

JING-ZHANG CIVIC FOUNDRY

A cultural-production belt for AI-to-civic-value conversion

Core proposition

Turn technical results into civic products and real use into durable value.

Explicit limit

A design proposition, not an official designation, permit, budget, procurement, or approval.

01 / EXECUTIVE DECISION BRIEF

JING-ZHANG CIVIC FOUNDRY

A CULTURAL-PRODUCTION BELT FOR
AI-TO-CIVIC-VALUE CONVERSION

A NATIONAL PROTOTYPE FOR AI-TO-CIVIC-VALUE CONVERSION

Technical results become civic products; real use becomes durable value.
Cultural production connects rights, scenes, markets, and public reinvestment.

D1 / WHAT THE CITY BUYS FIRST

Public baseline and conversion rules

Fund shared evidence, staffed service, accessibility, and reversible interfaces before permanent assets.

D2 / HOW TECHNOLOGY ENTERS

One project, one five-gate chain

Public necessity, culture and rights, controlled trial, civic premiere, adopt/renew/exit.

D3 / HOW SPACE LIMITS RISK

S1-S2-S3 access code

The permanent public baseline cannot be displaced; AI services are time-limited, controllable, removable.

D4 / HOW CAPITAL AVOIDS STRANDING

Whole-life fiscal firewall

Capex, annual opex, and exit reserve appear together; failed pilots cannot expand by inertia.

G1

Public Necessity

real problem, beneficiary, non-tech path

G2

Culture and Rights

fact, provenance, author, licence term

G3

Controlled Trial

containment, takeover, red team, stop

G4

Civic Premiere

public status, staff, no-scan bypass

G5

Adopt / Renew / Exit

reuse, cost, repair, restoration

THREE CONVERSIONS

Technical → social → value conversion; a release without real use is not civic value.

CULTURAL-INDUSTRY LEVERAGE

Content, provenance, creator pay, brand resources, channels, operations, and public reinvestment form one chain.

EXECUTIVE GRIP

Five first-100-day actions, six work packages, five funding channels; one gate, one accountable role.

PROVISIONAL GEOMETRY · DESIGN PROPOSITION · NO APPROVAL CLAIM

WHY CITY LEADERS SHOULD ACT

Not a fourth AI park: a nationally relevant conversion capacity

Public value

A transferable method for commissioning, validation, premiere, operation, adoption, and exit.

Fund first

Shared evidence, accessibility, staffed service, cultural provenance, independent review, and reversible interfaces.

01 / EXECUTIVE DECISION BRIEF

JING-ZHANG CIVIC FOUNDRY

A CULTURAL-PRODUCTION BELT FOR AI-TO-CIVIC-VALUE CONVERSION

A NATIONAL PROTOTYPE FOR AI-TO-CIVIC-VALUE CONVERSION

Technical results become civic products; real use becomes durable value.
Cultural production connects rights, scenes, markets, and public reinvestment.

G1

Public Necessity

real problem, beneficiary, non-tech path

G2

Culture and Rights

fact, provenance, author, licence term

G3

Controlled Trial

containment, takeover, red team, stop

G4

Civic Premiere

public status, staff, no-scan bypass

G5

Adopt / Renew / Exit

reuse, cost, repair, restoration

THREE CONVERSIONS

Technical → social → value conversion; a release without real use is not civic value.

CULTURAL-INDUSTRY LEVERAGE

Content, provenance, creator pay, brand resources, channels, operations, and public reinvestment form one chain.

EXECUTIVE GRIP

Five first-100-day actions, six work packages, five funding channels; one gate, one accountable role.

D1 / WHAT THE CITY BUYS FIRST

Public baseline and conversion rules

Fund shared evidence, staffed service, accessibility, and reversible interfaces before permanent assets.

D2 / HOW TECHNOLOGY ENTERS

One project, one five-gate chain

Public necessity, culture and rights, controlled trial, civic premiere, adopt/renew/exit.

