## PLANNING RESPONSE

- 01 Phased implementation**  
Coordinate existing-space assessment, missing-link connections, and operational integration.
- 02 Differentiated core roles**  
Apply distinct approaches to the cross-river renewal area, university-adjacent network, and transit renewal area.
- 03 Application-oriented AI**  
Advance projects through demand definition, reproducible PoC, validation, procurement, and 90/180-day review.
- 04 Scope-limited evidence**  
Local official data, including Lanjing Lijia, applies only to the corresponding implementation unit.

## SHARED OUTPUT

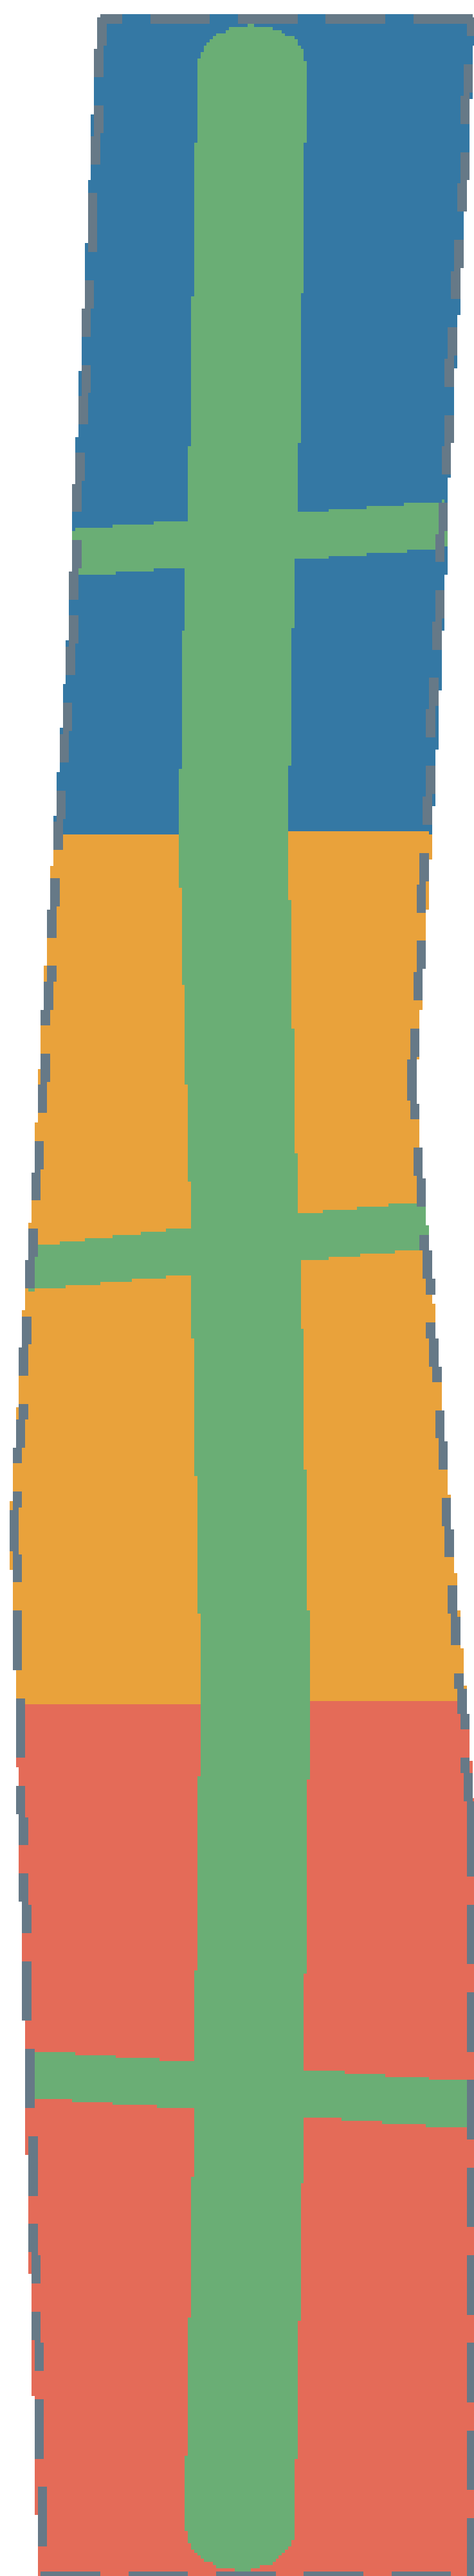

A traceable urban-application record defining the demand owner, accountable party, evaluation result, exit conditions, and spatial restoration requirements.

