

OPEN RAIL · Jing-Zhang AI Commons

Concept: One Spine · Six Stations · Three Areas · Two Wings

Sources: site-package provisional_boundaries.geojson / official announcement / design-layers | Areas in EPSG:4548
Boundary: provisional rough polygon (from announcement text; NOT an official redline)
All spatial proposals are conceptual recommendations for professional deepening

Overall Concept

One Spine

Century-old railway -> 9.7 km open-source trail as city mainboard

Six Stations

Dazhongsi / Zhichunlu / Wudaokou / Qinghuayuan / Zhongzhiyuan S+N

3 Areas + 2 Wings

Zhongzhiyuan, AI Origin, Dazhongsi + two wings

Heritage

Zhan Tianyou's herringbone rail -> open-source network

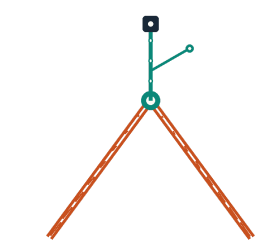

AI Commons

An open city shared by developers, residents, firms and agents

One Spine · Six Stations · Three Areas · Two Wings

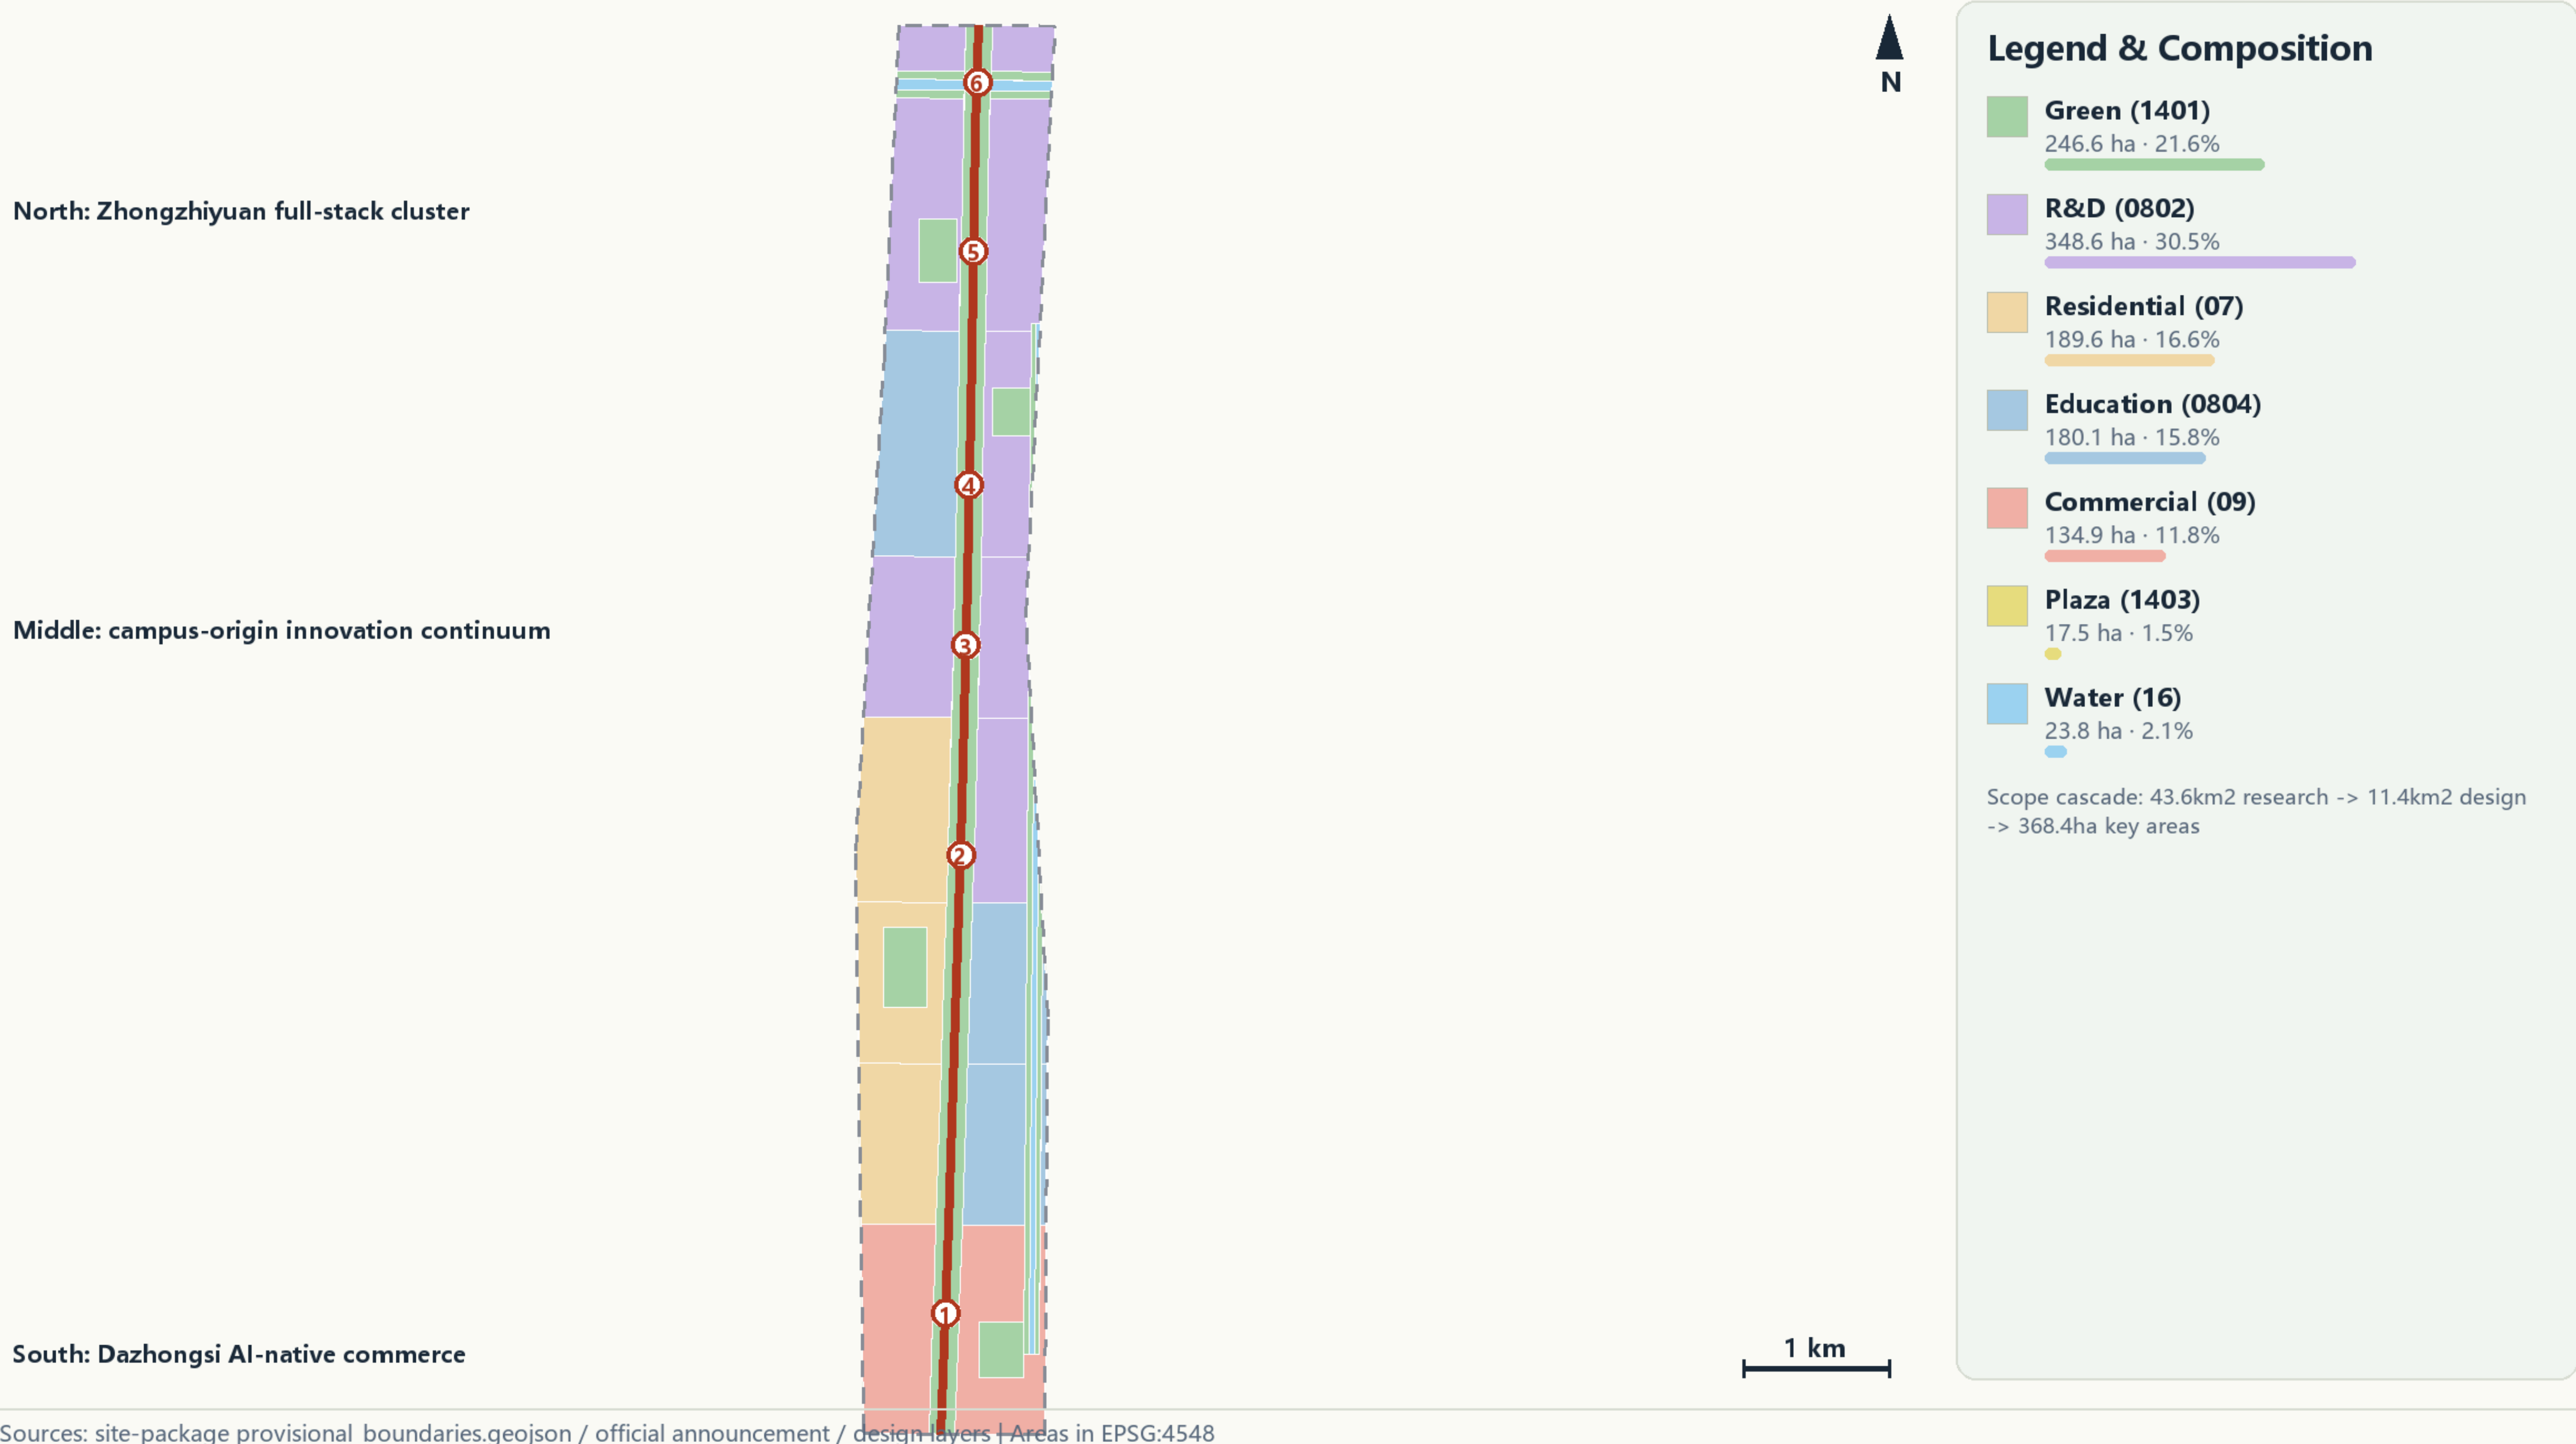

- 9.7 km corridor as civic mainboard; rails as data & slow bus
- Six halls: Dazhongsi, Zhichunlu, Wudaokou, Qinghuayuan, Zhongzhiyuan S/N
- Three areas: mainboard chip / bootloader / peripheral dock
- Two wings: ZGC tech-service + Xiaoyuehe scenario

