

PROVISIONAL conceptual geometry: not an official red line / ownership / engineering location; recompute on official boundary/regulatory plan.

Overall Design Overview • Three Nodes & One Loop Network (provisional)

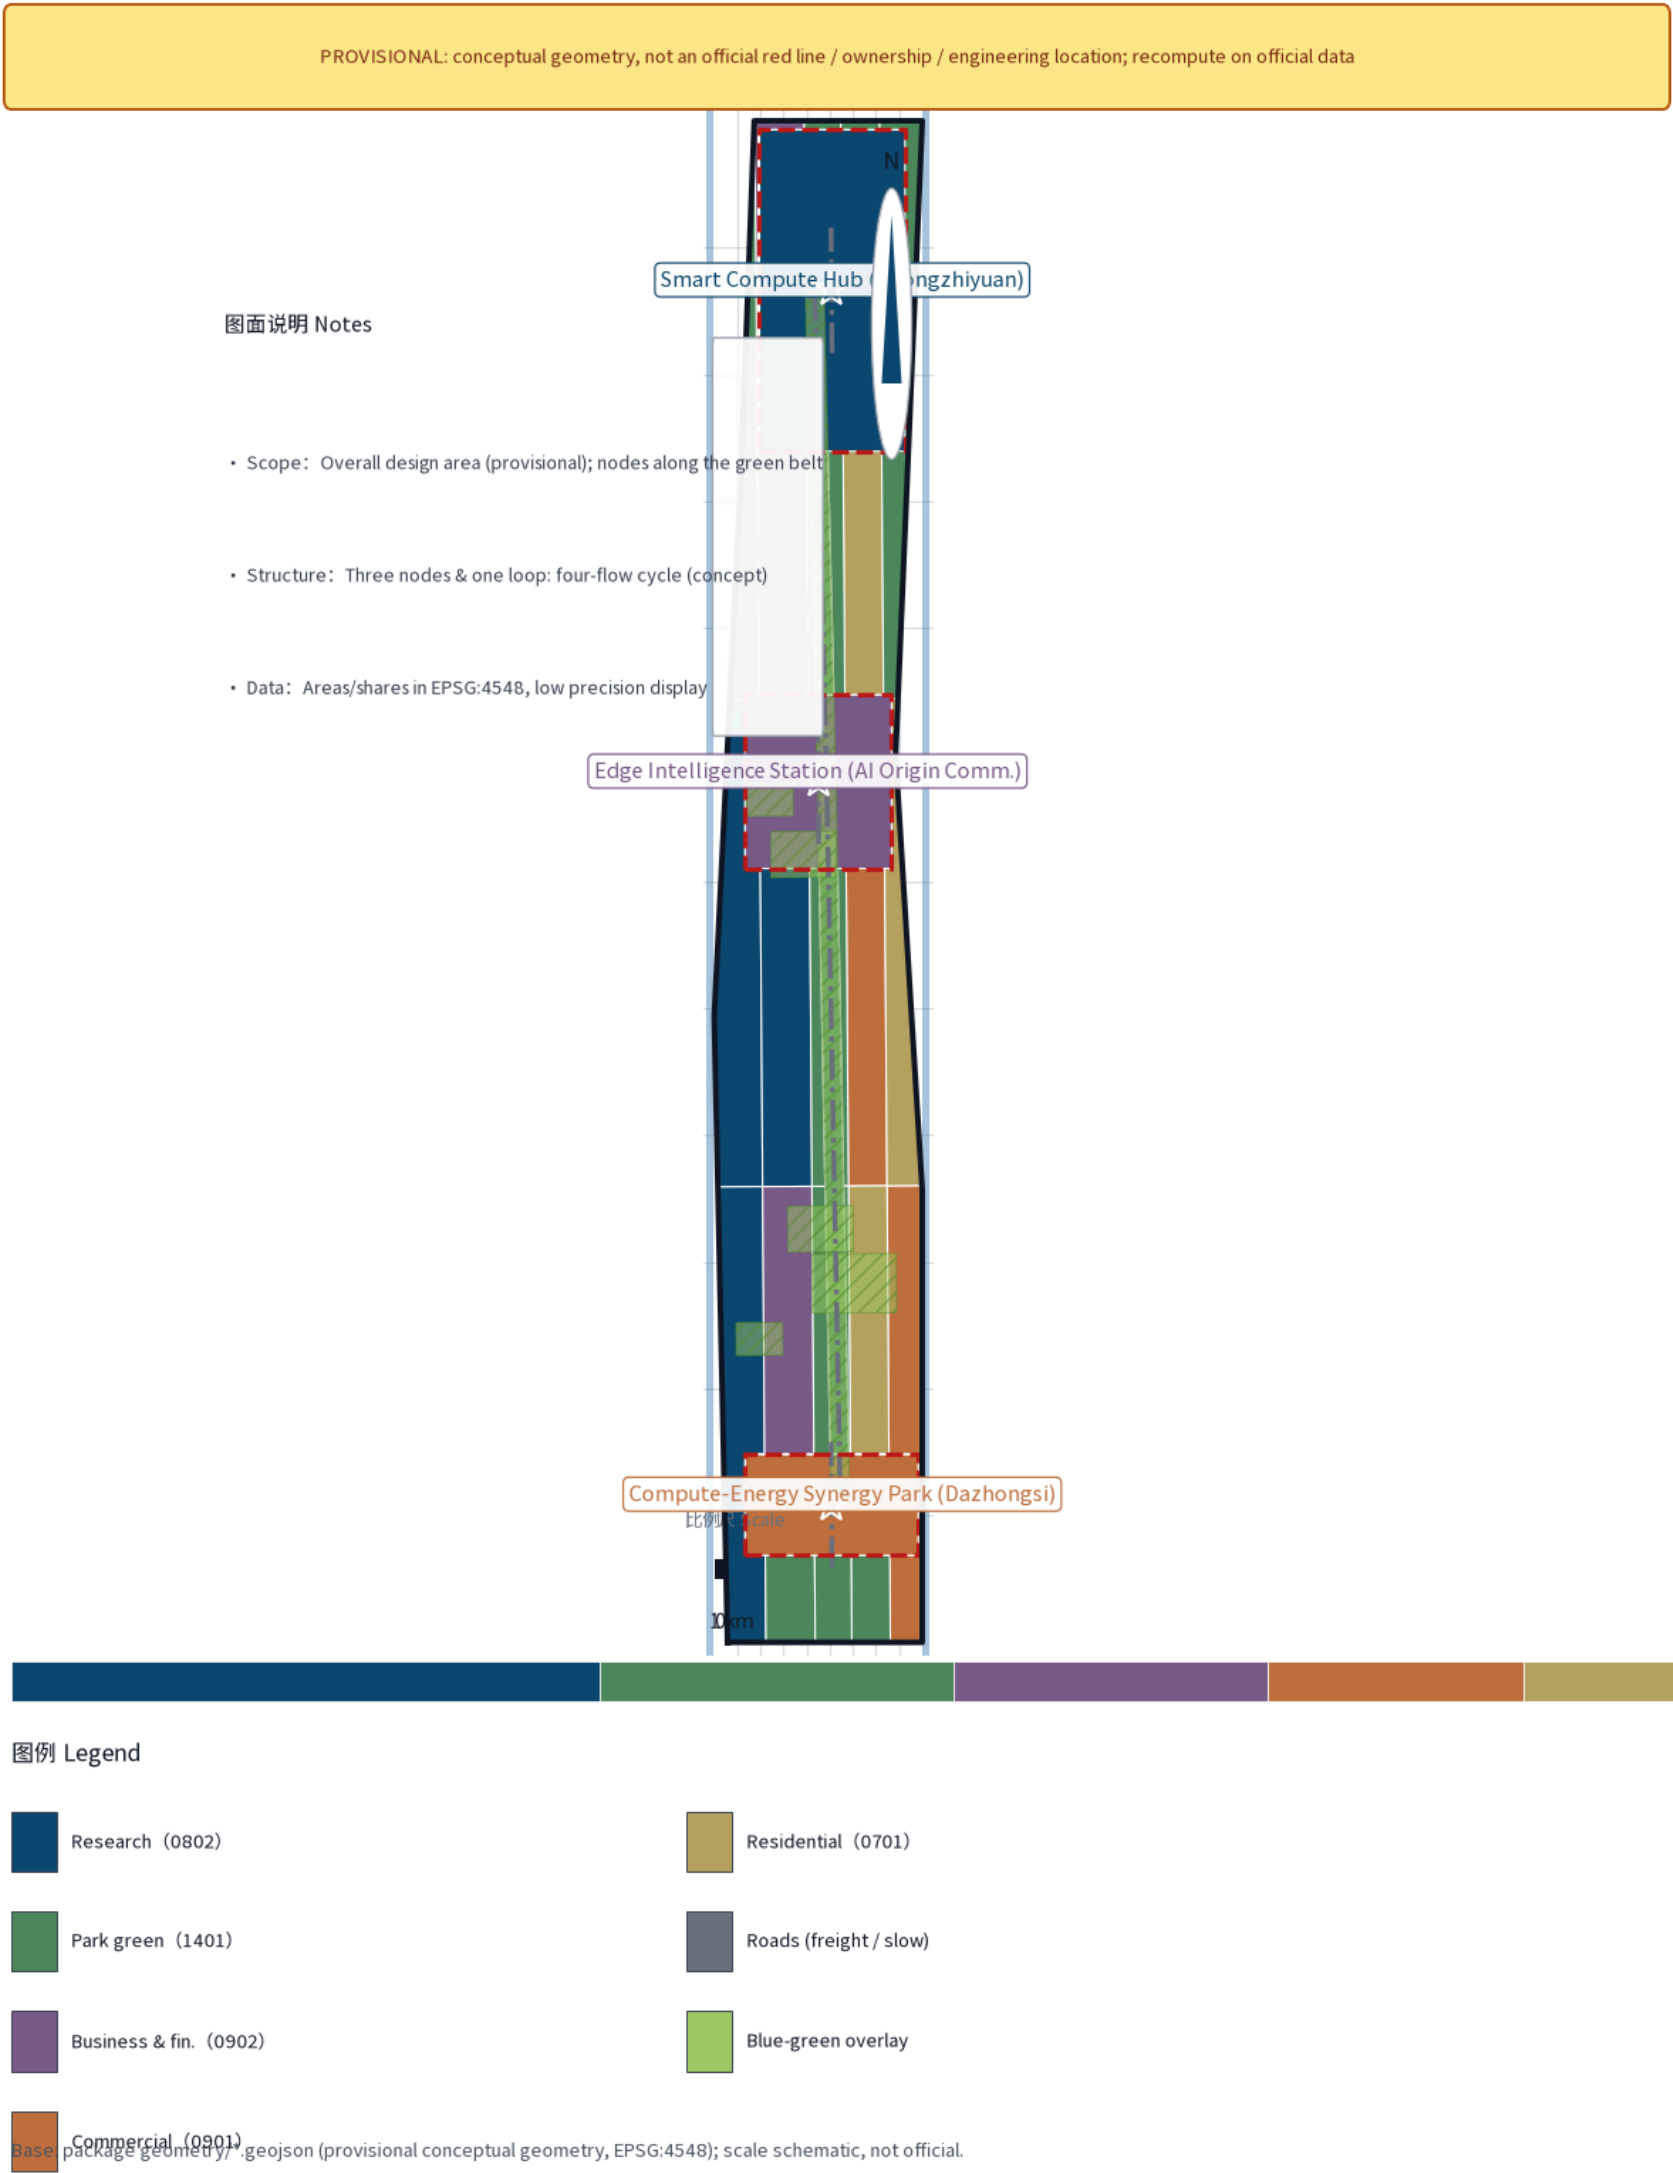

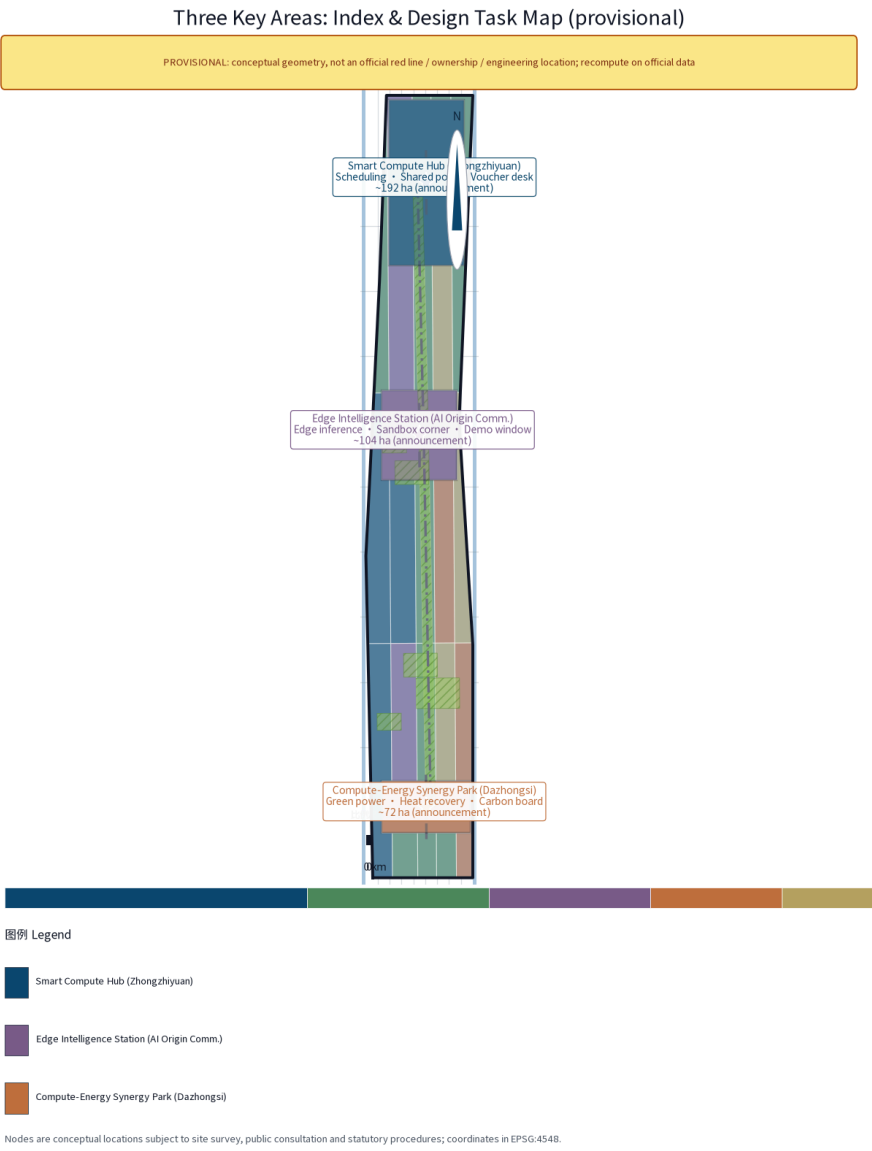

Fig. 1 Overall Design Overview (provisional conceptual geometry)

PROVISIONAL conceptual geometry: not an official red line / ownership / engineering location; recompute on official boundary/regulatory plan.

Key - area tasks (concept)

Code		
0 8 0 2		≈ 3 5 %
1 4 0 1		≈ 2 1 %
0 9 0 2		≈ 1 9 %
0 9 0 1	Commer c i a l (商业用地)	≈ 1 5 %
0 7 0 1		≈ 1 0 %

The three provisional key areas total about 369 ha, self-computed from announcement clues and consistent with the announced figure (not officially issued); official figures govern.