# Programmatic Land-Use Structure | Four Conceptual Action Areas

RAILWEAVE / V2.0

Complete coverage supports internal consistency checks; statutory controls remain subject to Regulatory Detailed Planning and official approvals.

PROGRAMMATIC PARTITION / CONCEPTUAL LAND-USE PLAN / PROVISIONAL BOUNDARY

## FOUR ACTION AREAS

- 0802

**Open Validation & R&D**  
Controlled testing · independent review · public communication
- 0702

**University & Talent Services**  
Innovation transfer · community needs · integrated services
- 05

**Scenario Application & Services**  
Demand matching · procurement services · international exchange
- 1401

**Jing-Zhang Axis & Three Chains**  
Existing-condition assessment · Blue-Green Space links · low-impact operation

## EVIDENCE STATUS

- KNOWN: official scope wording; text-only renewal-area extents; built park segments; local implementation units.
- CONCEPTUAL RECOMMENDATIONS: three cores; four action areas; three cross-corridor Evidence Chains.
- TO BE CONFIRMED: statutory land use; FAR; Building Height; ownership; DRR Strategy; Official Planning Boundaries; utility capacity.

# Three Differentiated Cores | Distinct Functions, One Implementation System

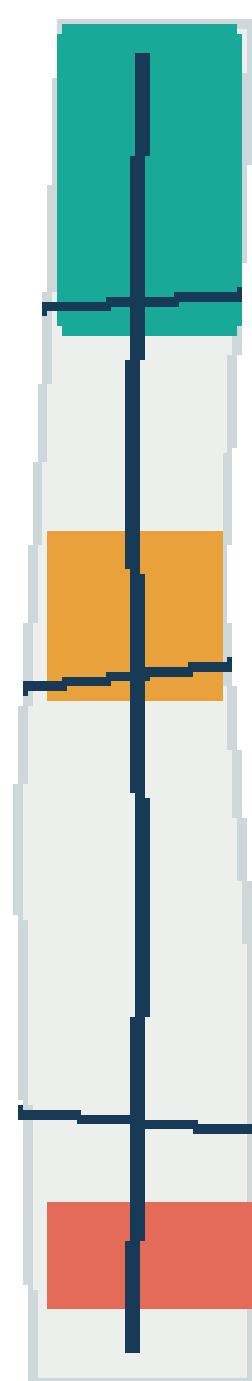

RAILWEAVE / V2.0

TESTING AND VALIDATION · INNOVATION TRANSFER AND COMMUNITY COLLABORATION · SCENARIO APPLICATION

Zhongzhiyuan AI Independent Innovation Acceleration Area

OPEN VALIDATION BASE

Trusted testing and validation results

## SPATIAL COMPONENTS

Indoor validation space / controlled test yard / walking and cycling test loop / public observation zone / safety review room

## ENTRY CONDITIONS

Insurance, emergency stop, logs, and independent Human Review are in place before Scenario Access.

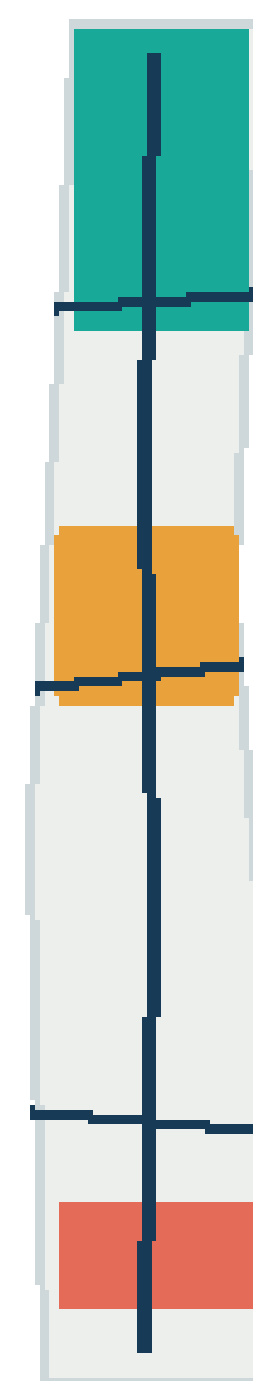

**RESULT: pass / corrective action / documented exit**

KDA envelope: Provisional Boundary / Conceptual Recommendation

Beijing AI Origin Community

INNOVATION COLLABORATION DISTRICT

Transfer-ready teams and community needs

## SPATIAL COMPONENTS

Shared ground floor / transfer service point / talent services / community forum / evening learning / housing services

