Existing conditions, provisional geometry and data-gap controls	EVIDENCE STATUS Local GeoJSON, metrics and matrices remain authoritative; the board is an explanatory layer.	LOCKED GAPS Official boundaries, controls, ownership, existing buildings and engineering conditions remain pending.	DEEPENING TRIGGER Recalculate first, then conduct parcel/building and specialist review before any implementation claim.

3

Three scope levels, land-use structure, mobility and blue-green network

JING-ZHANG SPARK LINE -- Spark-Line Spine & AI Full-Stack Land-Use Structure

Land-use partition covers the full submitted boundary without gaps or overlaps (EPSG:4548 recalculated). Provisional boundary only.

JING-ZHANG SPARK LINE -- Mobility & Blue-Green Public Space Network

基地面积 Site 11.41 km² 绿地率 Green 21.7% 公共空间 Public 3.7%
建筑基底 Buildings 191 千m² 重点区 Key Areas 3

Concept-level mobility and blue-green network; slow-mobility breaks and crossing nodes need official road/rail verification.

DESIGN JUDGMENT

Three scope levels, land-use structure, mobility and blue-green network

EVIDENCE STATUS

Local GeoJSON, metrics and matrices remain authoritative; the board is an explanatory layer.

LOCKED GAPS

Official boundaries, controls, ownership, existing buildings and engineering conditions remain pending.

DEEPENING TRIGGER

Recalculate first, then conduct parcel/building and specialist review before any implementation claim.

Key-area responses, AI-era evidence and recalculable indicators
