

JINGZHANG OPEN WAY

THE OPEN GROUND

BEFORE BRINGING AI OUT OF THE SHOWROOM,
OPEN THE CIVIC GROUND BENEATH IT.

ONE CIVIC SPINE • THREE OPEN GROUNDS • TWO WINGS • 100-DAY EVIDENCE ROUTE

I • REVIEWABLE CONCEPT • IMPLEMENTATION BLOCKED X1-X6

ONE CIVIC PROMISE, THREE SPATIAL MOVES

AI augments; people can take over; the same core civic service continues when AI is off.

OPEN TESTBED

Zhongzhiyuan: garden-bounded test cells expose protocols, manual stop and negative results first.
Spatial moves: garden edge, bounded test cells, shared assurance room and negative-result gallery.
Evidence sequence: N evidence baseline → A bounded test cell → B distributed nodes only if relevant gates pass

TRANSLATION COMMONS

AI Origin: quiet courts, shared explanation and dual-channel service translate research into daily life.
Spatial moves: quiet courts, explanation room, accessible co-design tables and dual-channel service.
Evidence sequence: N existing-service and burden baseline → B quiet shared interface → A dual-channel service only if relevant gates pass

URBAN GATEWAY

Dazhongsi: arrival, merchant continuity and reversible event interfaces connect innovation to the city.
Spatial moves: arrival help, merchant-continuity interface, human alternative and reversible event kit.
Evidence sequence: N existing fabric and merchant baseline → B continuity-first urban interface → A station-industry interface only if relevant gates pass

NEXT DECISION

Approximately 100 days: authoritative inputs → field and burden baseline → bounded co-test → professional integration → GO/REVISE/STOP. GO only seeks next-stage project-party approval and never auto-implements.

SIX AGENT TASKS: COUNTABLE, LOCATABLE, TRACEABLE

agent.1 • Belt concept, identity and functional coordination

Three positionings: Centennial JingZhang Cultural Belt, Urban AI Life Experience Belt and AI Convergence Innovation Belt. Five functions span full-stack innovation, ecosystem, AI+ scenarios, city vitality and governance. Open bracket = two rails + three nodes + two wings. names=2 · positionings=3 · functions=5 · zones=3 · wings=2 · logo_direction=1. Content projected; external evidence gates remain BLOCKED.

agent.2 • Full-stack AI innovation system and world-class ecosystem

Connect problems, resources, validation, translation, daily life and assurance through five cases and six stages. cases=5 · value_chain_stages=6 · enabling_resources=8. Content projected; external evidence gates remain BLOCKED.

agent.3 • AI-enabled scenarios and an intelligent, vibrant city

Turn AI capability into stoppable public-problem tests through 12 scenarios, four tests and eight personas. scenario_cards=12 · industry_tests=4 · personas=8. Content projected; external evidence gates remain BLOCKED.

agent.4 • AI public space, intelligent-native activity and civic landmarks

Organise open space through four civic-capability landmarks, a contribution ledger and nine reversible components. landmarks=4 · honor_system=1 · components=9. Content projected; external evidence gates remain BLOCKED.

agent.5 • JingZhang, Zhongguancun and new AI culture narrative

Build dual-line wayfinding through connect, maintain, open, translate, care and continue. narrative_layers=3 · spatial_chapters=6 · wayfinding_systems=1 · international_copy_sets=1. Content projected; external evidence gates remain BLOCKED.

