

Human City OS / Spatial Evidence Overview

Three provisional focus areas, six design bands, five concept corridors and sixteen scenario anchors

PACKAGE v1.6

CONCEPT / PROVISIONAL

Review-visible commitments

geometry → action → metric, all still conceptual

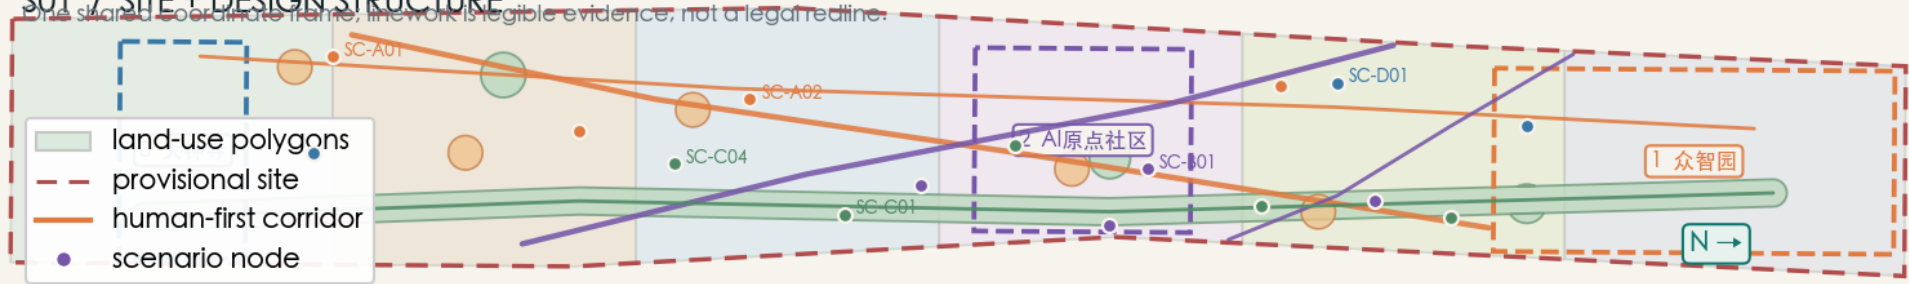

SITE AREA 11.41 km² provisional / recalc after official polygon	FOCUS AREAS 03 true outlines, not generic bands
SCENARIO NODES 16 4 human / 4 machine / 6 validation	GREEN SPACE 11.12% 1,269,257 m² in EPSG:4548

WHAT THE MAP CHANGES

- 01 recognisable key-area outlines
- 02 corridors touch real geometry
- 03 human and machine routes share one frame
- 04 unknown controls remain explicit

ALL SPATIAL MOVES ARE CONCEPTUAL / REFERENCE SCHEMES FOR PROFESSIONAL DEEPENING.

S01 / SITE + DESIGN STRUCTURE

Human City OS / Six Design Bands

Shared boundaries, recomputed shares and a visible reversible layer

PACKAGE v1.6

CONCEPT / PROVISIONAL

Six replayable bands

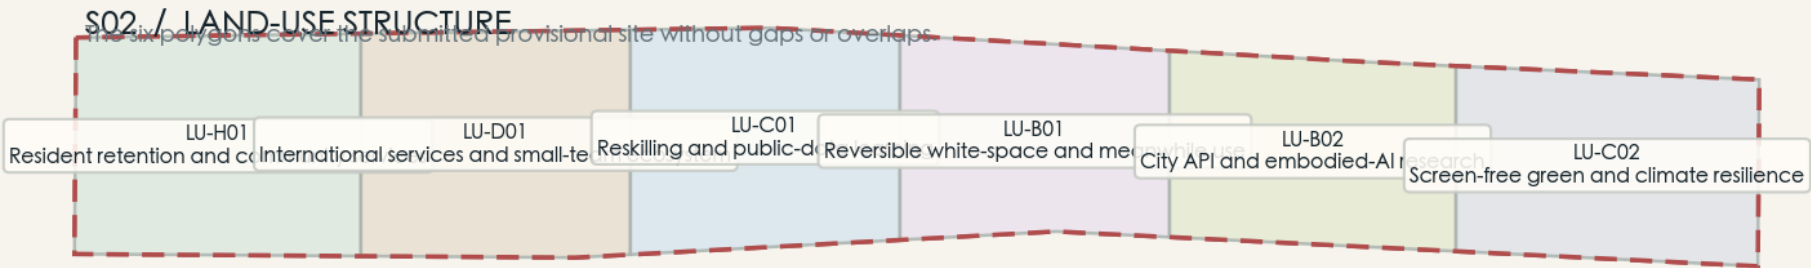

area / share are package-derived; control values stay unknown

LU-H01	Resident retention and community services	2.09 km²	·	18.28%
LU-D01	International services and small-team ecosystem	2.02 km²	·	17.68%
LU-C01	Reskilling and public-data learning	1.95 km²	·	17.06%
LU-B01	Reversible white-space and meanwhile use	1.72 km²	·	15.09%
LU-B02	City API and embodied-AI research	1.77 km²	·	15.48%
LU-C02	Screen-free green and climate resilience	1.87 km²	·	16.40%

SHARED-EDGE RULE

Neighbouring polygons inherit the same coordinates; no hand-drawn seam is introduced.

