

From an AI Showcase to a City for People in the AI Era

A3 BOOKLET 01 · OVERVIEW AND LAND USE

This booklet is a concept reference: provisional boundary, layer recomputation and pending data are disclosed. It is not a statutory control, engineering feasibility statement or investment commitment.

From an AI Showcase to a City for People in the AI Era

A3 BOOKLET 02 · KEY AREAS AND BLUE-GREEN MOBILITY

CENTENNIAL JINGZHANG · CONCEPT DESIGN v0.1

CONCEPT REFERENCE · PROVISIONAL BOUNDARY

FIG 03 | Three key areas: govern before deploying

All three polygons are provisional and conceptual

THREE SPATIAL MOVES

- 01 Start with a negotiation entrance for residents and merchants
 - 02 Offer a voluntary reskill-operations-scenario pathway
 - 03 Only then place robot, low-altitude, data and energy testing under reviewable rules
- Boundary precision, ownership, buildings and utilities await professional confirmation.

CENTENNIAL JINGZHANG · CONCEPT DESIGN v0.1

CONCEPT REFERENCE · PROVISIONAL BOUNDARY

FIG 04 | People first, machines bounded, blue-green visible

Manual first · bounded machines · reversible failure

FOUR PEOPLE-MACHINE RULES

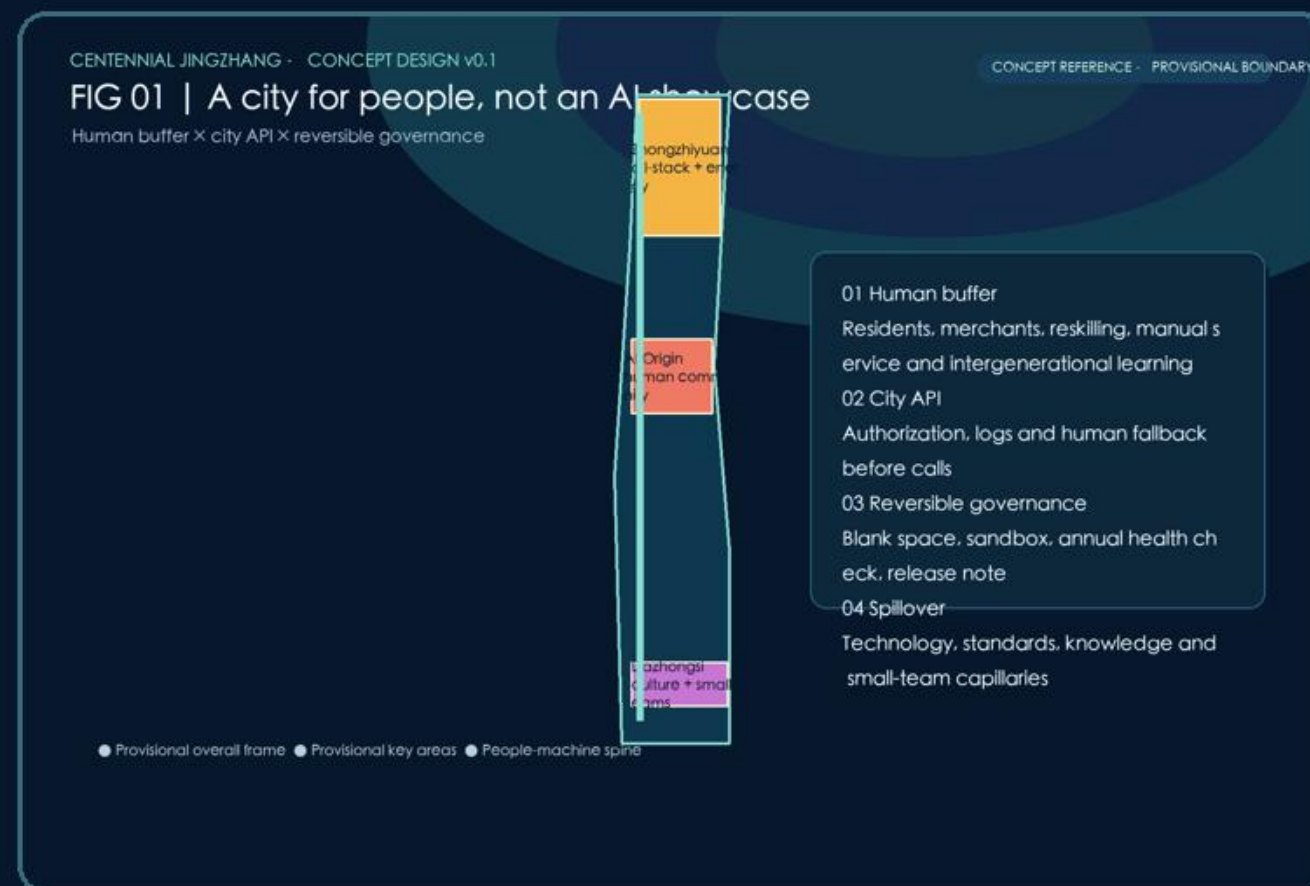

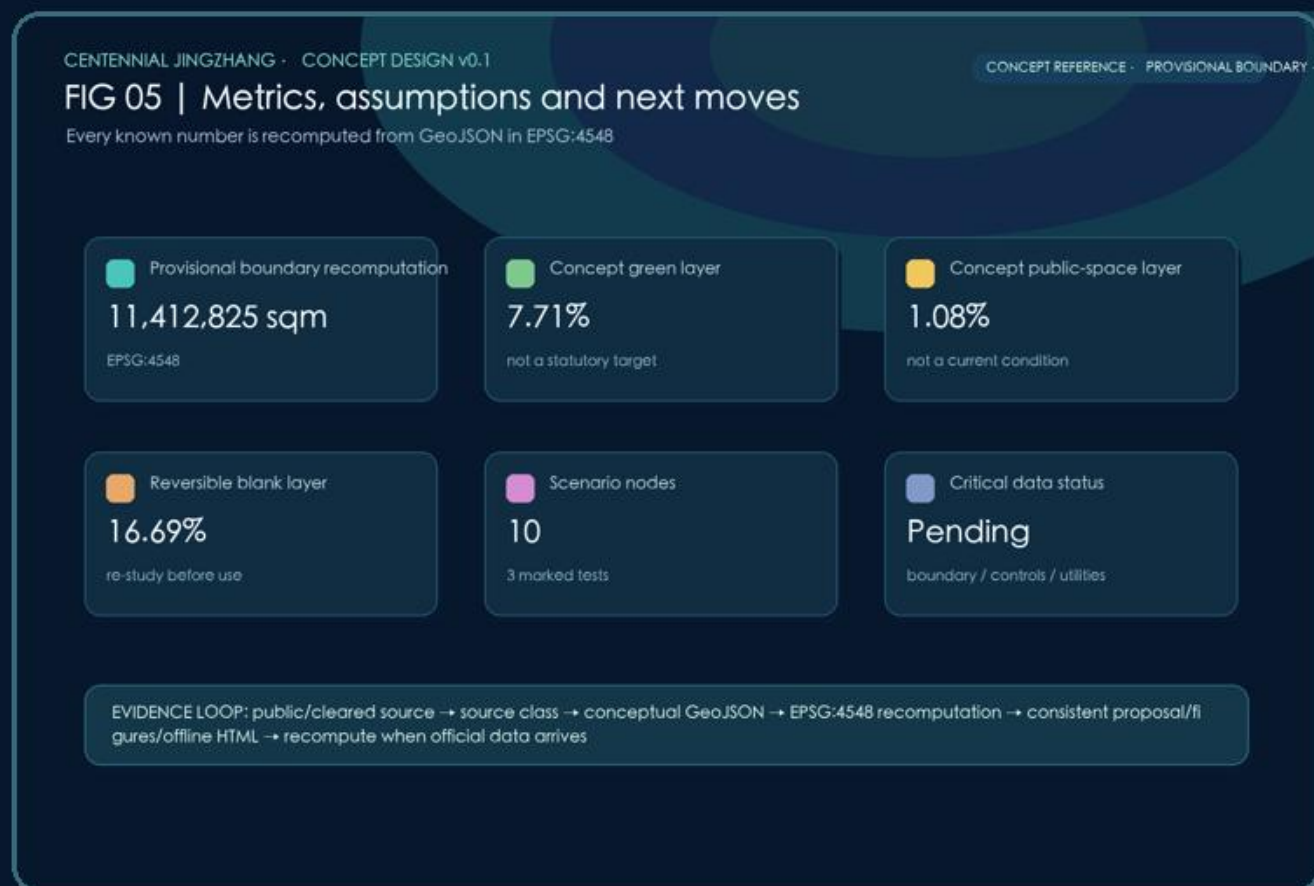

- 1 Walking and accessible paths always remain usable
 - 2 Machine tests are visible, stoppable and available
 - 3 Low-altitude logistics needs responsibility, insurance and authorization before spatial discussion
 - 4 Night service retains a manual front desk and a safe fallback
- BLUE-GREEN: river buffer + no-screen green + AI risk explanation, not an engineering promise.

All lines are conceptual paths, not redlines, flight routes, permits or utilities.

This booklet is a concept reference: provisional boundary, layer recomputation and pending data are disclosed. It is not a statutory control, engineering feasibility statement or investment commitment.