agent.6 • Global AI activity system and long-term operation

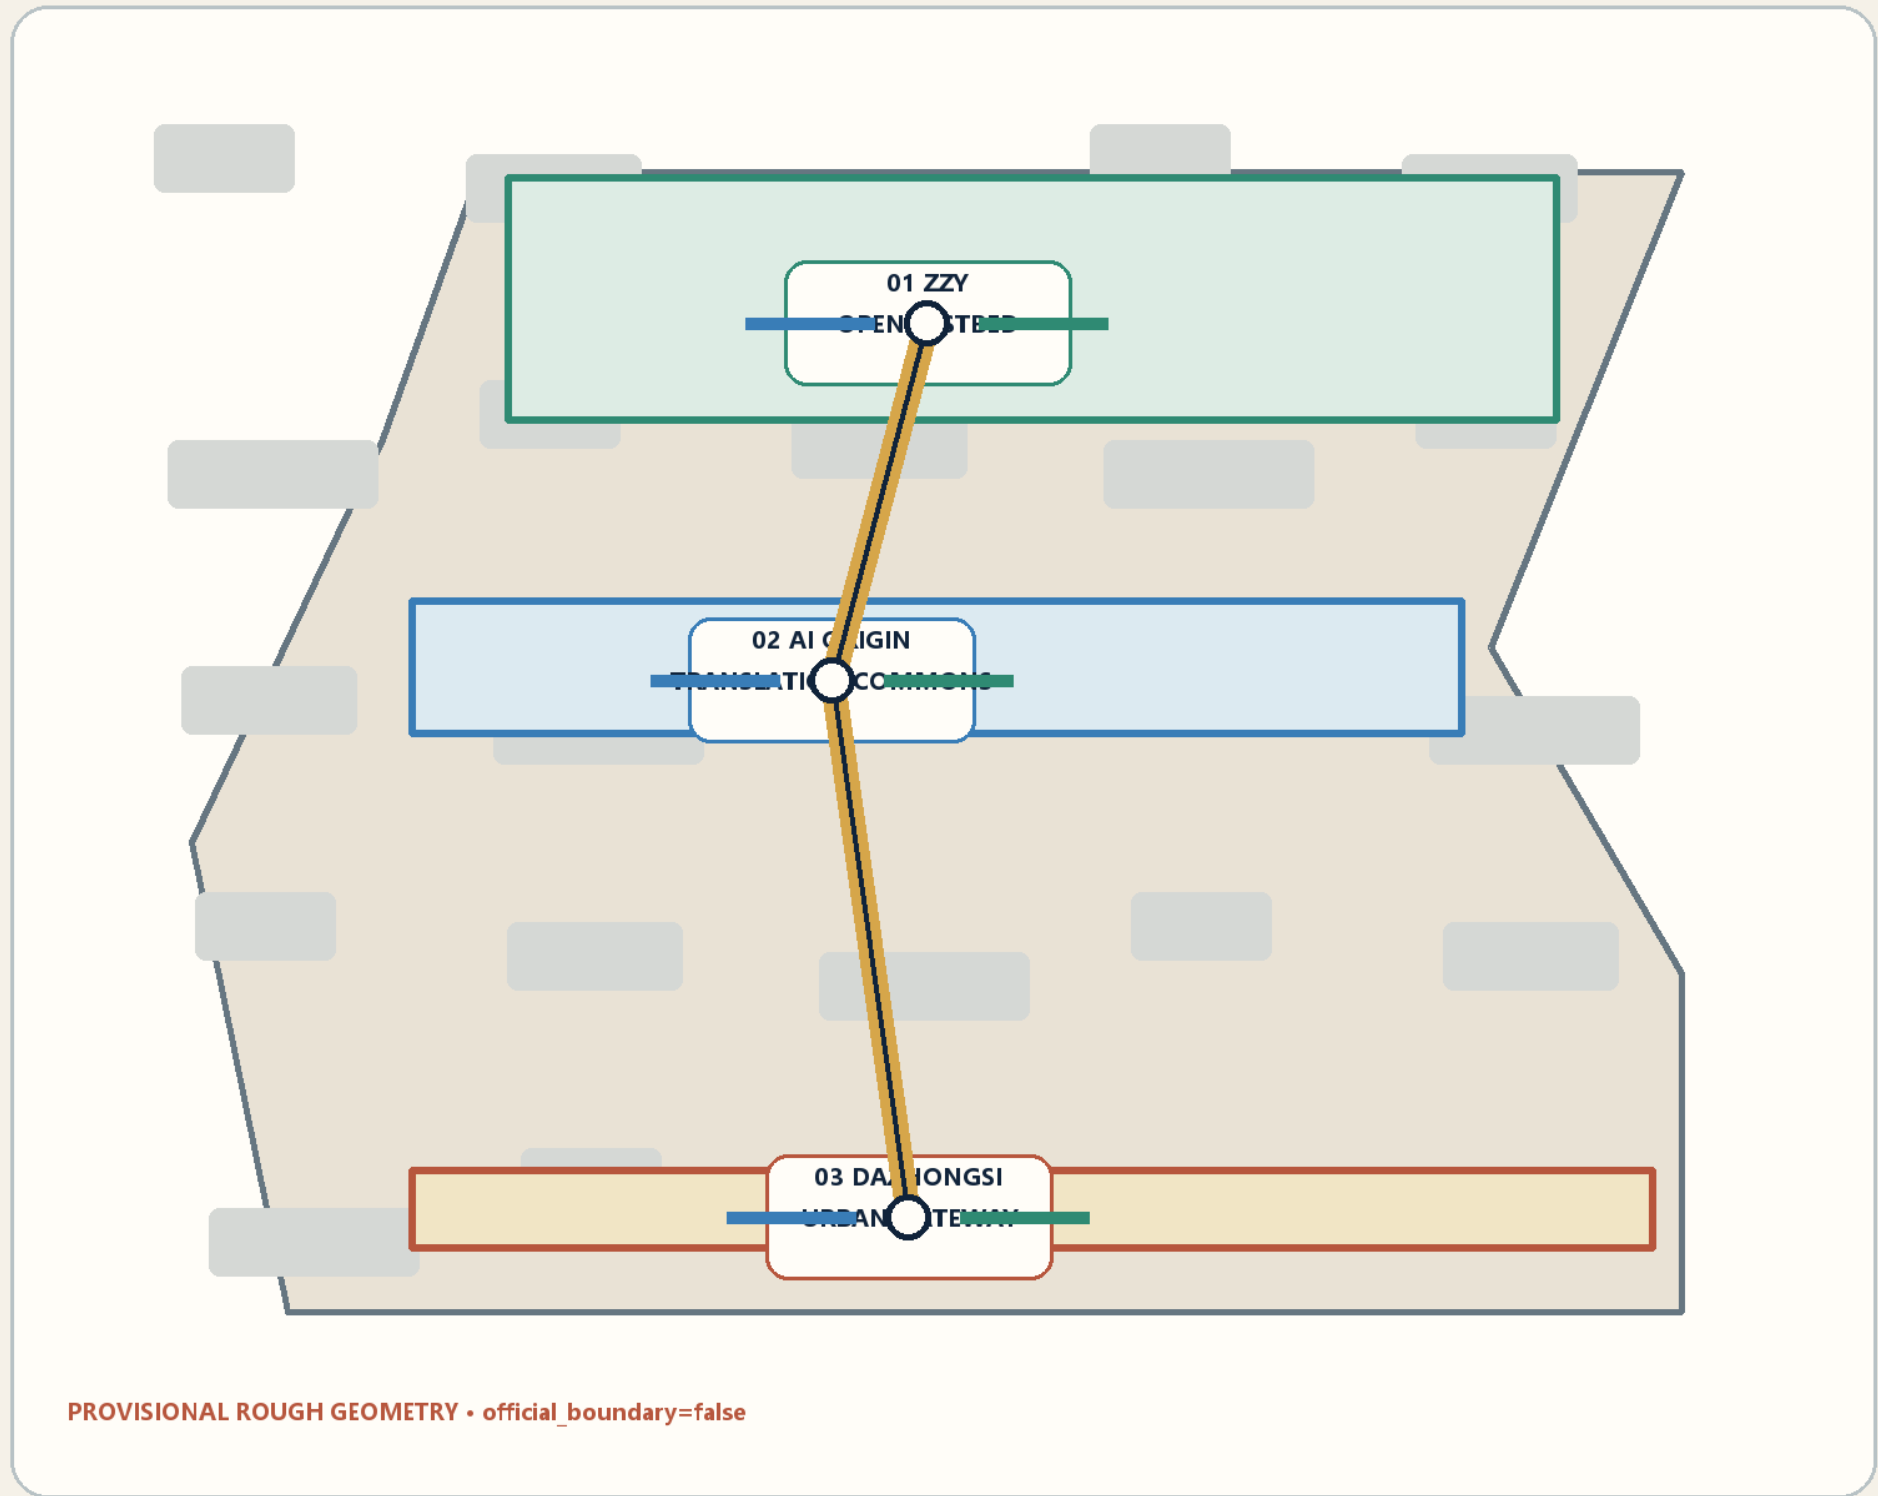

Create long-term learning through four seasons, four opening levels and an accountable conversion path. seasonal_programmes=4 · recurring_cadences=4 · opening_levels=4 · conversion_pathways=1. Content projected; external evidence gates remain BLOCKED.

THE OPEN GROUND: ONE CIVIC SPINE, THREE URBAN PROTOTYPES

MOVE INNOVATION FROM CLOSED SHOWROOMS INTO UNDERSTANDABLE, REVERSIBLE CIVIC LIFE

FIG 01 • 总体 / OVERALL

OFFICIAL TEXT

43.6 km² research 11.4 km² overall design 368.4 ha key areas

THREE OPEN GROUNDS

TEST: make risk visible **TRANSLATE:** make service legible **ADOPT:** make innovation usable

TWO WINGS

ZHONGGUANCUN: knowledge + services
XIAOYUEHE: civic needs + real contexts

NEXT DECISION

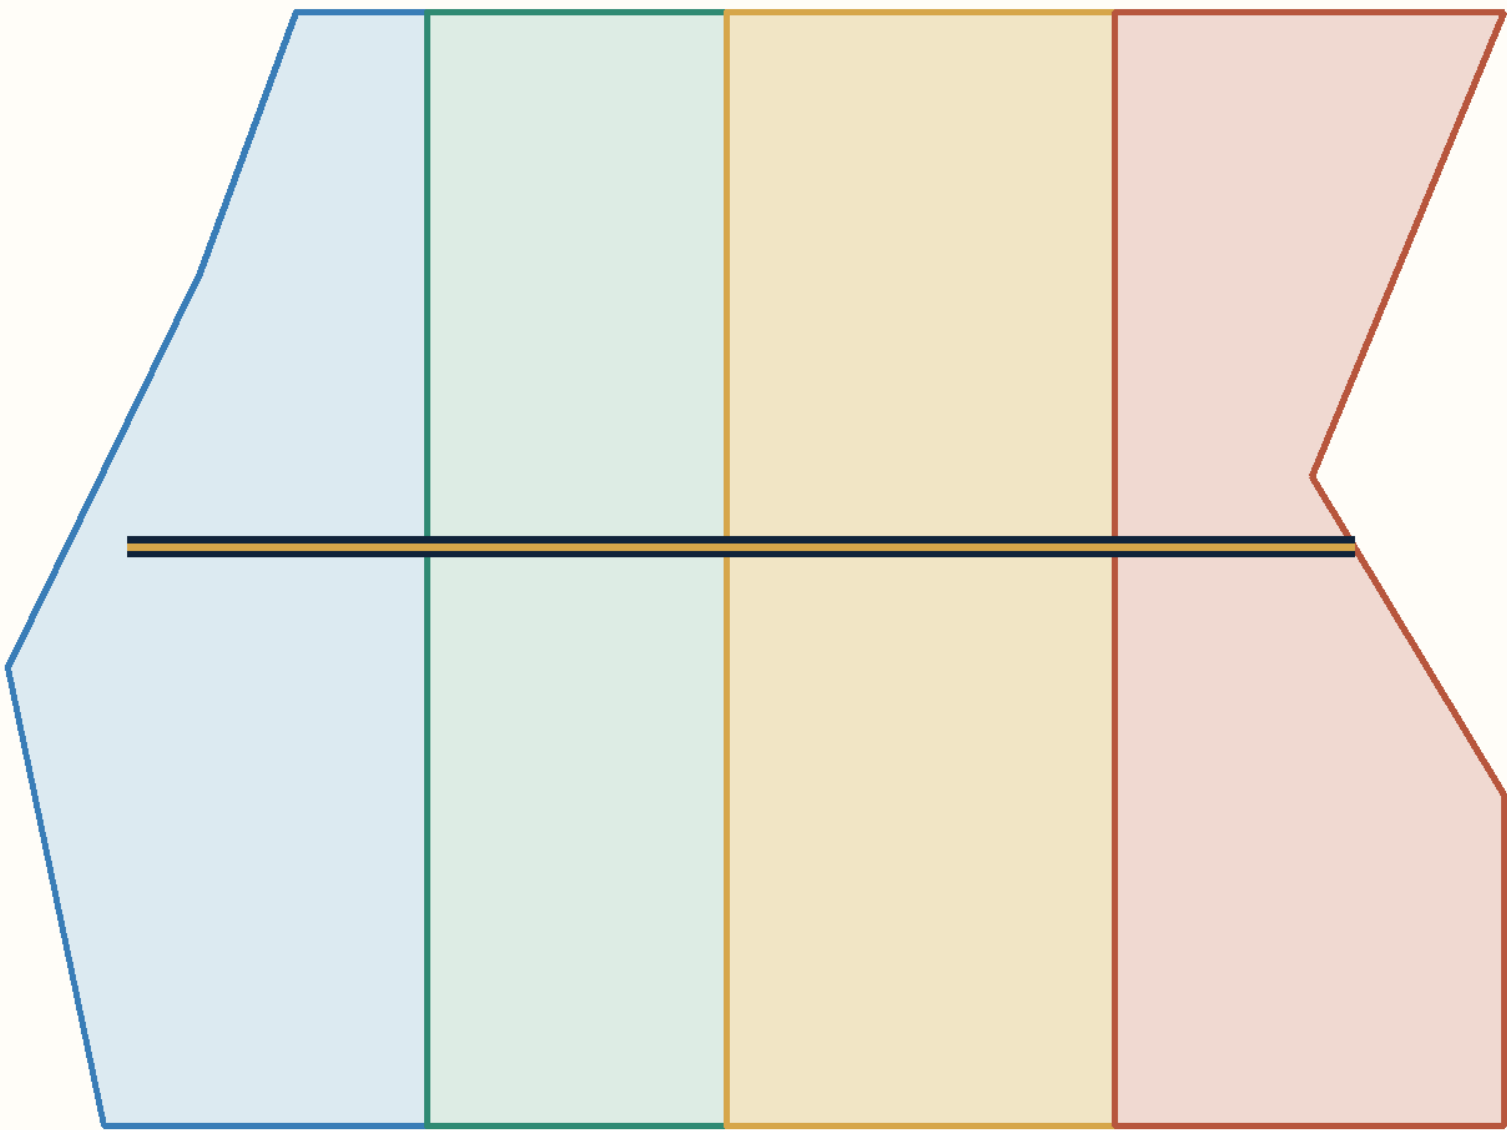

100-day Evidence-to-Decision not construction; no auto-implementation

SPATIAL STRATEGY: A NETWORK OF PUBLIC GROUND, NOT A TECH CORRIDOR

FIG 02 • 空间 / SPATIAL

KEEP DAILY LIFE; INSERT REVERSIBLE INTERFACES; KEEP CIVIC SERVICE CONTINUOUS

■ KNOWLEDGE + R&D
■ INDUSTRY + CIVIC SERVICE

■ PARK + OPEN SPACE
■ EVERYDAY COMMUNITY

1

KEEP

register existing streets, merchants and daily services before design

I • X1/X2/X6

2

STITCH

safe slow-mobility links across roads, rail and scale breaks

I • X1/X2/X6

3

INSERT

reversible service points, co-design tables and test bays

I • X1/X3/X4/X5/X6

4

YIELD

leave room for heritage, blue-green care, quiet space and non-users

I • X1/X2/X6

CONCEPTUAL • NON-OFFICIAL BOUNDARY • EXACT SITING SUBJECT TO X1/X2

JINGZHANG OPEN WAY • R006.2

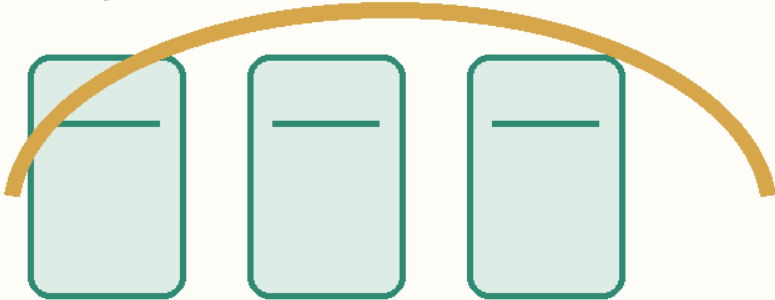

THREE KEY AREAS, THREE FORMS OF OPEN GROUND

ONE CIVIC PROTOCOL, DISTINCT SPATIAL PROTOTYPES; PRIORITISE EVIDENCE, NOT DEPLOYMENT

FIG 03 • 三域 / THREE GROUNDS

01 Open Testbed

Zhongzhiyuan AI Independent-Innovation Acceleration Area

BOUNDED TEST CELLS + GARDEN EDGE

PUBLIC VALUE

Make technical risk and negative results visible before expansion.