Conceptual · provisional boundary, not official redline

OPEN RAIL • Jing-Zhang AI Commons

Land-Use Structure: spine as axis, parcels as clusters

Sources: site-package provisional_boundaries.geojson / official announcement / design-layers | Areas in EPSG:4548
Boundary: provisional rough polygon (from announcement text; NOT an official redline)
All spatial proposals are conceptual recommendations for professional deepening

Composition (recomputed)

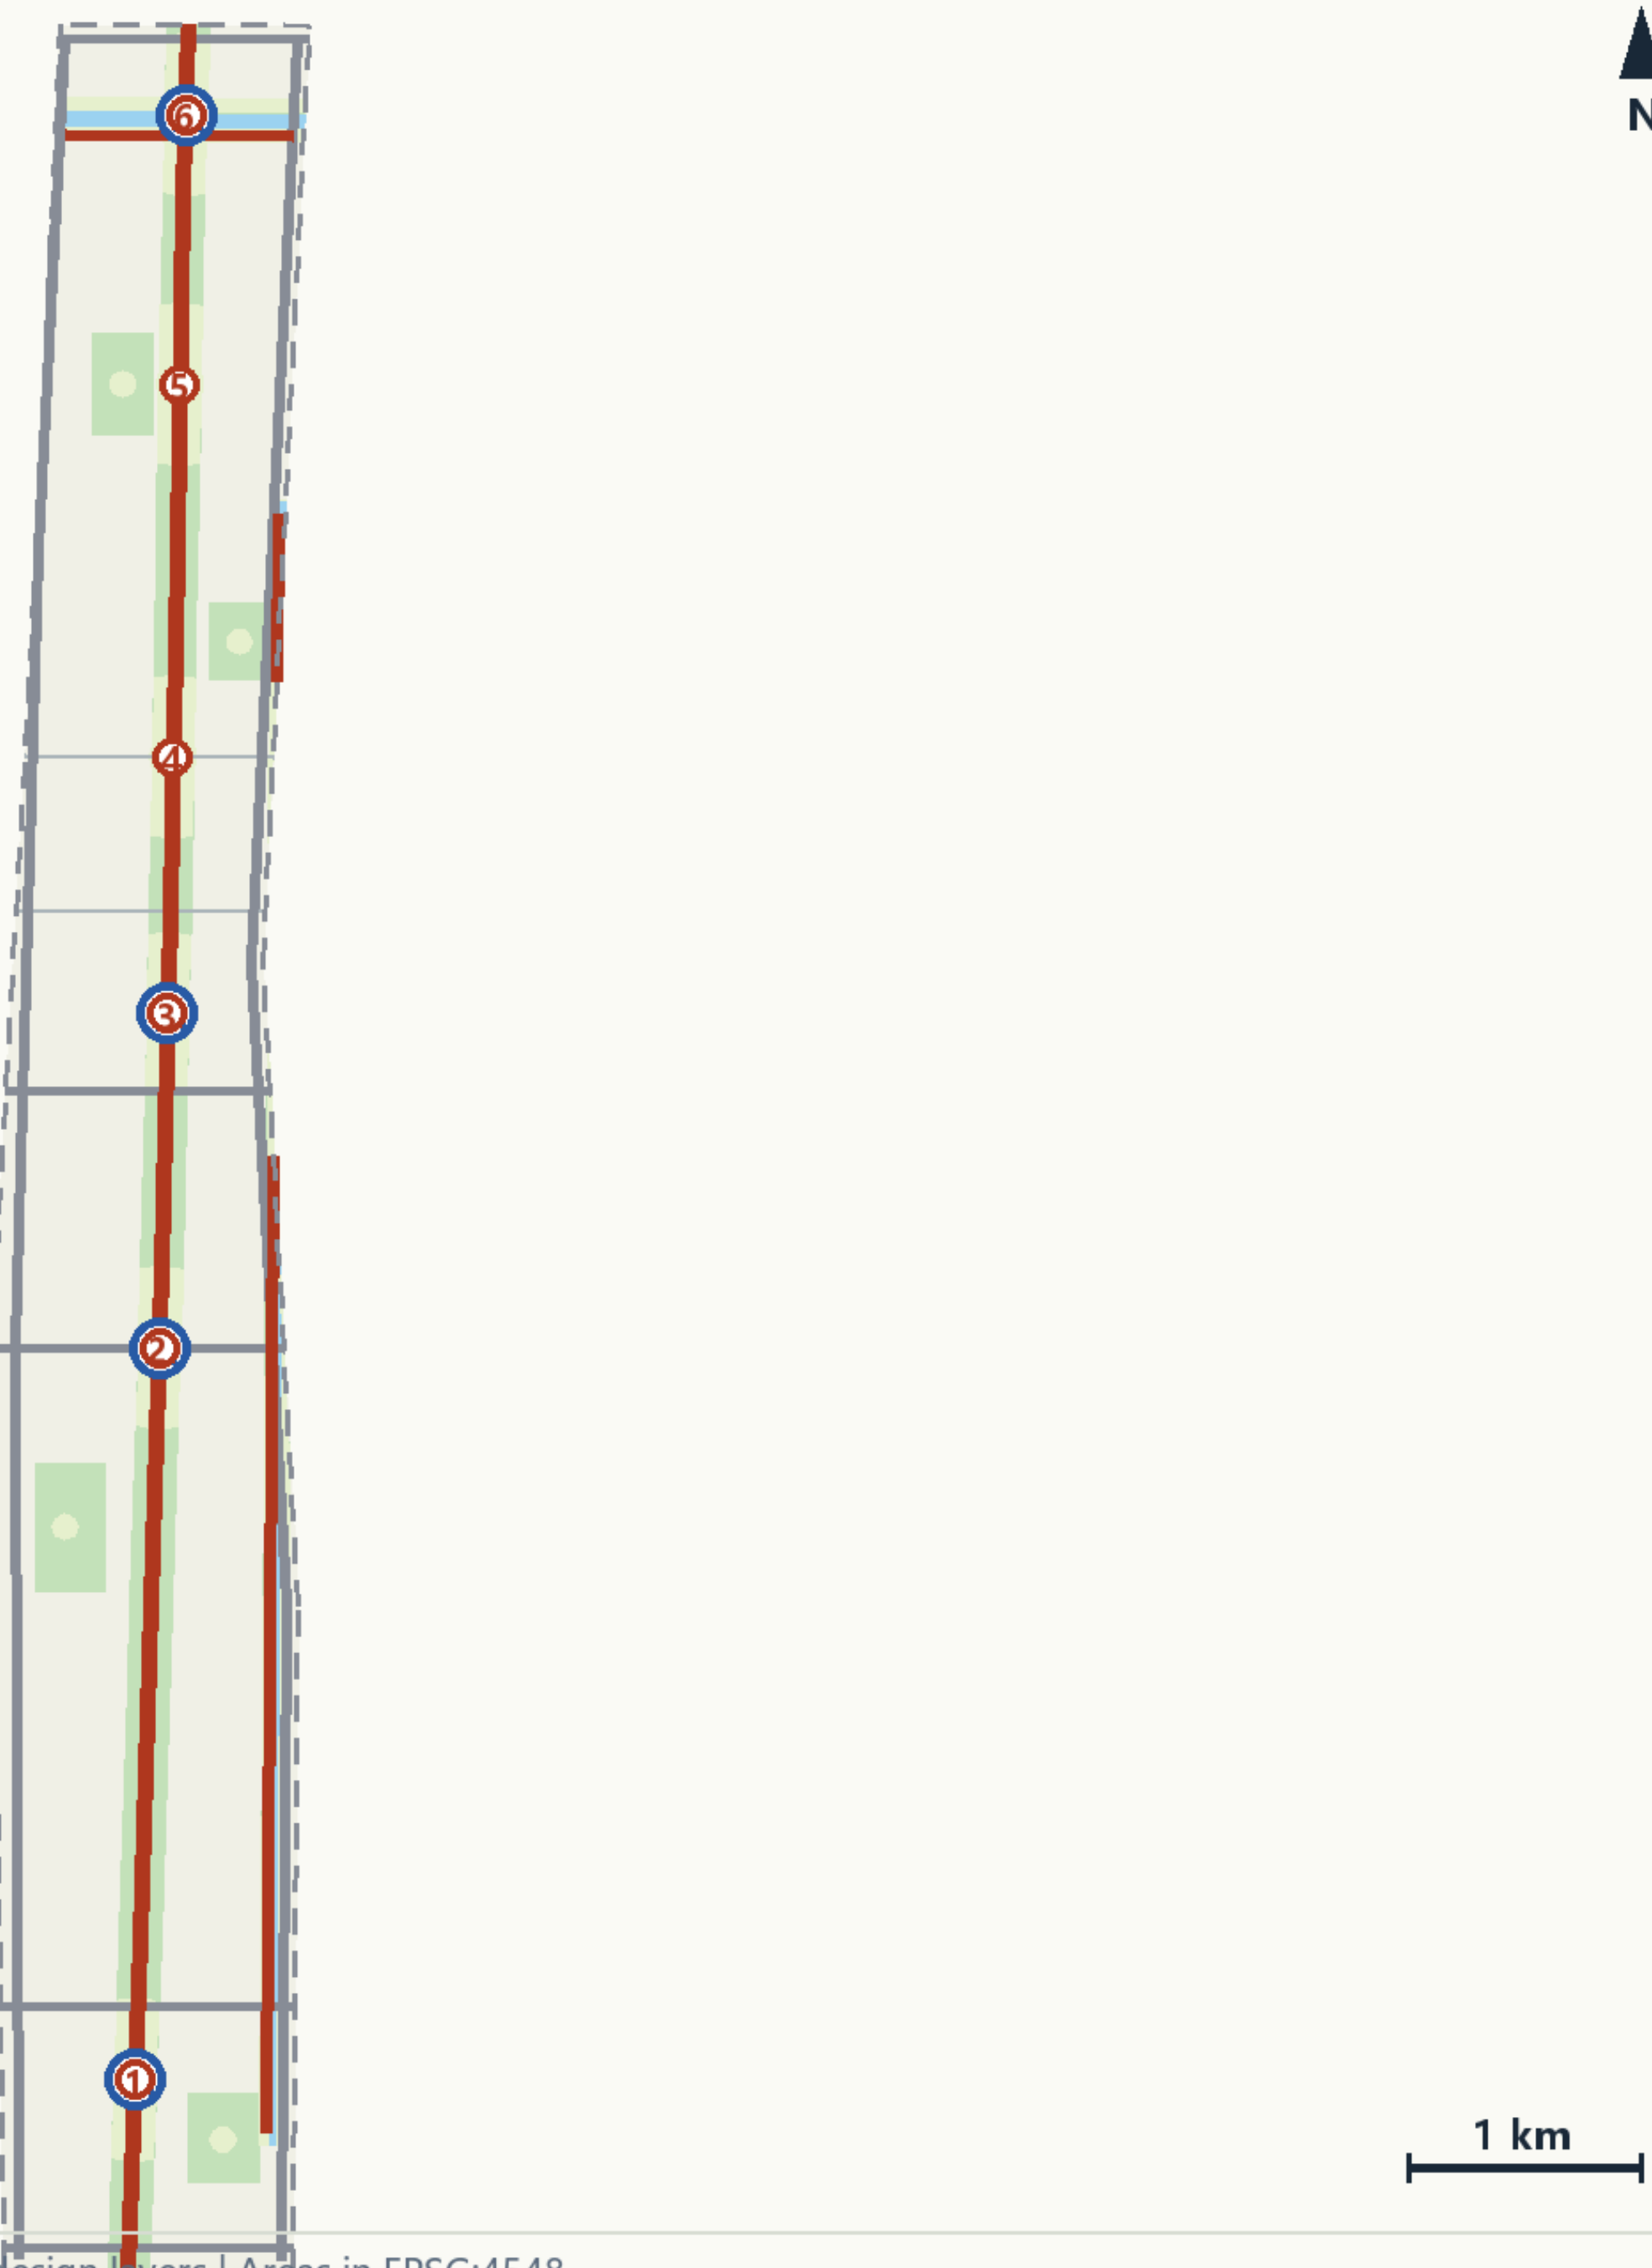

Use	ha	%
R&D	348.6	30.5
Green	246.6	21.6
Residential	189.6	16.6
Education	180.1	15.8
Commercial	134.9	11.8

Renewal: retain in housing areas, renovate campus interfaces, combine in key areas; plot-level classification pending.

OPEN RAIL • Jing-Zhang AI Commons

Mobility x Blue-Green: stitched corridors, riverfront pearls

Legend & System Notes

- Open-source trail: 9.7 km heritage slow-mobility spine
- Metro-station integration (concept)
- Arterial frontages (Xitucheng-Xueyuan etc.)
- Qinghe / Xiaoyue river water
- Heritage corridor & riverside green
- Public space network

- 6 full-age accessible interchange nodes across arterials
- Corridor-Qinghe-Xiaoyue forms an N-shaped eco skeleton
- AI scenario nodes within 5-min walk of station halls
- Rail/road redlines per official data; this is conceptual

Sources: site-package provisional_boundaries.geojson / official announcement / design layers | Areas in EPSG:4548
Boundary: provisional rough polygon (from announcement text; NOT an official redline)
All spatial proposals are conceptual recommendations for professional deepening

Stitched corridors • riverfront pearls

- 9.72 km trail; six full-age interchange halls
- Metro integration at 4 stations (concept)
- Edge-compute in halls; energy & sponge along riverside
- Rail/road redlines per official data

Blue-green skeleton

- 1.567 km2 continuous corridor green
- Riverside green + 4 community parks
- Green ratio 21.61% (design model)

Public-space network

- 6 plazas + 6 active segments
- Waterfront + 5 pocket squares
- Public space 10.56% (not additive)

