

Jing-Zhang Authenticity Commons

A bidirectional evidence spine that sends errors back to their source

BRAND + INDUSTRY + AI+ SCENARIOS + SPACE + JING-ZHANG CULTURE + GLOBAL OPERATION

Conceptual landmarks, synergy interfaces and provisional geometry are not statutory planning, established partnerships or operating achievements.

JING-ZHANG AUTHENTICITY COMMONS

A BIDIRECTIONAL EVIDENCE SPINE THAT SENDS ERRORS BACK TO THEIR SOURCE

JZAC
v1.2

TWO-WAY PUBLIC-WORKS LOOP

Evidence southbound

ZHONGZHIYUAN
FAILURE EVIDENCE YARD
Test claims, versions and failure boundaries

Correction northbound

AI ORIGIN COMMUNITY
CIVIC REVIEW HALL
Explain, contest, review and correct

DAZHONGSI
REVERSIBLE ADOPTION HALL
Procure, exit, migrate and recover

FOUR URBAN CORRECTION RIGHTS

- Know basis
- Human handover
- Pause and review
- Same-channel recovery

TASKBOOK ALIGNMENT

- 01

Brand and positioning
J/Z mark, 3 positions, 5 functions
- 02

Industry ecosystem
full-stack tests and lifecycle dossier
- 03

AI+ scenarios
15 scenarios, 12 journeys, 5 tests
- 04

Space and landmarks
3 areas, 6 stations, 4 landmarks
- 05

Jing-Zhang culture
engineering log to open-source log
- 06

Global operation
4 seasons and conversion paths

11

cases

15

scenarios

12

journeys

5

industry tests

4

landmarks

90

days

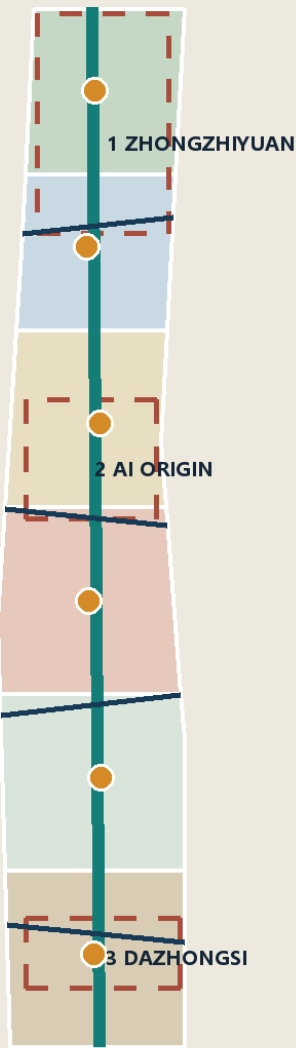

Conceptual landmarks, interfaces and provisional geometry. Not statutory planning or existing partnerships.

Three Belts | Service and Correction Spaces

Provisional land-use fields recede; public-service protocols carry the design intent

02 / 05

SUBMITTED SPATIAL FRAME

provisional land uses / dashed key areas / slow spine / six stations

THREE WORKING BELTS

CENTURY-OLD CULTURAL BELT

versioned memory | original, repaired, reconstructed, AI-interpreted

URBAN AI LIFE BELT

screenless service | human review | same-channel recovery

AI CONVERGENCE BELT

failure testing | expiring evidence | reversible adoption

OVERLAP AT SIX STATIONS

PROTOTYPES

FAILURE EVIDENCE YARD

controlled test / observation / isolation / retest

DAILY TEST RECOVERY

CIVIC REVIEW HALL

evidence vestibule / review / translation / return wall

DAILY TEST RECOVERY

REVERSIBLE ADOPTION HALL

procurement / lifecycle cost / exit test / expiry wall

DAILY TEST RECOVERY

LIMITS

no truth score | no blacklist | no removal power | no government certification

Concept design | provisional geometry shown quietly | statutory controls pending

JZAC v1.2 | 2026-08-14

THREE SPATIAL SERVICE PROTOTYPES

People, controlled material, operating states and accountable recovery

03 / 05

Concept prototype; not an existing-condition survey; pending refinement with formal data. No unverified area or building dimensions.