EVIDENCE SEQUENCE

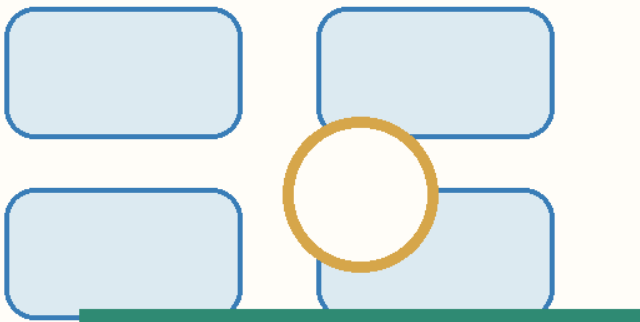

N evidence baseline → A bounded test cell → B distributed nodes only if relevant gates pass

IMPLEMENTATION GATES: X1 / X3 / X4 / X5 / X6

I • exact siting U • official_boundary=false

02 Translation Commons

Beijing AI Origin Community

QUIET COURTS + DUAL-CHANNEL SERVICE

PUBLIC VALUE

Translate research into quiet, optional and maintainable daily services.

EVIDENCE SEQUENCE

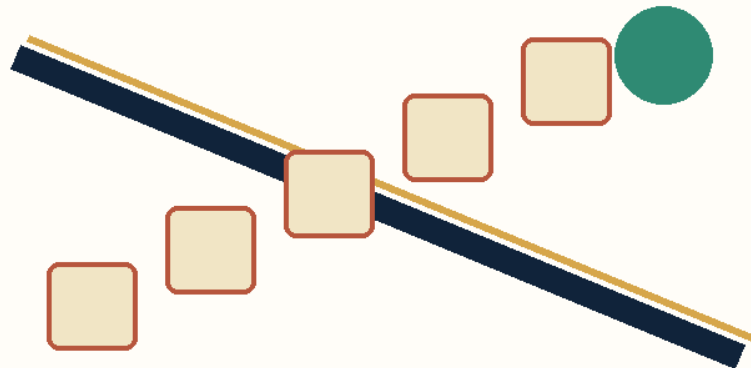

N existing-service and burden baseline → B quiet shared interface → A dual-channel service only if relevant gates pass

IMPLEMENTATION GATES: X1 / X2 / X3 / X4 / X6

I • exact siting U • official_boundary=false

03 Urban Gateway

Dazhongsi AI Industry Cluster

ARRIVAL GATEWAY + MERCHANT CONTINUITY

PUBLIC VALUE

Connect innovation to arrival, commerce and care while protecting non-users.

EVIDENCE SEQUENCE

N existing fabric and merchant baseline → B continuity-first urban interface → A station-industry interface only if relevant gates pass

