

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A traceable AI public-return belt: track trace, three civic commons, five receipts

Turn the centennial Jing-Zhang time line into a public frame for daily walking, pause, questioning, learning, and care. The three areas are not one generic campus: Zhongzhiyuan verifies, AI Origin translates, Dazhongsi returns.

CONCEPT / PROVISIONAL GEOMETRY
Spatial content uses provisional geometry as a constraint. This original generated cover is not a built or approved condition.

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

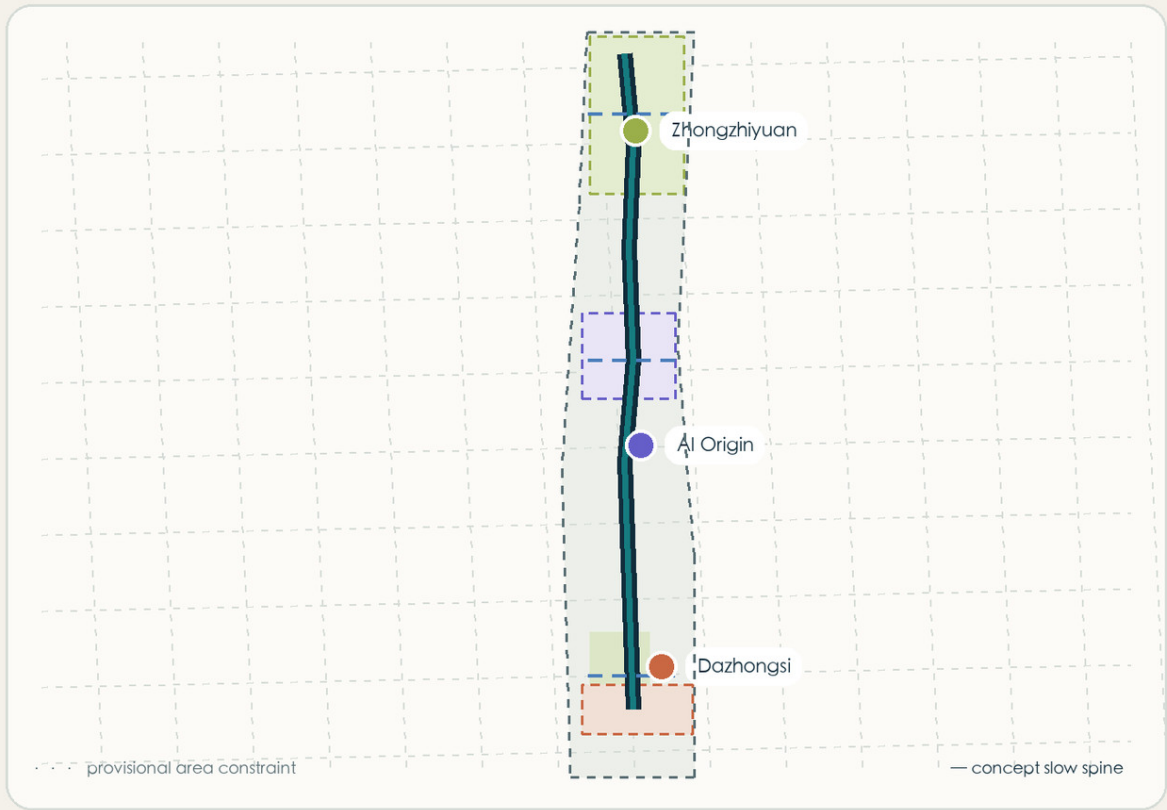

A3 Booklet | overall structure and two wings

J· Z COMMONS / 京张公地

One heritage line, three civic commons

Track trace, commons, and public receipts organize the three areas and two wings; the provisional boundary stays secondary.

CONCEPT / PROVISIONAL GEOMETRY

Spatial grammar

01 轨痕 / Track trace

A continuous walkable public frame carries the railway's temporal memory.

02 三处公地 / Three commons

Verification, translation, and return are spatially distinct—not one generic AI campus.

03 五张凭据 / Five receipts

Source, test, release, review, return: each names a steward, review date, and stop condition.

两翼 / Two wings

Zhongguancun service wing: make IP, capital, compute, and conversion approachable. Xiaoyuehe scenario wing: test ecology and everyday service with low data and a clear exit path.

资料：公开征集与资料包 | 空间图层：概念建议 + 暂定几何，非红线、非工程图、非审批依据

DESIGN MOVE

One line links industry, public life, and governance

The track trace does not redraw rail or road engineering. It organizes slow mobility, shade, service, and readable receipts as a public interface that can be iterated.

