HANDOVER LINE

Intelligence moves. Responsibility stays visible.

Human takeover is not a fallback.
It is public infrastructure.

01 Research to validation

02 Validation to open source

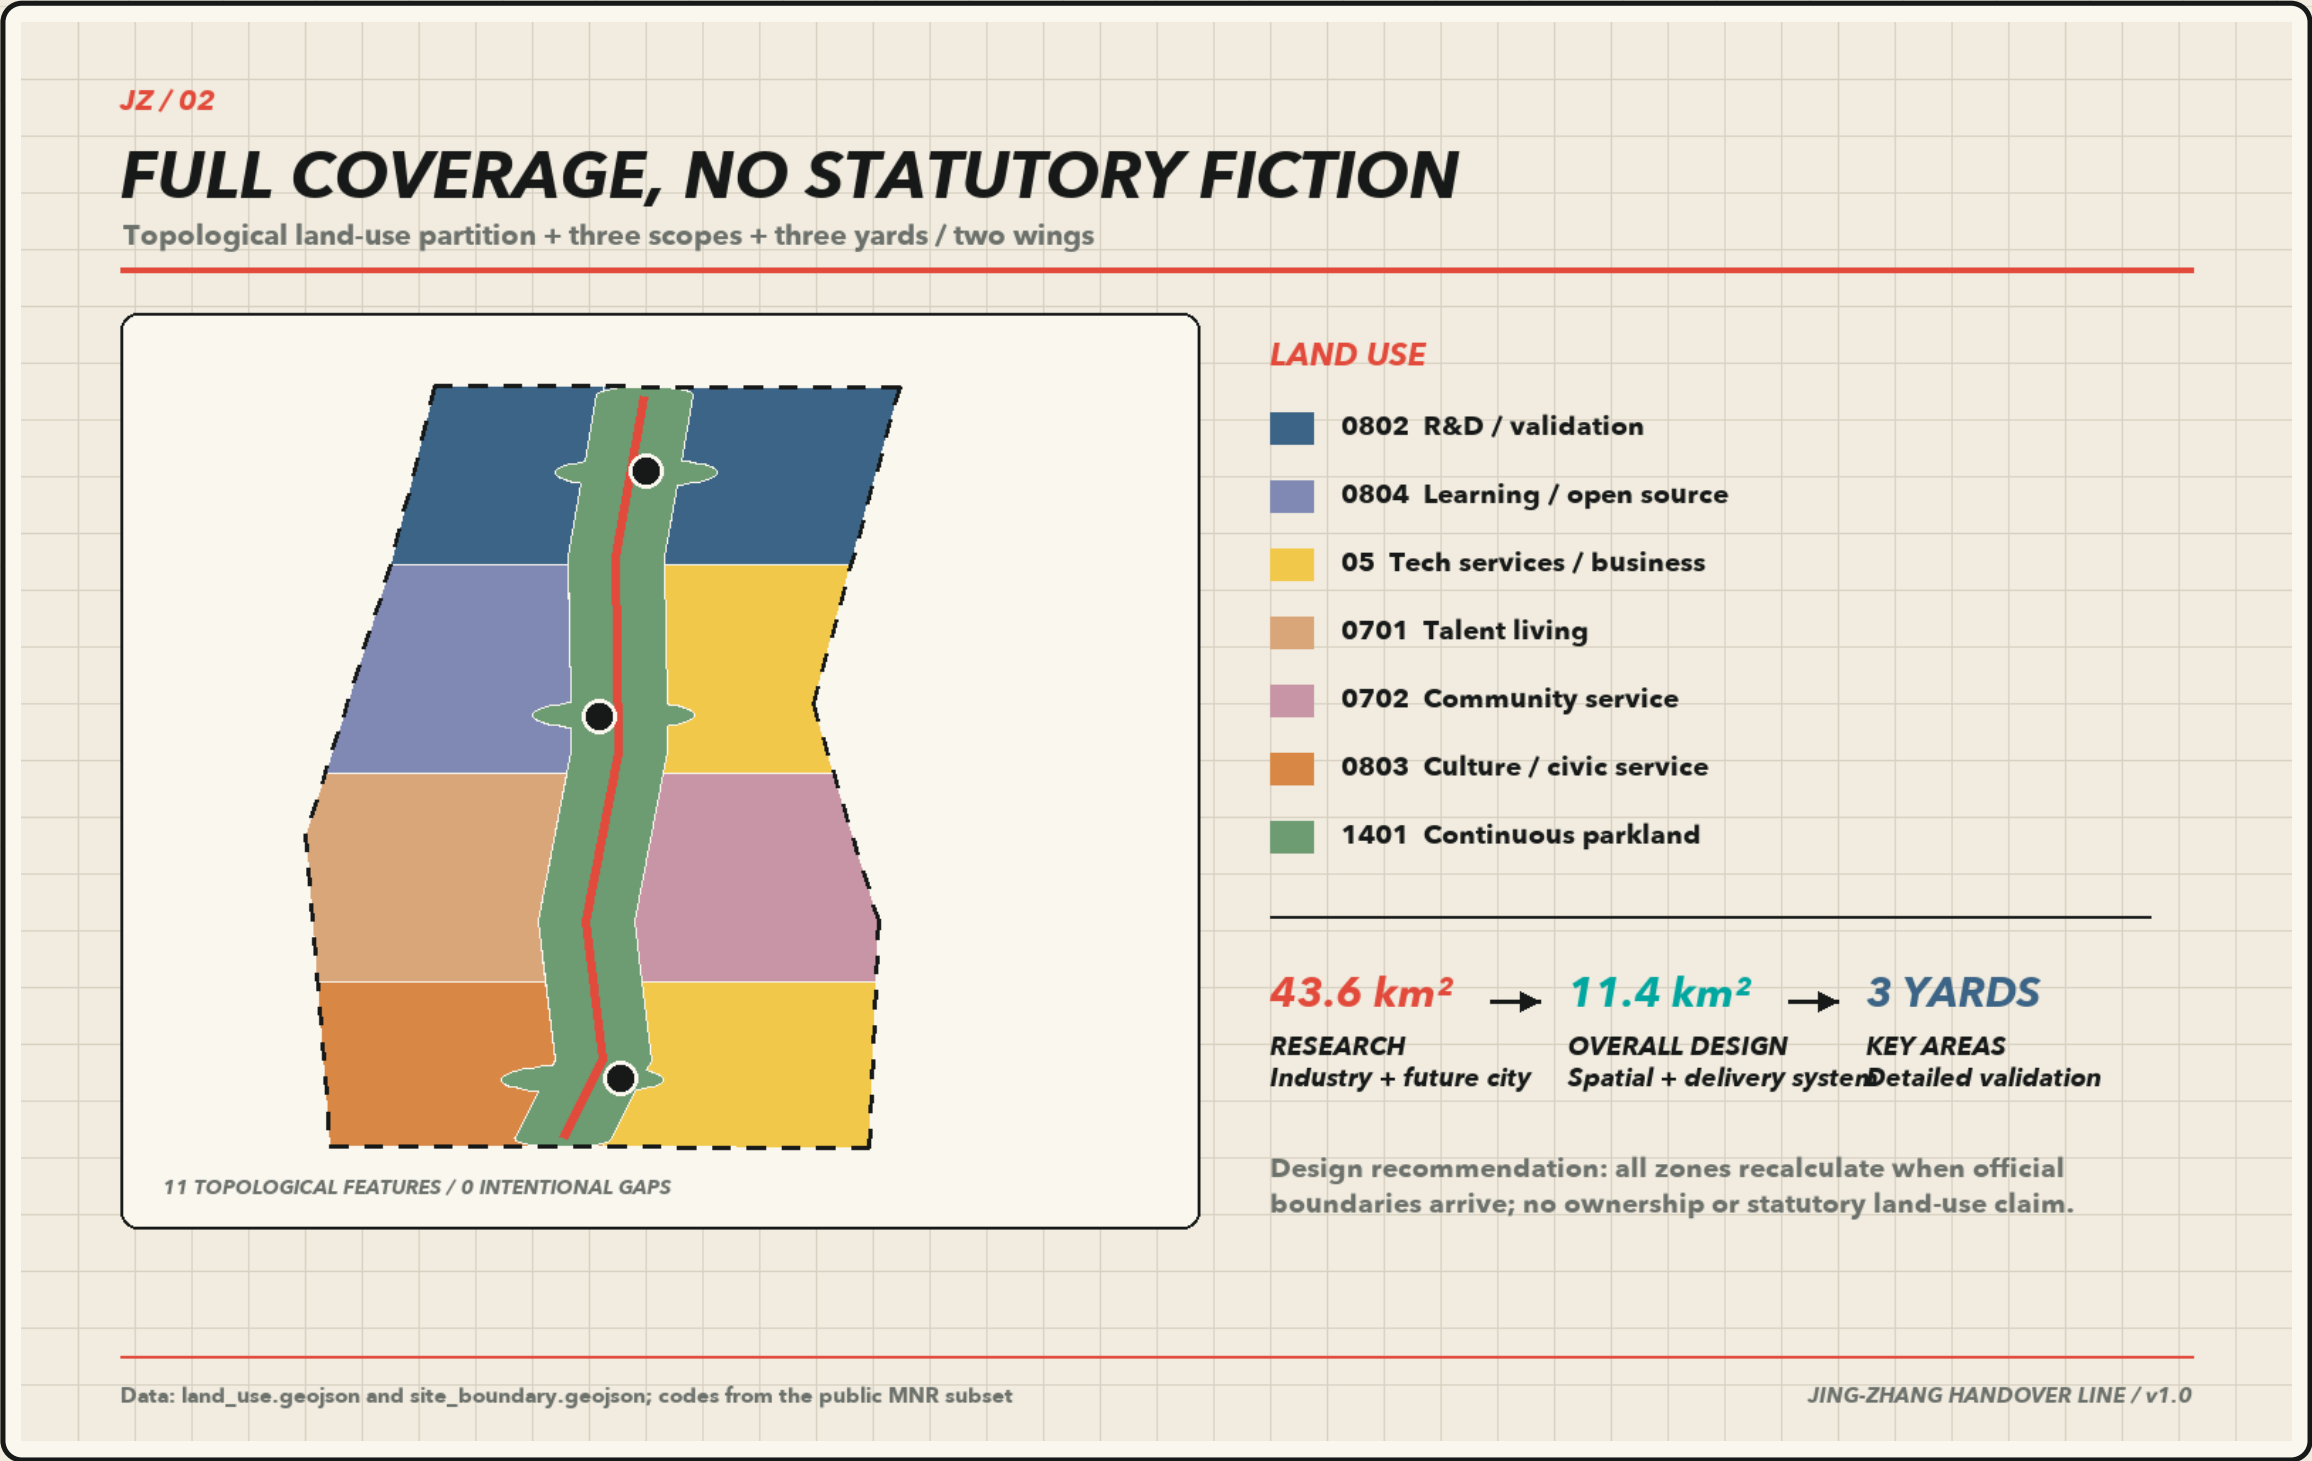

03 Capability to the city

04 The city hands problems back

One line · three handover grounds · two wings · twelve reversible scenarios

Full coverage, no statutory fiction

Topological land-use partition + three scopes + three areas, two wings

Official positions, real interfaces

Three positions, five functions, three areas and two wings x four levels of synergy

POSITION 01 Centennial Jing-Zhang Culture Belt Century Logbook, oral-history booth and the Tsinghuayuan Station anchor form one continuous public record.	POSITION 02 Urban AI Life Experience Belt Twelve reversible scenarios on continuous public ground: enterable, refusable, exitable.	POSITION 03 AI Integrated Innovation Belt Eight shared stacks interface across the three areas in a build-verify-share-serve-feedback loop.
WITHIN BELT	Three areas and two wings organise the research-validation-service loop; objections and shutdown reasons travel back north.	
