

JINGZHANG AI INNOVATION BELT

Three rhythms, three key areas, two wings and a shared calibration layer on a real basemap

URBAN DESIGN ATLAS · BOARD 01

JINGZHANG AI INNOVATION BELT

Complete innovation ecosystem × real urban space × civic calibration layer

01 NORTH
Research · controlled validation · ecological commute

02 CENTRAL
Universities · open source · engineering culture · talent

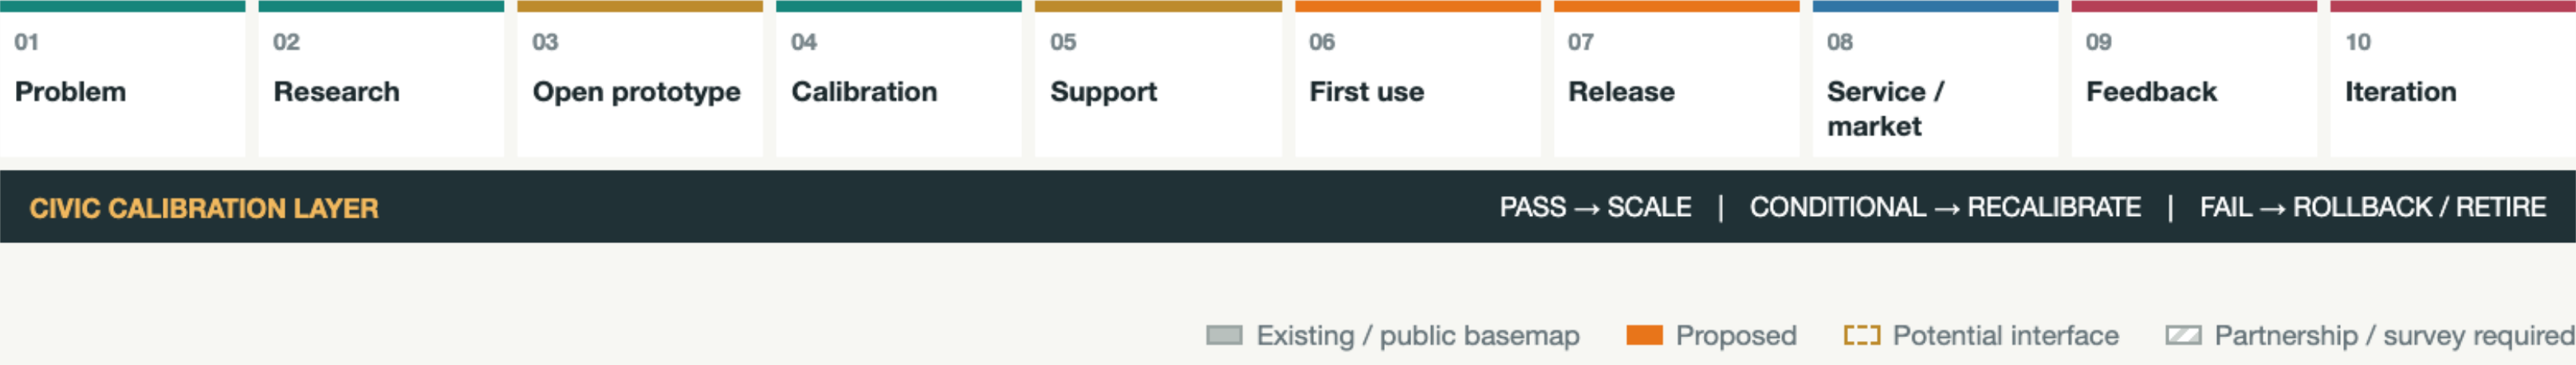

03 SOUTH
First use · urban life · release and feedback

THREE KEY AREAS
1 Zhongzhiyuan
2 AI Origin / university-heritage interface
3 Dazhongsi

TWO WINGS
A Zhongguancun wing
B Xiaoyuehe wing

ONE LAYER
Civic Calibration
Problem → qualify → release → verify → renew / rollback