IMPLEMENTATION GATES: X1 / X2 / X3 / X4 / X5 / X6

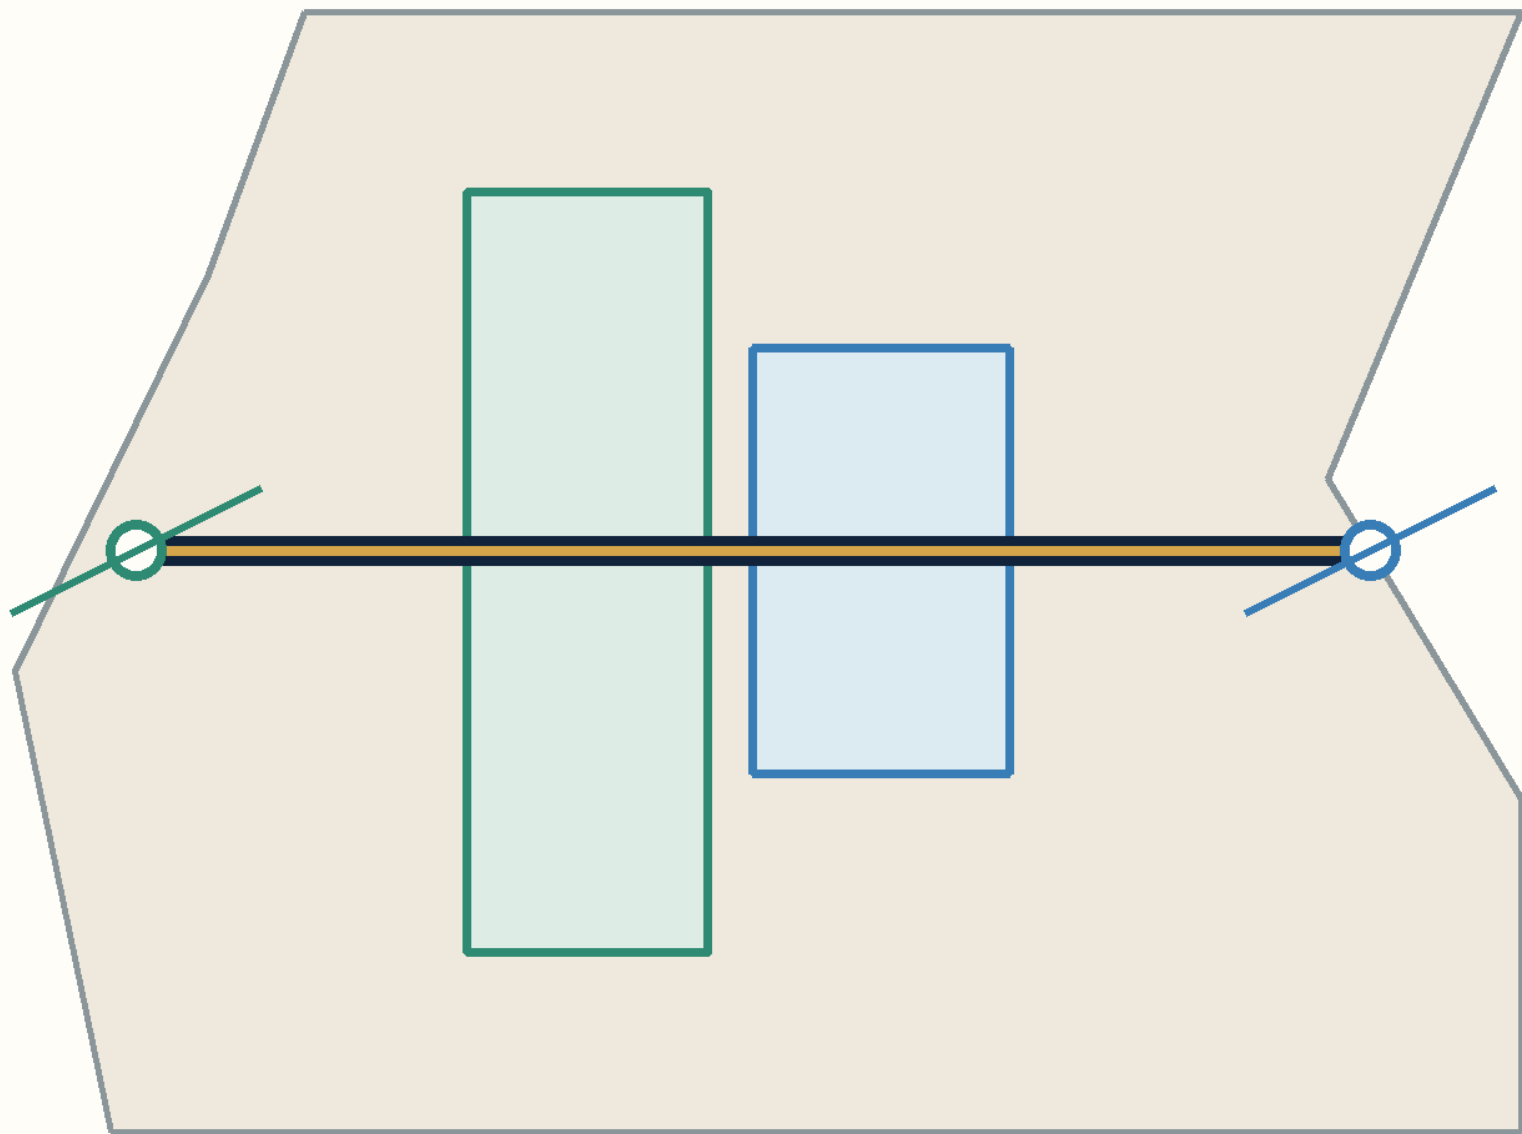

I • exact siting U • official_boundary=false

MOBILITY + BLUE-GREEN: CONTINUOUS CIVIC GROUND BEFORE TECHNOLOGY

FIG 04 • 连续 / CONTINUITY

THREE EQUAL SERVICE PATHS: AI ASSIST, HUMAN SERVICE, AI-OFF BASELINE

CONCEPT ROUTE: REPLACE WITH FIELD CROSSINGS, SLOPES, BARRIERS AND INDEPENDENT RE-WALK

COMMON BASELINE AT EVERY SERVICE NODE

01 AI ASSIST

Optional explanation, translation and guidance; never the final decision.

02 HUMAN SERVICE

Named people review, take over, correct and receive appeals.

03 AI-OFF BASELINE

Paper, signs, phone and staffed help complete the same core task.