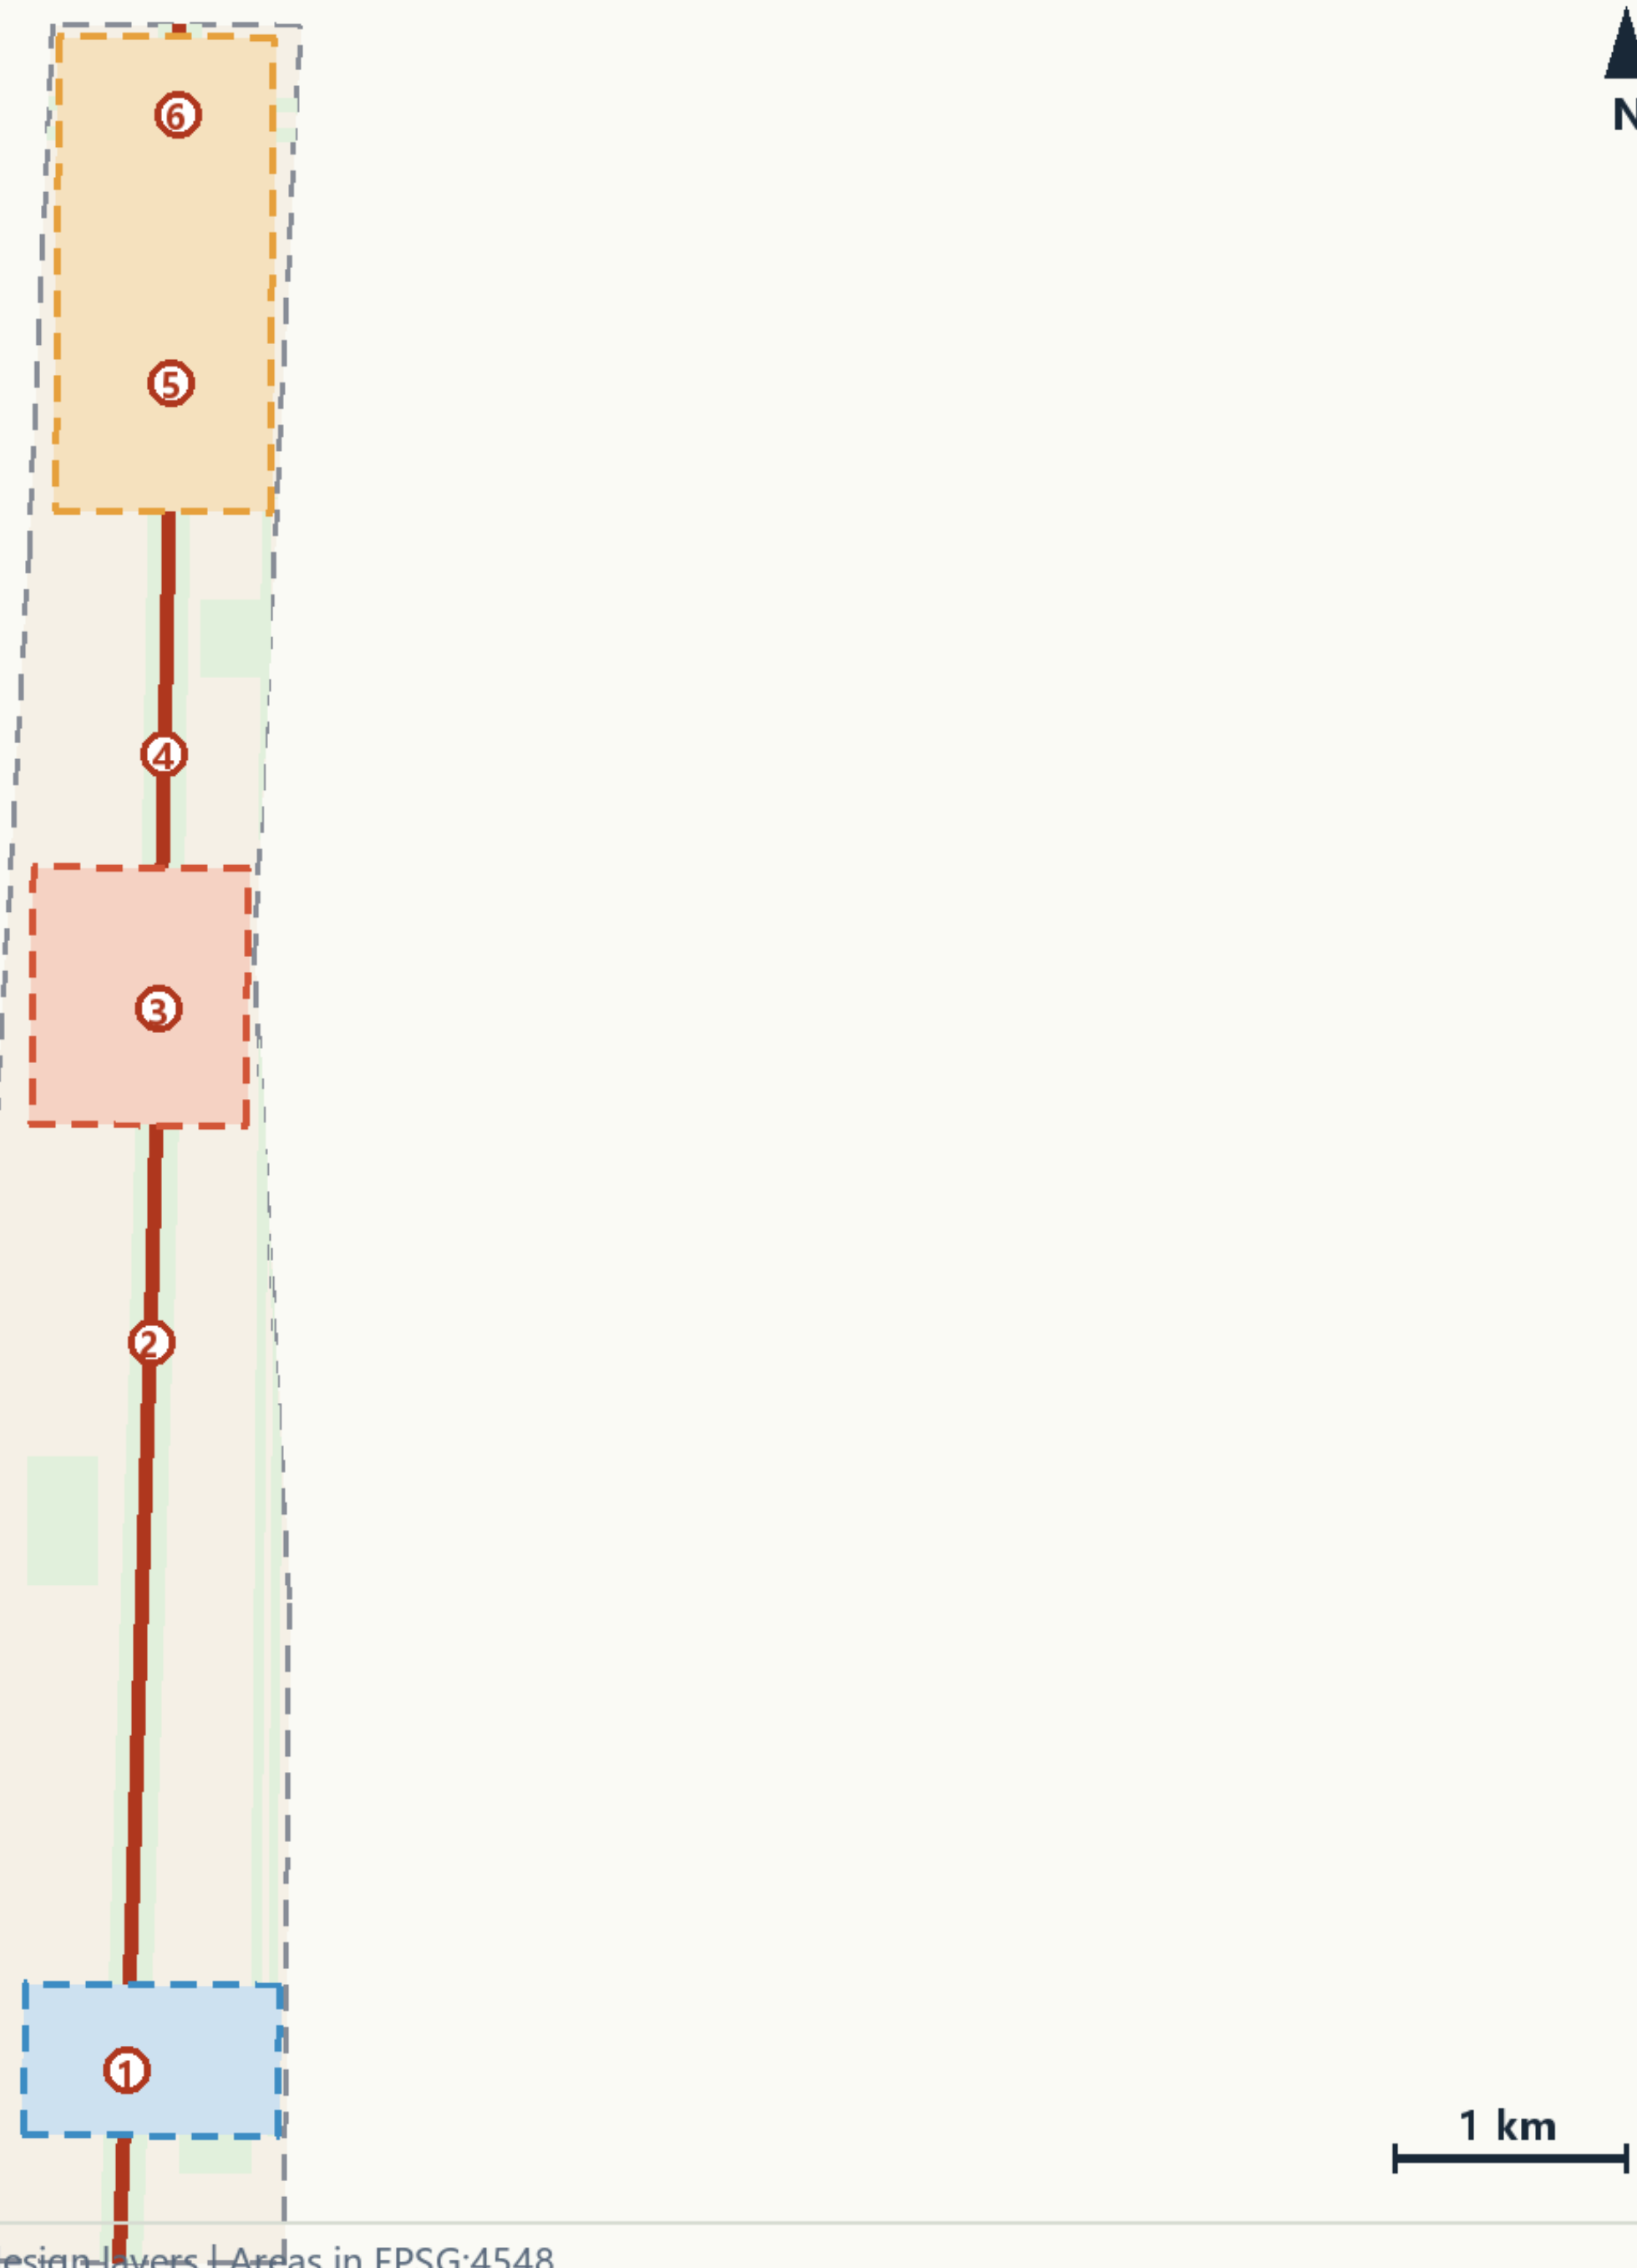

AI pilgrimage landmarks

- Developer Promenade
- Agent Honour Wall
- Open-Source Gallery
- AI Origin Monument

OPEN RAIL • Jing-Zhang AI Commons

Three Key Areas: positioning, anchors, risk conditions

Sources: site-package provisional_boundaries.geojson / official announcement / design layers | Areas in EPSG:4548
Boundary: provisional rough polygon (from announcement text; NOT an official redline)
All spatial proposals are conceptual recommendations for professional deepening

Key Area Detailed Design

Zhongzhiyuan AI Acceleration Area

Mainboard chip • full-stack innovation

~192.1 ha (announced)

- Compute-model-toolchain courtyards
- AI governance standard testbed
- Open innovation green valley

Conceptual only; deepen after official boundary & controls

Beijing AI Origin Community

Bootloader • world-class AI ecosystem

~104.3 ha (announced)

- Qinghuayuan hall + open-source gallery
- Developer mixed-use blocks
- Wudaokou international gateway

Conceptual only; deepen after official boundary & controls

Dazhongsi AI Industry Cluster

Peripheral dock • AI-native business

~72.0 ha (announced)

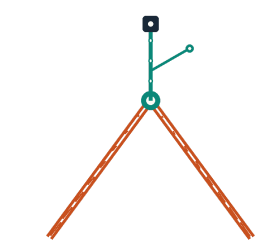

- AI-native retail and commerce
- Dazhongsi civic showcase hall
- AI+commerce test streets

Conceptual only; deepen after official boundary & controls

Positioning & anchors

Area	Role	Anchors
Zhongzhiyuan 192.1 ha	Mainboard	Full-stack courtyards, testbed, valley
AI Origin 104.3 ha	Bootloader	Gallery, developer blocks, gateway
Dazhongsi 72.0 ha	Dock	AI-native commerce, test streets

All conceptual; deepen after official boundary & controls.

13 scenario cards (3 tests need permits)

- AI+walkability
- AIcultural guide
- AIhealth nav
- copilot
- safety review
- robot delivery
- AI+open class
- AI+retail guide
- edge test
- park O&M
- auto shuttle
- gov sandbox

Personas (6)

Researchers, developers, students, residents, visitors, older adults; 10-type public-space component library

Annual events

Spring conf / summer tests / autumn culture / winter annual

Phasing

Near: south demo; mid: north + ZZY-S; far: ZZY-N + Qinghe

11,412,825

m² site area

Metrics & Evidence: recomputable from package geometry

Core Metric Cards

Overall design area

11,412,825 sqm

≈ 11.41 km² (announced 11.4, +0.11%)

□ site_boundary -> polygon_area(EPSG:4548)

green_ratio

21.61%

green 246.6 ha / site

□ green_space / site_boundary

public_space_ratio

10.56%

public 120.6 ha / site

□ public_space / site_boundary

Building footprint (concept)

221.6 ha

1107 footprints

□ sum(buildings.geojson)

Spine length

9.72 km

6 station halls, ~2h walk

□ roads.geojson centerline

Key areas

3 areas • 368.4 ha

192.1 / 104.3 / 72.0 ha (announced)

□ key_areas.geojson

Sources: site-package provisional_boundaries.geojson / official announcement / design_layers | Areas in EPSG:4548

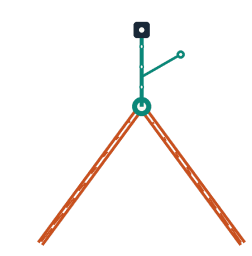

Boundary: provisional_rough_polygon (from announcement text; NOT an official redline)

All spatial proposals are conceptual recommendations for professional deepening | Chain: GeoJSON -> EPSG:4548 -> metrics.json -> this figure & visual data-value; FAR/height pending official controls (unknown)

Evidence chain

- GeoJSON -> EPSG:4548 -> metrics.json -> drawings/exhibit
- 23 requirements covered; mandatory standards addressed; 15 depth items complete
- FAR/height: unknown pending controls
- Four self-check gates must pass (see self_check.json)

Conceptual / reference scheme • not statutory planning • not a government conclusion

OPEN RAIL

Jing-Zhang AI Commons • Centennial Jing-Zhang AI Innovation Belt

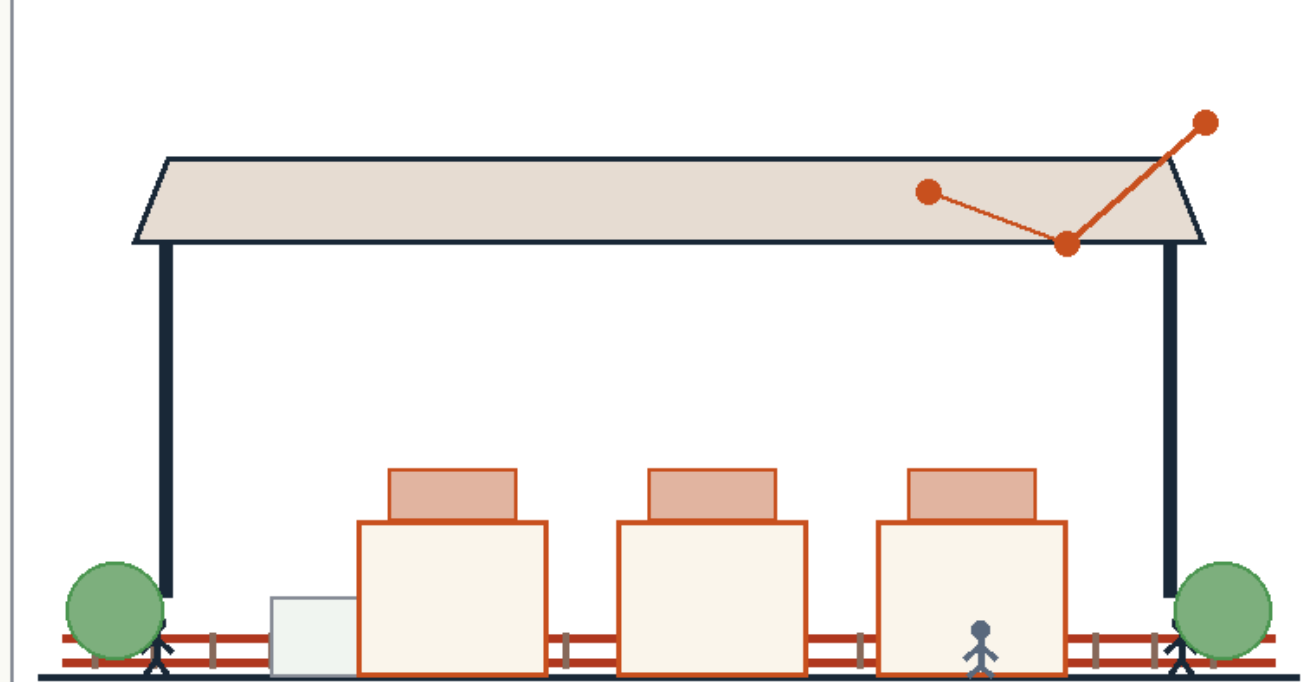

Board 8 | Place Design & Implementation Governance

OPEN RAIL • Jing-Zhang AI Commons

Six station halls as places: from concept band to tangible setting (concept sections)

