

KnowRing — Xueyuan Road Campus Innovation Belt (Concept)

Centennial Jingzhang AI Belt international call - campus belt concept study

Three-level scope framework + site references (concept; not official data)
concept / provisional - temporary concept boundary - not an official redline - recompute after official data 数据发布后复算
PROVISIONAL - not an official redline - recompute after official data

Coordinated research area ~43.6 km² - overall design area ~11.4 km² - key areas ~368.4 ha (official text)

This package: campus-innovation belt inside the overall design area (concept) - all geometry provisional

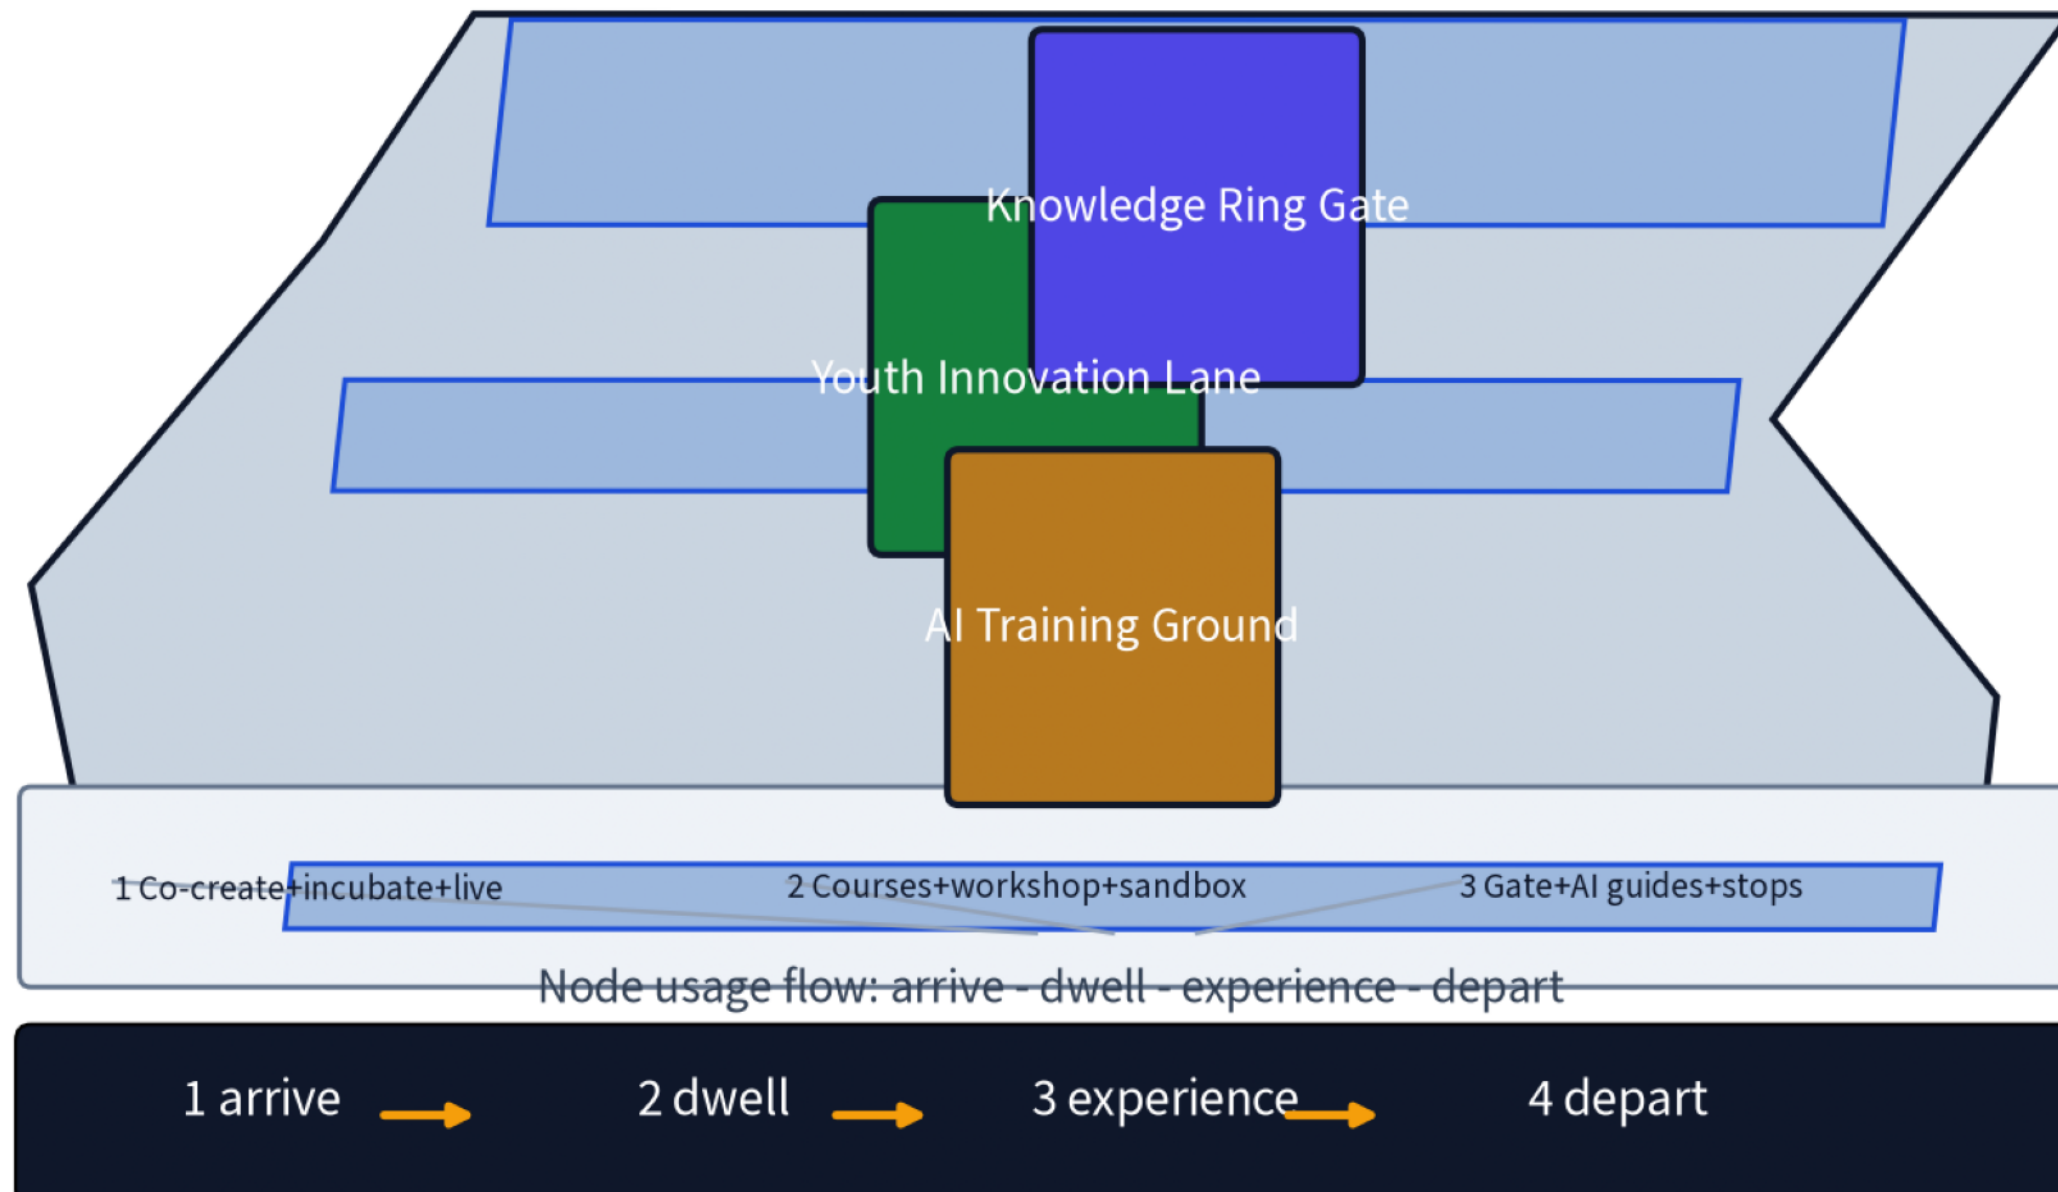

Official text caliber: coordinated ~43.6 km² - overall design ~11.4 km² - key areas ~368.4 ha

