

HOW DOES A STRANGER BEGIN?

Without an account or relationship disclosure, find a table, a human host, and a clear way out.

AI生成概念图 / AI-GENERATED CONCEPT • 非现场照片 / NOT A SITE PHOTOGRAPH

01 PERSON

Follow Lin through one ninety-minute AI Origin table session, from arrival to exit.

03 EXPERIENCES

One task may span days: co-create at AI Origin, verify at Zhongzhiyuan, exchange at Dazhongsi.

01 EVIDENCE SET

Offline evidence first checks rejection; people still decide field release.

FIELD RELEASE: PENDING

13 OFFLINE TASKS • 18/18 ASSERTIONS • 64 SPATIAL COMBINATIONS • 9 EXPECTED REJECTIONS

See the Spatial System Before the Protocol

One spine links three Commons; two wings bring resources; six seams test whether people can move across the corridor. Grey dashed areas are provisional, not confirmed sites or legal boundaries.

THREE SCALES

43.6 km²

COORDINATE RESOURCES

11.41 km²*

SYSTEM CONNECTIONS

368.4 ha

THREE PROTOTYPE AREAS

1 SPINE • 3 COMMONS • 2 WINGS • 6 AUDIT SEAMS

Confirm locations, dimensions, and calculations once official boundary, ownership, transport, and site data are available.

Locations show system relationships only. Do not use this diagram to publish entrances, routes, construction, or approval claims.

A Route Exists Only When People Can Use It

Planned counts only show how many seams need checking. Each seam must be walked by the operator, a resident, an accessibility representative, and a professional reviewer.

CROSSING GATE / LEGAL CROSSING

EXISTING / APPROVED ONLY

No exact alignment, protection boundary, authority, opening hours, or new rail crossing is claimed.

EVERYDAY SERVICE MINIMUM

HUMAN WAYFINDING • ACCESSIBLE ROUTE

SAFE WAITING • LIGHTING • VISIBLE EXIT

WALK TOGETHER BEFORE RELEASE

01 AUTHORISED OPERATOR

02 RESIDENT / COMMUNITY

03 ACCESS PARTICIPANT

04 SAFETY / TRANSPORT

Do not publish the route until all four parties accept responsibility and hours, access, crossing, lighting, and egress are all known.

Every Entry Needs an Exit

ENCOUNTER TICKET 0.2

01

TASK + EXPIRY

02

ENTRY + ACCESS + EXIT

03

SPACE + TIME + CAPACITY

04

MINIMUM DATA + DELETION

05

NAMED HOST + STOP RIGHT

06

RESOURCE + COST BAND

07

PUBLIC OUTPUT + RIGHTS

08

COMPLAINT + ADOPT / AMEND / RETIRE

NO FACIAL DATA / CONTACT LISTS / PRECISE TRACKING /
HEALTH INFERENCE / SOCIAL GRAPH / PERSONAL SCORES

BLOCK if any G0-G4 gate fails, no host is named, no non-AI equivalent exists, or recovery is undefined.

Three Commons, Three Different Prototypes

01

ZHONGZHIYUAN PROBLEM YARD

PUBLIC ENTRY - PROBLEM THRESHOLD - CONTROLLED TEST - PHYSICAL STOP

NO NAMED PERSON ON DUTY, NO SEPARATION, OR ANY SAFETY EVENT: STOP

02

AI ORIGIN TABLE YARD

ENTER WITHOUT AN ACCOUNT - HUMAN HOST - COMMON TABLE - OFFLINE EXIT

NO HOST, OVERLOAD, OR FAILED OFFLINE ROUTE: STOP

03

DAZHONGSI CITY YARD

URBAN ENTRY - EVENT RELEASE - CULTURE CORE - QUIET EGRESS

STOP IF CROWD OR NOISE LIMITS FAIL, OR IF EGRESS IS BLOCKED.

A Ninety-Minute Journey

First visit / limited Chinese / no local account / dead phone battery. This 90-minute journey is a test script, not measured performance.

Every Metric Must Be Traceable