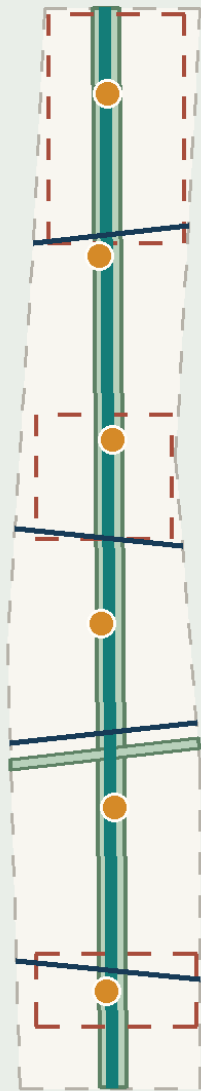

JZAC v1.2 | 2026-08-14

Access and Recovery Routes | Governance in the Last 50 Metres

Transit - slow spine - step-free entrance - human handover - same-channel return

04 / 05

SLOW, BLUE-GREEN, SIX STATIONS

design centrelines, not road redlines; all boundaries provisional

LAST 50 M HUMAN HANDOVER

TRANSIT GREEN STEP-FREE HUMAN

SERVICE ARRIVAL

- phone, paper, telephone and oral intake
- no account, fee or continuous facial recognition
- equivalent outcomes across access modes
- private case review separated from public method display

SAME-CHANNEL RECOVERY: return to every sign, counter, page and subscriber

STATION CONTRACT

01 Accountable role

02 Human handover

03 Return channels

04 Pause trigger

05 Shutdown trigger

06 Recovery action

FIELD MEASURES

handover time | step-free continuity | correction time | understanding

Concept design | provisional geometry shown quietly | statutory controls pending

JZAC v1.2 | 2026-08-14

READINESS, FAILURE TESTS AND FIELD EVIDENCE

Package evidence is not operating achievement

COMPUTABLE NOW

3

key areas

6

station contracts

15

scenario contracts

12

persona journeys

5

industry tests

4

correction rights

11

global cases

4

landmarks

4

annual seasons

90-DAY REVERSIBLE PILOT

1-15

Baseline and authority
stop without owner, lawful material or return channel

16-45

Three-area relay
heritage, health and procurement

46-70

Failure injection
human outage, return failure and deletion proof

71-90

Independent disposition
adopt, modify or retire

FIELD OUTCOMES REMAIN UNKNOWN

PENDING

human handover time

PENDING

same-channel correction time

PENDING

screenless parity completion

PENDING

appeal reversal

PENDING

understanding: provenance is not truth

PENDING

asset and data recovery

STOP CONDITIONS

no accountable owner

unlawful test material

no human handover

correction cannot return

recovery cannot be proven

Valid provenance is not factual truth. Unresolved is a valid result. Statutory controls remain pending official data.

Eleven cases, each with an application and a red line

CASE	TRANSFER	JING-ZHANG APPLICATION	DO NOT COPY
C2PA Content Credentials	Adopt signed provenance receipts, revocation status and explicit separation between provenance and truth.	heritage and creator receipts	Do not make a C2PA-valid asset automatically true or safe.
DARPA Semantic Forensics	Combine multiple forensic signals and keep analytic uncertainty visible.	controlled forensic testing	Do not translate defence research into pervasive civic surveillance.
NIST OpenMFC	Use blind tests, validators, versioned datasets and multiple performance metrics.	Open Benchmark Season	Do not publish one leaderboard score as a universal certification.
NIST AI RMF and AIRC	Use named owners, pre-release gates, monitoring, incident response and human oversight.	six contracts and release gate	Do not claim NIST alignment equals regulatory approval.
Helsinki AI Register	Publish purpose, data, operator, oversight, lifecycle status and feedback route.	staffed and paper public register	Do not limit transparency to web users; retain staffed and paper access.
Amsterdam Algorithm Lifecycle Approach	Bind evidence disclosure to procurement and supplier contracts.	procurement dossier and expiry wall	Do not copy legal clauses without Chinese law and procurement review.
AI Singapore 100 Experiments	Stage validation from scoped problem to PoC, production readiness and handover dossier.	90-day relay pilot	Do not promise identical funding or eligibility.
Munich Re aiSure	Design a reproducibility dossier that underwriters may inspect.	Technology Wing risk clinic	The commons must not set premiums or guarantee insurability.
Finnish media literacy framework	Pair public verification with repeatable teacher-led learning and non-formal education.	civic translation and classes	Do not assume Finnish curricula or institutions can be copied directly.
Zollverein industrial heritage reuse	Use retained railway fabric as working civic infrastructure, not scenery.	Jing-Zhang service infrastructure	Do not equate heritage branding with proven local conservation status.
EU Verifiable Credentials	Use minimum disclosure, revocation and offline/proximity verification patterns.	optional credential interface	Do not require a smartphone wallet for public access.