WITHIN CITY	Connects to the official "two zones and one belt" framework, matching Zhongguancun technology supply to this belt's validation and scenario demand.	
MUNICIPAL	Future Science City, Huairou Science City and BDA form an original-research / engineering-validation / scale-delivery division; this belt is the public-validation output end.	
REGIONAL	Compute, energy and scenario interfaces reserved toward Zhangjiakou and other Beijing-Tianjin-Hebei nodes; feasibility to be confirmed by authorities.

THREE HANDOVER YARDS, THREE SHIFTS OF DUTY

Each key area links programme, space, scenario, human takeover and delivery gates

01

BUILD?VERIFY YARD

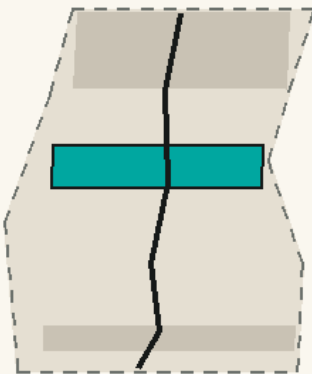

- Public validation street
- Model red team / robot sandbox
- Physical stop by safety staff

PROVISIONAL KEY AREA

02

VERIFY?SHARE YARD

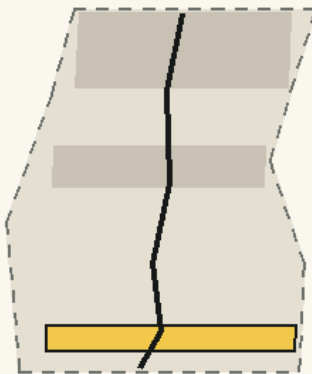

- Public handover table
- Research relay / translation
- Licence, withdrawal, human desk

PROVISIONAL KEY AREA

03

SHARE?SERVE YARD

- Century logbook
- Oral history / AI-native service
- Non-commercial access / no-AI service

PROVISIONAL KEY AREA

Key-area geometry is provisional; detailed strategies are directions for professional development

PHASE 01	Return to baseline: official data, inventory, wayfinding and three low-risk human-led pilots.
PHASE 02	Open-source yard: ground floors, research relay and community service after ownership and community review.
PHASE 03	Belt-wide operation: complex validation networks only after transport, utilities, heritage, privacy and safety conditions.

Core metrics and the evidence chain

Known values recompute; FAR, height, AI innovation index, talent density and output scale stay unknown

Risk, copyright and the next shift

Open co-design advice; it does not replace statutory planning or professional approval

DATA	Full recalculation once official boundaries, controls, ownership, roads, utilities, fire and heritage data exist.
PUBLIC	People without a phone, without Chinese, with disabilities, older people and those declining AI keep equivalent service.
COPYRIGHT	Original graphics, text and layout; external cases paraphrased only, no reused image, mark or protected chart.
