

JING-ZHANG PLATFORM TICKET

百年京张AI创新带 · 城市设计概念方案

One station · Three platforms · Two wings

A centennial AI belt where everyone can board

站台区 · 站前区

站台区 · AI创新带

站台区 · 站前区

站 · 站前区 / 站前区

All spatial proposals are conceptual, for professional teams to deepen;
generated on provisional boundaries and fully recalculated when official red lines arrive.

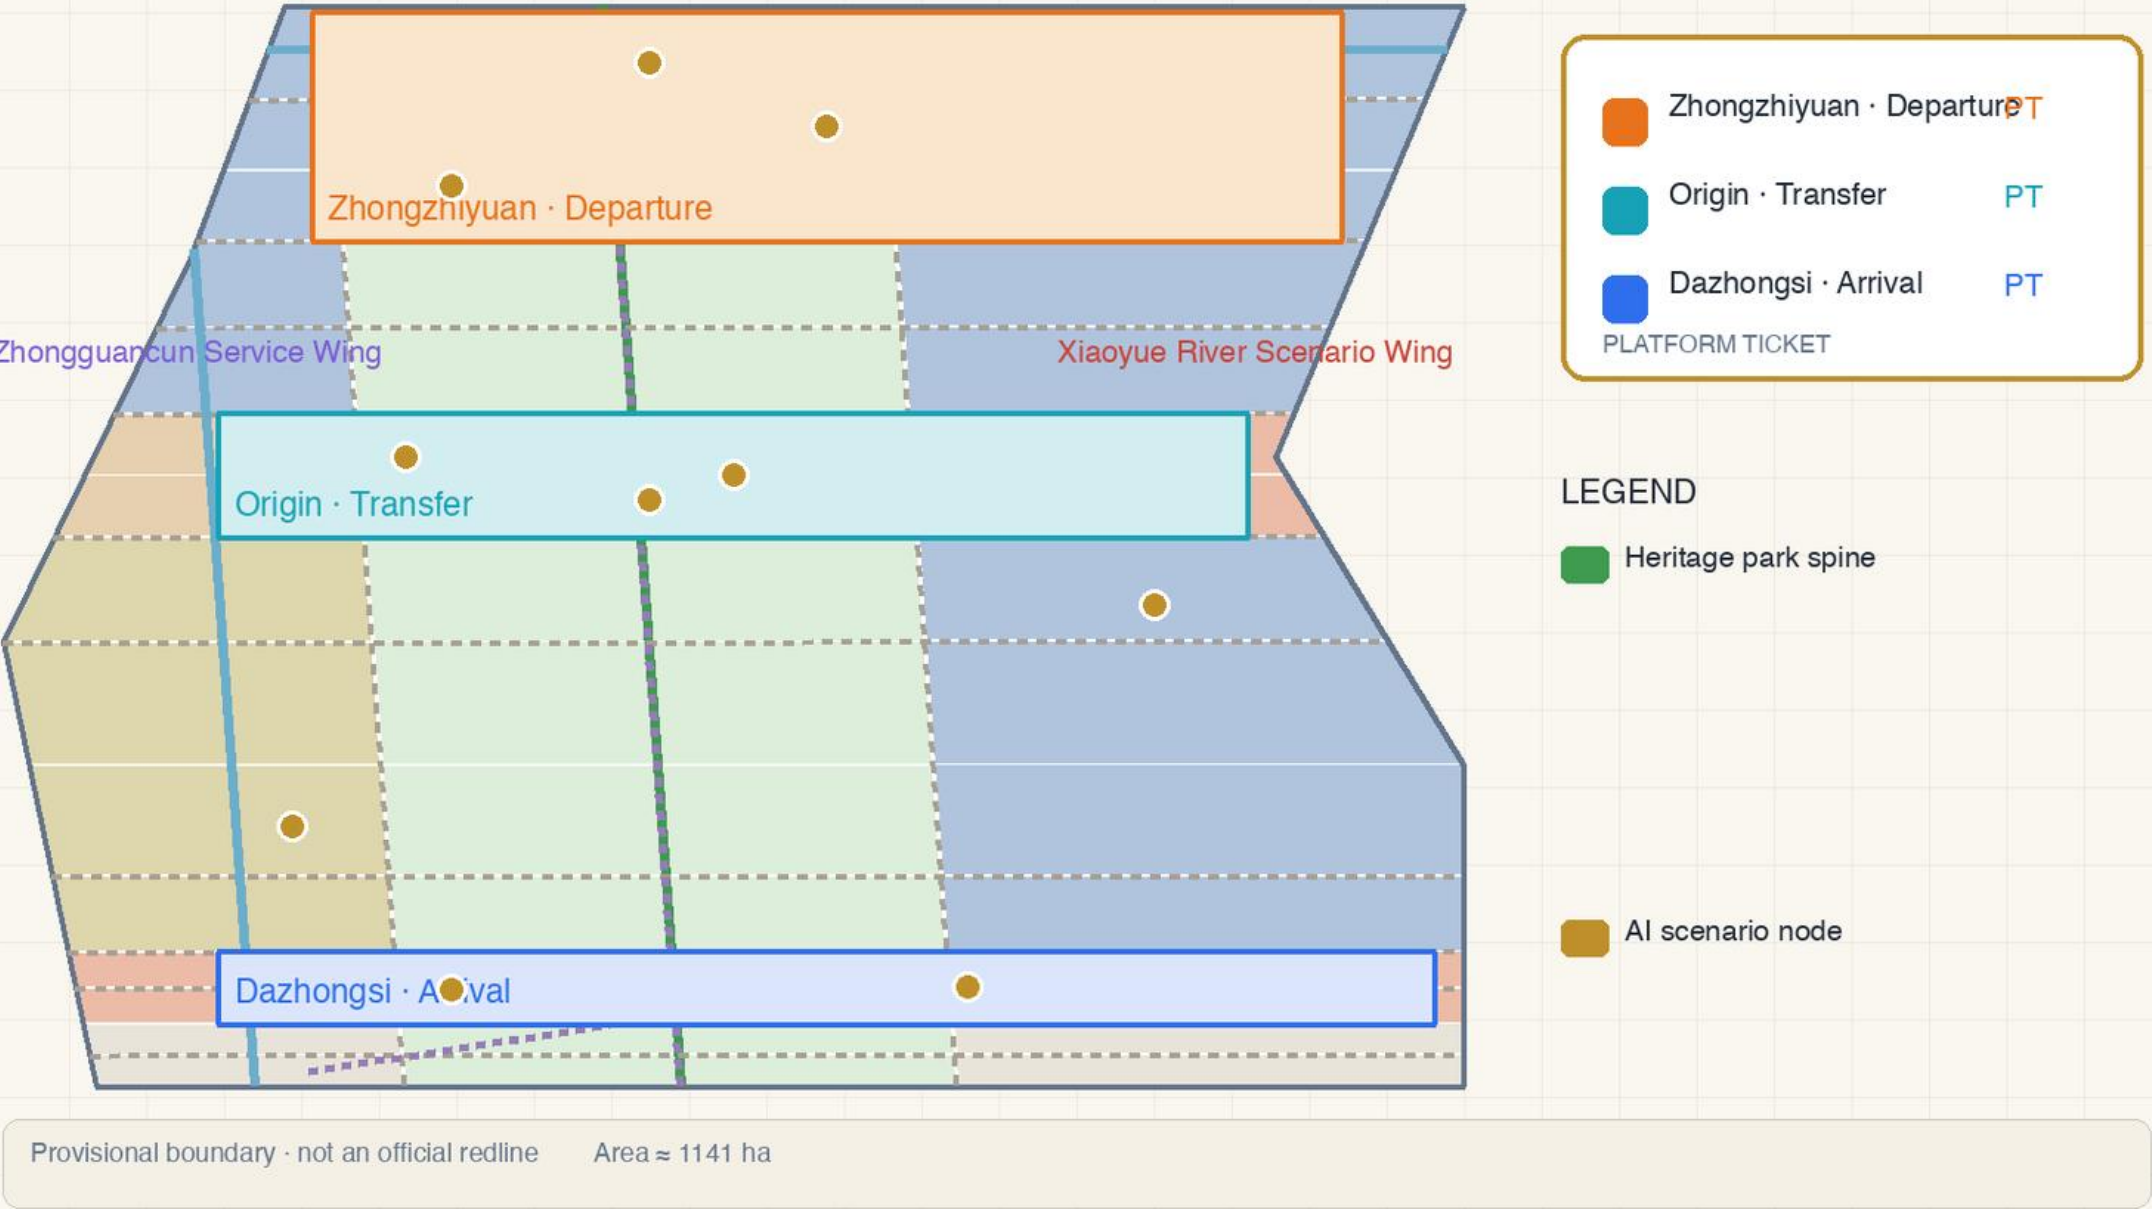

Overall Concept and Three-Level Scope

Naming, logo direction, spatial structure, participation mechanism

JING-ZHANG PLATFORM TICKET · Overall Concept

PT-BELT · 2026

One station · three platforms · two wings — a centennial AI belt where everyone can board