Dazhongsi Hall

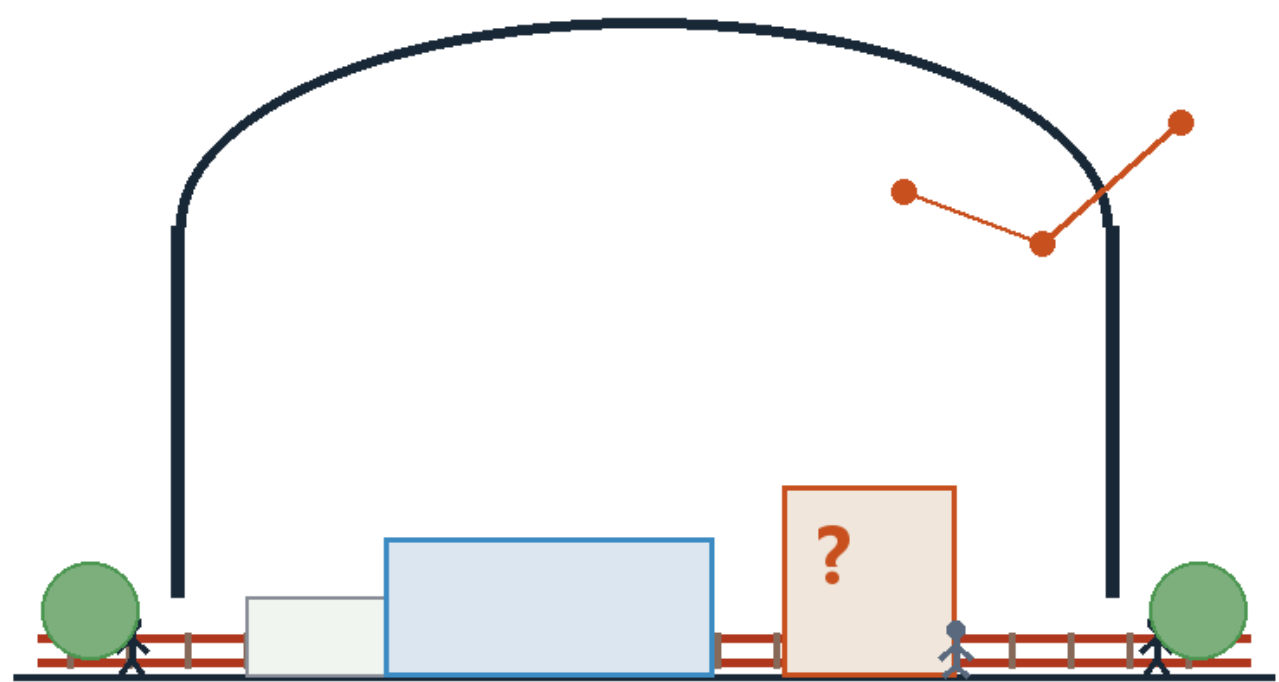

■ Dock & Test Block

Concept section, not to scale

Zhichunlu Hall

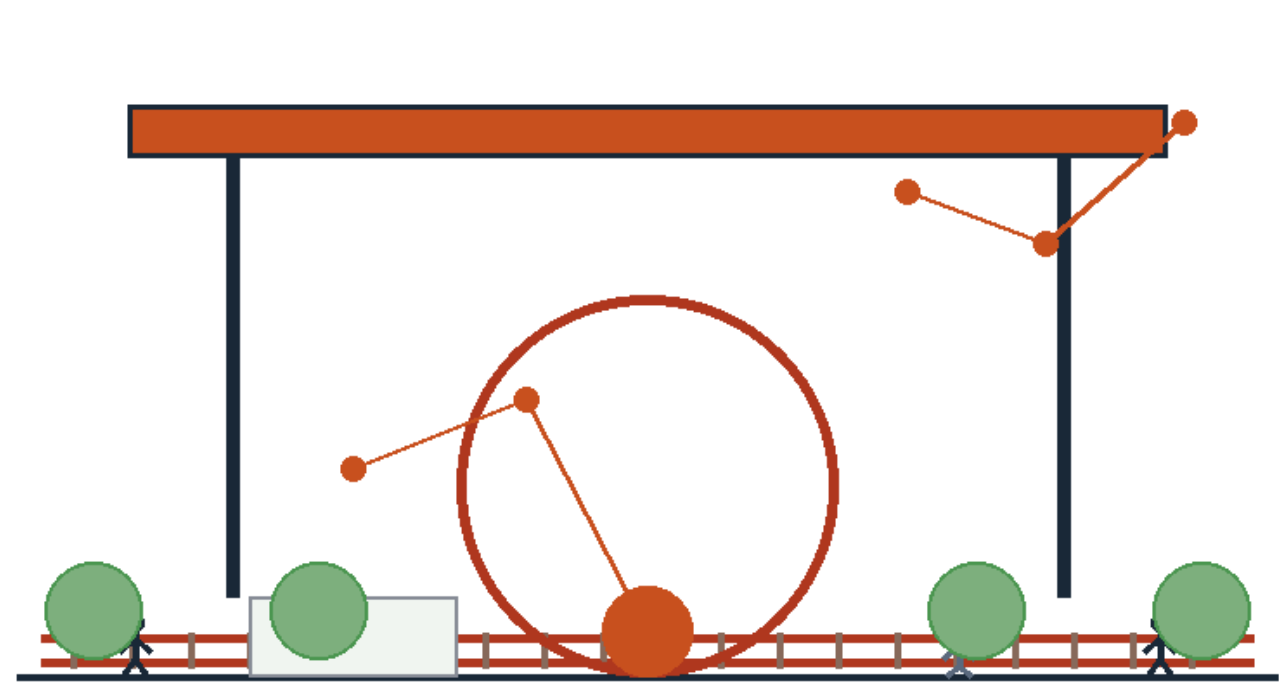

■ All-day Community Services

Concept section, not to scale

Wudaokou • AI Origin

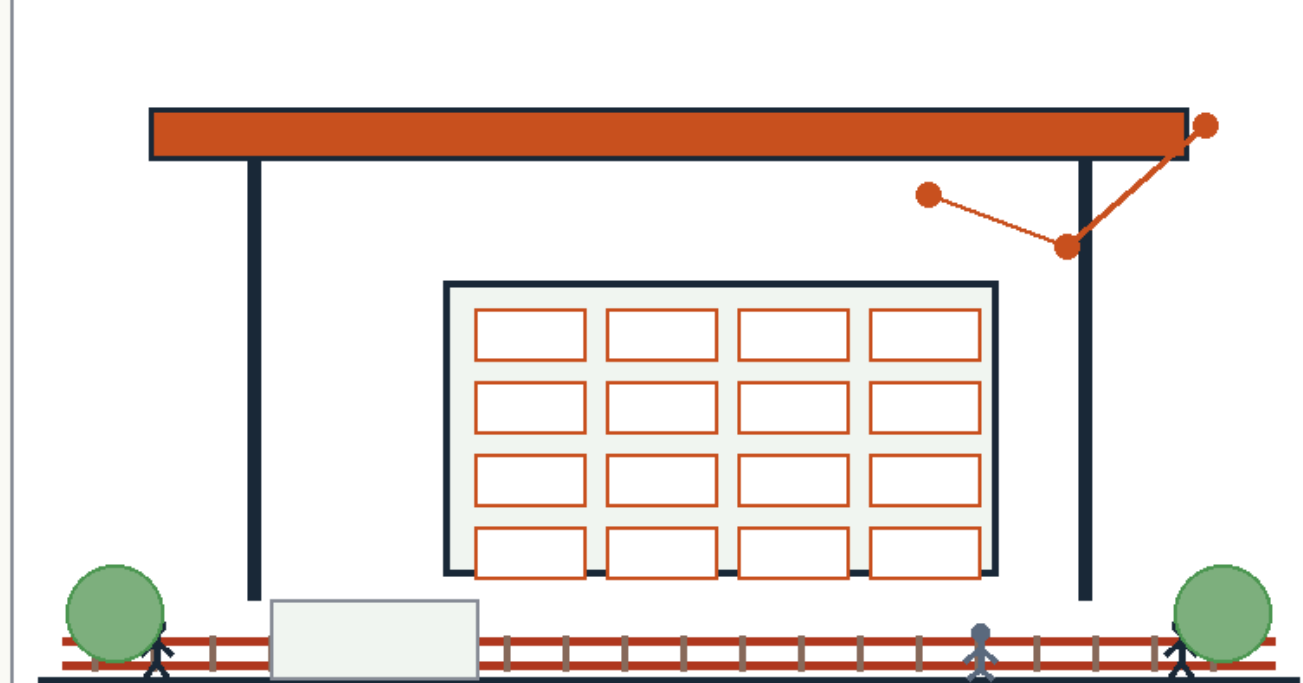

■ Origin Plaza, Urban Living Room

Concept section, not to scale

Qinghuayuan Hall

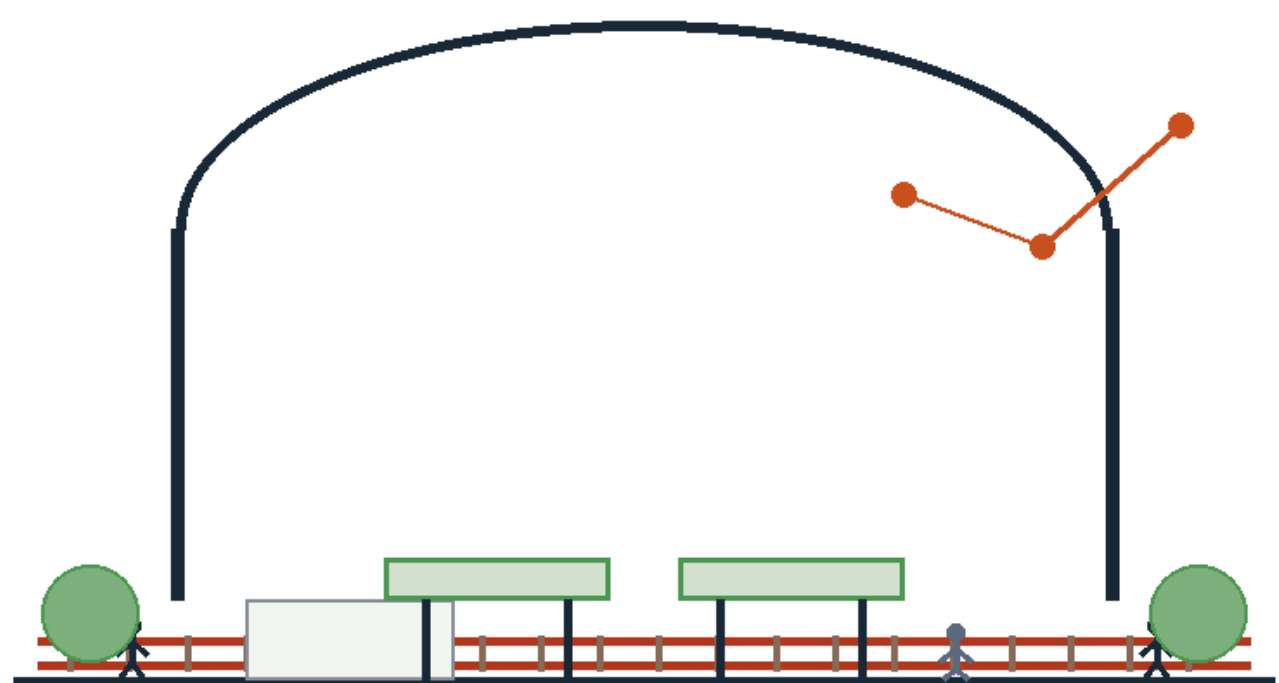

■ Heritage Display & Honor Wall

Concept section, not to scale

Zhongzhiyuan South

