

Three scope layers and overall structure

KEY READINGS ON THIS BOARD

One public baseline must stay continuous: the three scope layers express working levels, not approval levels; every drawn boundary is provisional working geometry.

02 / OVERALL STRUCTURE

Three scope layers, one continuous public baseline

The announced c.43.6 km² research scope frames an inclusive-AI ecosystem; the c.11.4 km² overall-design scope establishes a continuous public baseline; three key areas divide validation, co-design and adoption. All drawn boundaries remain provisional working geometry.

- Continuous north-south spine
- Direct multimodal path
- Quiet low-stimulus alternative
- Three transverse interfaces
- Ten independent-completion points

03 / LAND USE + STRUCTURE

Four conceptual functions share one baseline

Functional relationships test whether R&D, public space, adoption and community service support each other. They are not existing land use, zoning, title or development-capacity conclusions.

- Universal interface R&D + validation
- Accessible park + quiet open space
- Inclusive AI services + adoption
- Independent-living co-design + community

Public-space envelope public_space	2,074,716.512 sqm	18.1788%
Deliberate overlap · spine greenway	452,986.656 sqm	3.9691%

Both ratios use the same denominator and the envelopes deliberately overlap by 452,986.656 sqm — they must not be added.

KEY READINGS ON THIS BOARD

Four conceptual functions share one baseline; the land-use drawing tests functional relationships and never replaces statutory classification, title or capacity conclusions.

05 / MOBILITY + BLUE-GREEN

Basic service remains equivalent with AI on or off

The direct multimodal path and quiet alternative run in parallel. With AI off, offline or declined, fixed signs, paper and easy-read information, staffed help and an account-free path remain available. Centrelines express conceptual relationships only.

MARK CONSTRUCTION

- Parallel sensory lines** Two solid rails carry the continuous spine for sight and sound; two dotted lines carry tactile paving and the low-stimulus alternative. Four channels run in parallel, none subordinate.
- Open node** The ring keeps openings left and right: a service can be entered and can be left. The node never closes, and never locks in one kind of body or one kind of device.
- Origin** The centre point is Every Sense Origin — where human help, human takeover and the right to stop land. Always visible, always reachable.

All four gaps sit on one construction circle. A common gauge lets different trains share one network; universal design lets different bodies share one city.

04 / Grammar in use SIGNAGE / PAVING / COLLATERAL / INTERFACE

Wayfinding SIGNAGE

The main panel carries the mark and bilingual name, a low panel adds tactile and braille layers, and the coral help post stays in view.

Tactile paving GROUND

Parallel sensory lines become paving bands; the open node becomes a dot-grid circle that can be walked around, with the help post at its centre.

Event collateral PRINT

Posters flood-hill the parallel lines, booklets keep the stop notice, and tickets stay usable without an account through mono codes and a tactile strip.

Interface SCREEN

Both channel states stay visible, stop ranks equal to human handover, and the paper version is the same grammar in an equivalent form.

06 / BRAND · CULTURE · GLOBAL

One line grammar carries brand, culture and outward communication

The brand grammar abstracts the Jing-Zhang railway's "one standard gauge" into parallel sensing lines and an open node: one gauge lets different trains share a network, universal design lets different bodies share a city. Cultural work first builds a traceable resource inventory, then chooses carriers, and only then reaches symbols and wayfinding.

07 / METRICS + EVIDENCE

Recalculated metrics show in-package consistency, not statutory figures

Scope area, building footprint, green ratio and public-space ratio derive from the submitted provisional geometry; the green and public-space envelopes share one denominator and deliberately overlap by 452,986.656 sqm, so the two ratios must not be added. Ten structural counts count the proposal's own objects and can be re-counted inside the package. Inclusion performance must come from real participants, reasonable accommodation and outcome testing; all of it is still to be tested.