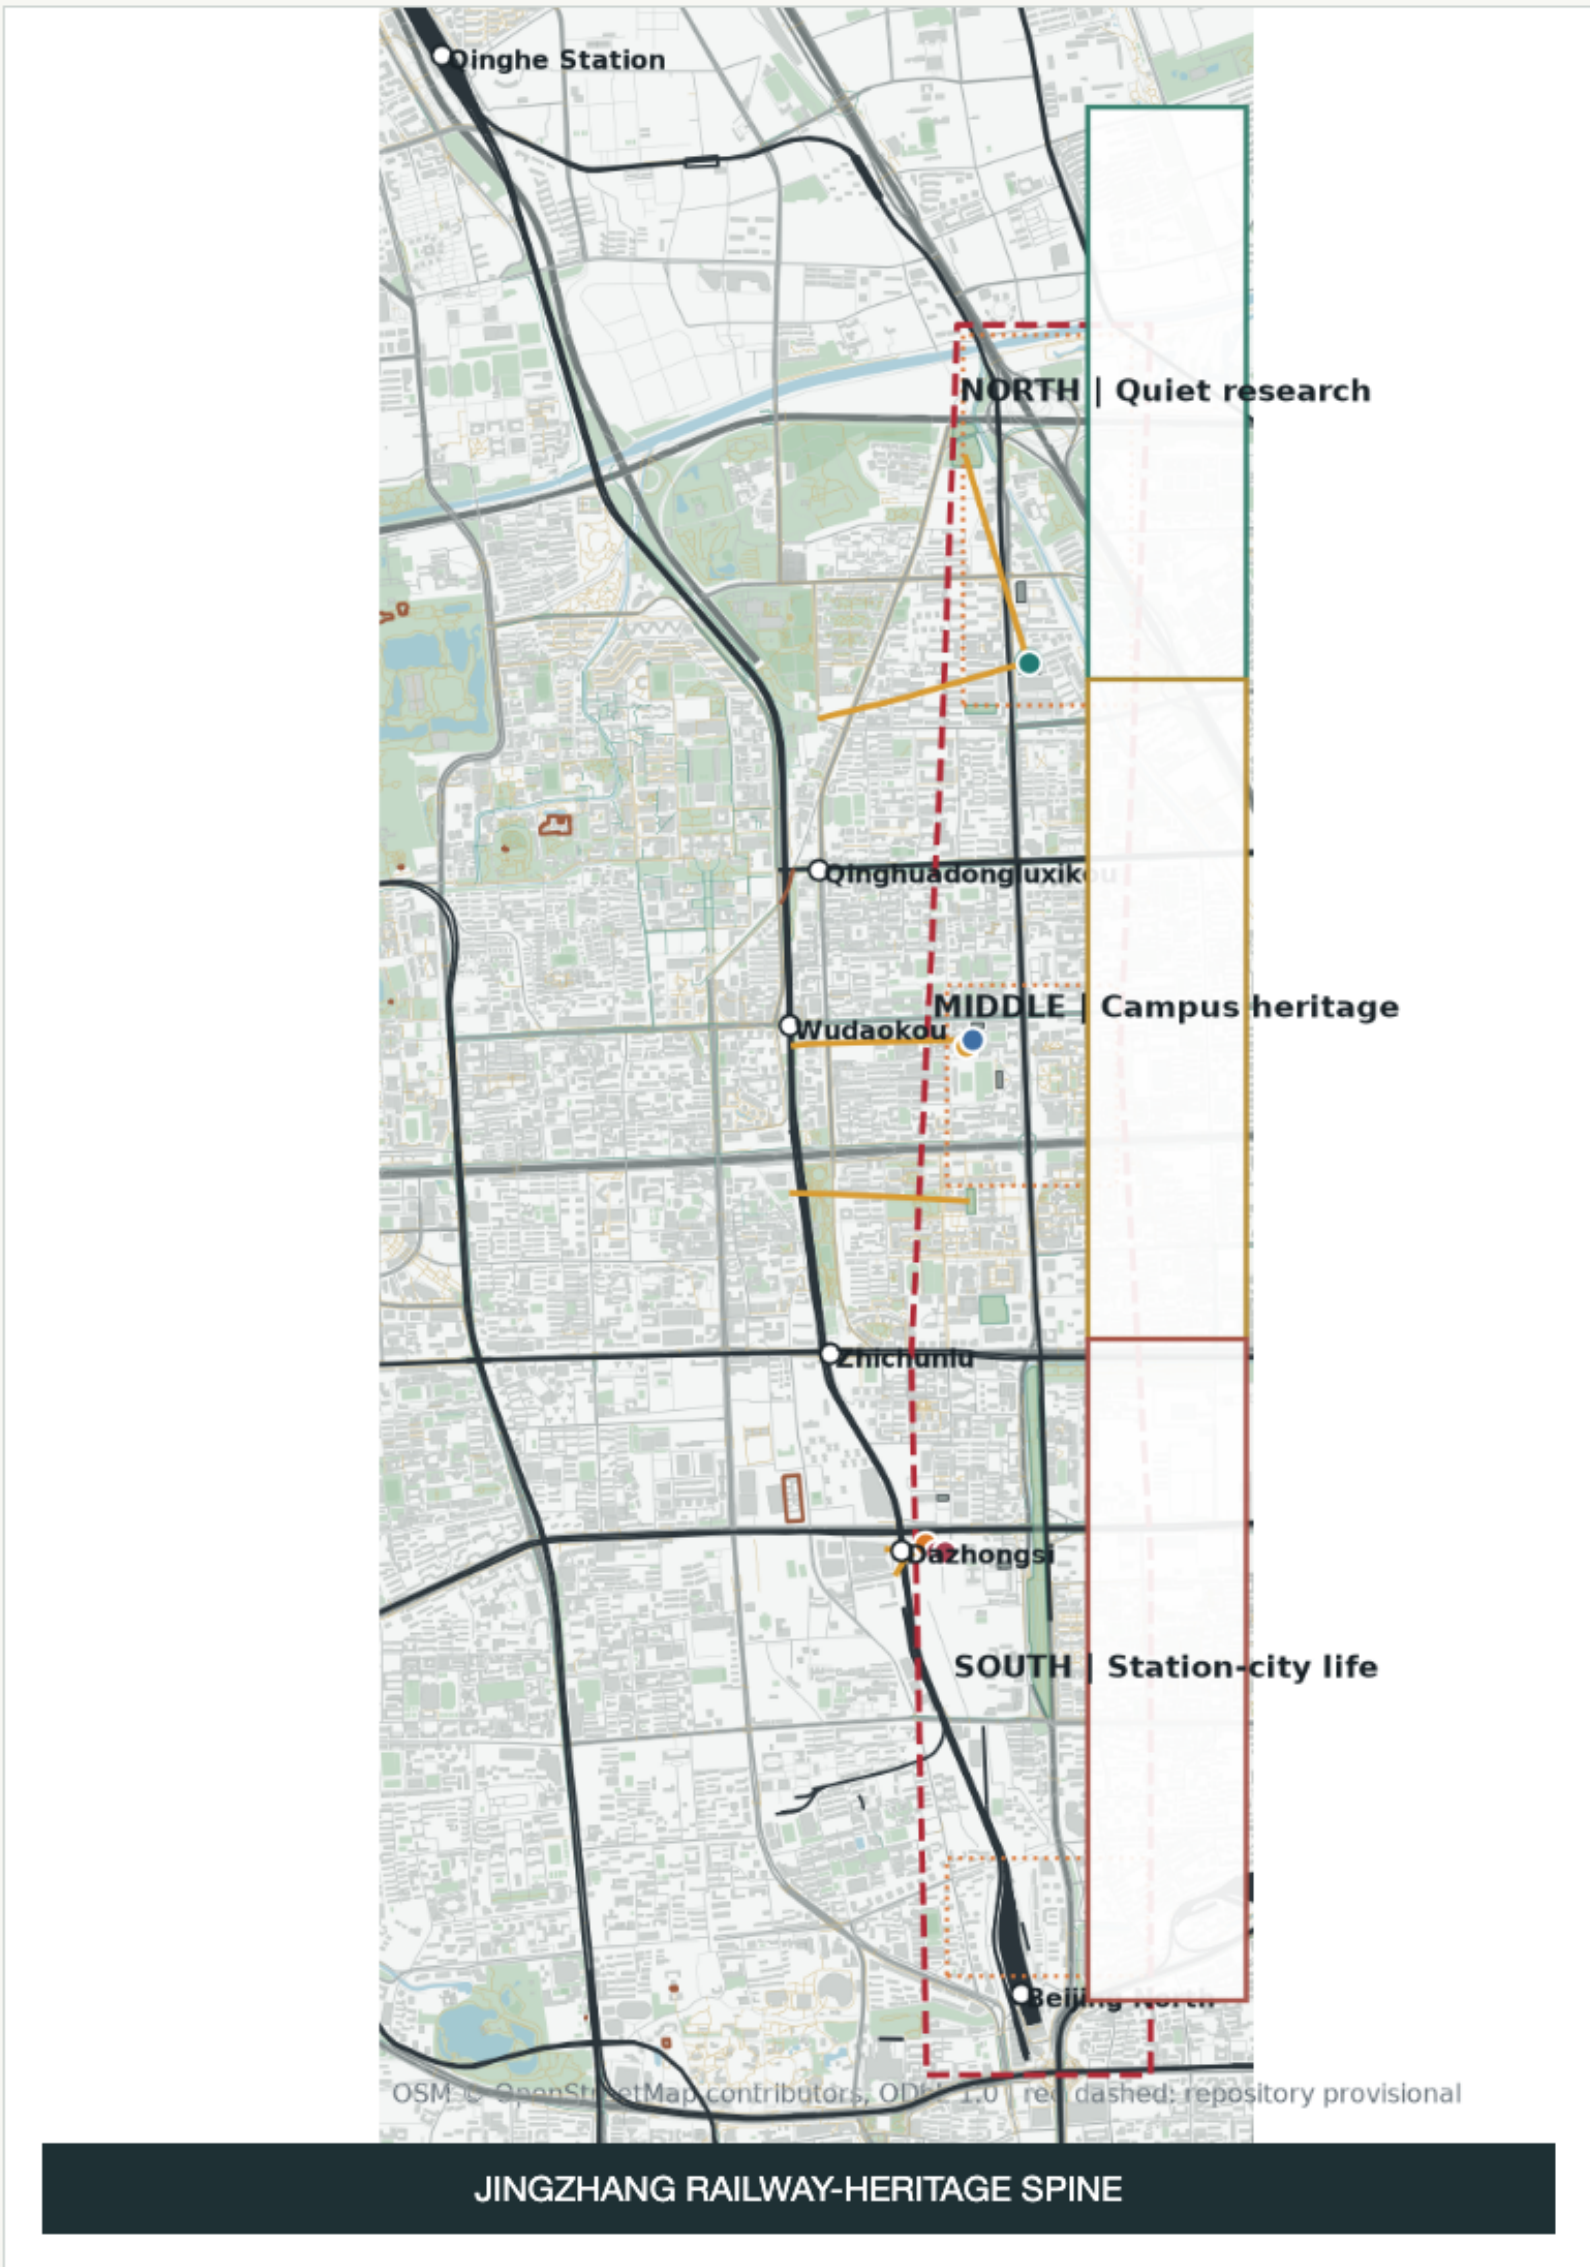

43.6 km² coordinated research context	≈11.4 km² provisional computation geometry
3 key areas	2 supporting wings

URBAN DESIGN ATLAS · SPATIAL SYSTEM

SPACE × INNOVATION × PUBLIC LIFE

The railway-heritage spine organizes three rhythms; ecosystem roles do not claim statutory land use

THREE URBAN RHYTHMS

EXISTING + PROPOSED

NORTH

Zhongzhiyuan / Qinghe / Fifth Ring
Research interface, equipment transfer, controlled low-disturbance validation

EXISTING + POTENTIAL

CENTRAL

AI Origin / universities / railway heritage
Open knowledge, reproduction, contribution, learning and incubation interface

EXISTING + PROPOSED

SOUTH

Dazhongsi / southern daily-life interface
Limited first use, disclosure, verification, rollback and retirement

