1. Core Concept: One Corridor, Nine Needles, Three Clocks

Core Proposition: Not designing the park interior, but repairing every urban interface.

Nine suture nodes along 9km corridor address east-west fracture from a century of railway severance.

Three Temporal Layers:

- Day Clock (24h): Morning exercise / commute / midday / school dismissal / night running
- Season Clock (4 seasons): Winter windbreak corridor -> Summer shade canopy
- Era Clock (10 years): Progressive opening strategy monitored by AI

AI Four-Layer Closed Loop:

Layer 1 Diagnose: Computer vision identifies boundary obstacles (wall/grade/railing/blind spot)

Layer 2 Generate: Parametric design generates repair solutions from obstacle types

Layer 3 Schedule: Temporal rhythm engine optimizes multi-period functional allocation

Layer 4 Monitor: Sensor network + citizen feedback evaluates suturing effectiveness

SEB Principle: Physical improvements remain effective when AI is shut down.

2. Three Key Areas

Zhongzhi Park AI Acceleration Zone (192.1 ha) - Phase 2

Nodes: Knowledge Permeation + Tidal Interlace

Actions: Remove walls, install Knowledge Exhibition Corridor, Qinghe ecological repair

AI Origin Community (104.3 ha) - Phase 3

Nodes: Entrepreneurship Incubation + Intergenerational Weave + Nature Permeation

Actions: Campus-park slow mobility, shared ramp garden, station integration

Dazhongsi AI Industry Cluster (72 ha) - Phase 1

Nodes: Commercial Suture + Memory Anchor + Health Suture + Data Suture

Actions: Four-quadrant pedestrian connectivity, market plaza, heritage display, interactive devices

3. Metrics & Evidence Chain

Site Area: 11,412,825 m2 (provisional geometry, EPSG:4548)

Green Ratio: 24.17% (geometry recalculation, medium confidence)

Public Space Ratio: 10.44% (geometry recalculation, medium confidence)

Suture Nodes: 9 (fixed design parameter)

East-West Crossings: 9 (1 per node, conceptual proposal)

Temporal Programs: 27 (9 nodes x 3 clock layers)

Implementation Phases: 3 (near-term / mid-term / long-term)

Data Status: All spatial metrics are provisional pending official boundary release.

Confidence: Medium (provisional geometry from maintainer-derived polygon).

Evidence Files:
