

Open Weave / Jingzhang Civic Loop

Heritage spine, open testing and everyday services

Open Weave: one belt, three cores, one civic loop

Spatial structure: one belt, three cores, two wings

Concept technical architecture / vendor-neutral handoff

Five layers describe evidence responsibility; they do not claim deployment, models, compute or engineering capacity.

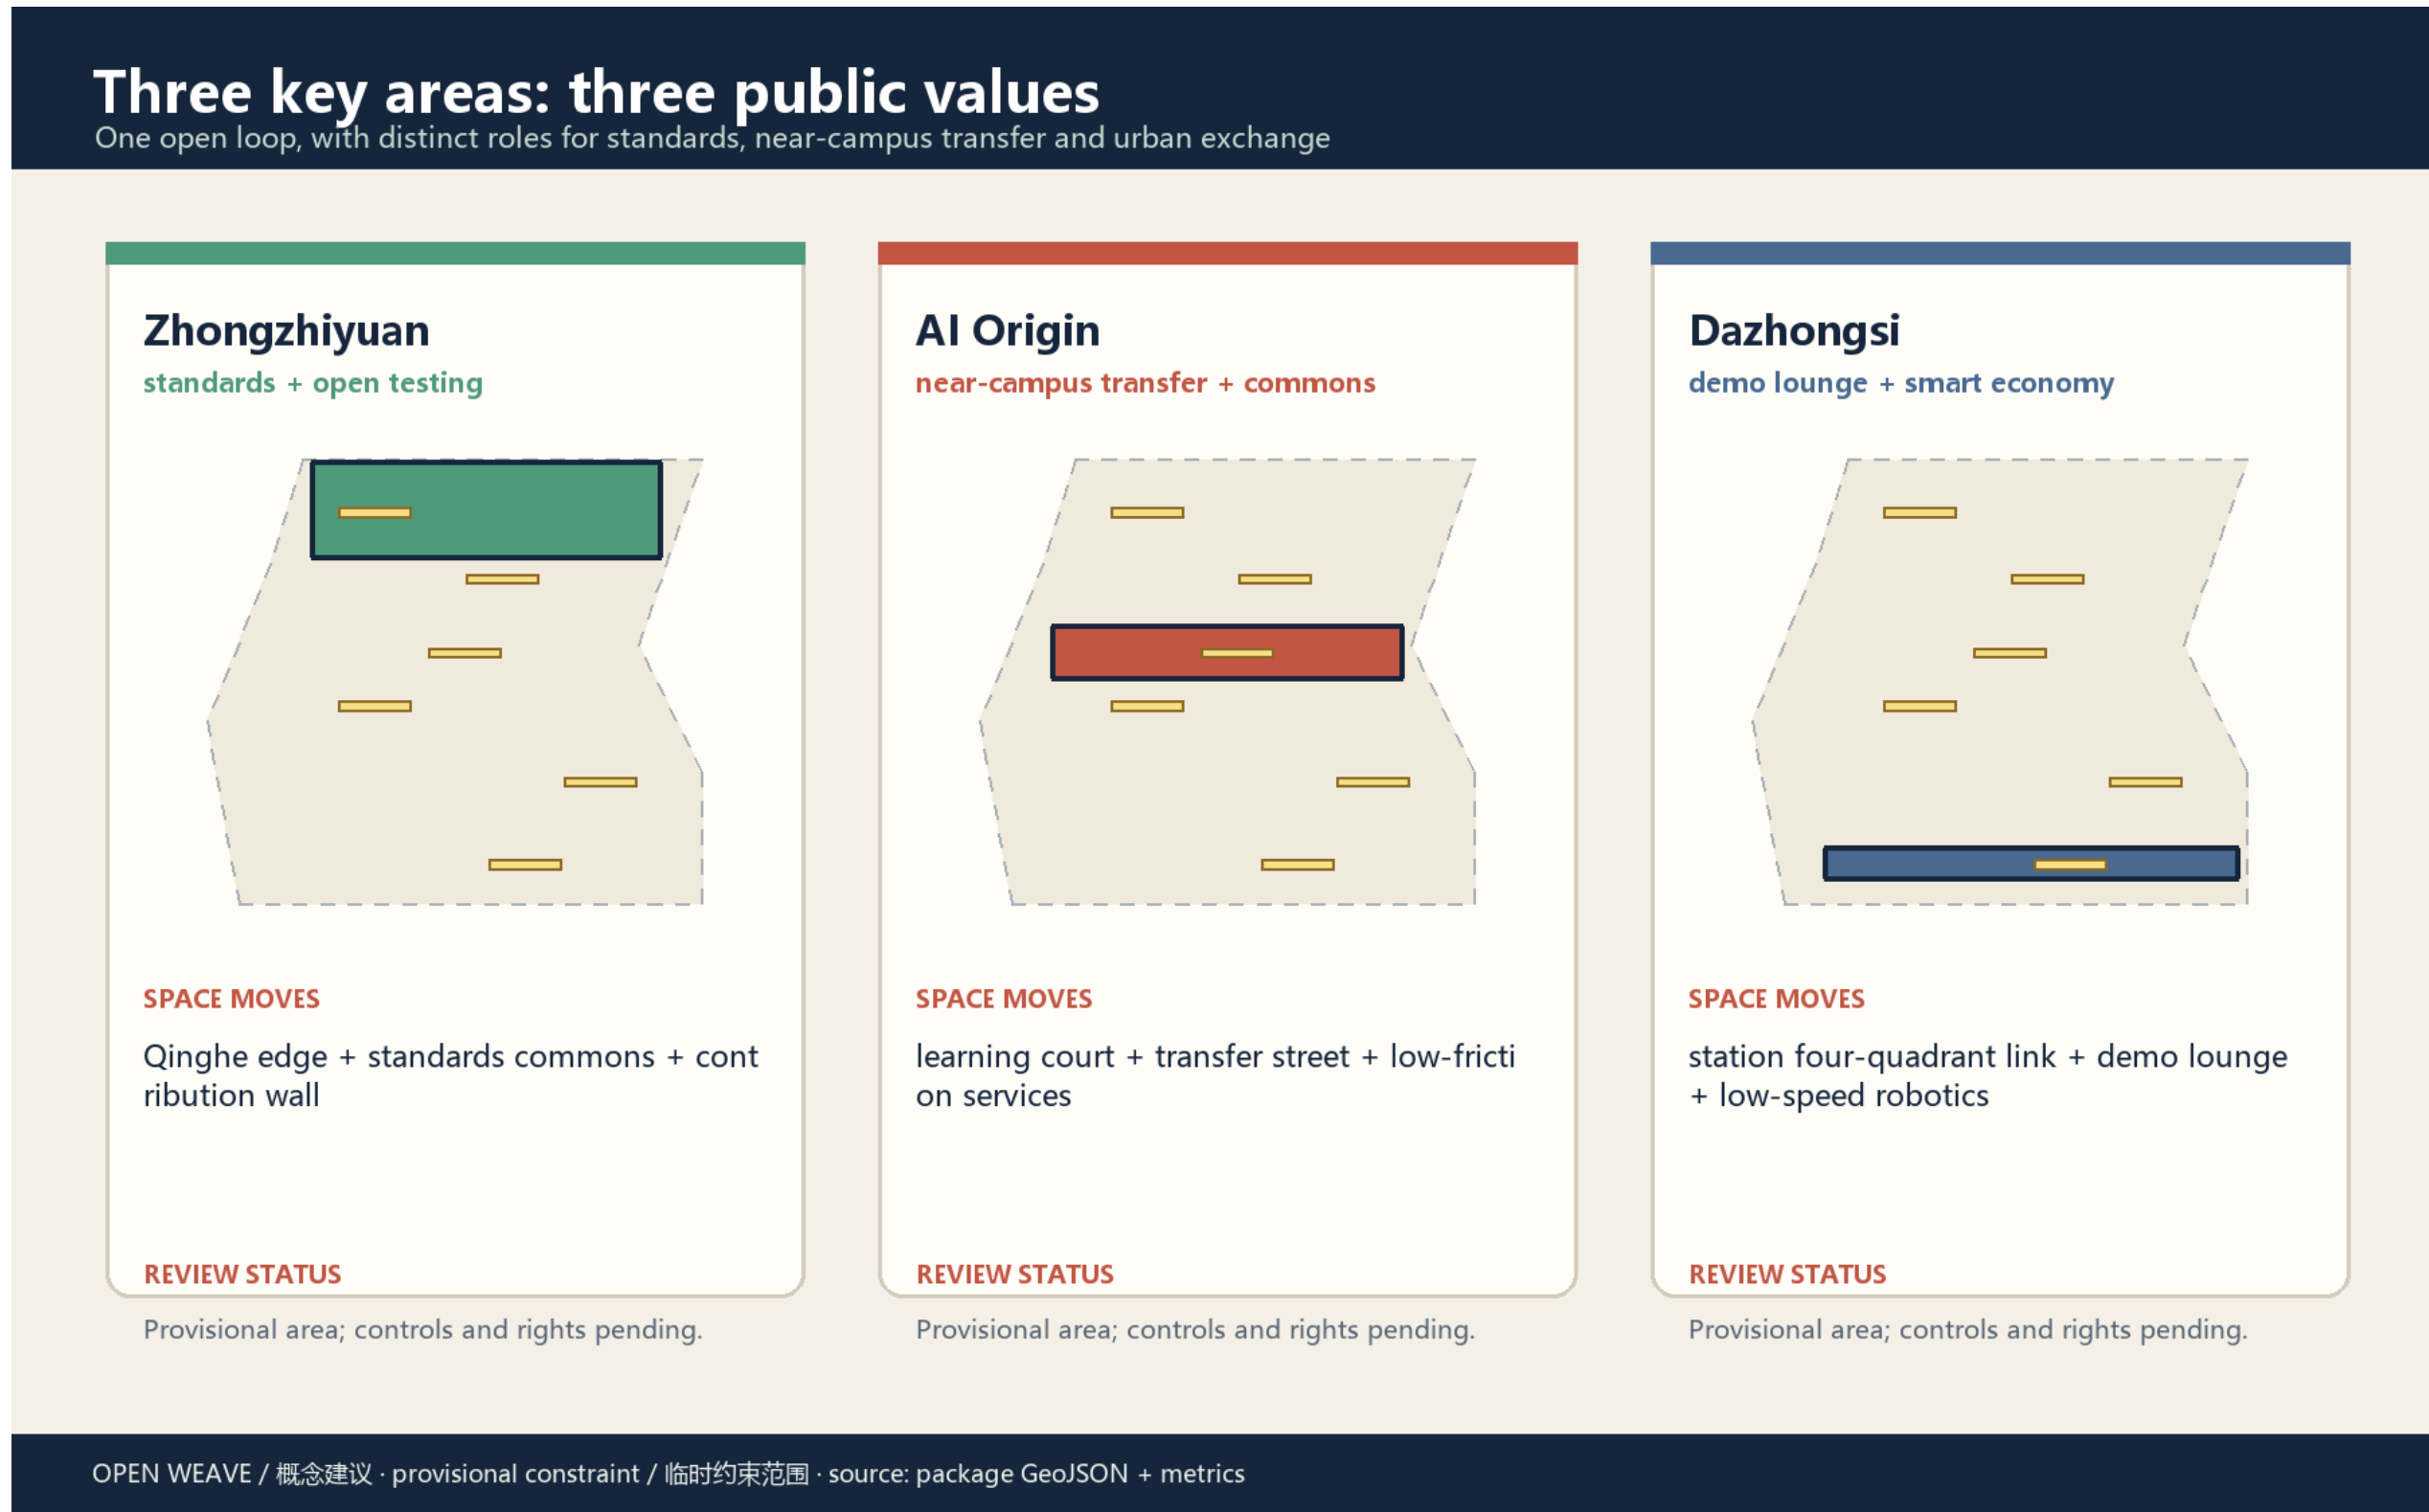

01Civic access Paper/phone/staff human fallback	02Orchestration Consent/risk/exit human fallback	03Model/rules Advice, not command human fallback	04Evidence registry Provenance/version human fallback	05Edge infrastructure Device/network/power human fallback
--	---	---	--	--