THREE KEY INTERFACES

01 Zhongzhiyuan

02 AI Origin / university-heritage interface

03 Dazhongsi

TWO SUPPORTING WINGS

Zhongguancun wing

standards · IP · professional service · capital interface
REQUIRES PARTNERSHIP

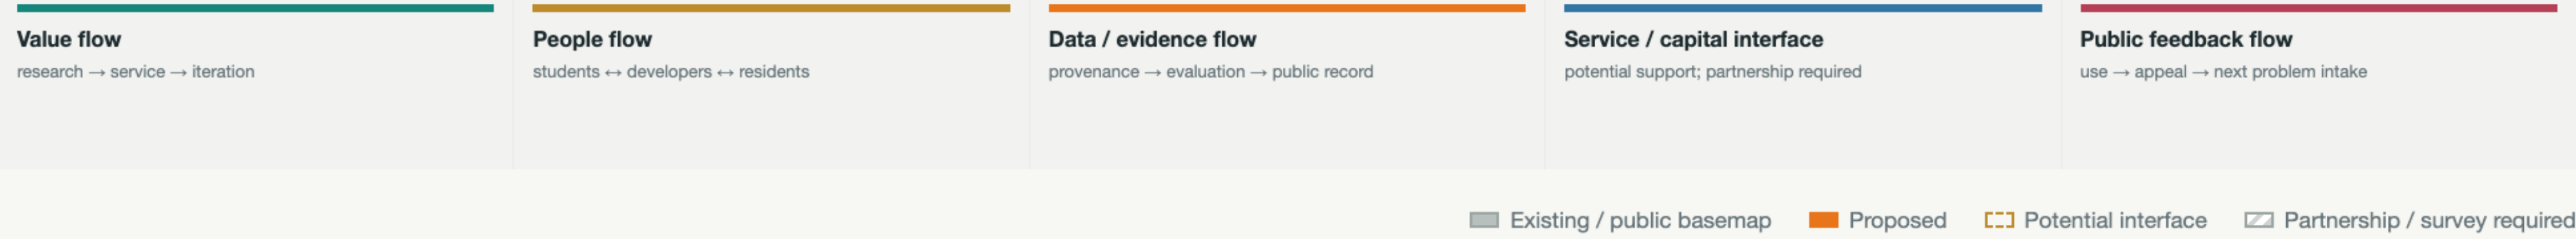

Xiaoyuehe wing

youth · recreation · everyday feedback · future-life context
POTENTIAL

IDENTITY SYSTEM

parallel rails = continuity
visible gap = reversible operation

open gate = accountable entry

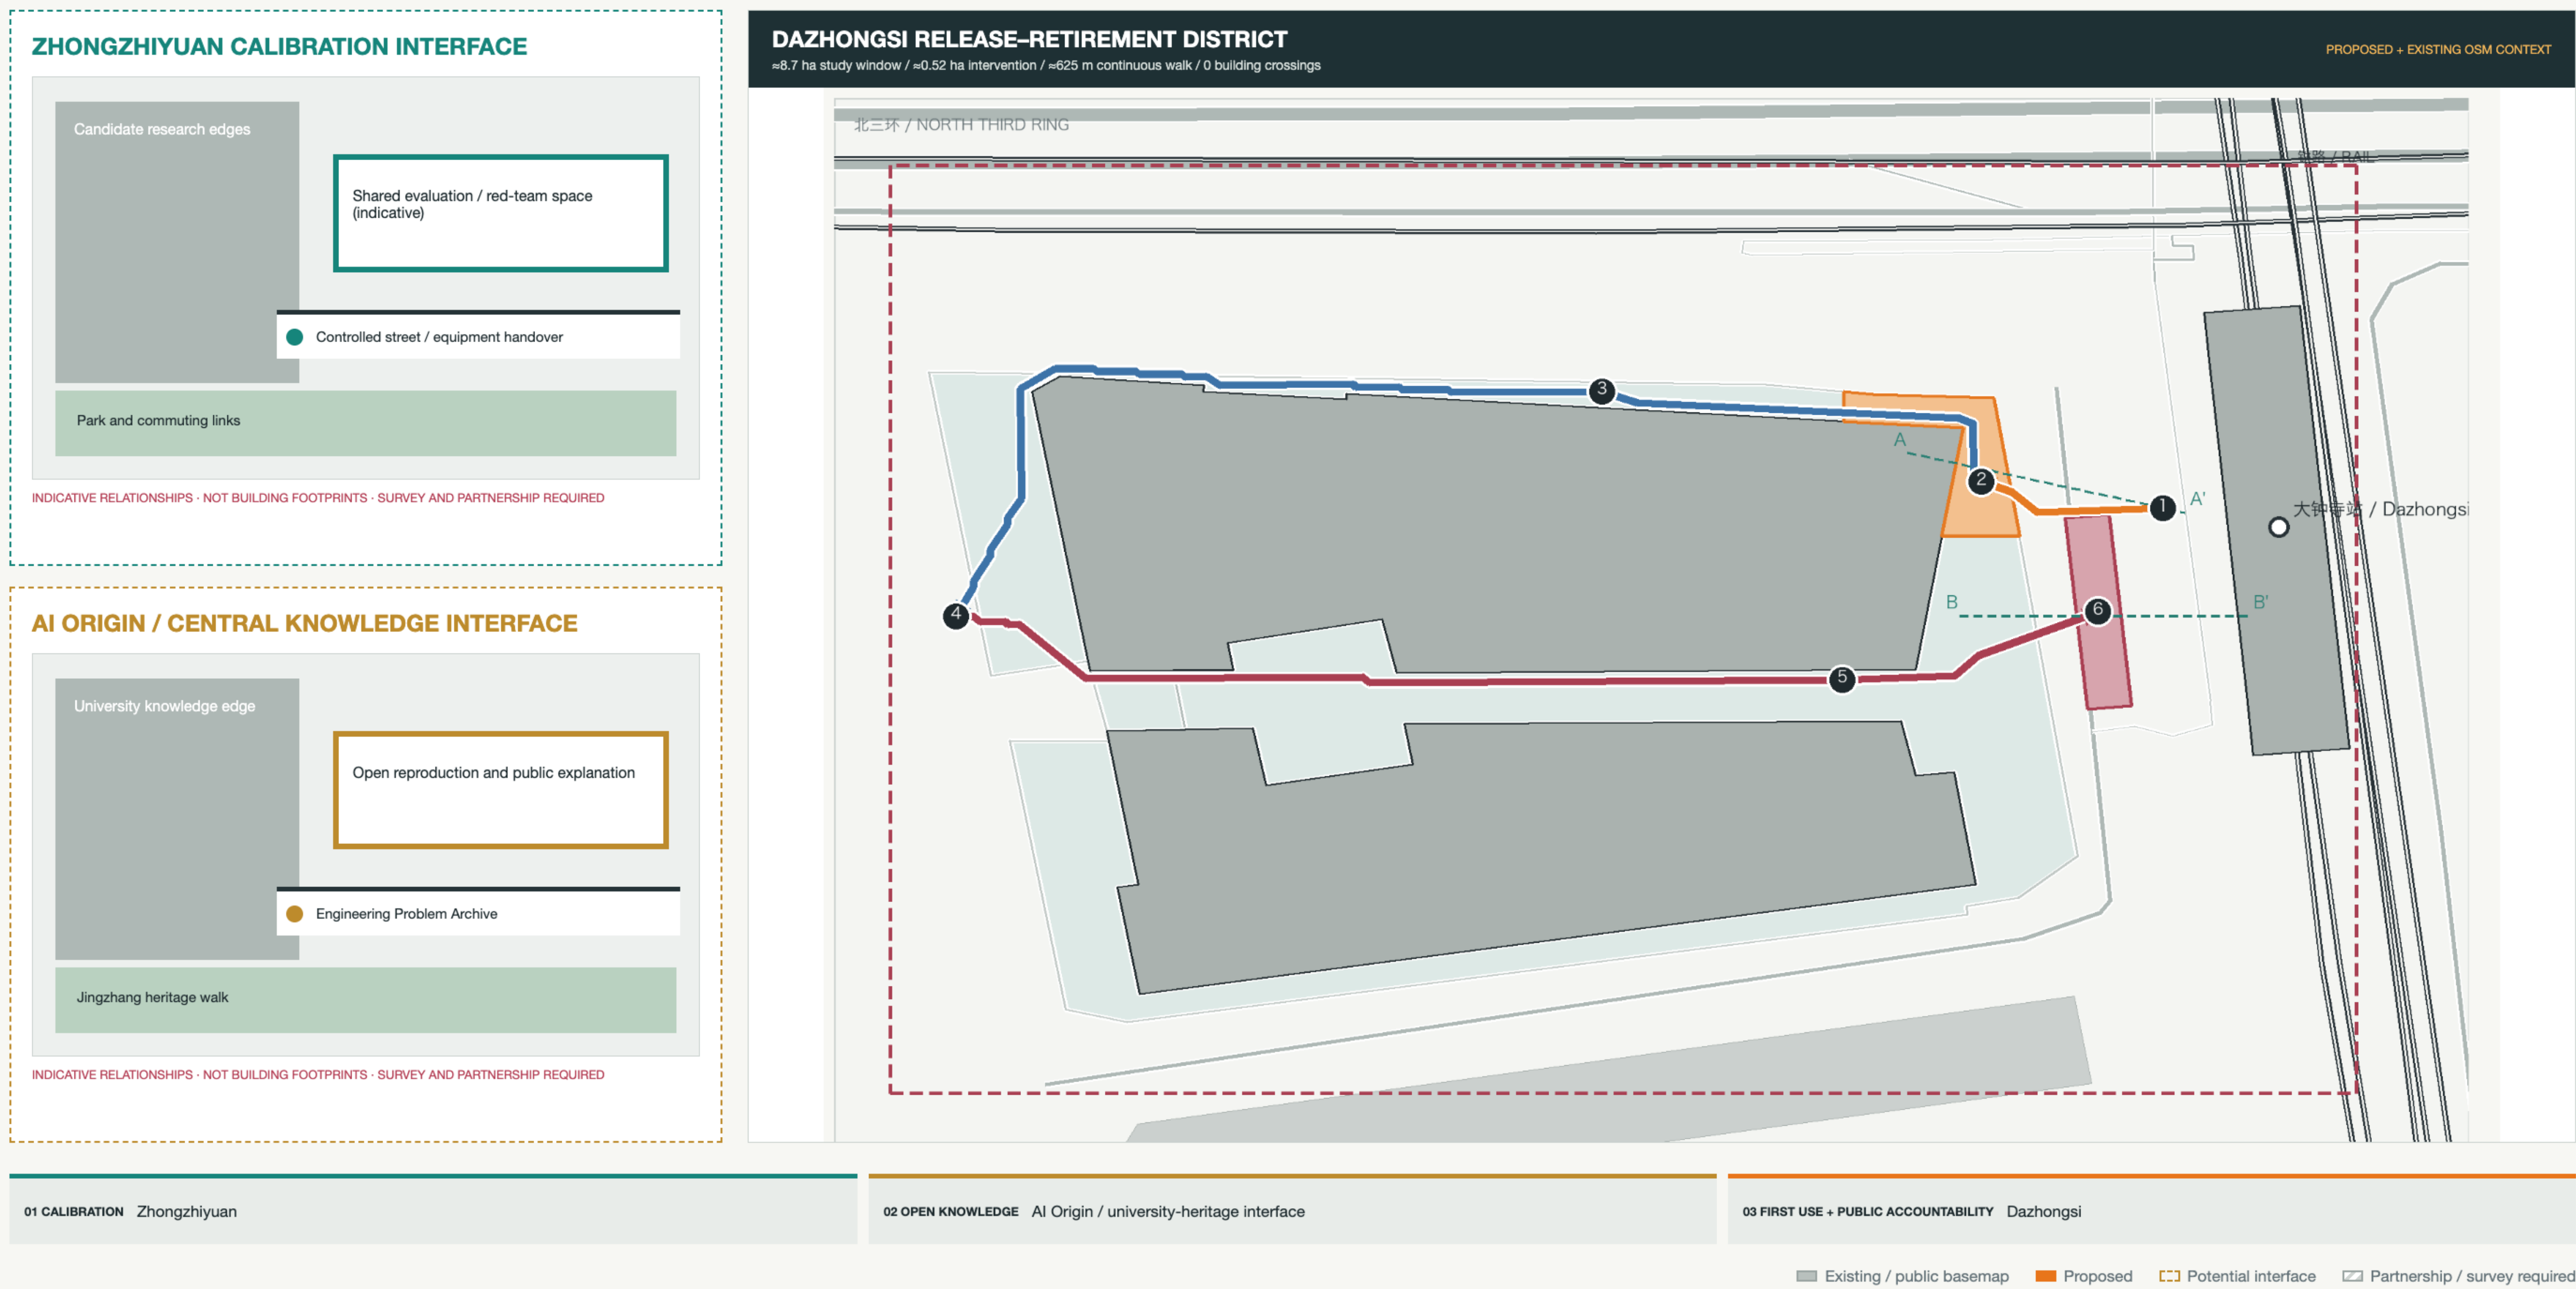

THREE URBAN INTERFACES

Zhongzhiyuan and AI Origin are indicative; Dazhongsi uses a building-conflict-checked plan

URBAN DESIGN ATLAS • BOARD 02

THREE URBAN INTERFACES

Two honest indicative interfaces + one conflict-checked Dazhongsi demonstration district

Zhongzhiyuan	AI Origin / central corridor	Dazhongsi
Research interface and low-disturbance controlled validation; indicative, survey required.	University knowledge, open reproduction, engineering culture and talent; indicative.	≈8.7 ha study window, ≈0.52 ha intervention and ≈625 m continuous walk; building-conflict-checked design geometry.

DAZHONGSI / BUILDING-CONFLICT-CHECKED BASELINE

≈8.7 ha	≈0.52 ha	≈625 m	0	0	0
study window	intervention	continuous walk	route-building conflict	public-space/building conflict	lifecycle-node/building conflict

FROM RESEARCH TO PUBLIC LIFE

Innovation ecosystem, three evaluation protocols, ten tiered scenarios and public operating qualification

URBAN DESIGN ATLAS · BOARD 03

FROM RESEARCH TO PUBLIC LIFE

The belt produces and translates innovation; the calibration layer governs public operating qualification

Value flow People flow Data / evidence flow Service / capital interface Public feedback flow