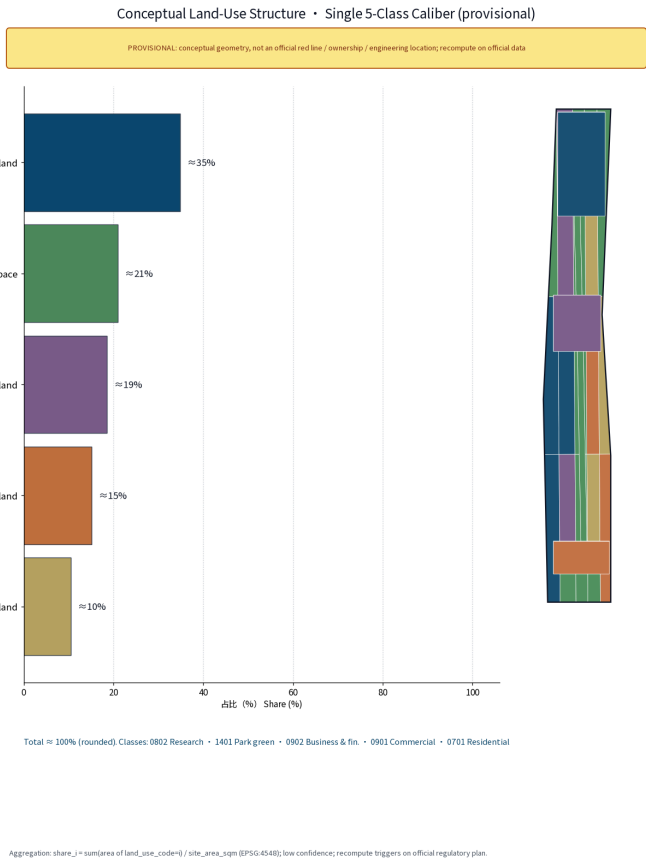

Fig. 2 Three Key Areas & Design Tasks

PROVISIONAL conceptual geometry: not an official red line / ownership / engineering location; recompute on official boundary/regulatory plan.

指标 / Metrics

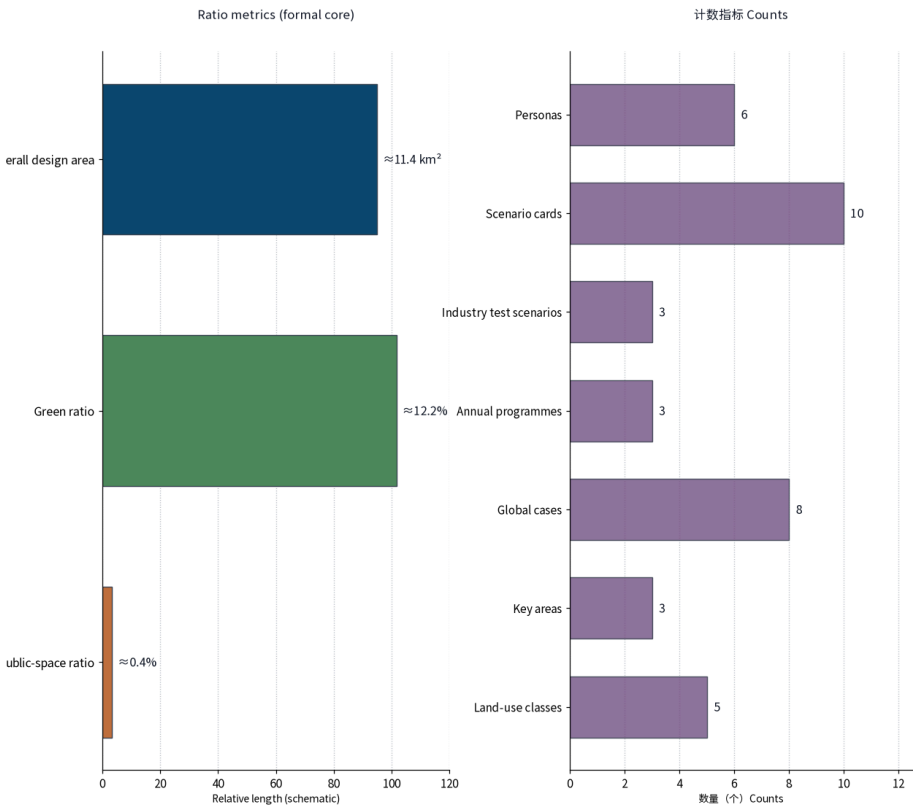

Overall design area	
Green ratio	≈12.2% green_ratio
Public-space ratio	≈0.4%
Personas	6
Scenario cards	10
	3
Annual programmes	3
Global cases	8
Key areas	3
Land-use classes	

All counts match metrics.json, proposal.md and visual/index.html; pages and drawings show rounded low-precision figures only, with provisional warnings.