Three concept nodes: design tasks and usage flow

Three concept nodes: design tasks and usage flow

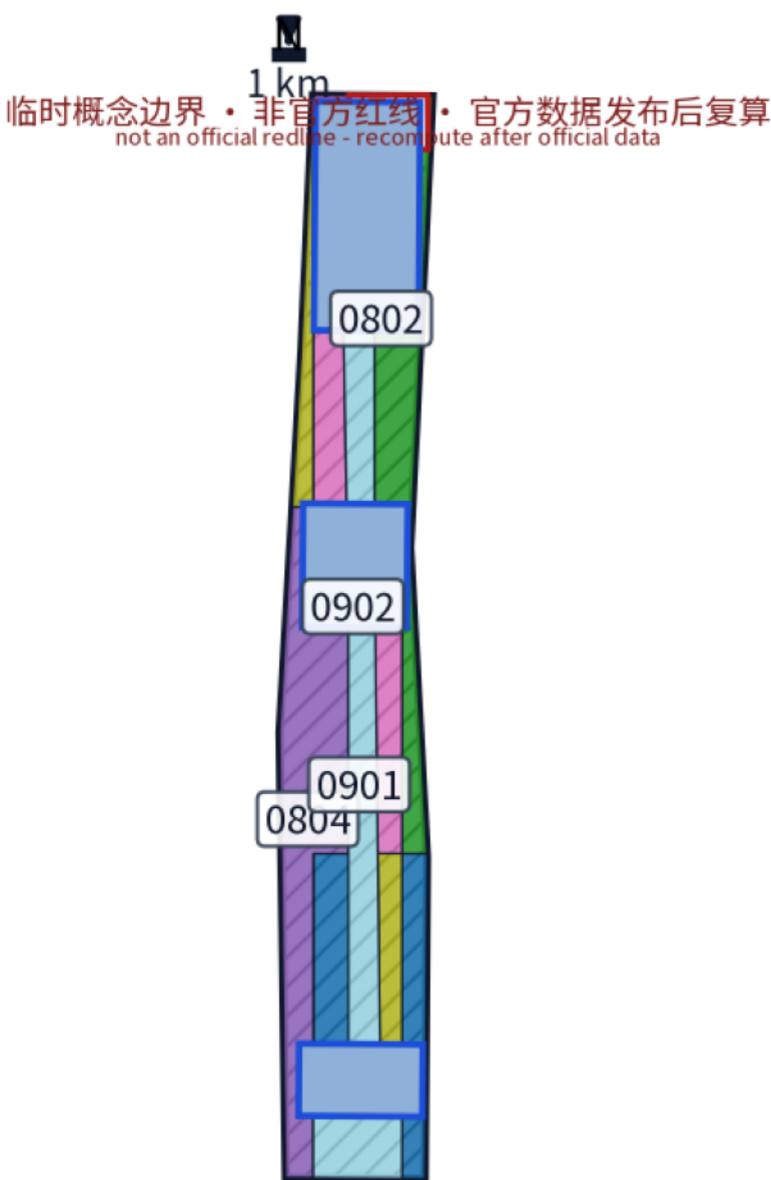

Concept locations; final siting follows the organizer's official boundary

临时概念边界 · 非官方红线 · 官方数据发布后复算
not an official redline - recompute after official data

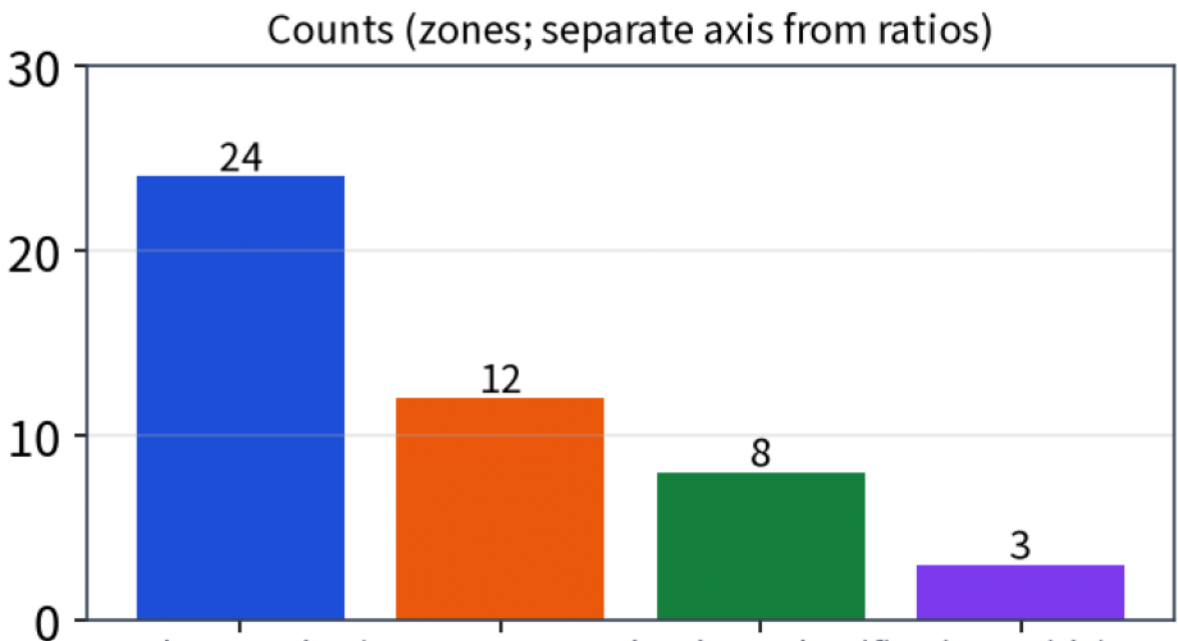

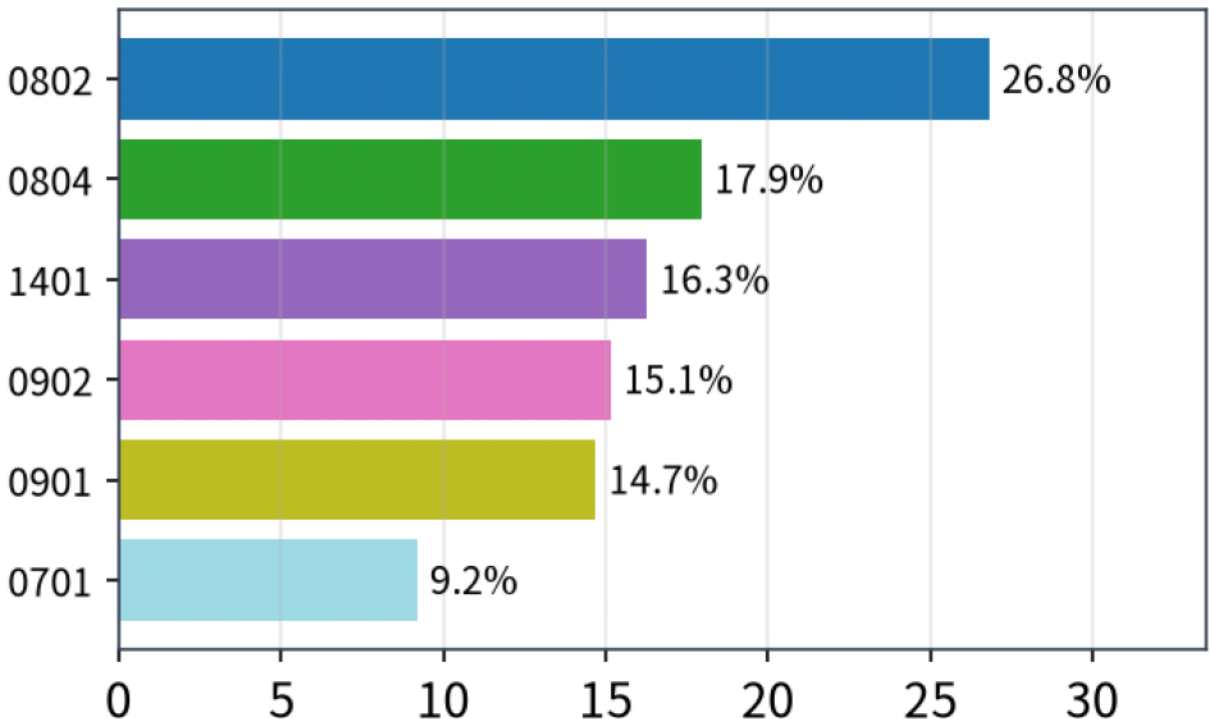

Land-use structure and baseline note

Spatial layer: geometry/land_use.geojson

Land-use structure and baseline note (conceptual)

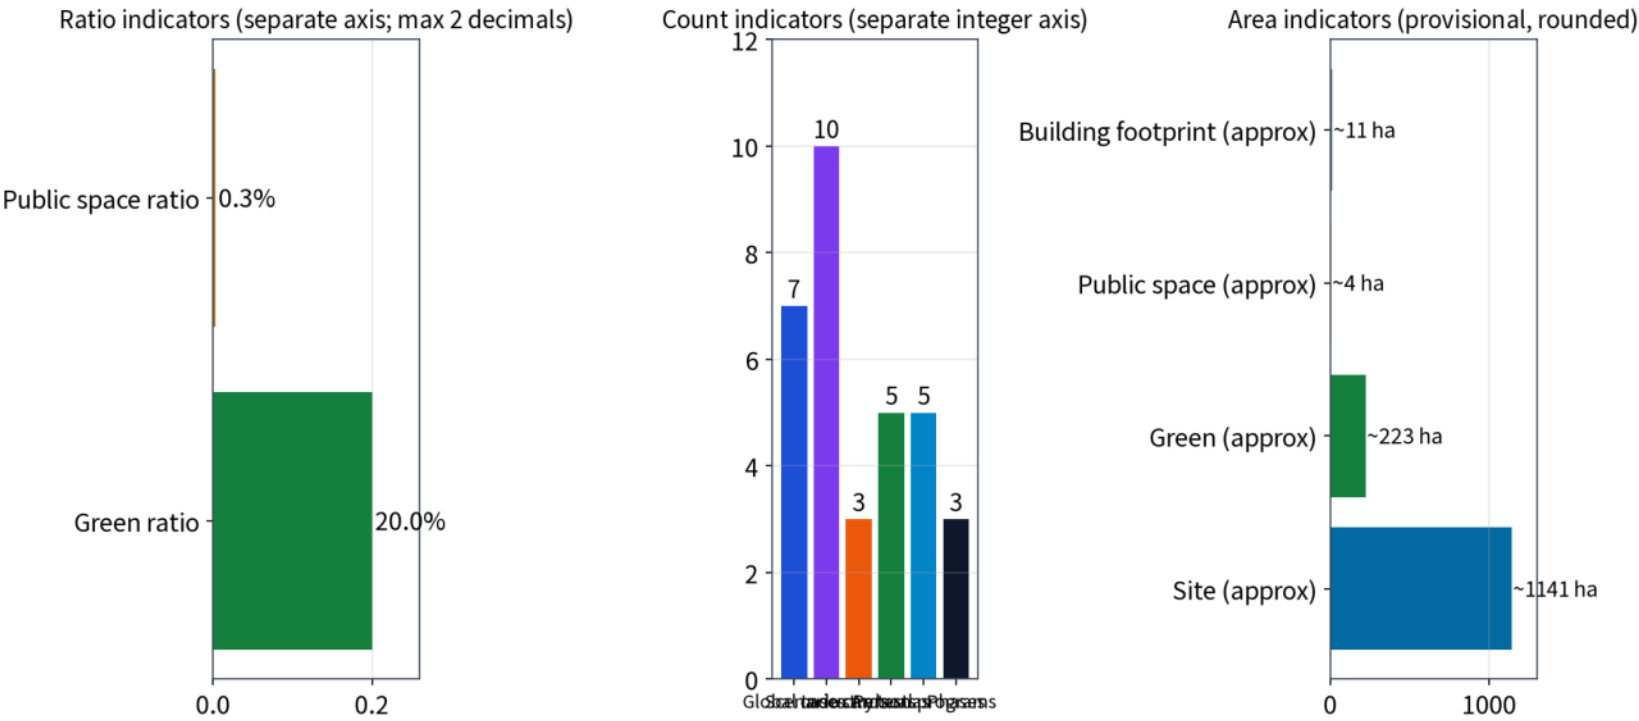

临时概念边界 · 非官方红线 · 官方数据发布后复算
PROVISIONAL - not an official redline - recompute after official data

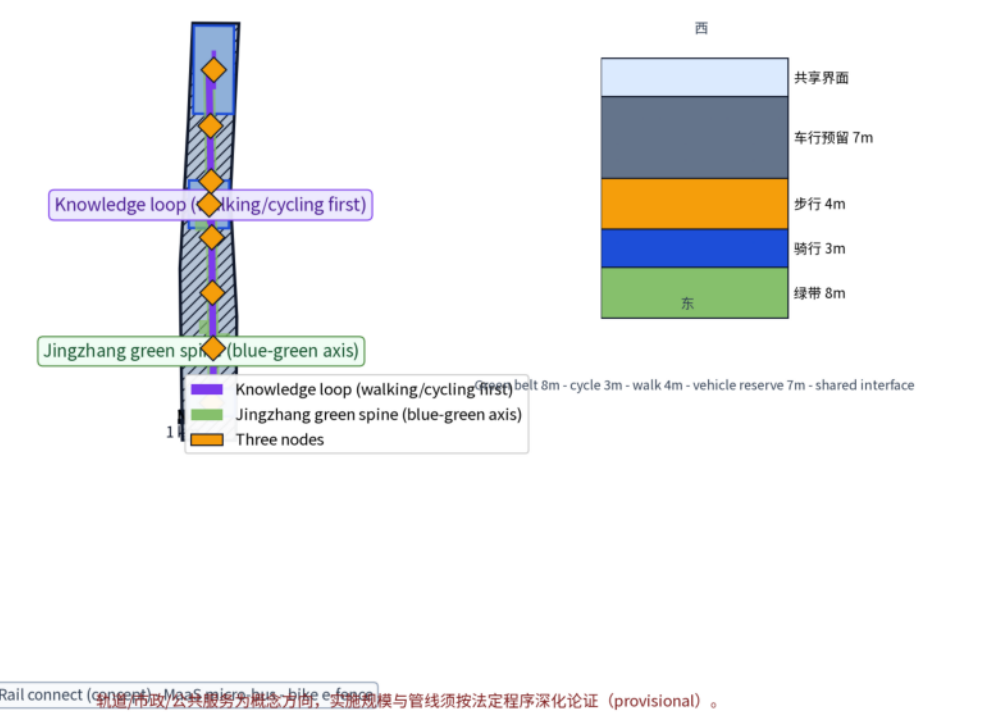

Official baseline census not yet published: this chart is a conceptual scenario, not a survey result; recompute with the declared formula once official data is released.

Indicators, phasing, and slow-traffic blue-green

Core indicator evidence (official text caliber + reduced-precision provisional display)

Slow-traffic and blue-green network (with street section) 临时概念边界 · 非官方红线 · 官方数据发布后复算
PROVISIONAL - not an official redline - recompute after official data

数据来源与公式: 比率=各概念层面积÷site面积 (geometry, EPSG:4548) ; 计数=正文表格与 geometry/public_space.geojson ; 面积类=投影面积约整展示。置信: 计数=高 (文本口径), 比率与面积=低 (provisional) 。
用途限制: 仅概念讨论, 不得作为精确面积或红线依据 (临时概念边界 · 非官方红线) 。复算触发: 组织方发布可验证坐标系边界与现状基数据后, 按同一公式复算并更新全部图件。