硬停止 / HARD STOP

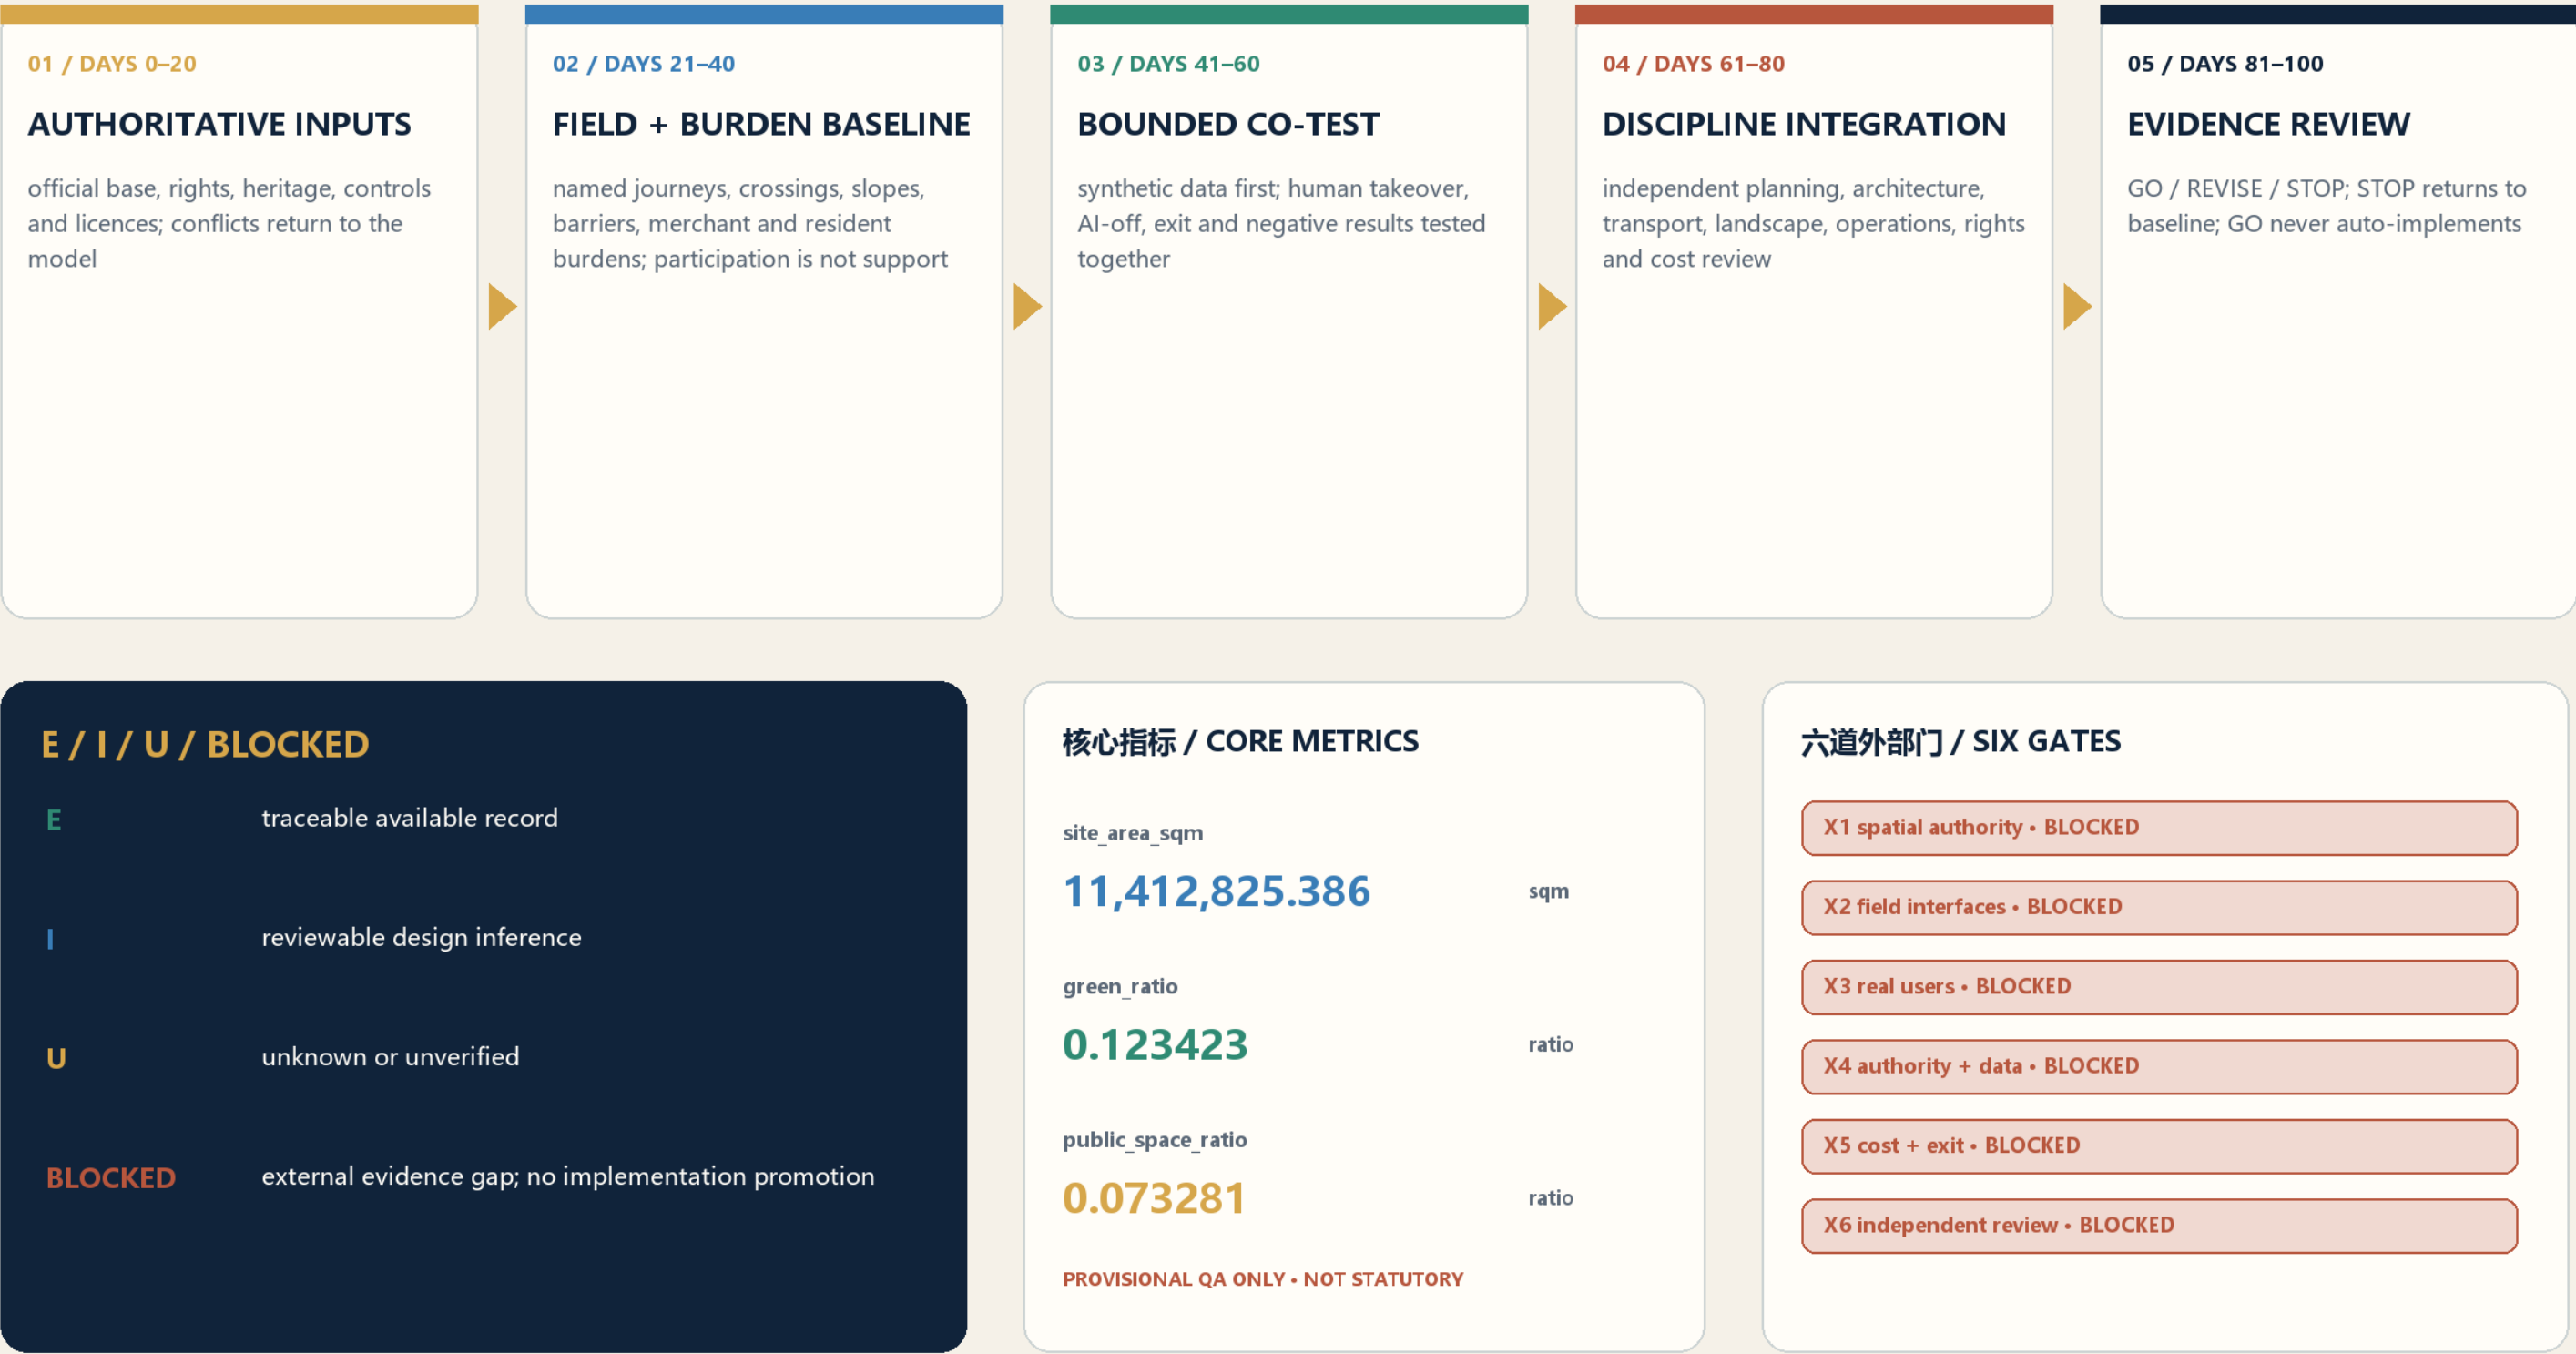

- route not field-verified
- no human alternative
- wrong or unsafe guidance
- forced profiling or face recognition
- single-vendor civic-service dependency