Conceptual allocation only. No FAR, height, construction or approval claim.

Human City OS / Three Focus Areas

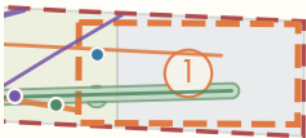

True provisional outlines, local interfaces and distinct human-first actions

PACKAGE v1.6

CONCEPT / PROVISIONAL

S03 / KEY AREA LOCATOR

One shared display frame, nested outlines are provisional constraints.

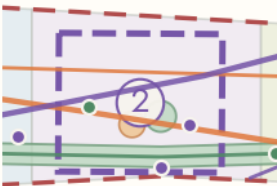

01 Zhongzhiyuan

1.93 km² · 16.90% of provisional site

Retention ledger + reskilling relay

human-first / anti-displacement provisional / concept only

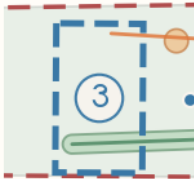

02 AI Origin

1.04 km² · 9.14% of provisional site

Human counter + intergenerational learning

digital inclusion / accessible service provisional / concept only

03 Dazhongsi

0.72 km² · 6.31% of provisional site

Sandbox court + public data interface

machine-city rights with accountability provisional / concept only

Human City OS / Human–Machine Mobility + Blue–Green Resilience

Concept corridors meet actual submitted geometry; operating status is not authorized or run

PACKAGE v1.6

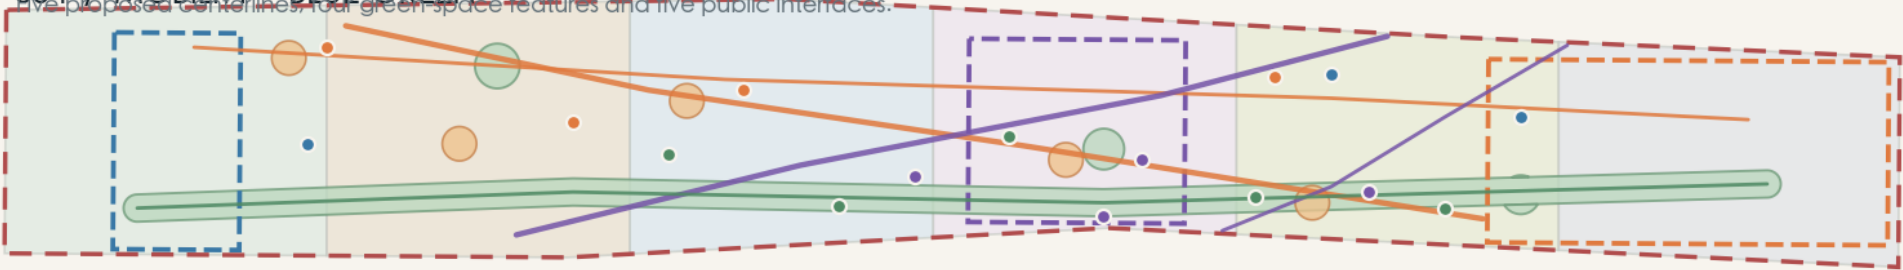

CONCEPT / PROVISIONAL

Four spatial rules

lengths are geometry-derived; no road right-of-way is asserted

S04 / MOBILITY + BLUE-GREEN

five proposed centerlines, four green space features and five public interfaces.

SKILL / 技能再造	5.919 km
replacement risk → retraining → new work	
SILICON / 硅基通行	4.586 km
human-machine mixed movement	
LOW-AIR / 低空分层	2.015 km
concept layer; sandbox first	
SPONGE / 小月河翼	area / line
flood path + sponge monitoring	

BLUE-GREEN CHECK

Green geometry 1.269 km² / 11.12%; no-screen gardens 82,701 m².

A concept map for professional deepening, not an engineering flood or mobility model.

Human City OS / Metrics + Evidence

Known values point back to geometry; unresolved controls remain visible as data gaps

PACKAGE v1.6

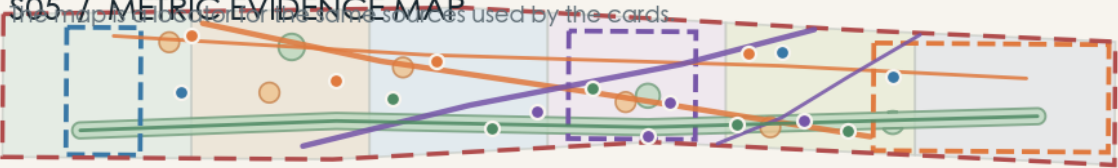

CONCEPT / PROVISIONAL

Recomputable metrics

status=known; confidence=low unless noted

SITE AREA 11.41 km² site_boundary.geojson · EPSG:4548	LAND-USE COVER 100.00% six polygons / shared edges
GREEN RATIO 11.12% 1,269,257 m²	PUBLIC SPACE 1.06% 121,447 m²
SKILL CORRIDOR 5.919 km ROAD-A-SKILL	SCENARIO NODES 16 constraints.geojson

S05 / METRIC EVIDENCE MAP

UNKNOWN / 待补数据

official boundary · FAR / height · resident retention rate · sustained employment transition · manual-service equivalence · PUE · green-electricity share · recovered heat