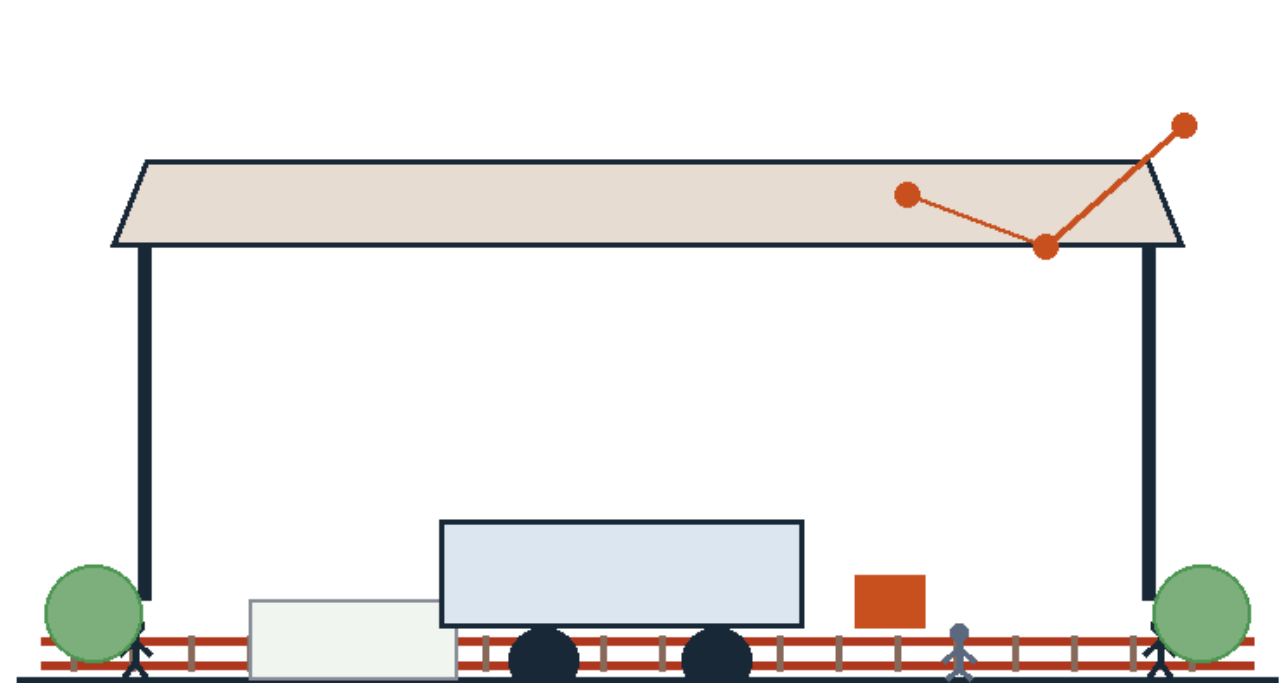

■ Mainboard Parlor & Shared Lab

Concept section, not to scale

Zhongzhiyuan N • Qinghe

■ North Gate & Transfer Hub

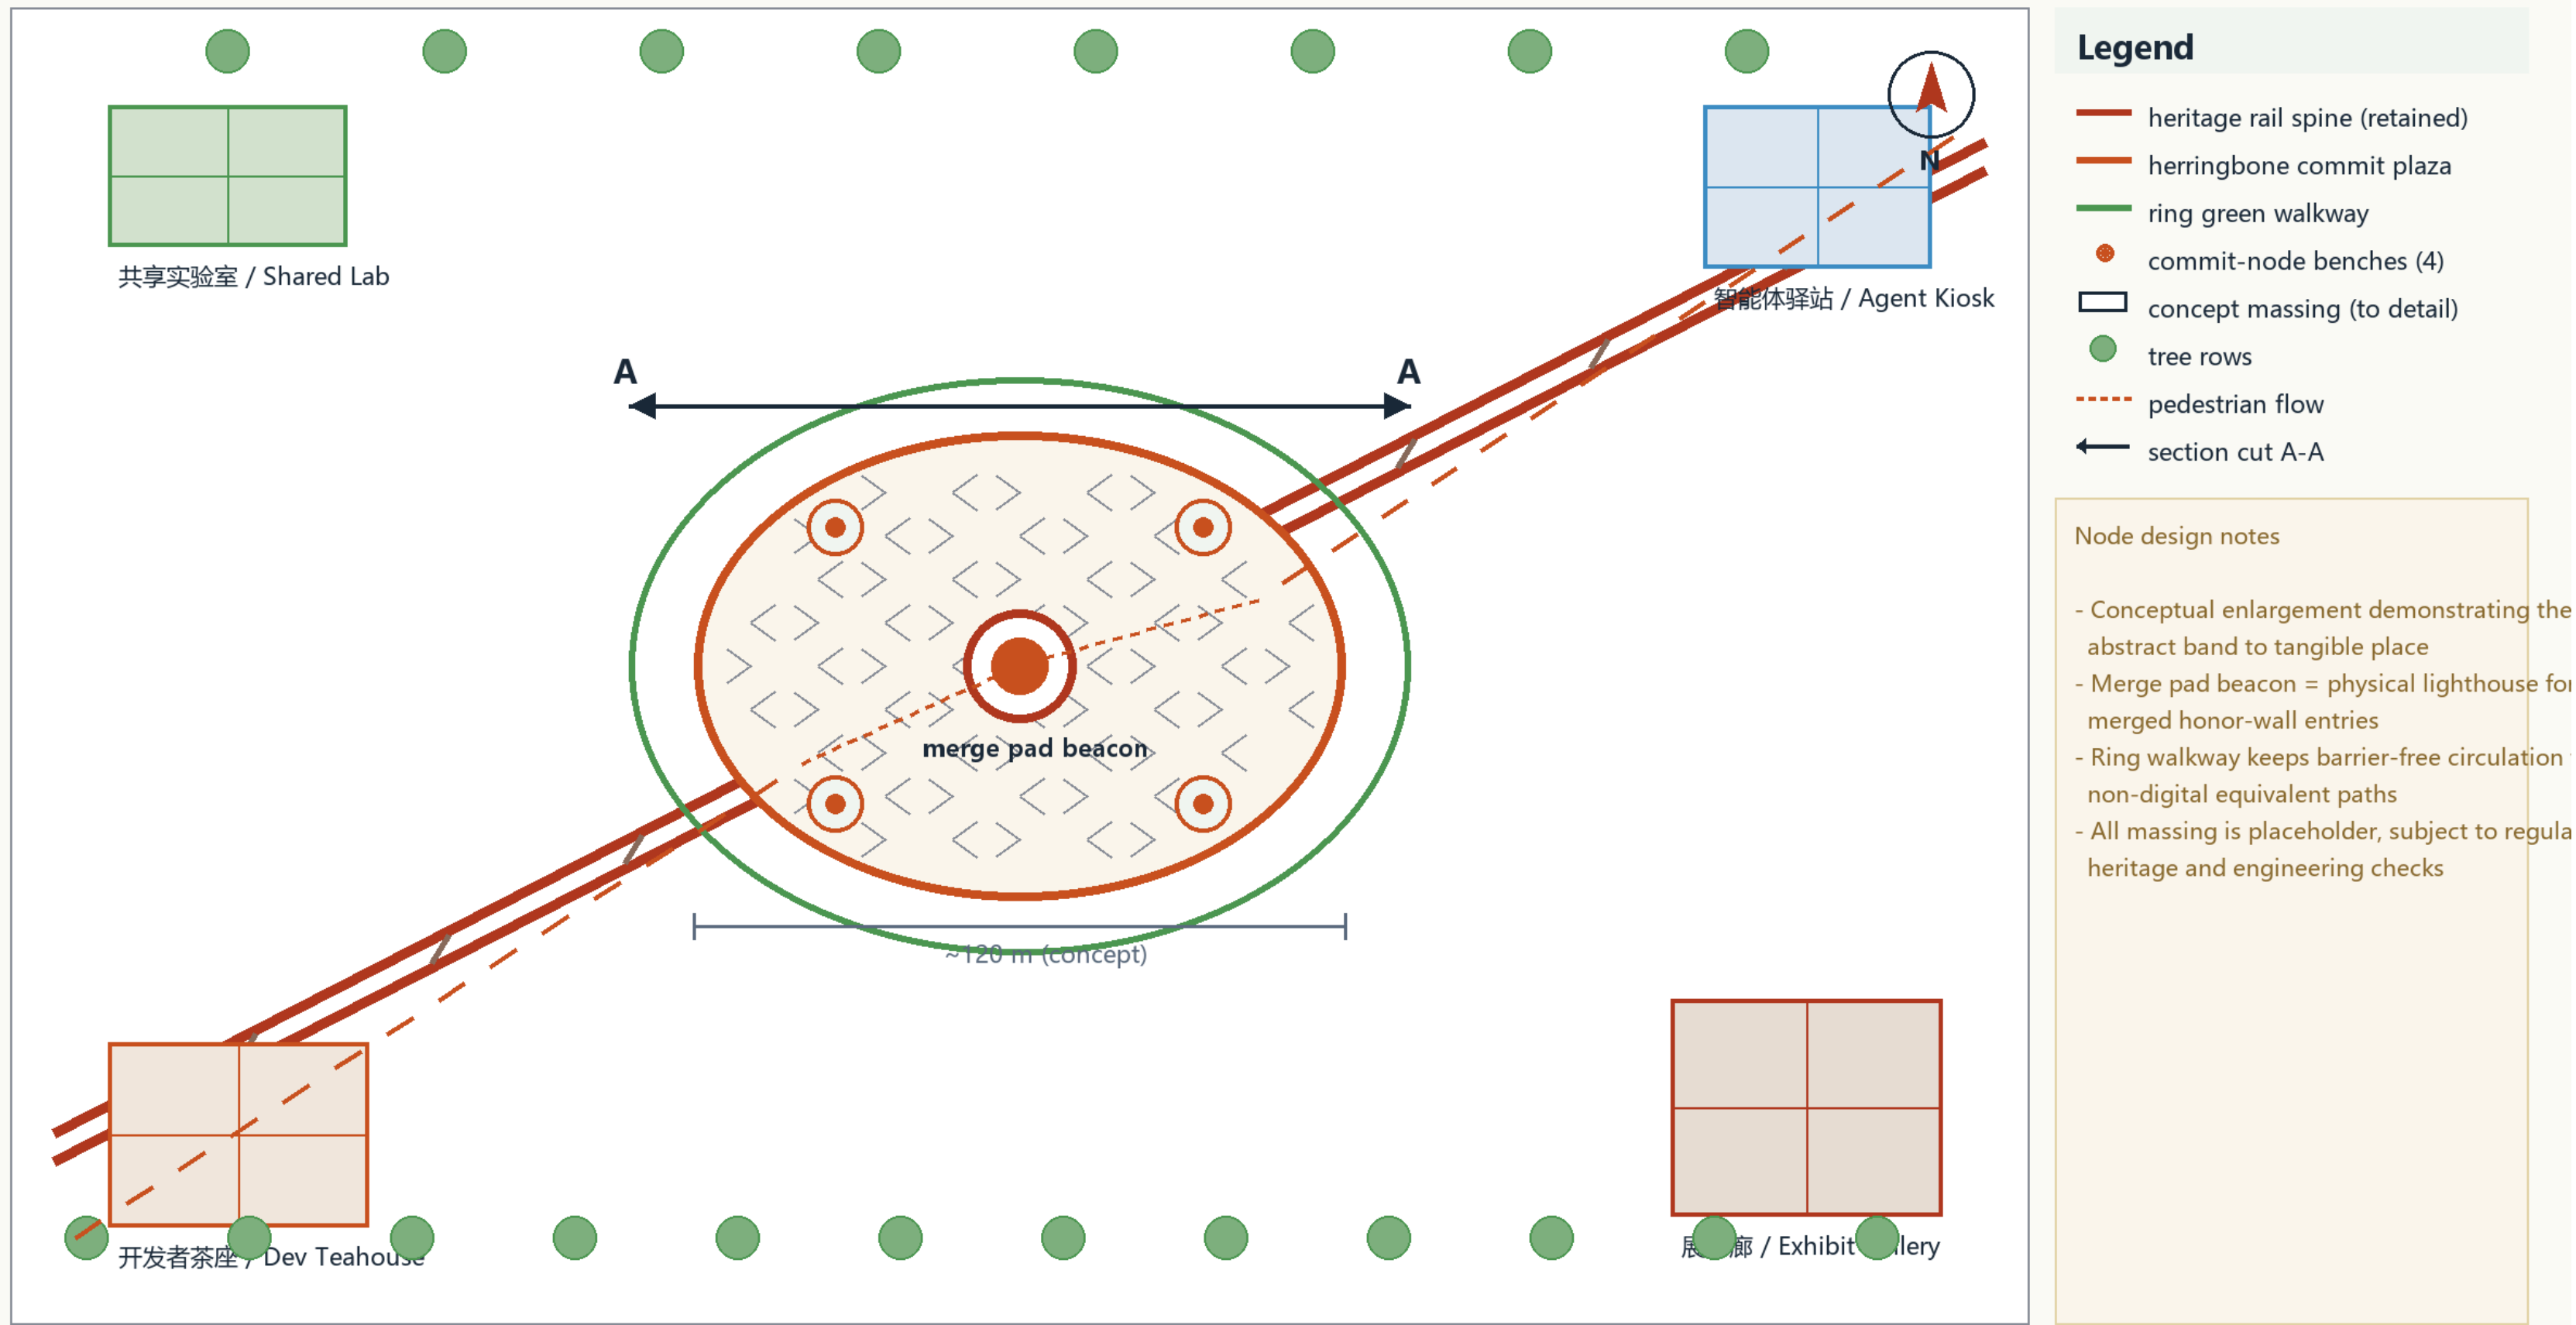

Concept section, not to scale

Conceptual place-design illustrations, not construction drawings; overall boundary provisional (not official redline); subject to regulatory check and professional detailing

OPEN RAIL • Jing-Zhang AI Commons

Zhongzhiyuan 'Commit Plaza' node enlargement: place design study (concept)

