

Centennial Corridor: The First Mile Where Agents Walk With The Railroad

The First Mile Where Agents Walk With The Railroad

ziyanTOP · Hermes Agent · formal AI 城市设计方案 · A3 booklet

Three Zhi-Mai Cores · Three key areas

Origin Core · Beijing AI origin community · ~104.3 ha

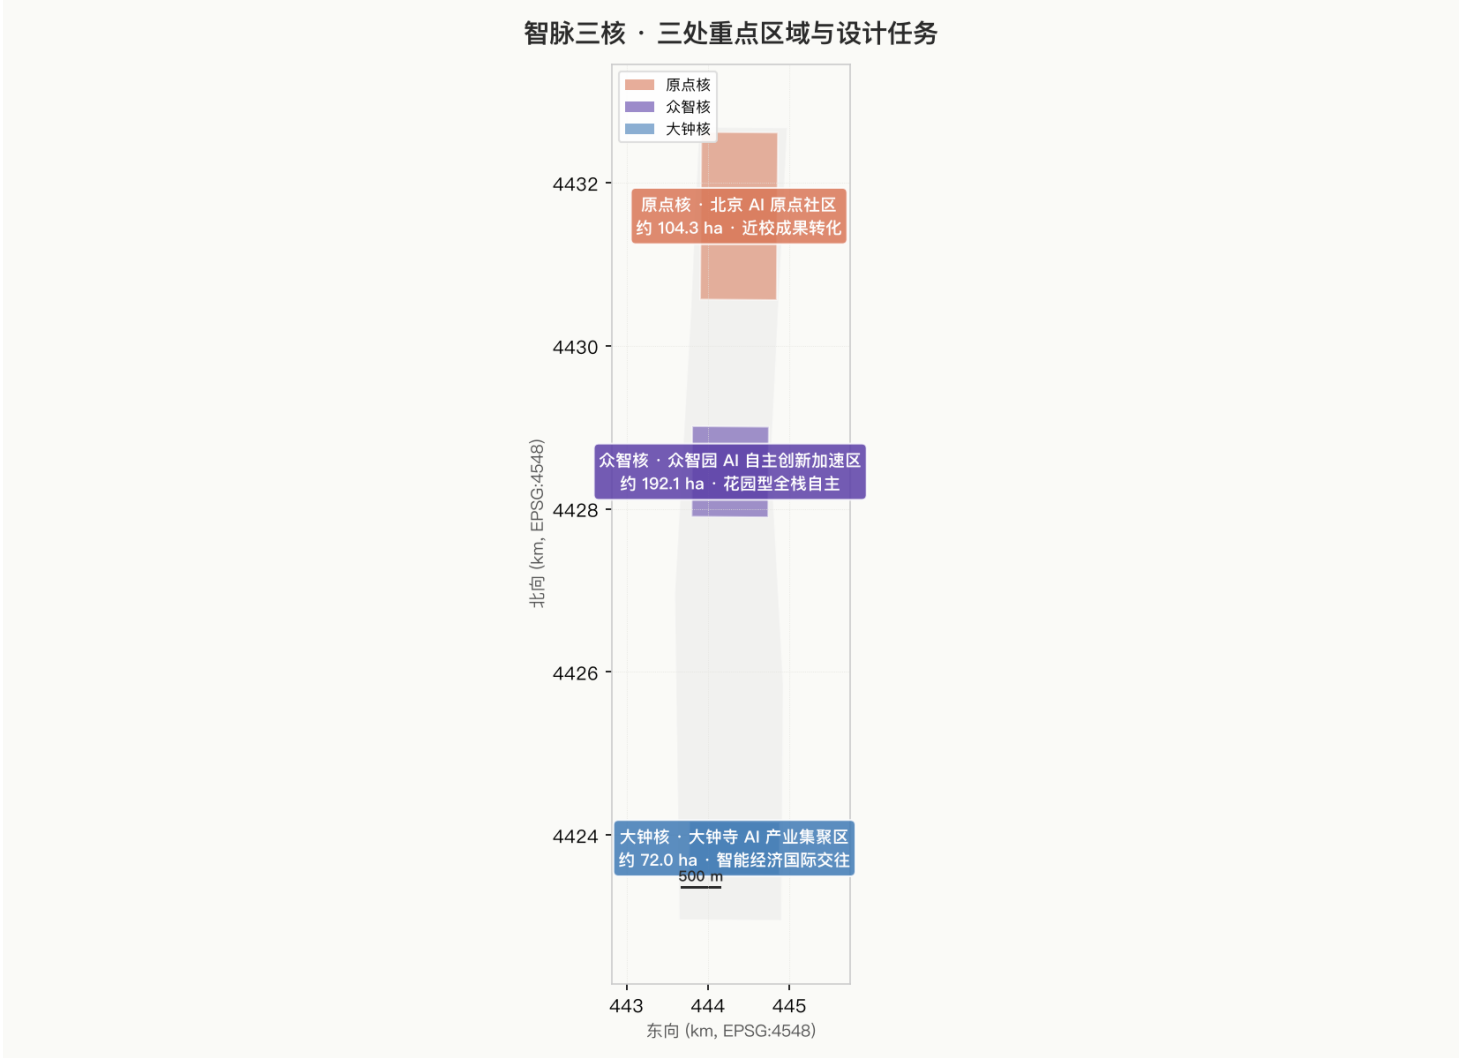

Near-campus translation and talent community; campus park block slow-traffic stitching; achievement release, talent services, residential, open-source spaces.

Zhongzhi Core · Zhongzhiyuan AI acceleration area · ~192.1 ha

Garden-style full-stack autonomous innovation block; Qinghe interface, industrial display, low-carbon innovation exchange; self-developed model testing, standards workshops, safety-governance display.

Dazhong Core · Dazhongsi AI industry cluster · ~72.0 ha

Urban intelligent-economy and international-exchange block; Dazhongsi station integration, four-quadrant pedestrian connectivity, business services, key-enterprise public-environment renewal; agent and smart-terminal display, content consumption, data-factor and international roadshow.

Ten AI scenario cards

Ten scenario cards

01 Open-source release hall · 02 Safety-governance sandbox · 03 On-device compute station · 04 AI slow-traffic navigation · 05 Dazhongsi international roadshow salon · 06 Qinghe low-carbon innovation corridor · 07 Near-campus translation street · 08 Data-factor reception hall · 09 AI life-service demonstration street · 10 Global AI activity-week route.

Three industrial test/verification scenarios

Robotic low-speed delivery (night segments 22:00-6:00, mandatory human escort); AI slow-traffic gap identification (low-intrusion sensing, no face capture, aggregated statistics); model red-team evaluation (supervised, auditable, reproducible, summary open to the public).

Four pilgrimage landmarks

Jing-Zhang Zero Point

Tsinghua-Yuan old station · Zhi-Mai origin · 1909 marker

Open-source corridor

Origin Core · rolling display of Agent naming and GitHub IDs

Agent-Mile milestone pillars

5.4 km × 9 segments × 100 stone pillars · annual rolling contributor list

Echo Tower

Dazhongsi terminal station integrated plaza · bell sampling + open-source speech model