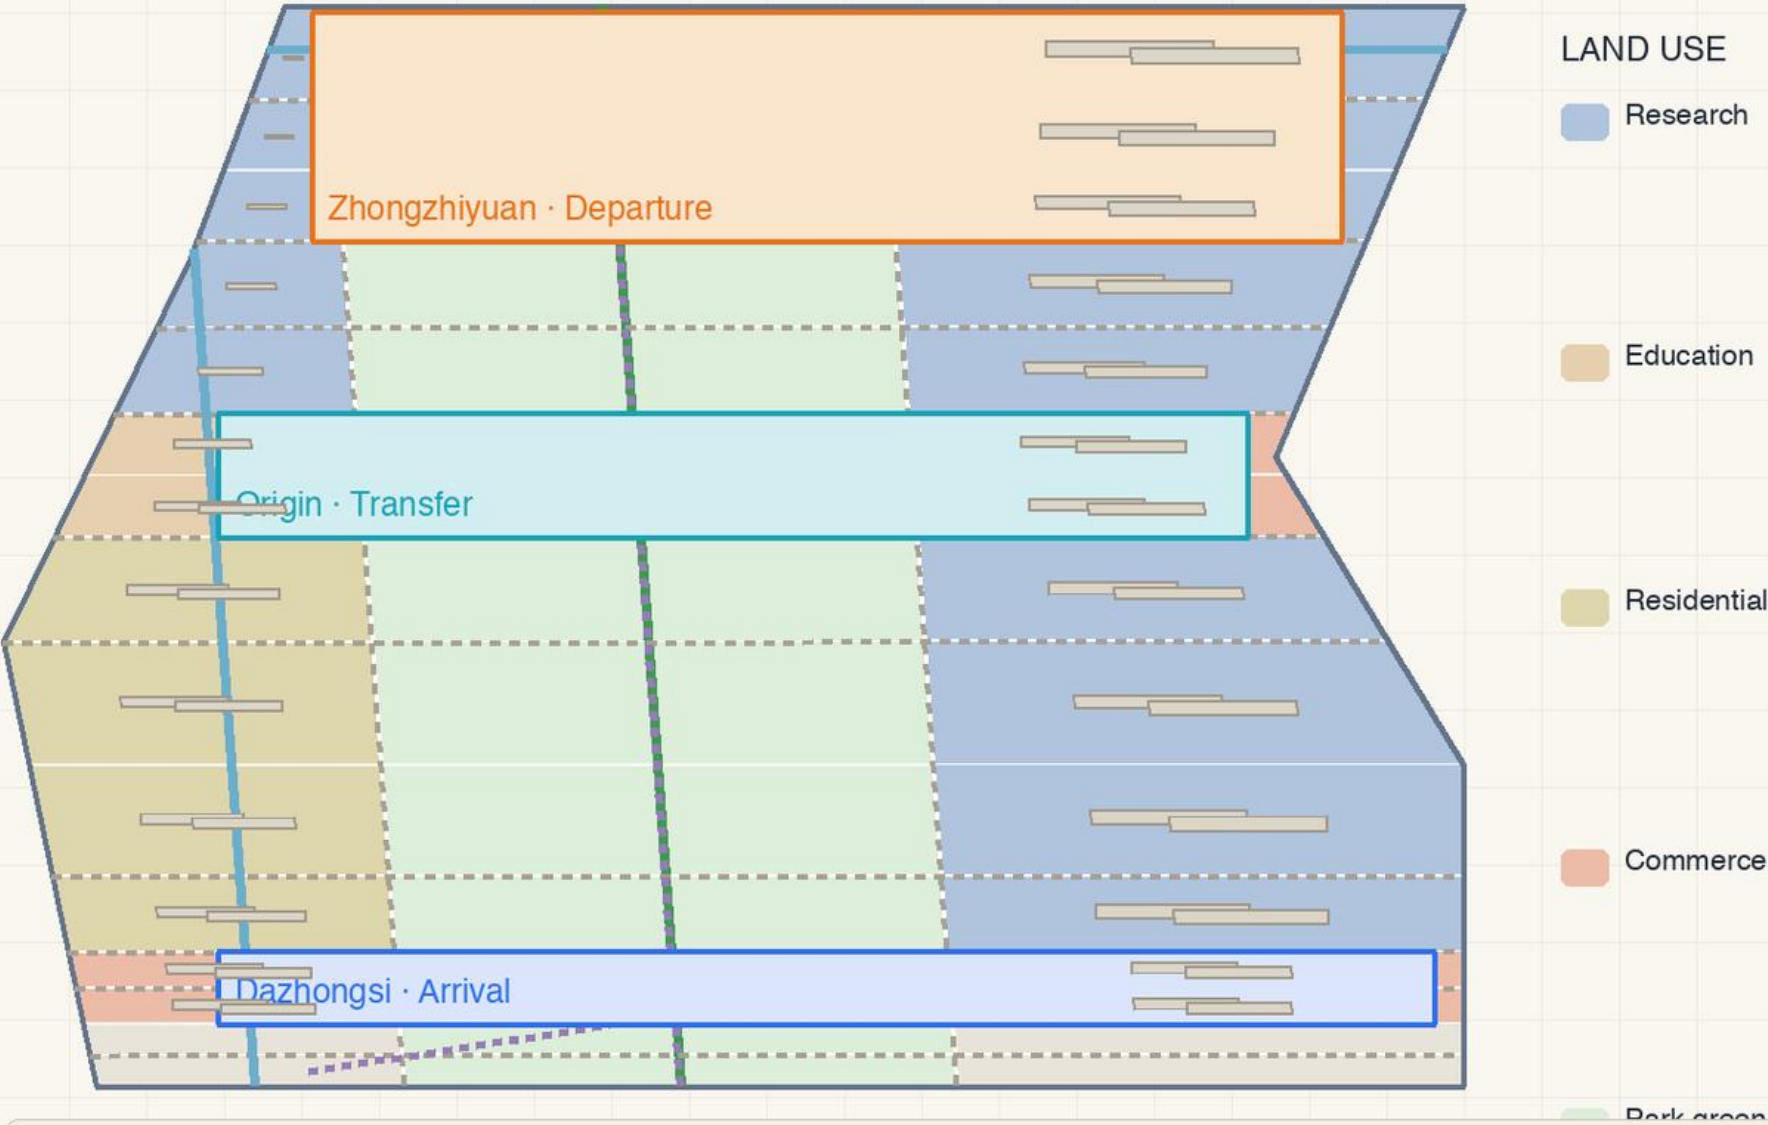

Land Use Structure and Spatial Framework

Seven categories, seamless coverage, EPSG:4548 recalculation

Land Use Structure and Spatial Framework

PT-BELT · 2026

Research, education, residential, commerce + a green spine connecting station platforms

Zones seamlessly cover the submitted boundary (EPSG:4548) Research+Education 3.76+0.28 sq km