FLAGSHIP 01

Accessible Transfer Guidance

Visually impaired and older users; unfamiliar visitors
Route blockage / wrong turn / human takeover
Failure: static route and staffed assistance

TEST A · safety / accessibility

FLAGSHIP 02

Public-Service Information Agent

Commuters and front-line service staff
Provenance, freshness, task completion, complaint closure
Failure: suspend, disclose cause, restore service desk

TEST C · accuracy / provenance

FLAGSHIP 03

Open-source Low-speed Public-Service Agent

Student developers, pedestrians and service staff
Zhongzhiyuan validation → central reproduction → Dazhongsi first use
Failure: human takeover and withdrawal from public route

TEST B · low-speed embodied service

7 SUPPORTING: open education · health/ageing navigation · multilingual local information · heritage · park comfort · administrative navigation · innovation pathway

NO-AI CONTINUITY: static signs · paper information · human assistance · accessible non-digital route · complaint channel

3 PROPOSED EVALUATION PROTOCOLS: safety/accessibility · low-speed embodied service · public-information accuracy and provenance

01 Accessible Transfer Guidance	02 Public-Service Information Agent	03 Open-source Low-speed Public-Service Agent
Safety / accessibility; static route and staffed assistance remain available.	Accuracy / provenance; suspension restores the staffed service desk.	Zhongzhiyuan validation, central reproduction, Dazhongsi first use; human takeover and route withdrawal on failure.

Value flow	People flow	Data / evidence flow	Professional / capital interface	Public feedback flow
research problem → open prototype → first use → service → iteration	students / researchers ↔ developers ↔ residents / service staff	provenance → evaluation → release conditions → public record	potential, partnership-dependent support only	use → verification → appeal → next annual problem intake

ENGINEERING CULTURE THAT KEEPS LEARNING

Engineering problems, open-source contribution, release-retirement commons and annual operation

URBAN DESIGN ATLAS · BOARD 04

ENGINEERING CULTURE THAT KEEPS LEARNING

From railway engineering problems to open-source contribution and the public retirement of technology

Engineering Problem Archive1

Historic engineering problems ↔ present urban problems
Reading, rest and walking

→

Open-source Contribution Ground2

Contribution, reproduction, adoption and version history
Public meaning and developer value

→

Release–Retirement Commons3

Release, challenge, rollback, replacement and memory
Daily shade, seating and accessible movement

A - A' Station interface → release forecourt

existing commercial edge

clear everyday path

static + staffed disclosure

candidate station interface

rail edge

Indicative relative arrangement: all widths and levels require measured survey.

Building-conflict-checked site relationships · dimensions and heritage details require survey

B - B' verification → retirement memory → rail

verification + appeal

tactile archive strip

shade + ordinary seating

rail-parallel memory

No specific heritage artifact is claimed: access, trees and underground utilities require survey.

ANNUAL OPERATING LOOP

01 CONTINUOUS: problem intake

02 SPRING: open source / education / prototype

03 SUMMER: calibration / evaluation

04 AUTUMN: limited release / civic verification

05 WINTER: renew / rollback / retirement archive

Organizers are role-based only; no signed institution, funding or deployment permission is claimed. Each stage leaves traceable outputs for the next year.

problem evidence → contribution → evaluation → public record → next intake

RETIREMENT MEMORY · ≈535 m²

Failed AI is also remembered in public: the stopping cause, accountable decision, alternative service and data disposition enter a durable archive.

PUBLIC DAILY VALUE walking · shade · seating · accessibility DEVELOPER MEANING problem · correction · version history

Existing context, provisional bounds, proposals, potential interfaces and partnership-dependent content are visibly separated.

GLOBAL PRECEDENTS → TRANSFERABLE PRINCIPLES → JINGZHANG TRANSLATION

Singapore LaunchPad Shared startup infrastructure works with professional support.	Paris-Saclay Research, firms and transit form an accessible network.	MIT Kendall Square University edges can become translation interfaces.	Toronto Vector Institute Talent, research and industry need intermediary capacity.
Montréal Mila Open research and social responsibility can share a platform.	London Knowledge Quarter Existing knowledge institutions can collaborate through public routes.	Seoul AI Hub Space, technical support and entrepreneurship can form a service sequence.	Helsinki Maria 01 Historic renewal can host a startup community without copying operators.

RETIREMENT MEMORY · ≈535 m²

Failed AI is also remembered in public. The stopping cause, accountable decision, alternative service and data disposition enter a durable archive.

When no retirement event occurs, this remains a walkable, shaded and accessible everyday place for waiting and rest.