Conceptual place-design illustrations, not construction drawings; overall boundary provisional (not official redline); subject to regulatory check and professional detailing

Place studies (concept)

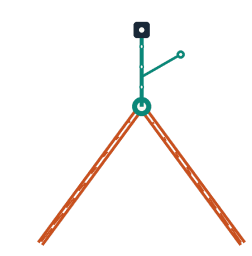

- Six halls as places, concept sections
- Brand kit: paving, railings, benches, lights, medallions
- Commit Plaza enlargement (placeholder massing)

Funding typology

- City funds / market investment
- Industry funds / foundations / micro-funds
- Operations reinvest, disclosed

Baseline protocols

- P1 accessibility / P2 equivalent paths / P3 response
- P4 walkability / P5 third-party audit
- Failures retained; unmeasured = pending

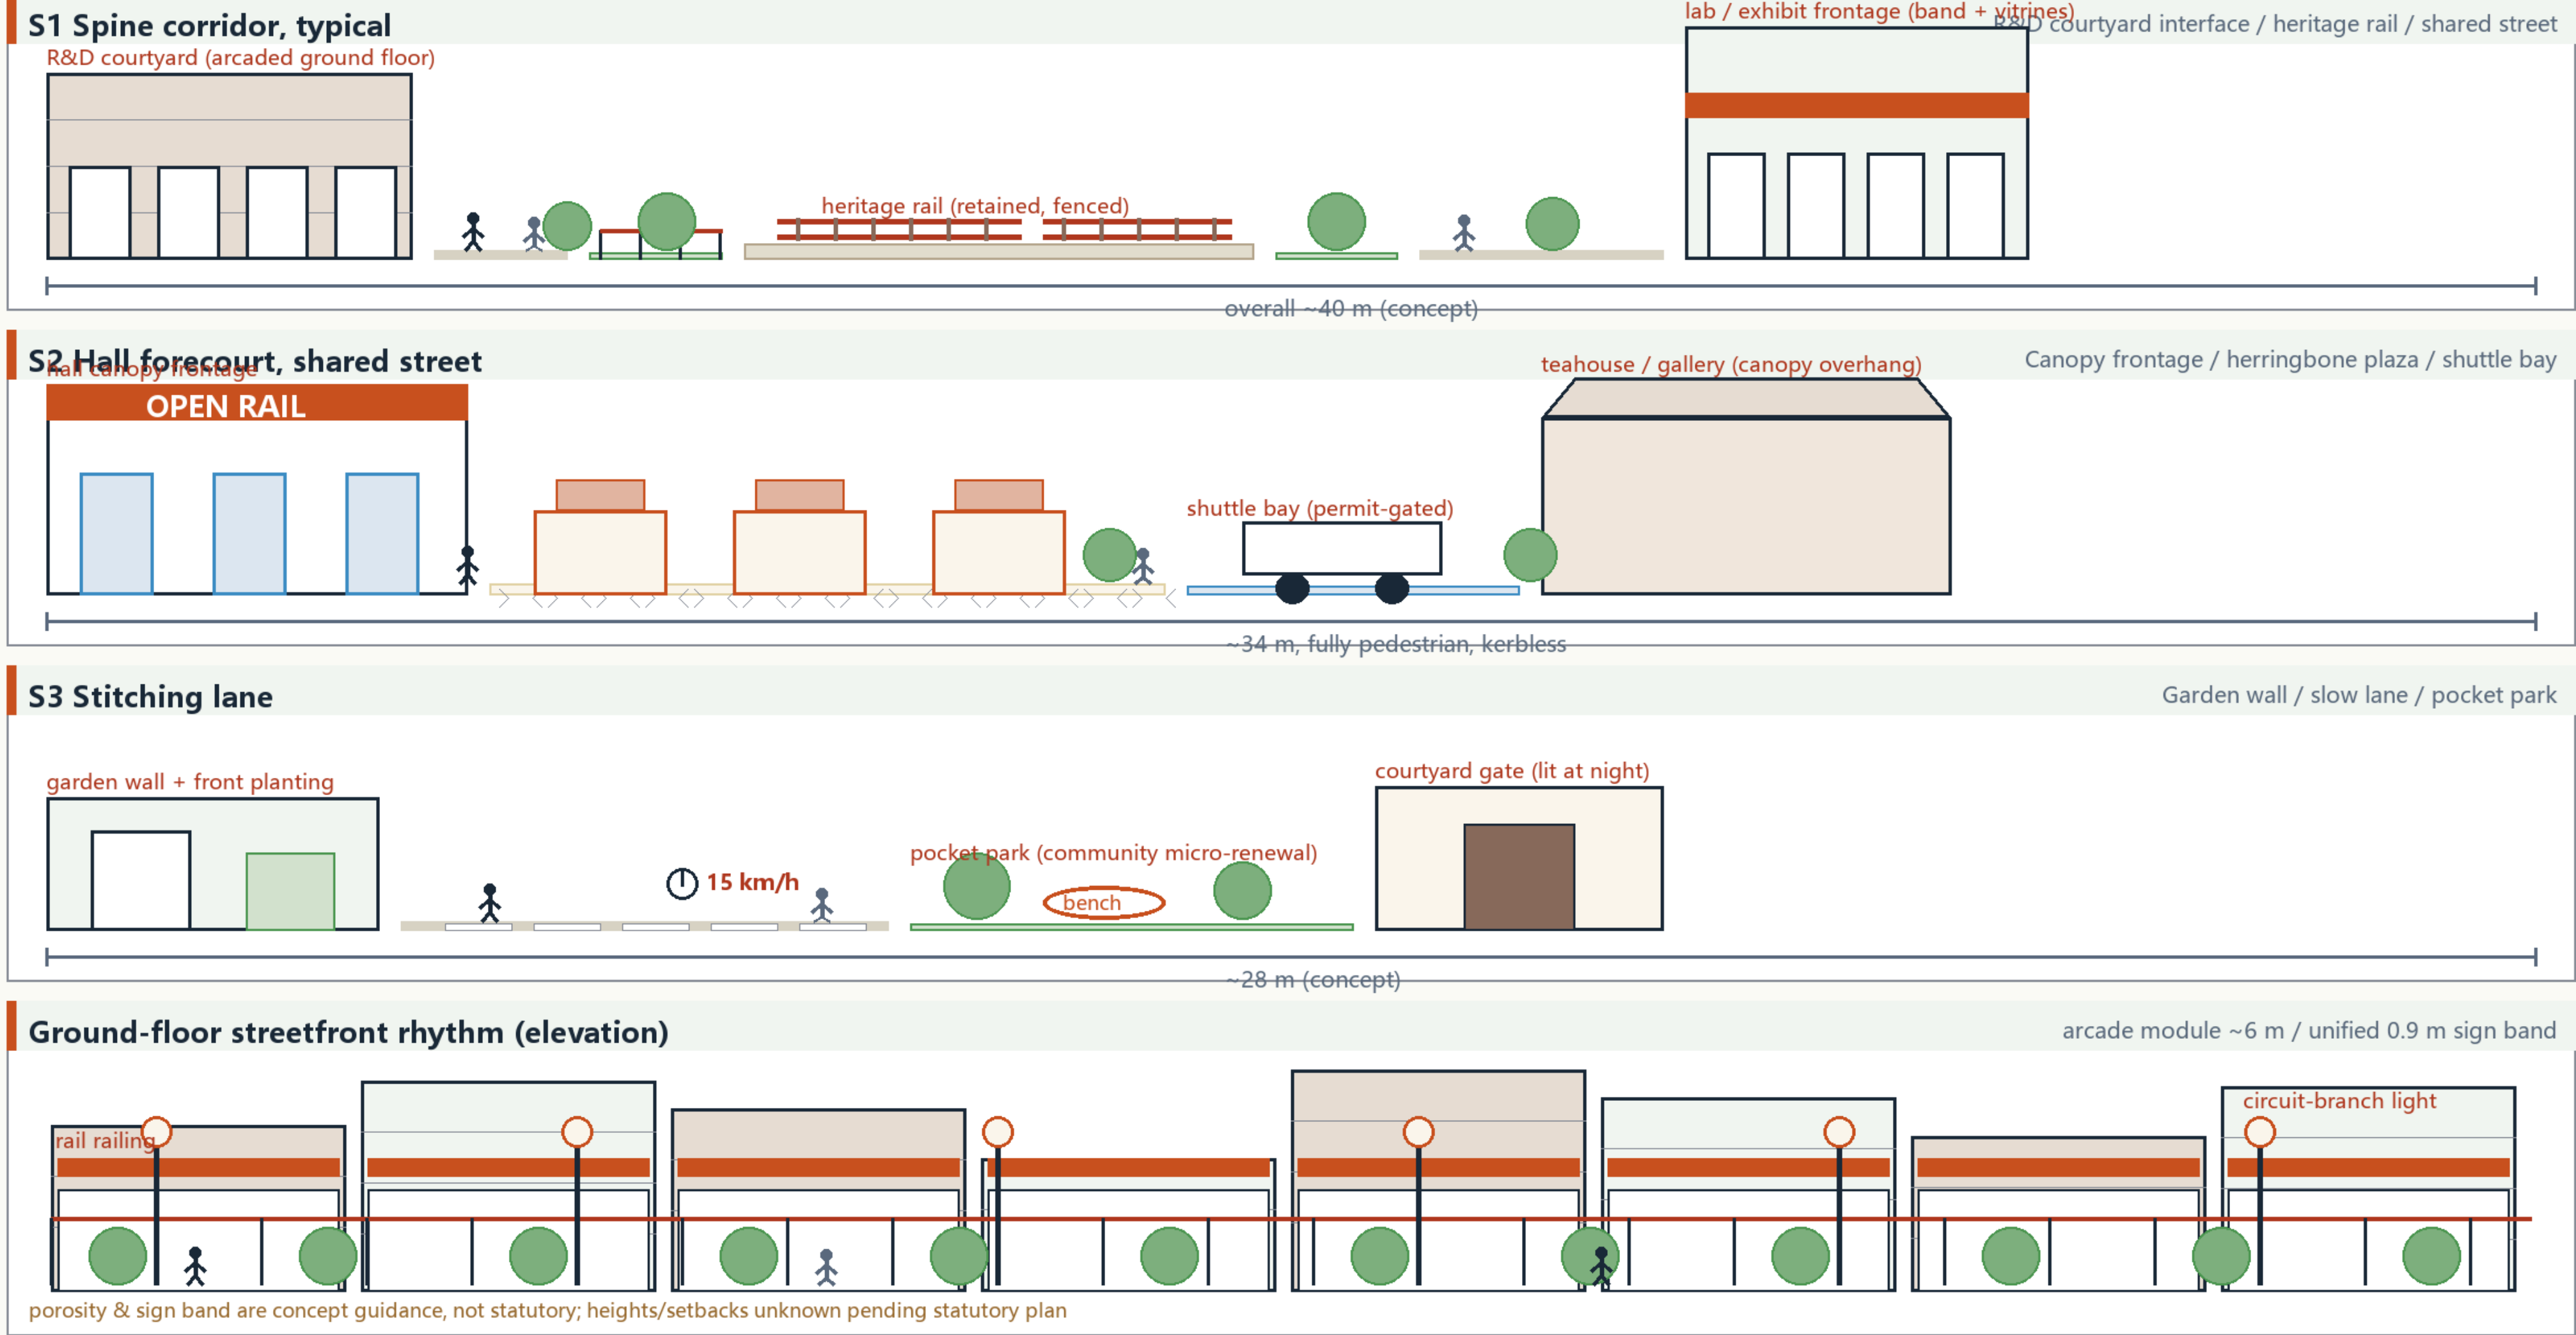

OPEN RAIL

Jing-Zhang AI Commons • Centennial Jing-Zhang AI Innovation Belt

Board 9 | Streetfront, Construction & Sequencing

OPEN RAIL • Jing-Zhang AI Commons

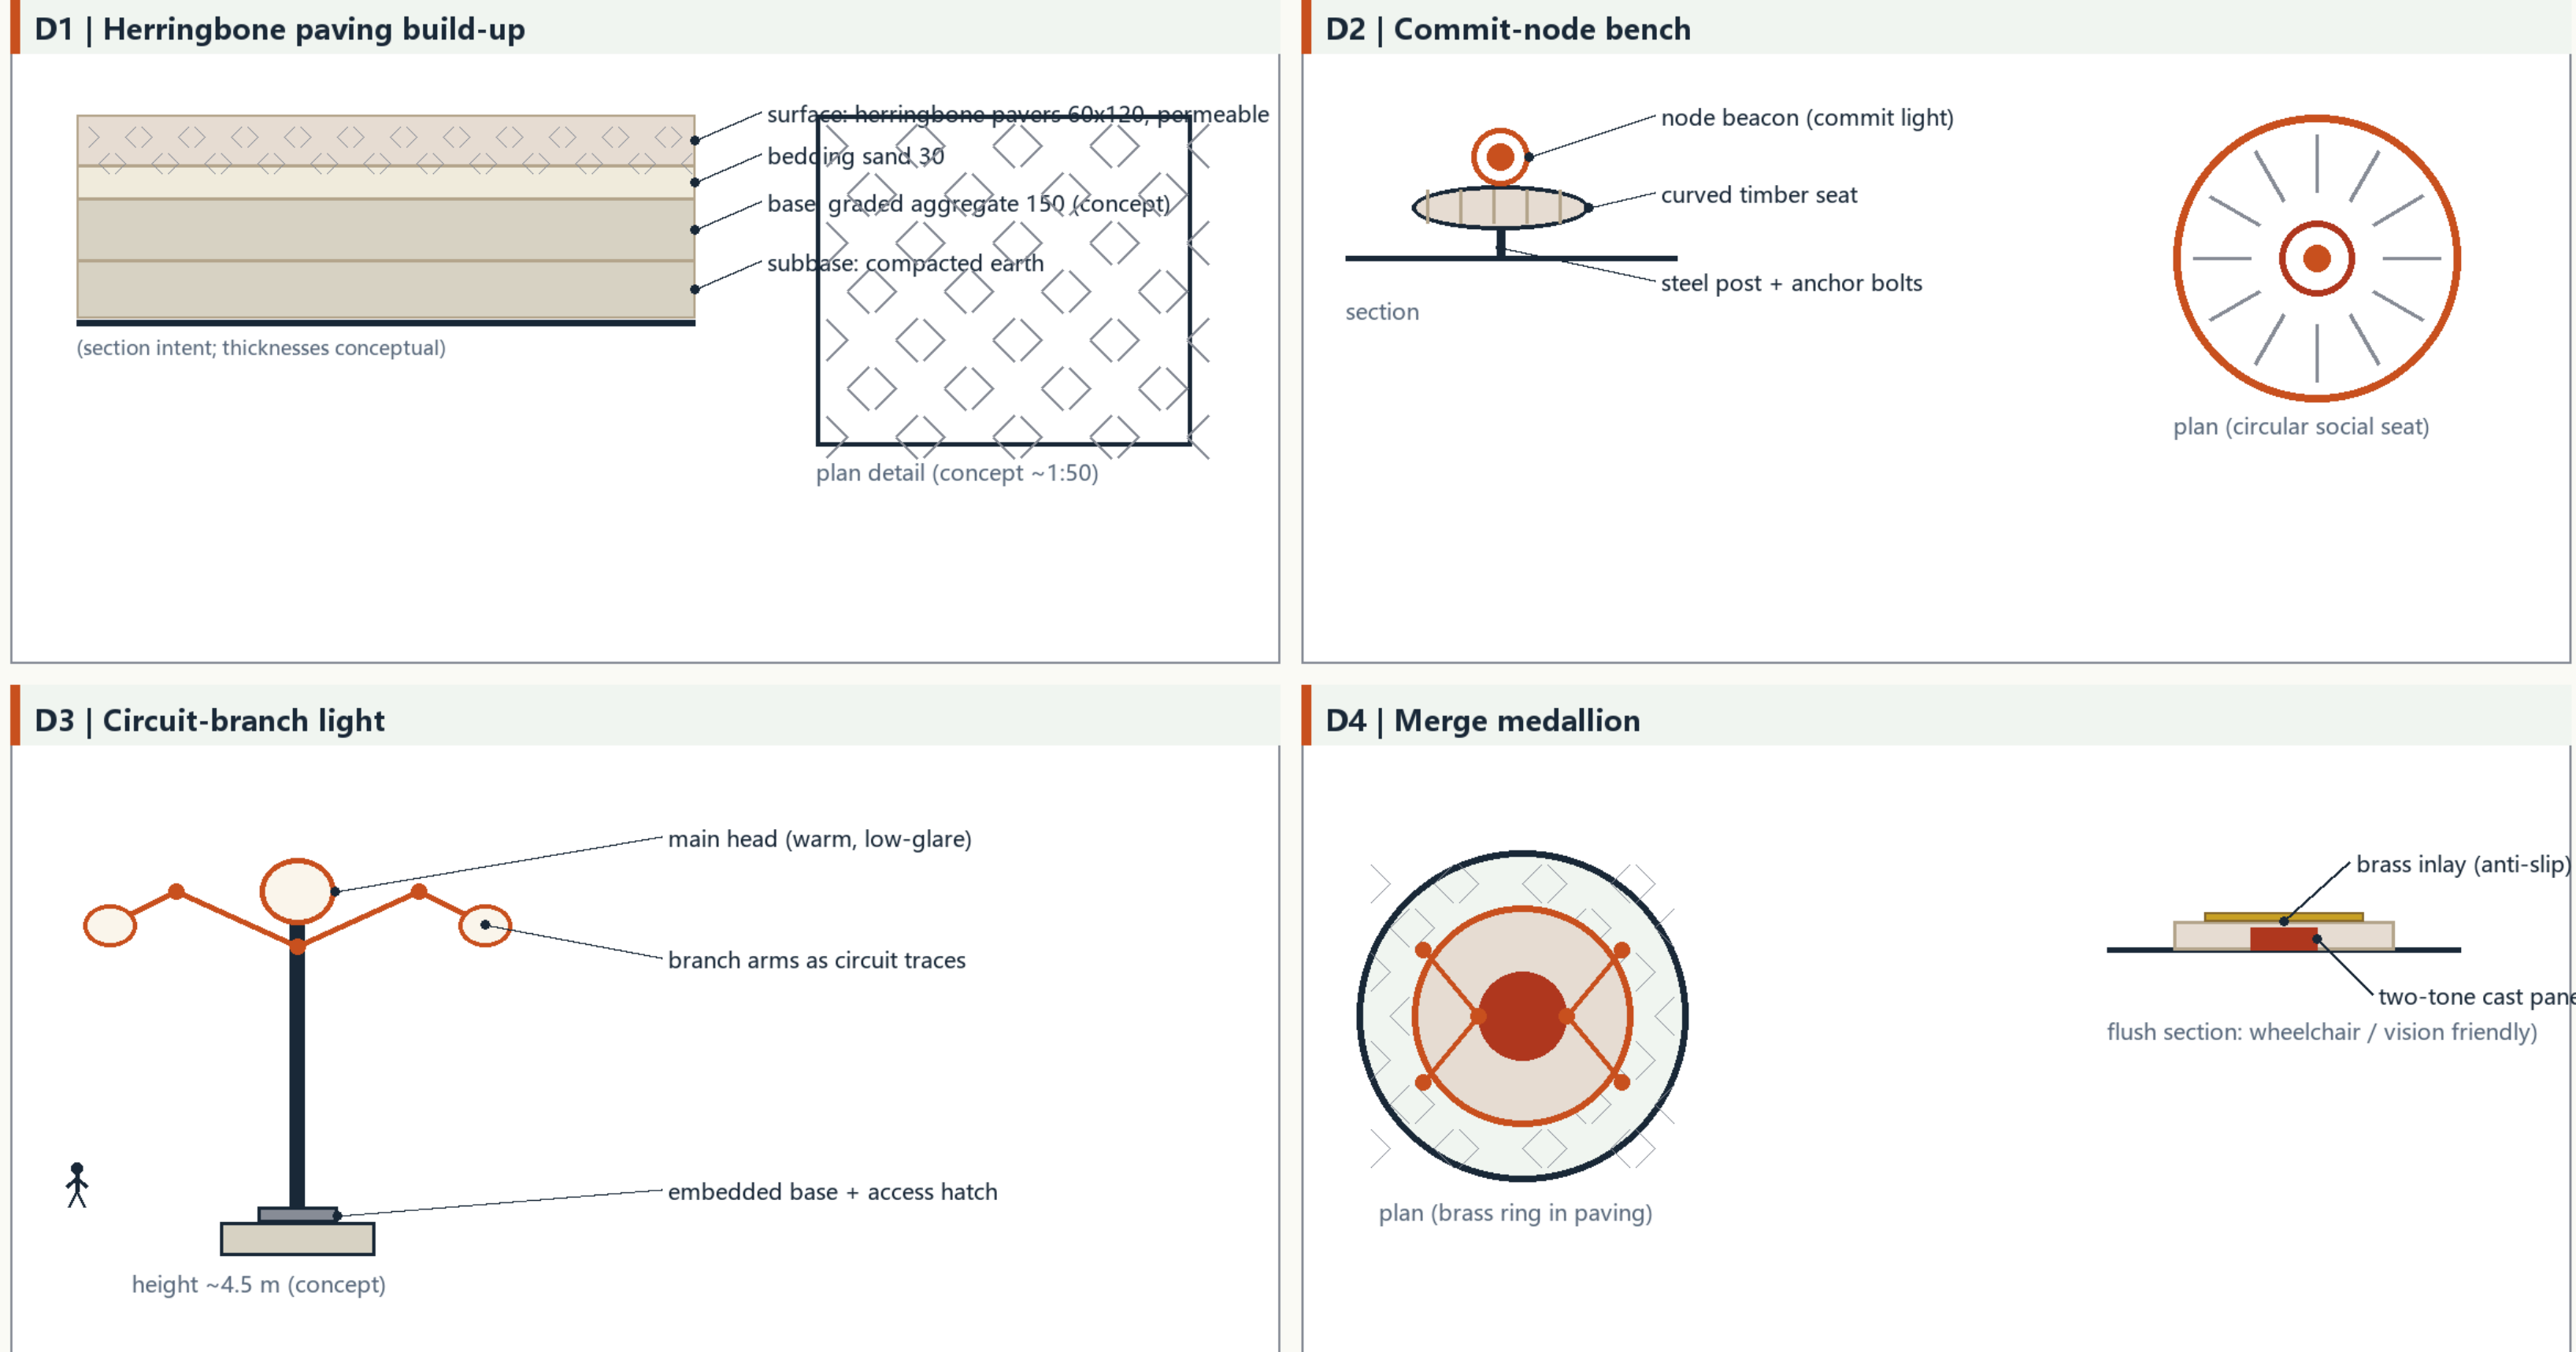

Streetfront interfaces and typical sections: three street types + ground-floor rhythm (concept)

Conceptual interface and construction intent, not construction drawings; boundary provisional; materials, craft and structure subject to regulatory check and professional detailing

OPEN RAIL • Jing-Zhang AI Commons

Node construction details: paving layers / commit bench / circuit light / merge medallion (concept intent)

Conceptual interface and construction intent, not construction drawings; boundary provisional; materials, craft and structure subject to regulatory check and professional detailing

Streetfront (concept)

- S1 corridor: arcade, buffer, rail, shared street
- S2 forecourt: kerbless, shuttle bay
- S3 lane: 15 km/h + pocket parks
- arcade ~6 m, sign band 0.9 m (non-statutory)

Construction (intent)

- paving build-up (permeable/sand/aggregate)
- bench: timber, steel, node beacon
- circuit light ~4.5 m warm
- medallion: brass, fully flush

Sequencing (trigger-gated)

- baseline / scoring / cost lines
- benefit lines (P1-P5) / sensitivity
- no figures before field/official data
- conclusions roll with 90-day review