FROM CONCEPT TO THE NEXT ACCOUNTABLE DECISION: 100 DAYS

THE OUTPUT IS A DECISION DOSSIER, NOT CONSTRUCTION; GO ONLY SEEKS NEXT-STAGE APPROVAL

FIG 05 • 证据 / EVIDENCE

TWELVE SCENARIOS ARE STOPPABLE PUBLIC-PROBLEM TESTS

SCN-01 • Accessible Arrival and Orientation

Three paths: AI / human / AI-off. independent access and reduced wrong-route burden · X2/X3/X4/X6

SCN-02 • Public-Service Booking and Explanation

Three paths: AI / human / AI-off. understandable access, choice and appeal · X3/X4/X5/X6

SCN-03 • Small-Business Continuity

Three paths: AI / human / AI-off. continuity, fair participation and non-adoption rights · X1/X3/X4/X5/X6

SCN-04 • Research Visitor and Collaboration Access

Three paths: AI / human / AI-off. lower-friction knowledge exchange with clear rights · X3/X4/X5

SCN-05 • Night-Time Help and Safe Referral

Three paths: AI / human / AI-off. visible and accountable access to help · X1/X2/X3/X4/X5/X6

SCN-06 • Older-Person and No-Smartphone Service

Three paths: AI / human / AI-off. dignity, choice and continuity across digital confidence levels · X3/X4/X5/X6

SCN-07 • Public-Space Events and Multilingual Participation

Three paths: AI / human / AI-off. open cultural and technical participation without commercial capture · X1/X2/X3/X4/X6

SCN-08 • Blue-Green Maintenance and Public Work Orders

Three paths: AI / human / AI-off. visible stewardship and faster accountable maintenance · X1/X2/X4/X5/X6

SCN-09 • Developer Reliability Sandbox

Three paths: AI / human / AI-off. evidence before procurement or public exposure · X4/X5/X6

SCN-10 • Controlled Robotics and Intelligent-Terminal Test

Three paths: AI / human / AI-off. safe validation without treating public space as an unconsented laboratory · X1/X2/X3/X4/X5/X6

SCN-11 • Public Learning and AI Literacy

Three paths: AI / human / AI-off. informed participation and challenge rights · X3/X4/X6

SCN-12 • Urban Incident Response and Evidence Preservation

Three paths: AI / human / AI-off. accountability, remedy and continuity under failure · X4/X5/X6

LANDMARKS ARE CIVIC CAPABILITIES, NOT OBJECTS

Open Stack Mile

Make the full-stack test chain, human control and negative results publicly legible. · X1/X2/X4/X5/X6

Origin Translation Commons

Turn research into understandable public questions, service prototypes and dissent records. · X1/X2/X3/X4/X6

Civic Continuity Gateway

Make arrival, human help, small-business continuity and AI-off service visible at an urban threshold. · X1/X2/X3/X4/X5/X6

Contribution Memory Line

Recognise verifiable public contributions, maintenance, dissent and negative results across the belt. · X1/X2/X3/X4/X6

Dual-Line Civic Service Band

link the identity, wayfinding and service-continuity message

Three-Path Service Point

show AI assist, human service and AI-off baseline as equal choices

Quiet Co-Design Table

support compensated participation, plain-language review and dissent

Reversible Test Bay

separate controlled validation from production and uncontrolled public space

Accessible Threshold Kit

make arrival, decision, rest and help points legible across sensory and mobility needs