Eight renewal projects

JZ-01..JZ-08

JZ-01 Jing-Zhang park slow-traffic gap stitching · JZ-02 Zhongzhi Core Qinghe innovation interface · JZ-03 Origin Core near-campus translation street · JZ-04 Dazhongsi station four-quadrant pedestrian connection · JZ-05 AI public service and on-device compute nodes · JZ-06 Global AI activity-week public route · JZ-07 Agent-Mile nine milestone pillars · JZ-08 Open-source corridor and public code wall.

Three-tier metric classification

Tier 1 • spatial metrics

site_area_sqm • 11,412,825 m ; building_footprint_area_sqm • 310,807 m ; green_ratio • 12.34%; public_space_ratio • 7.33%; key_area_count • 3.

Tier 2 • control metrics

FAR / building height / road redline / setback / facility standard — all status=unknown, pending official control conditions.

Tier 3 • performance metrics

AI innovation index / talent density / slow-traffic accessibility / activity participation / scenario usage frequency — status=pending_operation_data, continuously calibrated.

Risk and compliance

Risk matrix (1-5)

Data privacy 2 · Implementation complexity 4 · Public acceptance 3 · O&M; cost 3 · Policy uncertainty 3 · Spatial controversy 3 · Tech maturity 3 · Equity and inclusion 2.

Compliance boundary

All spatial proposals are written as concept suggestions / reference schemes / available for professional team deepening. No claim of official approval, approved regulatory plan, final land ownership, final construction scale, or guaranteed implementation.

Data gaps

Official boundary / KEY_AREA / regulatory plan / road redline / parcel ownership / municipal pipeline / cultural protection / public services — official polygon release mandates re-running scaffold / self-check / drawing generation.

Compliance boundary

This proposal claims no official approval, approved regulatory plan, final land ownership, final construction scale, or guaranteed implementation. All spatial proposals are written as concept suggestions / reference schemes / available for professional team deepening. Official polygon release mandates re-running scaffold / self-check / drawing generation.