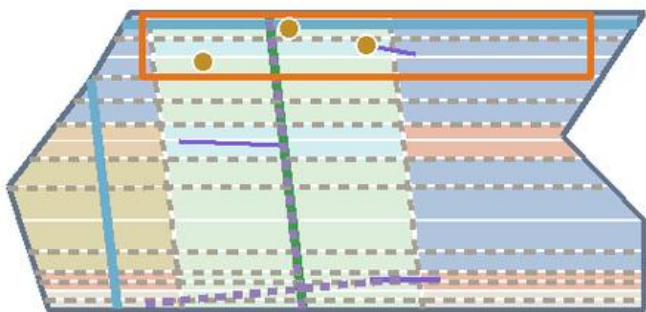

Detailed Design of Three Key Areas

Departure, transfer, arrival platforms

Three Key Areas · Three Station Platforms

PT-BELT · 2026

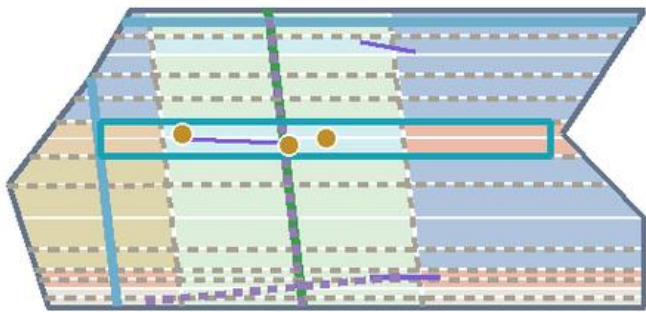

Departure, transfer, arrival: program, spatial moves, and AI scenarios

众智园AI自主创新加速区 DEPARTURE PLATFORM

· Model Test Yard · Safety Sandbox · Qinghe Low-Carbon Gallery · Departure Plaza

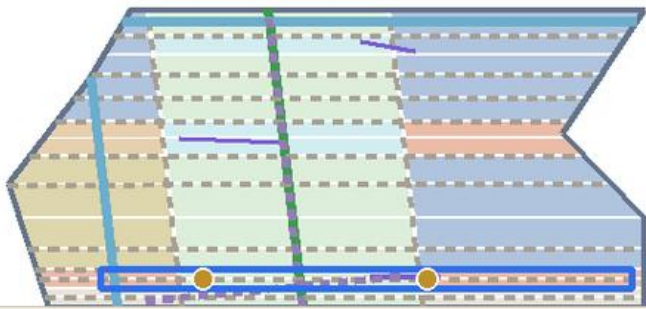

Area ≈ 192.9 ha

北京AI原点社区 TRANSFER PLATFORM

· Open Source Hall · Commercialization Street · Talent Transfer Hall · Campus stitching

Area ≈ 104.3 ha

大钟寺AI产业聚集区 ARRIVAL PLATFORM

· Pitch Lounge · Data Parlor · Mixed-use green · Four-quadrant connection

Area ≈ 72.0 ha

All three key areas use provisional polygons Areas vs announcement: 192.9 / 104.3 / 72.0 ha