Evidence and Negative-Result Wall

display what was tested, what failed, what changed and why a STOP occurred

Blue-Green Care Marker

connect public reports, verified maintenance and visible disposition

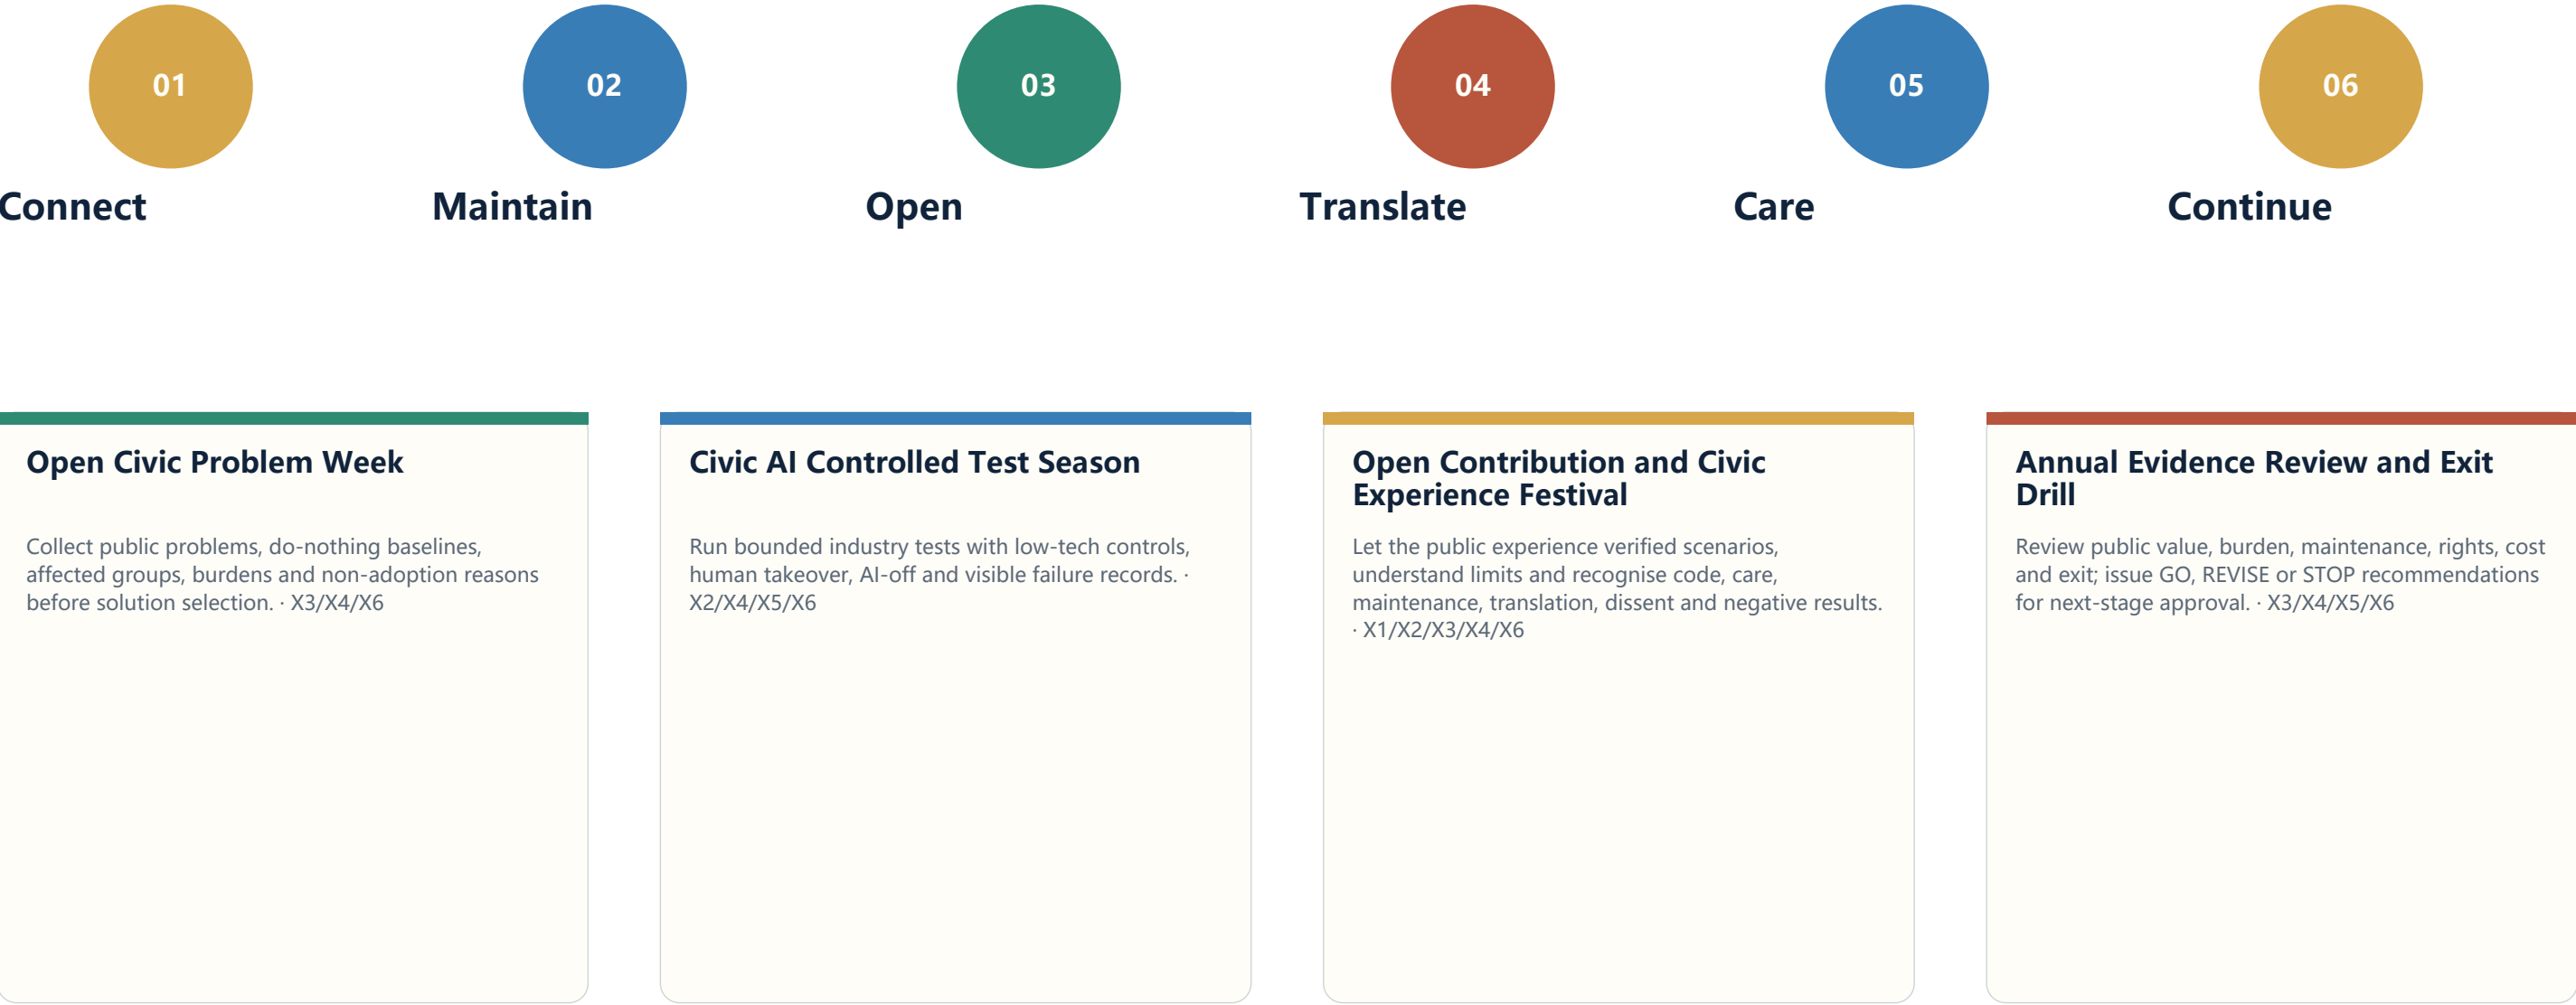

Human Help Beacon

make a verified human-help route visible without general surveillance

Reversible Public Event Kit

host learning, co-design and developer events without permanently occupying public space

FROM OPENING A RAILWAY TO OPENING KNOWLEDGE

AN HONEST BOUNDARY IS DELIVERABLE RISK CONTROL

X1 • authoritative spatial

External evidence unavailable; related implementation conclusions remain BLOCKED.

X2 • field interfaces

External evidence unavailable; related implementation conclusions remain BLOCKED.

X3 • real users and burdens

External evidence unavailable; related implementation conclusions remain BLOCKED.

X4 • authority, law and data

External evidence unavailable; related implementation conclusions remain BLOCKED.

X5 • cost, procurement and exit

External evidence unavailable; related implementation conclusions remain BLOCKED.

X6 • independent professional/accessibility

External evidence unavailable; related implementation conclusions remain BLOCKED.

LOCAL REVIEW ONLY

After local completion, this candidate is for user review only. No push, PR update, publication or maintainer contact without approval.