四个优先 Pilot 的最小验收 / Four priority pilots

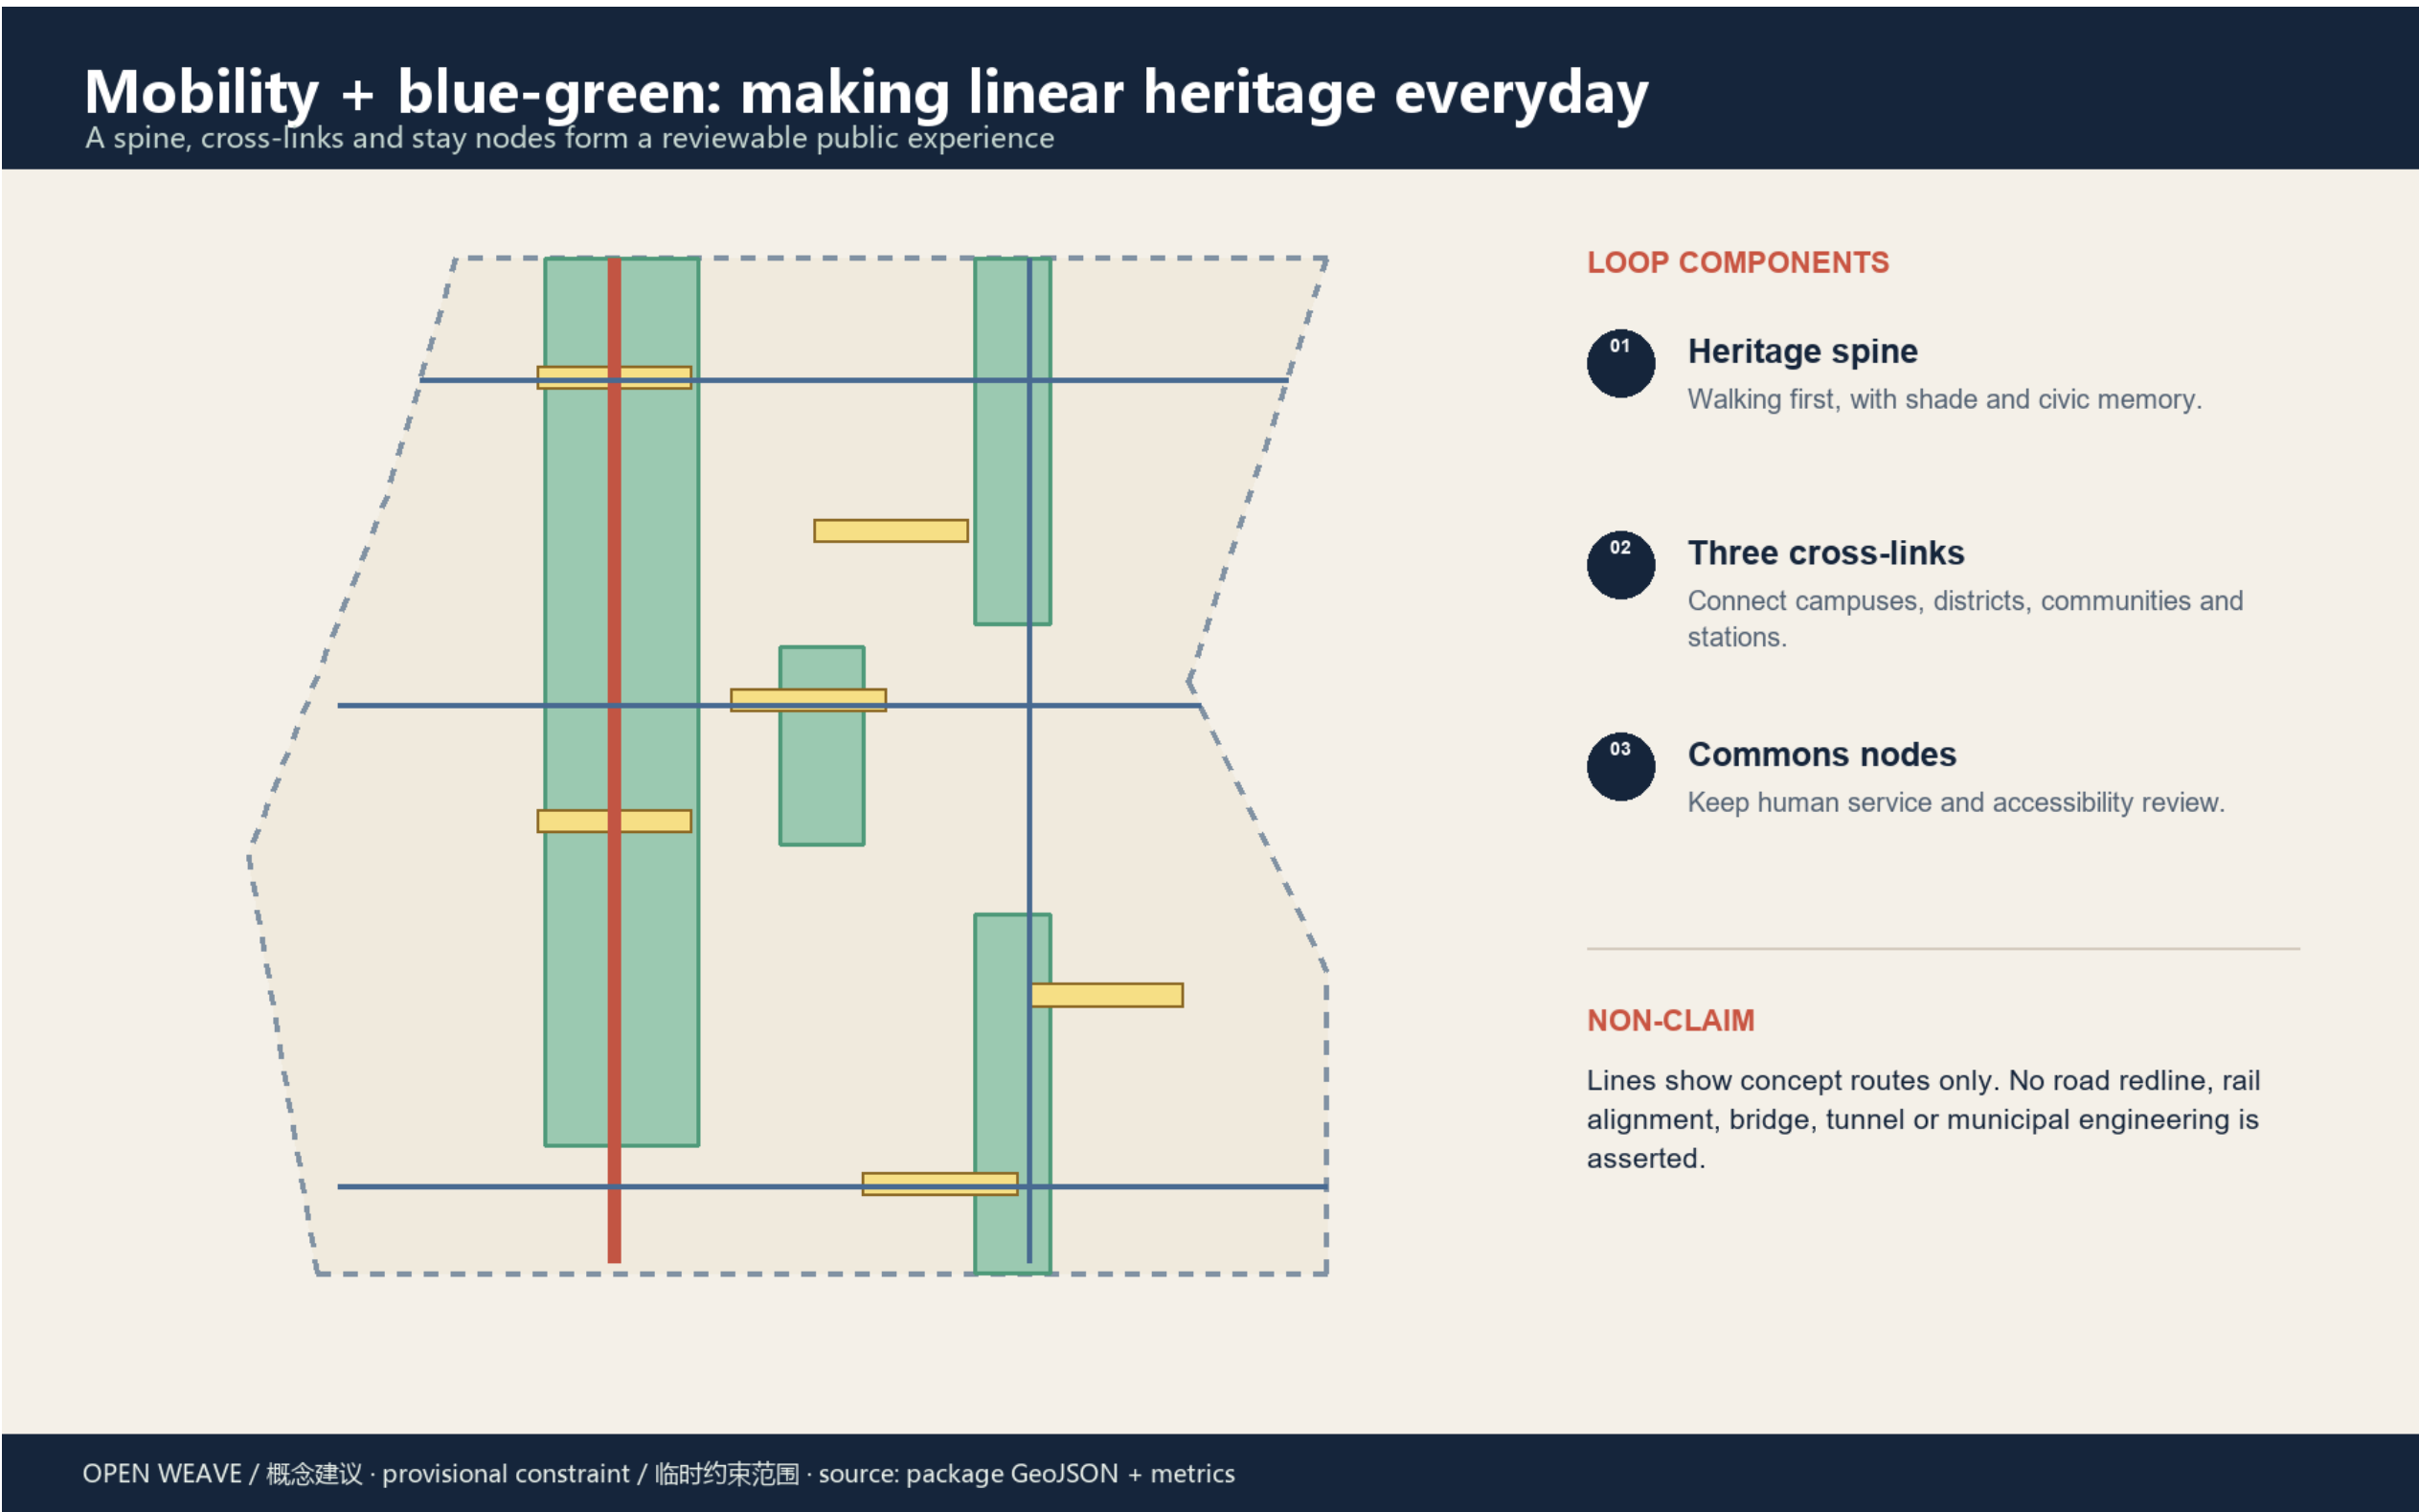

Pilot	Minimum observable evidence	Stop trigger
02 Safety sandbox	Rules + data scope + human conclusion + withdrawal	Unauthorized field / audit gap
04 Walking guide	Accessible, older-adult, night, rain walk audit	Misdirection / failed takeover
08 Data lounge	Authorization summary; personal fields 0	Broken provenance / failed deletion
10 AI week route	Capacity, access, safety, copyright checklist	Missing item / unknown capacity

Three key areas / scenarios + operations

Design actions, human boundaries and inspectable evidence

Three differentiated public values

Heritage spine, cross-links and commons nodes