## ENTRY CONDITIONS

A real demand, data boundary, and documented community feedback are in place before validation.

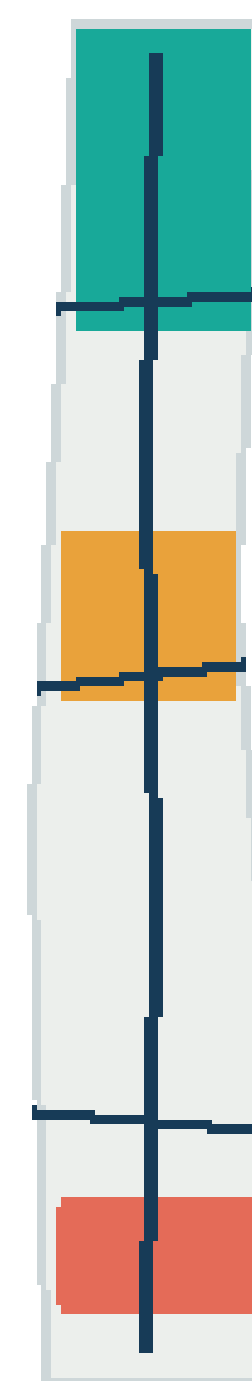

**RESULT: PoC / further study / managed exit**

KDA envelope: Provisional Boundary / Conceptual Recommendation

Dazhongsi AI Industry Cluster

SCENARIO APPLICATION CENTER

Scenario application, procurement, and delivery

## SPATIAL COMPONENTS

Demand-matching hall / procurement services / enterprise meeting area / flexible release hall / transit-city lounge / application review

## ENTRY CONDITIONS

A demand owner, budget responsibility, acceptance criteria, and operations are in place before long-term deployment.

**RESULT: procurement / deferred procurement / 90–180-day review**

KDA envelope: Provisional Boundary / Conceptual Recommendation

# Jing-Zhang Public Axis Continuity | Three Cores and Three Blue-Green Links

RAILWEAVE / V2.0

Assess access status, accessibility, crossings, walking and cycling conflicts, station links, waterfront safety, and night-time operation.

L5 colored alignments: Conceptual Recommendations within a Provisional Boundary.

Basemap data © OpenStreetMap contributors, ODbL 1.0 · OSM base 2026-08-11 · working reference, not survey/statutory

## SIX CONTINUITY CHECKS

- 01 ACCESS STATUS**  
Record construction completion, formal opening, and continuous access separately.
- 02 ACCESSIBILITY**  
Check station entrances, ramps, steps, crossings, and step-free access point by point.
- 03 CYCLING SAFETY**  
Assess cycling priority, parking, intersections, and walking–cycling conflicts by time period.
- 04 NIGHT-TIME USE**  
Review lighting, assistance, noise control, and staffed service provision.
- 05 WATERFRONT SAFETY**  
Prioritize river management, flood-access corridors, and removable-facility conditions.
- 06 OPERATIONS**  
Assign an accountable party, implementation cost, and closure threshold to each intervention.

# Implementation Metrics | Spatial Performance, Evidence Maturity, and Application Cycle

RAILWEAVE / V2.0

Known values are reproducible; pending values remain unassigned; operational metrics begin after baseline surveys.

## EVIDENCE MATURITY LEVELS

Bars show the review sequence, not the current completion rate.

## PENDING CONTROL DATA

- Floor Area Ratio and Building Height
- Building-by-building DRR Strategy
- Official Planning Boundaries and traffic flows
- Verified continuous open length
- River blue lines and flood levels
- Municipal and computing capacity
- Procurement budget and five-year cash flow

Evidence boundary: local official data applies only to its corresponding unit; news and open basemaps are Background Only and do not establish statutory controls.