Scenarios are recoverable service contracts, not an application menu

S01 Multimodal Provenance Intake

Zhongzhiyuan Evaluation Workshop

S02 Image and Video Deepfake Benchmark

Zhongzhiyuan Open Evaluation Yard

S03 Pre-release Information Integrity Gate

Beijing AI Origin Community Release Hall

S04 Trusted Procurement for SMEs

Dazhongsi Trusted Procurement Desk

S05 AI Insurance and Reproducibility Desk

Risk Clinic in the Zhongguancun Technology Services Wing

S06 Health Message Verification and Pre-visit Clarification

embedded verification window at community health services

S07 Education Material and Credential Verification

Media Literacy Classroom in the Origin Community

S08 Contract, Invoice and Promotion Verification

Dazhongsi Screenless Service Counter

S09 Community Rumour Triage

community node in the Xiaoyue River Scenario Enablement Wing

S10 Screenless Anti-scam Verification for Older Adults

staffed counter available across all six stations

S11 Accessible Audio-visual Explanation Verification

accessible verification desks throughout the corridor

S12 Creator Rights and Content History Registration

Creative Archive on the Jing-Zhang Cultural Belt

S13 Transit and Public Notice Version Check

Dazhongsi Station and slow-mobility connections

S14 Victim Correction and Reputation Recovery

Commons Correction and Recovery Station

S15 Jing-Zhang Industrial Heritage Archive Verification

heritage nodes on the Century-old Jing-Zhang Cultural Belt

12 COMPLETE JOURNEYS

retired resident without smartphone; low-vision or wheelchair visitor; clinician; teacher; parent; merchant; founder; creator; journalist; evaluator; international procurer; public-counter worker

A stoppable, reviewable and recoverable 90-day execution card

Operating KPI baselines remain pending an authorized field pilot; proposal values are not current performance.

STAGE	ACCOUNTABLE ROLE	DELIVERABLE	GATE
Days 1-15	Site owner / pilot lead	Authorized material, channel inventory and baseline	Stop without an owner or lawful material
Days 16-45	Test and review team	Failure dossier and review receipt	Adverse conclusions require human review
Days 46-70	Channel owner	Failure-injection and return log	Pause if correction cannot return
Days 71-90	Independent review role	Adopt, modify or retire decision	Do not continue without recovery evidence

HOW JZAC DIFFERS

Objective | verdict -> evidence, ownership, correction and recovery

Space | one back office -> three four-stage service prototypes

Rights | wait for result -> know, human, pause and same-channel recovery

Exit | model update -> failure injection, repair/retest or retirement

COMPLIANCE BOUNDARY

Public material stays within licensed use; privacy is minimized and scenario-isolated; copyright retains source, permission and revocation records; approval remains uncertain; high-impact adverse conclusions require human review.

From engineering log to open-source log

J/Z switchback + opposing arrows: evidence southbound, correction northbound, expiry at the switch.

Commit 0 Plaza

display each test question, version, owner and entry condition

Agent Contribution Log Wall

record human and agent contribution, dispute and revision side by side

Failure Boundary Beacon

make limits, expiry and shutdown visible instead of advertising success

Same-channel Repair Wall

track whether a correction reached every affected physical and digital channel

FIVE PROPOSED REGIONAL INTERFACES

Beiwei Community; Future Science City; Huairou Science City; Beijing E-Town; Jing-Jin-Ji nodes

FOUR-SEASON ANNUAL PROGRAM

Open Benchmark Season; Urban Correction Week; Open-source Heritage Festival; Annual Rights Audit and International Exchange

90-DAY STOP RULE

Stop without an owner, lawful material, human handover, correction-return channel or provable recovery.

AUTHORITY LIMITS

No truth score, automated blacklist, government-certification claim, content-removal authority, face database or sale of personal case data.

Core screenless public service remains free. Event footfall never substitutes for correction outcomes.