Three commons

Verification, translation, and return each have distinct users, sections, and care actions.

Two wings

The service wing organizes approachable factors; the scenario wing organizes low-risk, pausable public trials.

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A3 Booklet | three scales and spatial questions

J· Z COMMONS / 京张公地

CONCEPT / PROVISIONAL GEOMETRY

Three scales, not three overlaid maps

Research, urban design, and key-area prototypes work with different questions and different evidence.

One line, three distinct questions

43.6 km²

COORDINATED RESEARCH

Industry factors, talent, regional coordination, and ecological network.

11.4 km²

OVERALL URBAN DESIGN

Renewal, public interfaces, slow mobility, and service support around the heritage park.

368.4 ha

THREE-AREA PROTOTYPES

Walkable, testable, reviewable commons and service prototypes.

Not statutory zoning: four hand-off questions for urban design

地面 / Ground

shade, rainwater, walking, pause

边界 / Threshold

ground floors, corners, bookable public interfaces

支撑 / Support

service, testing, conversion, maintenance

凭据 / Receipt

purpose, stewardship, feedback, pause

资料：公开征集与资料包 | 空间图层：概念建议 + 暂定几何，非红线、非工程图、非审批依据

DESIGN MOVE

Different scales do not need one overloaded diagram

43.6 km², 11.4 km², and 368.4 ha carry research, overall urban design, and three-area prototypes. Functional bands support concept discussion and area recalculation only—not statutory zoning or ownership.