Public service, implementation and rollback

Eight JZ packages move public-first, test-second, deepen-third; targets below are design acceptance goals, not engineering or operating conclusions.

Package	First evidence	R/A	Stop / rollback
JZ-01 Slow mobility	Continuous route + access audit	Public-space / safety	Human guide if audit fails
JZ-03 Transfer street	Open ground floor + human service	Renewal / authority	No fixed retrofit before title/fire review
JZ-05 Public node	Service, compute and energy sheet	Municipal / operations	No pilot without takeover
JZ-07 Robotics	Controlled site + safety list	Operations / safety	Stop on breach or incident
JZ-08 AI week	Capacity, access, safety, copyright	Events / public safety	No route with missing checklist

Human boundary / 人工边界

No face recognition, hidden tracking or automatic clearance. Paper, phone and staffed service remain available. Official boundary, heritage control, title, fire, transport, municipal and energy conditions remain provisional or unknown/null.

Open Weave / Key scenario perspectives

Concept perspectives for spatial experience and AI public value; not approval conclusions.

Heritage spine / 遗产主轴

Walking first, with shade, pauses and civic memory.

Standards commons / 众智园

Open testing, shared standards and public audit.

Learning court / AI 原点

Near-school learning with human review and offline access.

Smart economy / 大钟寺

Small firms, culture, services and data rights meet.
