

Site overview - three nodes - land-use structure (concept, provisional)

Overall Design Overview (provisional geometry • concept)

Overall design area ~11.4 km^2 (announcement) - one corridor, two belts, three nodes (concept)

Three Key Areas - Concept Locations and Design Tasks

One belt, three nodes - long-term operation loop (concept, provisional)

Key areas are concept envelopes from announcement clues; final siting follows organizer boundaries and field survey.

Conceptual Land-Use Structure (Single Caliber)

Provisional concept boundary • Not an official redline • Recalculate after official data

Class names follow the 2023 Land-Use & Sea Classification Guide; shares sum to 100%, single-caliber recompute after official data is published; not current or statutory.

Mobility - metrics - ecosystem - brand identity (concept, provisional)

Slow-Traffic & Blue-Green Network (concept, with AI scene links)

Provisional concept boundary • Not an official redline • Recalculate after official data

L1-L3 nodes connect through slow mobility and blue-green interfaces - scene cards enter human review

Core Metric Evidence (KPI ranges + formal metrics + counts on separate charts)

Provisional concept boundary • Not an official redline • Recalculate after official data

Recomputed from package geometry; concept values, recalculate after official data.

All displayed values are reduced-precision concept figures (participant temporary model data, not authoritative); ratios and counts on separate axes; not a numerical comparison.

AI Innovation Ecosystem Atlas (Elements, Flows, Open Interfaces)

Provisional concept boundary • Not an official redline • Recalculate after official data

Brand Identity Concept: VIS JZ Visual Identity Ring

Provisional concept boundary • Not an official redline • Recalculate after official data
