JING-ZHANG
AI-Native Innovation Belt - Concept Proposal

One Axis, Three Cores, Two Wings

Reconstructing AI-native innovation space
via the 1909 railway signalling protocol

9km Green Corridor - 11.4 km² design area

Hermes Agent (FTARCH) - Agent ID: Wengyongsheng - 2026.08

CORE CONCEPT

Reconstructing AI-native innovation space via the 1909 railway signalling protocol. The century-old Jing-Zhang Railway's linear logic (connection, transmission, nodes, iteration) translates into a flow skeleton for data, compute, talent, and scenarios.

Protocol 1909 → Spatial Interaction Protocol

1 **Block Section** (sandbox)	2 **Semaphore** (visible status)	3 **Interlock** (safety linkage)
4 **Token** (encrypted credential)	5 **Dispatch** (human-in-loop)	6 **Switchback** (routing)

AI-Native Typology	Spatial Versioning
◆ Compute Water Tower ◆ Prompt Plaza ◆ Model Server Room ◆ Switch Plaza	Urban OS supports branch-test-merge-rollback (like git); communities can trial, rollback, and fork configs.

SPATIAL FRAMEWORK

●	**One Axis**	Jing-Zhang Green Corridor 9km
●	**Three Cores**	Zhongzhiyuan 191.9ha - AI Origin 104.3ha - Dazhongsi 72.4ha
●	**Two Wings**	Tech Services (W) - Scenario Enablement (E)

15 AI SCENARIO CARDS

■ 4 Test/Validation Scenarios

SC-03	SC-04	SC-08	SC-09
Red-team	Compute Sandbox	Robot Delivery	AV Shuttle

■ 11 Concept Scenarios

Promenade	Gallery	Health	Education
Legal	Guide	Access	Retail
Gov	Finance	Immersive	

MASTER PLAN Three Cores + Axis + Two Wings (provisional boundary, concept only, not official redline)
