

CENTENNIAL JING-ZHANG REN BELT

A human-centred AI innovation belt for Haidian

One heritage spine · three civic stations · two complementary wings
1905 / 1949 / 2019 / 2026

Overview | One Spine · Three Stations · Ren Wings

Public map is a location reference; dashed lines are provisional, not official redlines

Design decisions

01 Heritage spine

Translate railway heritage into a continuous, walkable public-space armature.

02 Three stations

Each key area hosts a distinct industry, community or cultural exchange role.

03 Ren wings

Technology-services wing × scenario-enablement wing, linked by shared interfaces.

04 Test before scale

Start with reversible pilots; phase projects that depend on official conditions.

Boundary status

provisional / replace with official geometry

Auditable metrics

REN BELT / 2026 · CONCEPT PROPOSAL

Design judgement
Heritage spine as everyday public space; three stations carry production, community and culture.
Pilot first; recalculate after official data replacement.

Boundary status
Provisional / not an official red line; replace authoritative geometry before approval.
Pilot first; recalculate after official data replacement.

Three-level scope
43.6 km² coordination / 11.4 km² design / 9 km heritage spine.
Pilot first; recalculate after official data replacement.

Land-use structure | From a strip to readable spatial layers

Nine land-use bands are read as three vertical districts around a central heritage greenway

Three questions answered by one map

Relationship

The central greenway connects public space, slow mobility and the heritage narrative.

Difference

North: R&D and industry; middle: community and transfer; south: exchange and consumption.

Boundary

Colour blocks are design districts; orange dashes show provisional limits, never statutory redlines.

- Residential / community
- Education / research
- Park / green
- Industry / commerce

REN BELT / 2026 · CONCEPT PROPOSAL

□□□ / ZHONGZHI
AI governance, public computing and blue-green testing

Public-space anchor · local operator · measurable acceptance
Concept only; subject to planning, ownership and heritage review.

□□□□ / ORIGIN
Open-source exchange, learning and neighbourhood services

Public-space anchor · local operator · measurable acceptance
Concept only; subject to planning, ownership and heritage review.

□□□ / DAZHONGSI
Heritage gateway, culture and international dialogue

Public-space anchor · local operator · measurable acceptance
Concept only; subject to planning, ownership and heritage review.

Transport, slow mobility × blue-green public space

One map combines the 9 km green spine, east-west links, five green spaces and public nodes

System moves

Spine Greenway-first walking · 9 km continuous narrative

Cross-links Three east-west links · stitch communities

Nodes Five public spaces · 10-minute station walks

Blue-green Qinghe, Xiaoyue River and heritage park connected

Safety Delivery robots / governance sandboxes on controlled segments only

Roads are schematic centerlines;
official redlines, fire,
municipal, rail and flood
conditions require professional
review.

Source: geometry/roads.geojson · green_space.geojson · public_space.geojson · OSM location reference

REN BELT / 2026 · CONCEPT PROPOSAL

Daily movement
Continuous walking and cycling links; transit interfaces are wayfinding anchors.

Prioritise the spine before adding smart devices.

Blue-green repair
Shade, rainwater detention and maintenance routes are designed together.

Prioritise the spine before adding smart devices.

Guardrail
Road lines, utilities, flood control and heritage protection require professional review.

Prioritise the spine before adding smart devices.

01 Open-source hall Origin community · publish and collaborate Human review, privacy boundary and exit path.	02 Safety sandbox Zhongzhi · evaluate and govern Human review, privacy boundary and exit path.	03 Edge-compute station Belt nodes · public capacity Human review, privacy boundary and exit path.
04 AI slow-mobility guide Heritage spine · accessible wayfinding Human review, privacy boundary and exit path.	05 Global pitch lounge Dazhongsi · exchange and showcase Human review, privacy boundary and exit path.	06 Qinghe low-carbon corridor Blue-green repair and cycling Human review, privacy boundary and exit path.
07 Campus transfer street Prototype, IP and investment Human review, privacy boundary and exit path.	08 Data commons lounge Authorised and auditable exchange Human review, privacy boundary and exit path.	09 AI life-service street Care, education and daily services Human review, privacy boundary and exit path.
10 Global AI Belt Week A walkable annual programme Human review, privacy boundary and exit path.	11 Journey-to-Beijing guide Railway memory and learning Human review, privacy boundary and exit path.	12 Human-shaped plaza art Public art with a clear off switch Human review, privacy boundary and exit path.

SPACE Anchor and access	OPERATOR Named steward	GUARDRAIL Privacy + safety	ACCEPT Measure + appeal
---	--	--	---

REN BELT

One mark / one spine / many human-scale services

Brand promise
Heritage is not a backdrop: it is a public operating system for learning, exchange and care.
OPEN · HUMAN · REPEATABLE

Near term 2026–2030
Connect the heritage park and pilot the origin plaza.
Owner: district + park operator · Gate: heritage/access review · Stop: restore manual service
Owner / dependency / acceptance / stop condition are recorded for each project.

Mid term 2030–2035
Scale the blue-green corridor and station interfaces.
Owner: municipal partners · Gate: flood/traffic review · Stop: pause at safety threshold
Owner / dependency / acceptance / stop condition are recorded for each project.

Long term 2035–2040
Open the governance sandbox only after independent audit and public consent.
Owner: authorised operator · Gate: privacy/fairness audit · Stop: disable automated decision
Owner / dependency / acceptance / stop condition are recorded for each project.

Delivery gate
Reversible pilot → monitored service → independent audit → accountable scale.

Metrics evidence | Design decisions and recalculation basis

All values are recomputed from geometry / metrics.json; provisional limits support concept discussion only

REN BELT / 2026 · CONCEPT PROPOSAL

Accessibility

Continuous accessible paths, tactile/audio wayfinding, 48h complaint closure.

Annual audit by user group.

Low-income users

Free public space, transparent prices and ≥20% public-interest quota.

Annual audit by user group.

Care + night work

Care points, toilets, water, safe lighting and human night response.

Annual audit by user group.

Digital exclusion

Paper, phone and staffed service desks run in parallel with digital tools.

Annual audit by user group.

Evidence chain

Public facts are cited in sources.json; downloaded context images carry credits; OSM is explicitly labelled as locational reference.

Replace + recalculate

Replace provisional boundary, key areas, road lines and utilities with authoritative data, then rerun spatial review and refresh all hashes.

Stop conditions

Safety, flood control, heritage, privacy or fairness failure pauses the pilot and restores a staffed/manual service.

Decision gate

This is a concept package for professional teams. No area, investment or implementation claim is an approval conclusion.