D3 / HOW SPACE LIMITS RISK

S1-S2-S3 access code

The permanent public baseline cannot be displaced; AI services are time-limited, controllable, removable.

D4 / HOW CAPITAL AVOIDS STRANDING

Whole-life fiscal firewall

Capex, annual opex, and exit reserve appear together; failed pilots cannot expand by inertia.

THREE CONVERSIONS

Technical conversion · social conversion · value conversion

Technical

Models, prototypes, and research results become content packs, experience modules, and civic services.

Social

Products pass civic commissions, co-production, public explanation, and twelve months of real use.

Value

Use supports operation, creator income, bounded brand and channel cooperation, and public reinvestment.

SPATIAL MASTERPLAN AND ACCESS

Space carries responsibility and risk

02 / SPATIAL MASTERPLAN AND ACCESS CODE

WRITE AI GOVERNANCE INTO SPACE: THREE LAYERS, THREE EXPOSURE LEVELS

S1

Permanent Public Baselinecontinuous access, free basics, accessibility, staffed help, blue-green and heritage baseline

cannot be displaced by sponsor or algorithm

S2

Reversible Civic Interfacepower, network, rigging, canopies, workshops, service spine, human takeover position

lease and test before fixing

S3

Time-Limited AI Servicemodel, equipment, data, interaction, content version, expiry, shutdown, restoration

uses S2 but gains no permanent spatial right

L1

Zhongzhiyuan Safe Validation Yard

low exposure / high threshold / maximum G3

L2

AI Origin Co-Author Foundry

multi-party making / medium threshold / G3-G4

L3

Dazhongsi Civic Premiere Ground

high exposure / low risk only / must pass G4

R01 Premiere

R02 Local Content

R03 Cultural Evidence

R04 Civic Brief

R05 Co-Author

R06 Creator Life

R07 Failure Archive

R08 Physical AI

R09 Standards

PROVISIONAL GEOMETRY · DESIGN PROPOSITION · NO APPROVAL CLAIM

S1

Permanent public baseline remains usable when technology fails.

S2

Reversible civic interface has a term, maintainer, removal, and restoration.

S3

Time-limited AI service is exposure-graded, controllable, and never auto-renewed.

THREE KEY AREAS, THREE RISK LEVELS

Zhongzhiyuan L1 · AI Origin L2 · Dazhongsi L3

Zhongzhiyuan

Low public exposure, high technical threshold.

AI Origin

Co-authorship, cultural calibration, and civic commission production.

Dazhongsi

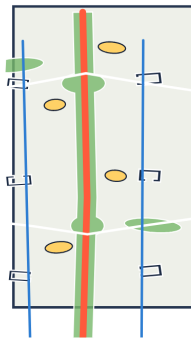

Premiere and twelve-month observation of mature low-risk services.

03 / THREE KEY AREAS · THREE RISK GRADIENTS

THREE KEY AREAS ARE THREE TESTING LEVELS OF ONE CONVERSION ACCOUNTABILITY CHAIN

L1 / G3

Safe Validation Yard

High-threshold capability is contained; the public enters observation and explanation interfaces only.

SPATIAL TASK

Controlled Trial

CONTROL BASELINE

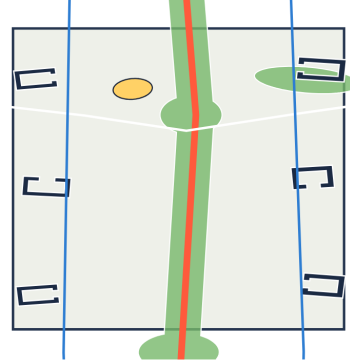

human takeover and physical containment

L1 PASS EVIDENCE

Reviewable red-team record, human takeover, physical containment, and breach shutdown; failure to pass G3 exits.

L2 / G2-G4

Co-Author Foundry

Cultural authenticity, shared authorship, and civic commissions are produced in walk-through courtyards.