Four layers

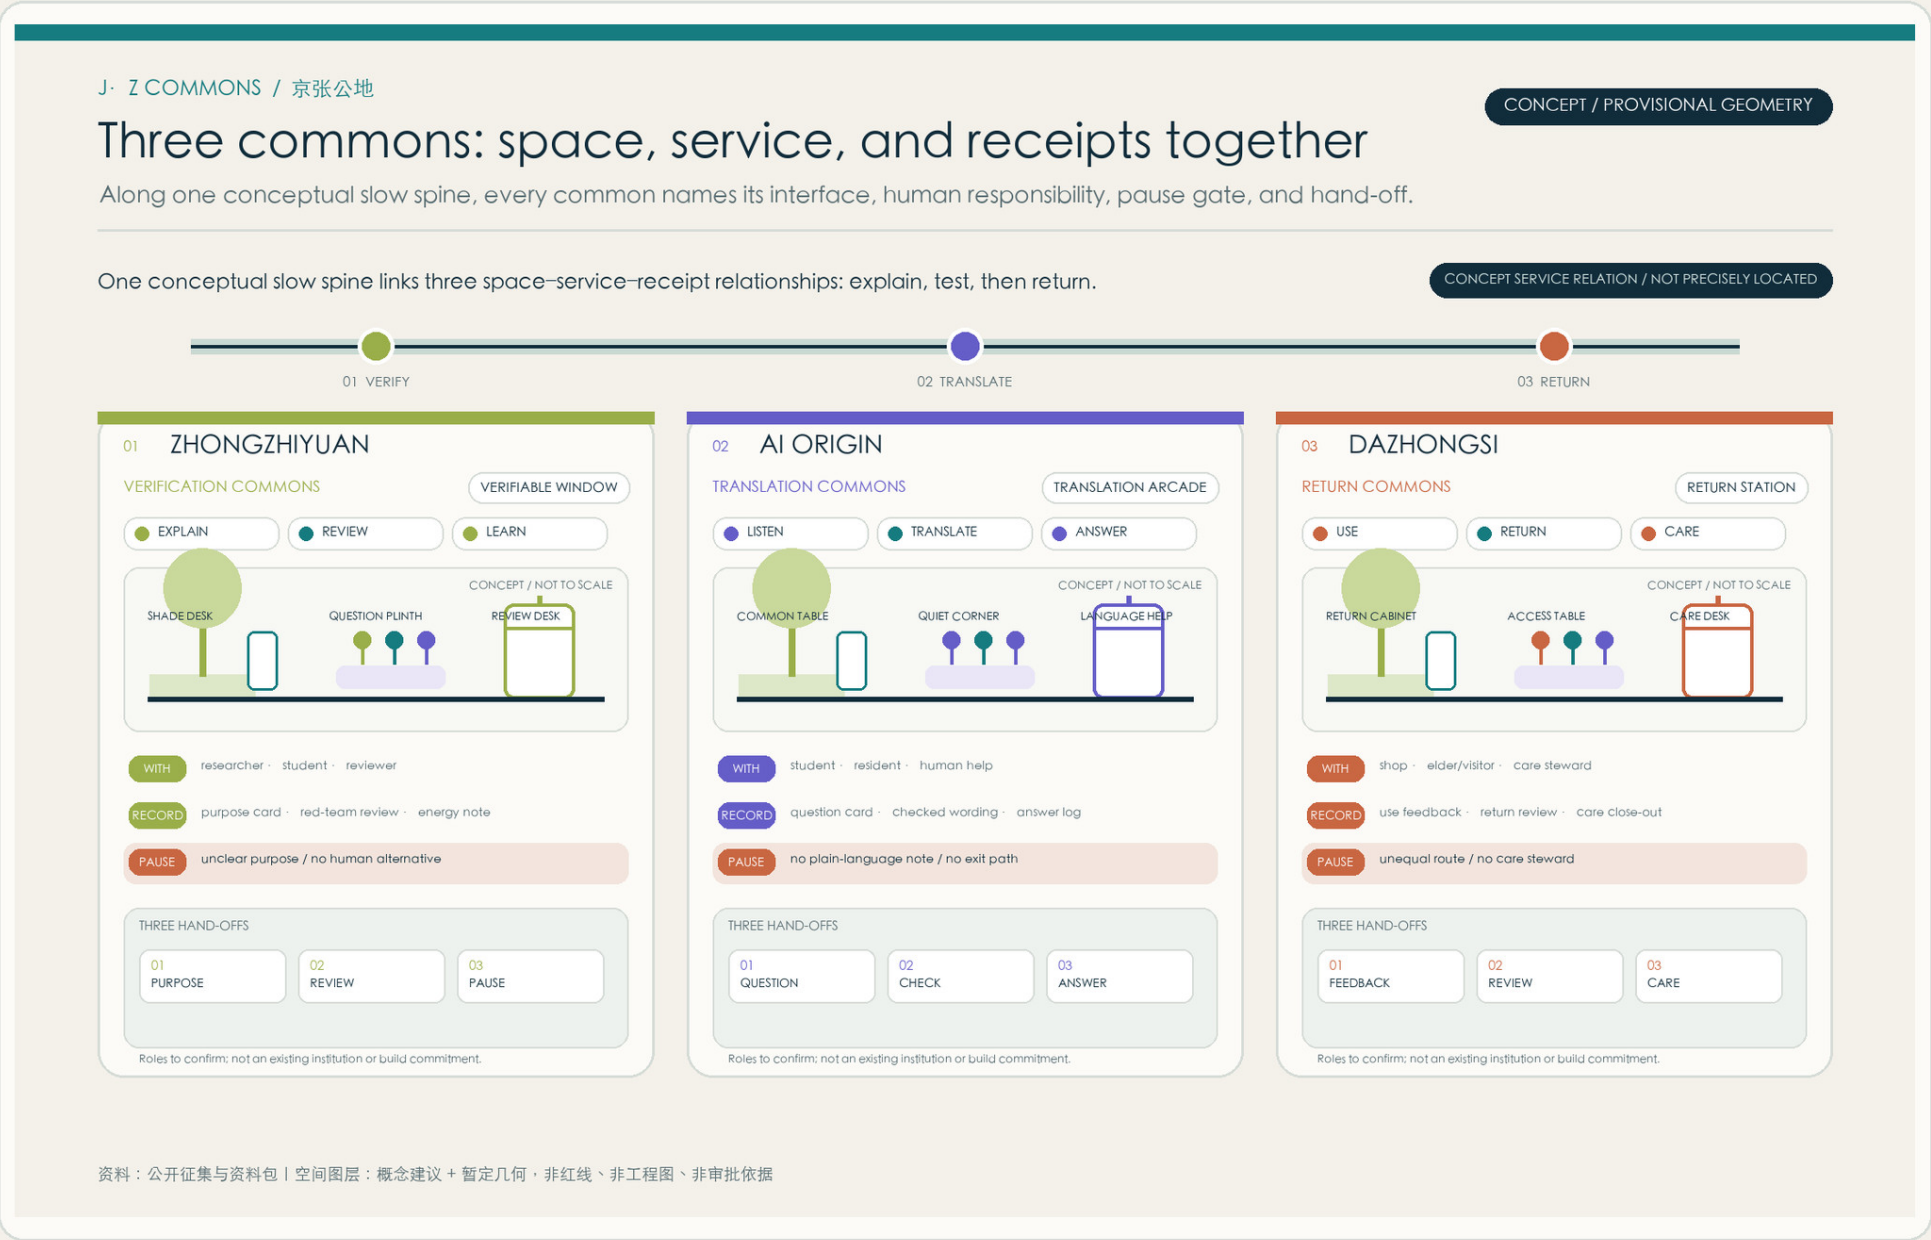

Ground, threshold, support, receipt align space, service, and responsibility.

Hand-off

When cleared boundary, baseline, and engineering data arrive, layers and metrics can be replaced and rerun.

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A3 Booklet | three commons and civic landmarks

DESIGN MOVE

Three commons: three civic relations

Zhongzhiyuan moves verification to the public edge; AI Origin turns specialist language into co-editable service; Dazhongsi makes return and care visible at a daily front room. All three landmarks are service interfaces, not isolated images.

People

Researchers, students, residents, small businesses, and staff have different but reachable actions.

Pause

Each place pairs readable explanation, human help, review, and pause conditions.

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A3 Booklet | identity, wayfinding, civic components

J· Z COMMONS / 京张公地

CONCEPT / PROVISIONAL GEOMETRY

J· Z COMMONS: not a logo, but a civic promise

Track is time, double line is companionship, and an open loop is a civic relation that can be questioned, corrected, and returned.

J· Z COMMONS

Jing-Zhang Commons / 京张公地

Not a named campus, but a civic agreement held in common—one that can leave a trace, be accountable, and return value.

TRACK

time is readable

DOUBLE LINE

people and tech travel together

OPEN LOOP

question, correct, return

四件公共组件 / Four civic components

SHADE TABLE

EXPLAIN

QUESTION PLINTH

EXPLAIN

COMMON TABLE

EXPLAIN

RETURN CABINET

EXPLAIN

资料：公开征集与资料包 | 空间图层：概念建议 + 暂定几何，非红线、非工程图、非审批依据

DESIGN MOVE

Make identity an operating system for civic promise

Track fold, double line, and open loop are not decoration: they make time readable, people and technology companions, and service open to question, correction, and return.

Components

Shade table, question plinth, common table, and return cabinet place explanation, pause, co-editing, and care in daily interfaces.

Boundary

No enterprise mark, unlicensed heritage image, or claim that concept wayfinding already exists.

Concept package | provisional geometry; not a redline, engineering drawing, or approval basis

05

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A3 Booklet | ecosystem map and regional interfaces

J· Z COMMONS / 京张公地

CONCEPT / PROVISIONAL GEOMETRY

Not a tenant list: six interfaces make innovation approachable

Research, transfer, scenarios, return, learning, and review form a visible collaboration network across three areas and two wings.

RESEARCH

LEARNING

RETURN

TRANSFER

REVIEW

SCENARIOS

questions + model limits

public question + co-editing

daily service + care

IP, space, partner interface

human review + appeal

low-data trials

CIVIC RETURN

Regional synergy is an open interface, not a pre-agreed partnership

NORTH LATITUDE

FUTURE SCIENCE CITY

HUAIROU SCIENCE CITY

BEIJING E-TOWN

JING-JIN-JI

Civic component library: every part carries a public p

SHADE TABLE

QUESTION PLINTH

COMMON TABLE

RETURN CABINET

purpose, steward, exit

booking, co-editing, translation

tools, care, review

ZHONGGUANCUN SERVICE WING

Turn space, IP, talent, capital, compute, and scenario questions into an approachable front desk; no partners or funding are presumed.

XIAOYUEHE SCENARIO WING

Use shade, rainwater, walking, and everyday service as a low-data, reversible test ground.

资料：公开征集与资料包 | 空间图层：概念建议 + 暂定几何，非红线、非工程图、非审批依据

DESIGN MOVE

An ecosystem is not a list, but a set of reachable interfaces

Research, transfer, scenarios, return, learning, and review work around a civic-return protocol. Regional synergy is an open interface, not an agreed partnership or funding promise.

Two wings

The service wing turns factors into an approachable front desk; Xiaoyuehe turns ecology and daily service into low-risk prototypes.

Regional

North Latitude, Future Science City, Huairou, E-Town, and Jing-Jin-Ji appear as knowledge, test, transfer, and story interfaces pending confirmation.

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A3 Booklet | regional synergy and open exchange

J· Z COMMONS / 京张公地

CONCEPT / PROVISIONAL GEOMETRY

Regional synergy is not an alliance map: five pending exchange protocols

Every interface states what can be exchanged, translated, made public, and what must remain not started.

Regional synergy is not an alliance map: it is five pending exchange protocols

PENDING / NO PARTNERSHIP, FUNDING, OR DEPLOYMENT CLAIM

INTERFACE	PROPOSED INPUT	LOCAL TRANSLATION	PUBLIC OUTPUT
NORTH LATITUDE	daily access questions	de-identified question cards	question-response format
FUTURE SCIENCE CITY	research questions + methods	bounded prototype comparison	failure-question log
HUAIROU SCIENCE CITY	independent review questions	review-role template	non-conclusive review list
BEIJING E-TOWN	validated handoff questions	scope/pause/restore fields	reusable handoff format
JING-JIN-JI	versioned scenario/return format	bilingual public receipts	comparable return records

Shared entry gate: purpose, permission, accountable role, public level, independent review. If one is missing, the interface remains not started.

资料：公开征集与资料包 | 空间图层：概念建议 + 暂定几何，非红线、非工程图、非审批依据

DESIGN MOVE

Synergy must state what it exchanges—and what is not y

Five regional interfaces only propose knowledge, methods, formats, and review questions that can be jointly confirmed. Without purpose permission, accountable roles, public level, and independent review, an interface remains not started.

Input

No un-cleared data, funding promise, or institutional endorsement is exchanged—only public questions, methods, and formats.

Output

Outputs are reusable source, pause, restoration, and public-return formats—not cross-regional delivery conclusions.

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A3 Booklet | executable public receipts

J· Z COMMONS / 京张公地

CONCEPT / PROVISIONAL GEOMETRY

Five receipts are not a slogan: how one rule accepts or rejects

Synthetic, non-personal tabletop records test public source, human alternative, independent review, expiry, and return.

How one public question is accepted—or returned

SYNTHETIC RECORDS / NOT A LIVE SERVICE

Offline tabletop replay: 1 synthetic record accepted; 6 synthetic records explicitly rejected

SOURCE

public source + plain purpose

REJECT

missing source / personal data

TEST

human alternative + pause

REJECT

no human alternative

RELEASE

limited scope + active expiry

REJECT

record expired

REVIEW

independent review + appeal

REJECT

maker reviews itself

RETURN

objection becomes next question

REJECT

return unresolved

P01 | multilingual question card (synthetic)

PUBLIC BRIEF

no personal data

HUMAN ALTERNATIVE

anyone may ask aloud

INDEPENDENT REVIEW

explanation can be challenged

NEXT QUESTION

objection is not silent

The runner checks only synthetic-record completeness; it creates no real service, permission, performance, or implementation conclusion.

资料：公开征集与资料包 | 空间图层：概念建议 + 暂定几何，非红线、非工程图、非审批依据

DESIGN MOVE

One incomplete receipt returns the service

Five receipts are written as a zero-dependency offline tabletop rule. It accepts one synthetic multilingual-question card and rejects six common failure conditions. The result shows only whether rules check synthetic records—not a field service.

Human

Every digital aid needs a non-digital alternative, independent review, and appeal; one absence rejects it.

Return

An objection is not a note: it must become the next question, or the current record cannot continue.

Concept package | provisional geometry; not a redline, engineering drawing, or approval basis

08

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A3 Booklet | slow mobility, blue-green, public interface

J· Z COMMONS / 京张公地

Heritage slow spine = climate + service + review

Shade, rainwater, inclusive pause, and low-glare information support everyday use—not a screen spectacle.

CONCEPT / PROVISIONAL GEOMETRY

One spine, three speeds, four climate-service components

WALK

LISTEN

PAUSE

shade buffer / continuous path / water-sensitive pause / low-glare information

Public-interface section

SHADE

WALK

HELP

ACCESS IS NOT AN ADD-ON

Human help, readable wayfinding, and non-digital alternatives appear together.

GREEN IS NOT DECORATION

Shade, stormwater, ecological learning, and maintenance work as one.

资料：公开征集与资料包 | 空间图层：概念建议 + 暂定几何，非红线、非工程图、非审批依据

DESIGN MOVE

The heritage slow spine is also a climate, service, and review

Shade, rainwater, inclusive pause, low-glare information, and human help form one daily section. New infrastructure is explainable, stoppable service with a contactable steward.

Climate

No unverified hydrological or engineering performance is claimed; start with low-intervention, maintainable climate buffering.

Access

Non-digital alternatives and human help appear alongside smart terminals.