Core Metrics Evidence (ratios vs counts, low-precision display)

PROVISIONAL: conceptual geometry, not an official red line / ownership / engineering location; recompute on official data

data-value matches metrics.json; pages and figures show rounded low-precision figures only. Recompute on official data.

Fig. 4 Core Metrics Evidence

PROVISIONAL conceptual geometry: not an official red line / ownership / engineering location; recompute on official boundary/regulatory plan.

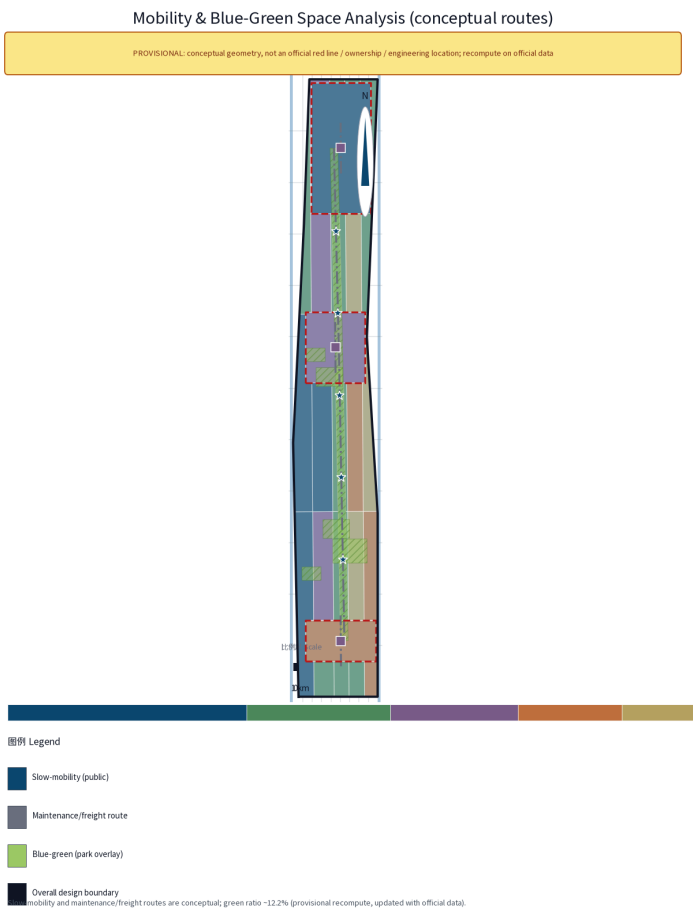

Fig. 5 Mobility & Blue-Green Space Analysis

Short term (1-3y): mechanism pilots — vouchers, sandbox rules, first-node renovation. Mid term (3-5y): loop connectivity and municipal interface rules mature. Long term (5-10y): full-loop synergy and regional interfaces. Minimum pilots, preconditions, responsible actors, stage gates, KPIs, maintenance, feedback and exit/recovery per proposal.md (implementation & operation matrix). Actors: a future data & compute coordination mechanism (concept, not an existing/planned body), local community service centers, district-heating network owners, energy operators (open procedure), universities/R&D institutes, community volunteers.

Whole package is a conceptual proposal / reference scheme: no FAR, heights, demolition, capacities, loads, investment or approvals; domestic & international cases described only from public channels and registered per case (sources.json); figures, drawings, logo, HTML and geometry self-produced (matplotlib etc.); font Noto Sans SC (SIL OFL 1.1) registered in report/copyright_statement.md; accessibility certified by human review — machine PASS cannot substitute.