SPATIAL TASK

Co-Production

CONTROL BASELINE

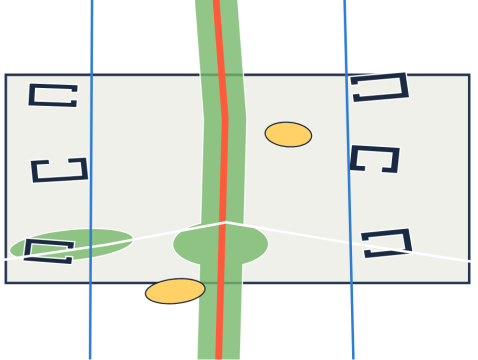

complete provenance and rights

L2 PASS EVIDENCE

Facts, provenance, attribution, pay, licence, and public co-production records are complete; gaps trigger revision.

L3 / G4-G5

Civic Premiere Ground

Only mature low-risk services enter; twelve-month adoption replaces opening-day footfall.

SPATIAL TASK

Civic Premiere

CONTROL BASELINE

public safeguards and effective exit

L3 PASS EVIDENCE

Free basics, staffed explanation, complaint repair, and twelve-month reuse; otherwise restrict renewal or remove.

Key-area boundaries and buildings are conceptual and provisional; they are not demolition, capacity, or approval decisions.

PROVISIONAL GEOMETRY · DESIGN PROPOSITION · NO APPROVAL CLAIM

PUBLIC INTEREST BEFORE DISPLAY

Six safeguards and four clocks constrain space

04 / PUBLIC INTEREST AND REVERSIBLE CITY

PUBLIC INTEREST AS AN ACCESS CONDITION: SIX SAFEGUARDS BEFORE DISPLAY

100y
Centennial Heritage

1d
Daily Public

1q
Quarterly
Reversible

1h
Rapid Digital

01
Free Basic Service

Access, rest, explanation, and help do not require purchase, registration, or data consent.

02
Non-Digital Route

People without a phone, account, or smart device can complete the same public task.

03
Human Takeover

Staff can immediately take over after failure, misclassification, or refusal of automation.

04
Field-Tested Accessibility

Real users test routes, interaction, queues, and information; declarations are insufficient.

05
Quiet / No-Scan Bypass

People can avoid cameras and interaction while retaining continuous access.

06
Complaint-Response-Restoration

Every service records responsible function, response, stop condition, and spatial restoration.

PROVISIONAL GEOMETRY · DESIGN PROPOSITION · NO APPROVAL CLAIM

Six safeguards

Free basics, non-digital path, human takeover, field accessibility, no-scan bypass, complaint repair.

Four clocks

Centennial heritage, daily life, quarterly creation, and rapid iteration cannot displace one another.

PROVISIONAL GEOMETRY · DESIGN PROPOSITION · NOT AN APPROVAL, BUDGET, PROCUREMENT, OR ENGINEERING BASIS

kingyfleo × Codex · CC-BY-SA-4.0 · v4.0 · 2026

CONVERSION ACCOUNTABILITY CHAIN 1.0

One project, one chain · one gate, one role · one stage, one evidence set · one failure, one exit

Five gates

Public necessity, culture and rights, controlled trial, civic premiere, adopt/renew/exit.

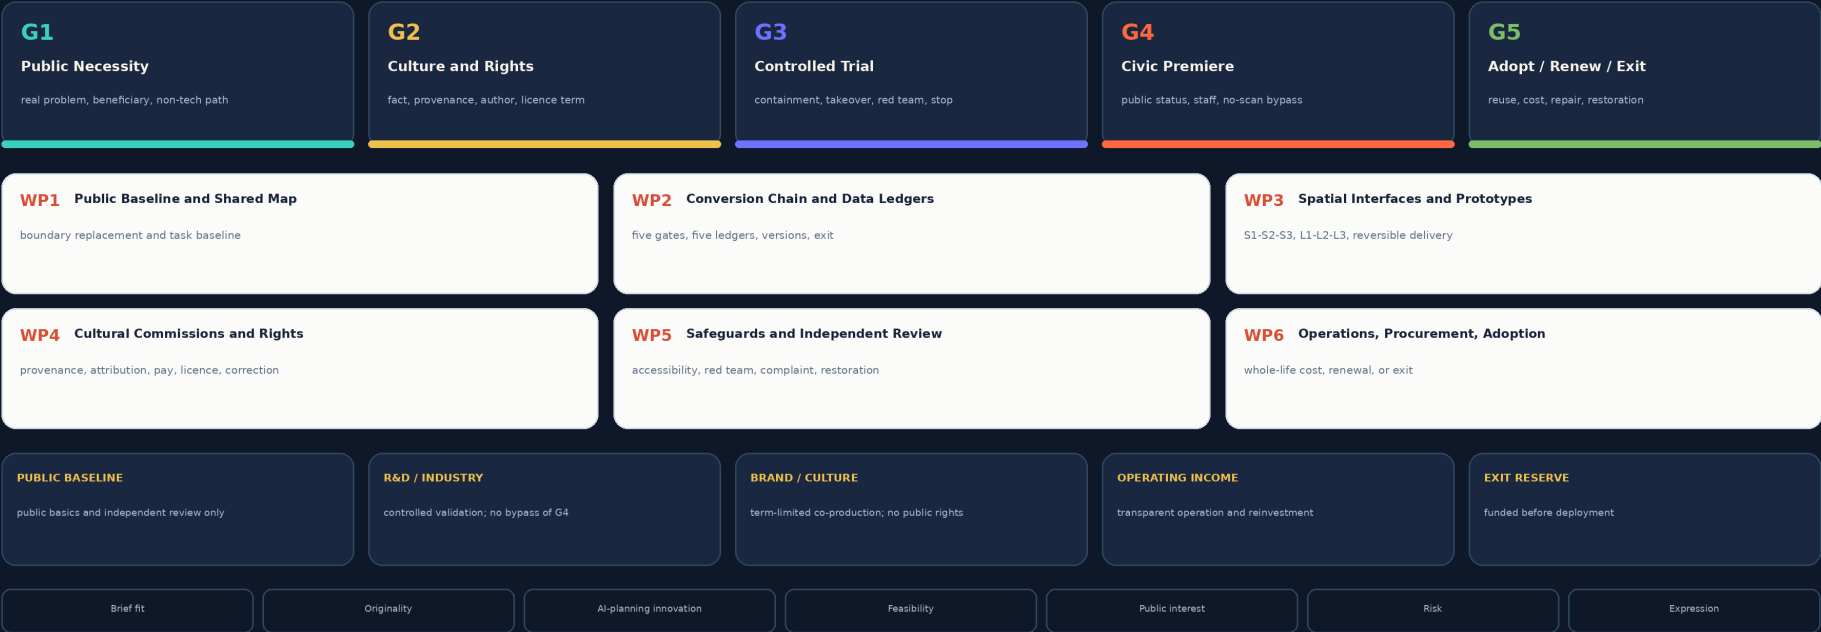

Machine record

Five ledgers, spatial licence, capex, opex, exit reserve, and stop conditions share one evidence object.

05 / MACHINE-READABLE CONVERSION AND DELIVERY

JING-ZHANG CONVERSION ACCOUNTABILITY CHAIN 1.0

ONE PROJECT, ONE CHAIN · ONE GATE, ONE ROLE · ONE STAGE, ONE EVIDENCE SET · ONE FAILURE, ONE EXIT

Files: jingzhang-civic-conversion-accountability-chain.schema.json / example-jingzhang-civic-conversion-accountability-chain.json / urban-room-control-code.json / delivery-program.json

Concept proposal only; not a permit, certification, procurement decision, or government commitment.

PROVISIONAL GEOMETRY · DESIGN PROPOSITION · NO APPROVAL CLAIM

CULTURE IS CONVERSION INFRASTRUCTURE

Content, rights, creators, brands, channels, scenes, and operations form one production chain

Content discovery

Separate fact, local knowledge, contemporary interpretation, and AI generation; make errors correctable.

Creative calls

Real users issue briefs before culture and technology co-produce.

Resources and brands

Permit term-limited co-production and licensed distribution; never sell public rights.

Long-term operation

Reuse, fair pay, maintenance, exit, creator income, and public reinvestment enter one ledger.

THREE DURABLE CIVIC PRODUCTS

One-off exhibits are not industrial results

Cultural content pack

Verified facts, narrative, assets, licences, and model declarations.

Public-experience module

Reversible components, interaction and human-service scripts, accessibility, and safety.

Urban service

AI capability, staff, data minimisation, operation, and exit plan.

FIRST 100 DAYS AND SIX WORK PACKAGES

Run rules, accountability, and real commissions before permanent capital

First 100 days

Close data gaps, issue the chain, select three real commissions, choose reversible prototypes, establish baselines.

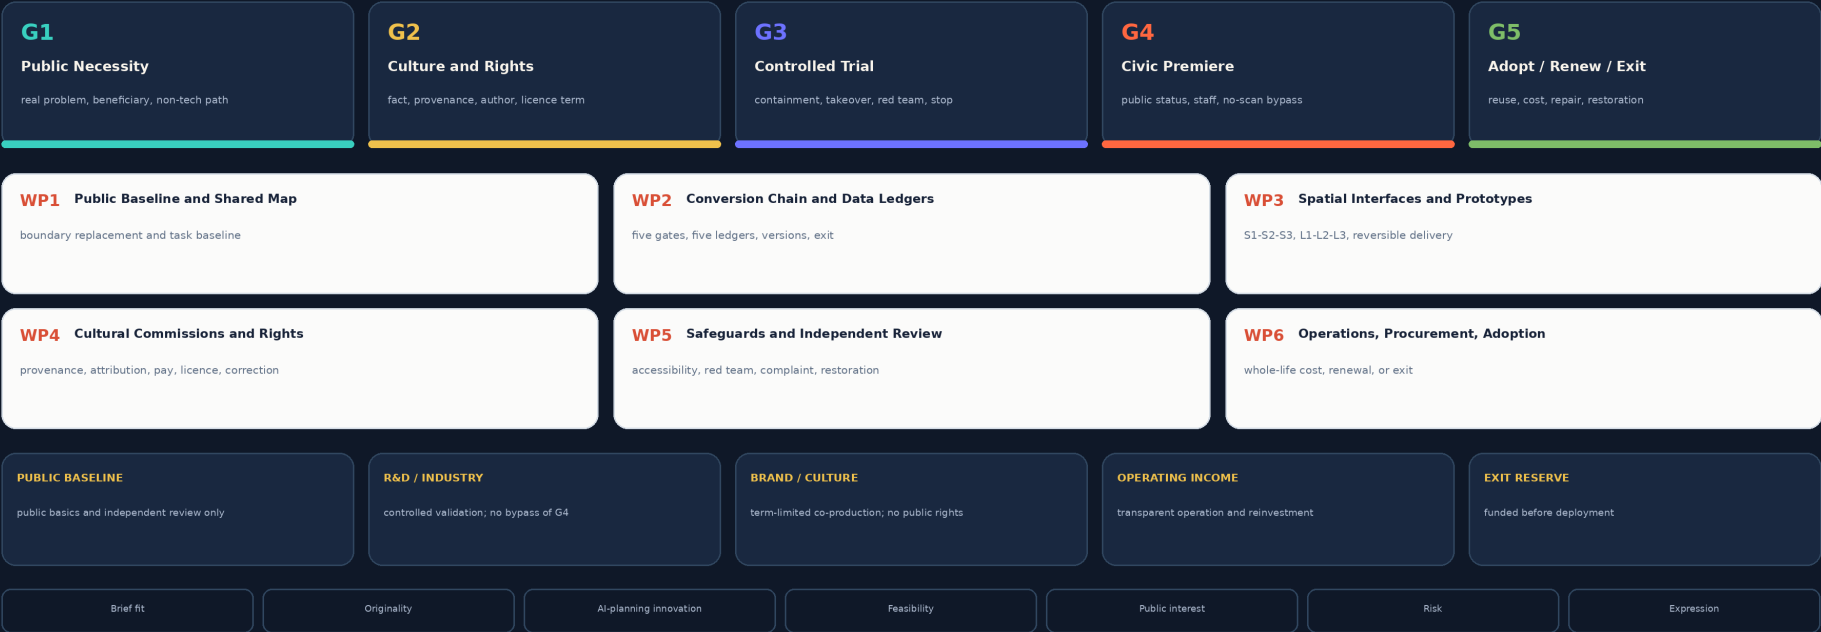

Six packages

Shared map, civic floor, chain, spatial prototypes, cultural-production network, and twelve-month review.

05 / MACHINE-READABLE CONVERSION AND DELIVERY

JING-ZHANG CONVERSION ACCOUNTABILITY CHAIN 1.0

ONE PROJECT, ONE CHAIN · ONE GATE, ONE ROLE · ONE STAGE, ONE EVIDENCE SET · ONE FAILURE, ONE EXIT

Files: jingzhang-civic-conversion-accountability-chain.schema.json / example-jingzhang-civic-conversion-accountability-chain.json / urban-room-control-code.json / delivery-program.json

Concept proposal only: not a permit, certification, procurement decision, or government commitment.

PROVISIONAL GEOMETRY · DESIGN PROPOSITION · NO APPROVAL CLAIM

FISCAL FIREWALL

Five funding categories retain separate responsibilities

Public baseline

Heritage, accessibility, basic space, staffed service, and independent review.

R&D and industry

Closed simulation, controlled prototypes, red teams, and open tools.

Brand and culture

Disclosed, term-limited, rights-cleared co-production and distribution.

Operations and exit

Adopted services, maintenance, reinvestment, and pre-funded restoration.

RISKS AND NON-PURCHASABLE RIGHTS

Commercial cooperation has a place, but no route around public safeguards

Never for sale

Permanent naming of heritage or roads, personal data, public decisions, permanent exclusion from public space.

Eight risks

False precision, cultural hallucination, AI overreach, commercial capture, rights extraction, lock-in, displacement, failed operation.

Exit baseline

No project enters the field without an accountable actor, annual operation, and exit reserve.

EVIDENCE, METRICS, AND DATA LIMITS

Machine precision enables recalculation; it does not claim statutory precision

Validated

Proposal score, topology, visual metrics, professional depth, source and standards matrices, bilingual mapping.

Awaiting official inputs

Precise boundaries, controls, ownership, existing conditions, heritage, roads, utilities, and observed footfall.

Replacement rule

When official polygons arrive, every layer, drawing, web page, and metric is recalculated together.

CONCLUSION

Jing-Zhang should win conversion capacity, not a larger AI park

One sentence

Turn technical results into civic products and real use into durable value.

Executive grip

Conversion chain, spatial access, six work packages, fiscal firewall, and public-interest safeguards.

01 / EXECUTIVE DECISION BRIEF

JING-ZHANG CIVIC FOUNDRY

A CULTURAL-PRODUCTION BELT FOR
AI-TO-CIVIC-VALUE CONVERSION

A NATIONAL PROTOTYPE FOR AI-TO-CIVIC-VALUE CONVERSION

Technical results become civic products; real use becomes durable value.
Cultural production connects rights, scenes, markets, and public reinvestment.

G1

Public Necessity

real problem, beneficiary, non-tech path

G2
