

Site Overview

Three scopes / One Spine / provisional geometry

01 / OVERVIEW

JINGZHANG NEON SPINE

Overall and key-area boundaries are provisional, not official redlines

01 Trust Foundry Garden

Safety, standards, energy and physical-AI validation

02 Station Zero Open Commons

Open release, translation and everyday talent life

03 Agent Bazaar

Human-confirmed applications, exchange and creation

Two Ledgers

Evidence Ledger: sources, geometry, metrics, assumptions. Civic AI Passport: purpose, minimum data, steward, human review, appeal, exit.

Land Use and Spatial Stack

Complete partition / five uses / two ledgers

02 / LAND USE

JINGZHANG NEON SPINE

VISIBLE SPATIAL STACK

L4 Civic governance

L3 Scenarios and services

L2 Buildings and open ground

L1 Mobility, blue-green and public realm

L0 Evidence, constraints and assumptions

Trust R&D
Rail Commons
Open Culture
Industry Services
Community Support

Three Key Areas

Trust Foundry / Station Zero / Agent Bazaar

03 / KEY AREAS

JINGZHANG NEON SPINE

01 Trust Foundry Garden

Safety, standards, physical AI, edge compute Protocol Beacon + four-gate test yards

02 Station Zero Open Commons

Open source, university translation, talent life Open ground + translation clinic

03 Agent Bazaar

Agents, devices, content and small business Human-first link + provenance stage

CAUTION

provisional polygons ≠ parcels / roads / ownership

CIVIC AI PASSPORT

Purpose / minimum data / steward / human review / appeal / alternative / sunset

BOUNDARY DISCIPLINE

All polygons remain provisional and non-statutory.

Core figures derive from package data

Mobility and Blue-Green Commons

Human-first links / continuous commons / reversible tests

04 / MOBILITY

JINGZHANG NEON SPINE

01 Walking spine

Continuous, no-app, staff-guided

02 Parallel cycle line

Slow at nodes and separate from walking

03 Blue-green commons

Rest, shade, rain, removable tests

04 Civic protocol ports

Steward, human stop, appeal, sunset

GOVERNANCE FLOOR

Robots never default to accessible paths; navigation is opt-in; environmental data does not track people; failure returns to staffed or offline service.

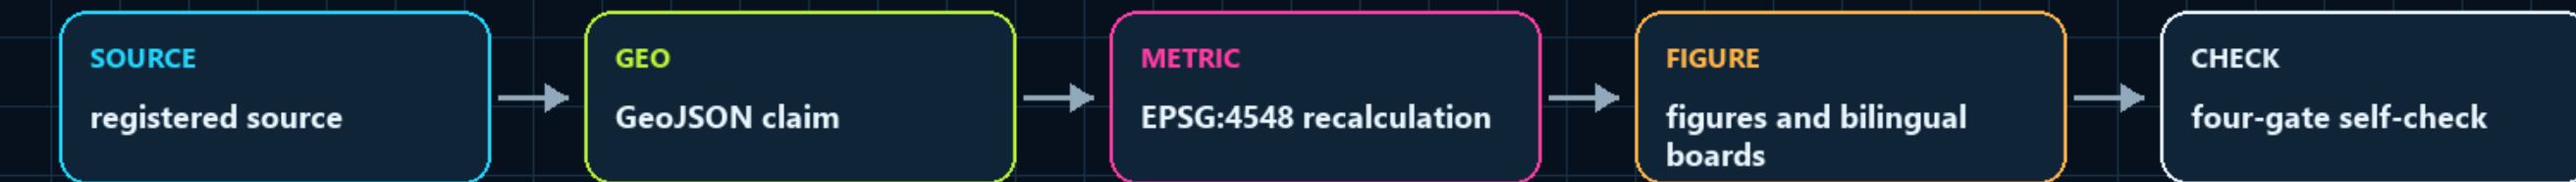

Core Metrics and Evidence Chain

Recalculable / contestable / updateable

05 / EVIDENCE

JINGZHANG NEON SPINE

SITE 11.413 km² provisional overall area	GREEN 15.03% designed green ratio	PUBLIC 2.99% public-space ratio
PORTS 12 / 4 scenarios / industry tests	PEOPLE 6 / 4 personas / civic landmarks	PHASE 8 / 3 projects / concept phases

BOUNDARY DISCIPLINE

Recalculate the whole package when official polygons arrive; FAR, height, density and utility capacity remain unknown.

T1 Multi-Operator Robot Street

No default face recognition; physical stop, safety marshal, yield and takeover tests

T2 Public Model Assurance Yard

Public, cleared or synthetic data only; publish red-team status; humans make high-risk decisions

T3 Edge Compute Energy Sandbox

Device and energy data only; electrical review; measure energy, latency and stability

T4 Multi-Agent Urban Simulation Lab

Synthetic or public data first; record dissent and human choice; model output is not a planning decision

S5 Open-Source Translation Clinic

Human licence and IP review; reusable code, model cards and pilot advice

S6 Accessible Co-Navigation

Opt-in and minimum retention; tactile, paper and staffed alternatives

S7 Century Memory Companion

Cleared archives only; label generated content, cite items and use expert review

S8 Xiaoyuehe Climate-Comfort Route

Non-personal environmental data; shade and rest advice without tracking people

S9 Civic Service Copilot

Link official sources; keep paper and staffed routes; never replace administrative decisions

S10 Dazhongsi Agent Bazaar

Merchants control permissions; humans confirm payments, contracts and publication

S11 Creator Provenance Stage

Show licence, author, AI method and editorial responsibility; appeal and takedown path

S12 Night Signal Commons

Low glare, timed operation, non-identifying counts and human patrol first

01 VERIFY & LIGHT UP

0-12 months: evidence baseline, Civic AI Charter, two ledgers, independent review and four removable tests.

02 CONNECT & CONVERT

1-3 years: connect active/public-space networks and adapt district services after professional verification.

03 SCALE & STEWARD

3-5 years: scale only publicly evaluated scenarios and deepen four civic landmarks.