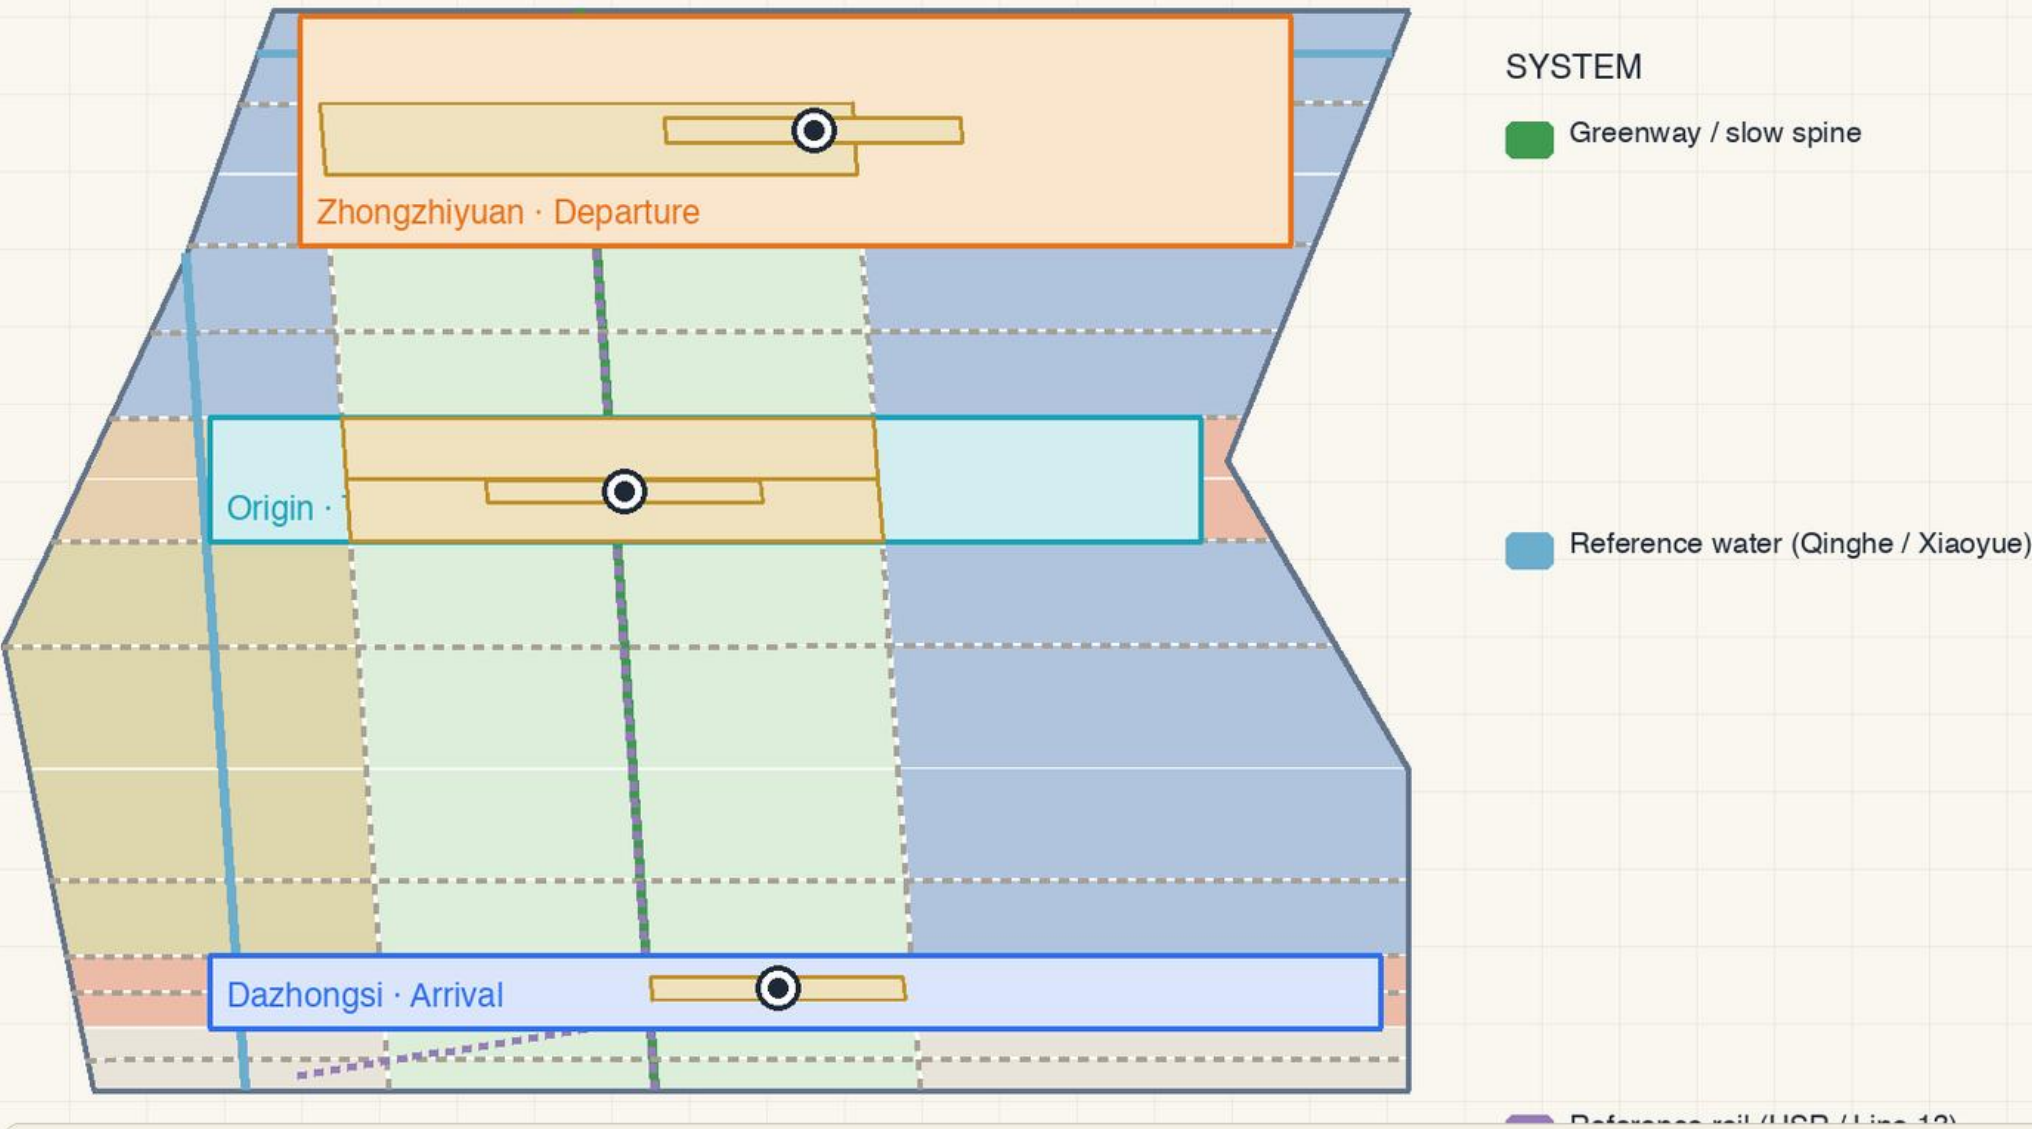

Mobility, Rail, and Blue-Green Public Space

Green spine, graded roads, rail connections, one-spine-two-ribbons

Mobility, Rail, and Blue-Green Public Space System

PT-BELT · 2026

Green spine, graded roads, rail connections, one-spine-two-ribbons-multiple-nodes

Water and rail are reference locations, not red/blue lines Slow-traffic first · rail connection · graded network

Core Metrics, Scenarios, and Phasing

10 AI scenario cards, 6 renewal projects, three phases

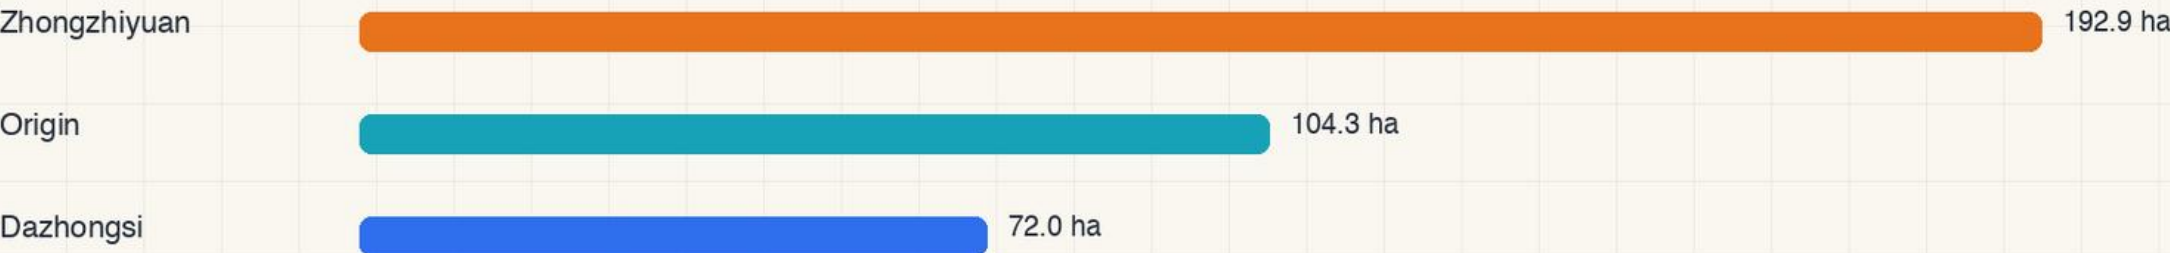

Core Metrics Recalculation and Evidence Chain

PT-BELT · 2026

All areas and ratios are recalculable from GeoJSON in EPSG:4548

KEY AREA AREAS (ha)

SELF-CHECK

Geometry, metrics, bilingual, visual, professional matrices

Full recalculation when official boundaries arrive

PENDING OFFICIAL DATA

FAR, height, density, setbacks, road red lines

No speculative values; no false precision

Metrics recalculated from geometry/*.geojson Confidence and formulas in metrics.json

Mechanism, Personas, Phasing, Risks

The platform-ticket mechanism: ordinary tickets for public open days, platform tickets for 10 AI scenario cards, souvenir tickets for 3 pilgrimage landmarks and contribution honors, work tickets for 3 industry test and validation scenarios.

Five personas: open-source developers, startup teams, executive visitors, surrounding residents, faculty and students.

Phasing: quick start (2026-2028) with plazas and open testing; mid-term (2028-2031) station districts and rail connections; long term (2031-2035) belt-wide operations and calibration.

Risks: missing official boundaries and key-area polygons, pending regulatory and engineering conditions, reference-only water and rail; all precision-sensitive metrics are recalculated when official data arrives.
