

JING-ZHANG TEMPORAL STITCH

Master Plan: One Corridor, Nine Needles, Three Clocks in Coordination

DESIGN CONCEPT

Repairing every interface between the Jing-Zhang Heritage Park and the city.

Introducing temporal dimension: same interface serves different populations at different times.

NINE SUTURE NODES (North to South):

N-01 Knowledge Permeation | N-02 Tidal Interlace | N-03 Entrepreneurship Incubation

N-04 Intergenerational Weave | N-05 Nature Permeation | N-06 Commercial Suture

N-07 Memory Anchor | N-08 Health Suture | N-09 Data Suture

THREE TEMPORAL CLOCKS:

Day Clock - 24h rhythm orchestration per node

Season Clock - Seasonal functional switching

Era Clock - Decade-scale progressive opening

AI FOUR-LAYER SYSTEM: Diagnose -> Generate -> Schedule -> Monitor

Physical improvements remain effective when AI is shut down (SEB standard).

KEY METRICS (provisional geometry):

Site: 11.4M m2 | Green: 24.17% | Public Space: 10.44% | Nodes: 9 | Programs: 27

THREE KEY AREAS - DETAILED DESIGN

ZHONGZHI PARK AI ACCELERATION ZONE (192.1 ha)

Garden-type full-stack innovation district. East boundary wall removal + Knowledge Exhibition Corridor.
Temporal: Weekdays 9-18h industrial priority; after 18h community activity mode.

AI ORIGIN COMMUNITY (104.3 ha)

Campus-adjacent incubation and talent community. 5-min slow mobility to incubation spaces.
Temporal: Semester/vacation switching. Shared ramp garden for intergenerational use.

DAZHONGSI AI INDUSTRY CLUSTER (72 ha)

Urban-type intelligent economy district. Four-quadrant pedestrian connectivity at station.
Temporal: Weekdays business/roadshow; weekends public experience/cultural markets.