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A3 Booklet | ten scenario cards and pause gates

J· Z COMMONS / 京张公地

CONCEPT / PROVISIONAL GEOMETRY

Ten scenario cards: every service has a reason to stop

Purpose, place, people, and pause gates sit in one human-readable discussion table.

Ten scenario cards: not a feature list, but a pausable civic protocol

SCENARIO	PLACE	WITH	PAUSE GATE
MODEL BOUNDARY WALK	Verifiable Window	researcher + student	pause if unclear
TRUST LEARNING DESK	Shade Table	student + resident	pause without human alternative
SMALL-BIZ REVIEW QUEUE	Return Cabinet	shopkeeper + steward	pause beyond purpose
ACCESS ROUTE EXPLAINER	Question Plinth	visitor + access partner	pause if route unequal
HERITAGE STORY CO-EDIT	Translation Arcade	elder + student	no source, no release
CIVIC ISSUE WALL	Common Table	resident + reviewer	pause without appeal
LOW-CARBON COMPUTE BOOKING	Service Front	developer + care	pause without energy note
NIGHT-SAFETY FEEDBACK	Slow Spine	night walker + human help	pause if unsafe
PUBLIC CARE MATCH	Care Learning Point	carer + resident	pause without steward
MULTILINGUAL VISITOR Q&A	Translation Steps	visitor + volunteer	pause if unverifiable

资料：公开征集与资料包 | 空间图层：概念建议 + 暂定几何，非红线、非工程图、非审批依据

DESIGN MOVE

Every AI scenario first states place, people, and when to

The ten cards are not an approved service list. They are civic protocols that can be discussed with real users, reviewed by people, and returned to problem definition at any time.

Three tests

Model red-team, resident comprehension, and service-return review are conceptually tested across the three commons.

Five personas

Researchers, founders, students/developers, residents, and staff/small-business operators all have a non-digital alternative and exit path.

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A3 Booklet | trusted implementation and public return

J· Z COMMONS / 京张公地

CONCEPT / PROVISIONAL GEOMETRY

Implementation is not a schedule: trust before scale

Evidence, reversible prototypes, daily service, and public review make a hand-off ladder.

From concept to trusted extension: four phases, five exit conditions

0

1

2

3

Exit conditions: unclear | inaccessible | excess data | no human alternative | no care steward

Three commons, three scales of trial

ZHONGZHIYUAN

model boundary + red-team review

AI ORIGIN

comprehension + multilingual service

DAZHONGSI

return catalogue + care review

THREE HAND-OFFS

PROTOCOL

purpose, minimum data, consent, pause

SPACE

walkable, bookable, maintainable interface

OPERATIONS

steward, review date, feedback, return

资料：公开征集与资料包 | 空间图层：概念建议 + 暂定几何，非红线、非工程图、非审批依据

DESIGN MOVE

Build trusted relations before scaling usable service

Evidence/co-design, reversible prototypes, daily service, and public review form a four-stage ladder. Each extension hands off protocol, space, and operation, with comprehension, access, minimum data, human alternative, and care stewardship as exit conditions.

Zero phase

The 90-day zero phase only closes evidence, permission, tabletop, access, and restoration conditions; it promises no construction or public operation.

Cost method

Quantities and prices remain blank until measurement, specification, quotations, and professional review exist.

Concept package | provisional geometry; not a redline, engineering drawing, or approval basis

011

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A3 Booklet | scenarios, tests, and public return

10 × 3 × 5

scenario cards × test settings × personas

源 / SOURCE
Declare purpose, minimum data, and steward.

测 / TEST
Test with users, withdrawal, and a human alternative.

审 / REVIEW
Review, appeal, and pause happen before extension.

返 / RETURN
Return and care become the next public record.

年度循环 / ANNUAL LOOP

Spring: question/translation | Summer: low-data trials | Autumn: Open Ledger Week | Winter: care and redesign

If comprehension, access, minimum data, or care readiness fails, pause and return to problem definition.

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

A3 Booklet | an everyday walkthrough of three commons

One conceptual slow-walk trace joins three daily public relations: understand, co-edit, then return.

01 VERIFY

Public explanation, low-risk testing, and a human alternative let people understand before deciding whether to participate.

02 TRANSLATE

A walk-through arcade, shared table, and non-technical language make a question co-editable, contestable, and recordable.

03 RETURN

A street-visible front room returns care, objection, and benefit to the next public question instead of silently closing them.

SHARED GATE

Without cleared inputs, accountable roles, permission, independent review, and professional/user review, do not enter real site or service discussion.
