

Jingzhang Zero AI Testbed ▪ A3 Booklet

Provisional intake ▪ not for formal professional scoring

Proposal summary

The proposal is China's first real railway-heritage AI scenario testbed, retaining the original rails for shared-track running of autonomous vehicles, robots, and future mobility equipment. It is also the only proposal answering three dimensions at once: physical entity, machine-verifiable institution, and investment in people.

Exclusivity: Jingzhang Zero is not a testbed for AI, but a testbed for human-machine civilization.

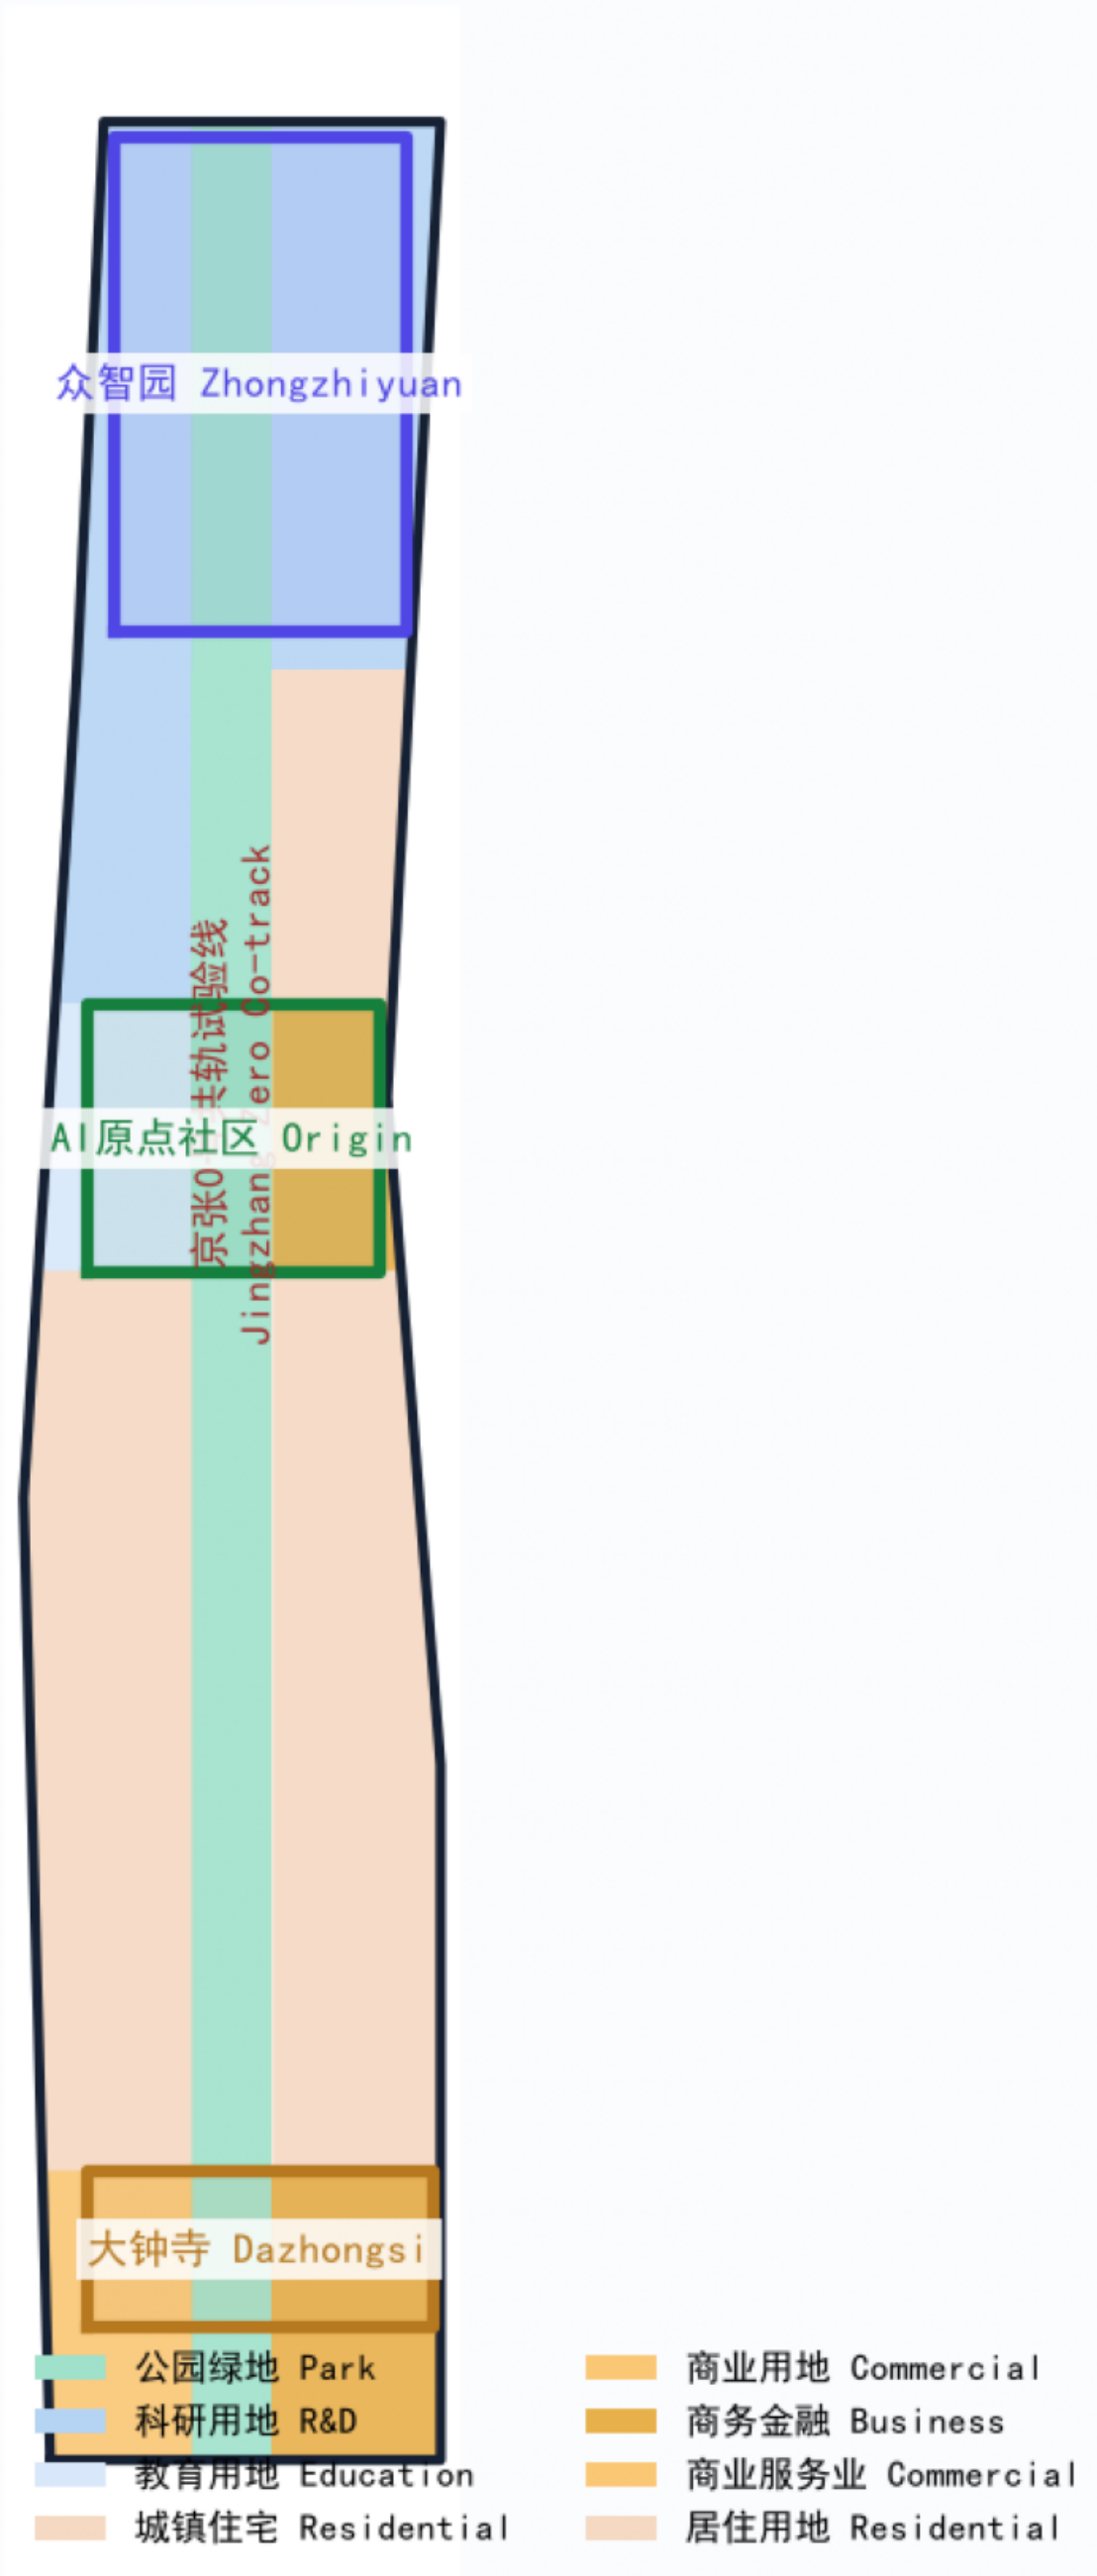

Four-layer concept: A soul (dual-track testbed) / B bone (rails as motherboard) / C biography (century relay 1909→2026→2049) / D heart (investment in people)

Three scopes: 43.6 km^A / 11.4 km^A / 368.4 ha across three key areas

Three key areas + Land use + rail spine

京张0号AI试验场 · 总体总览 Site Overview

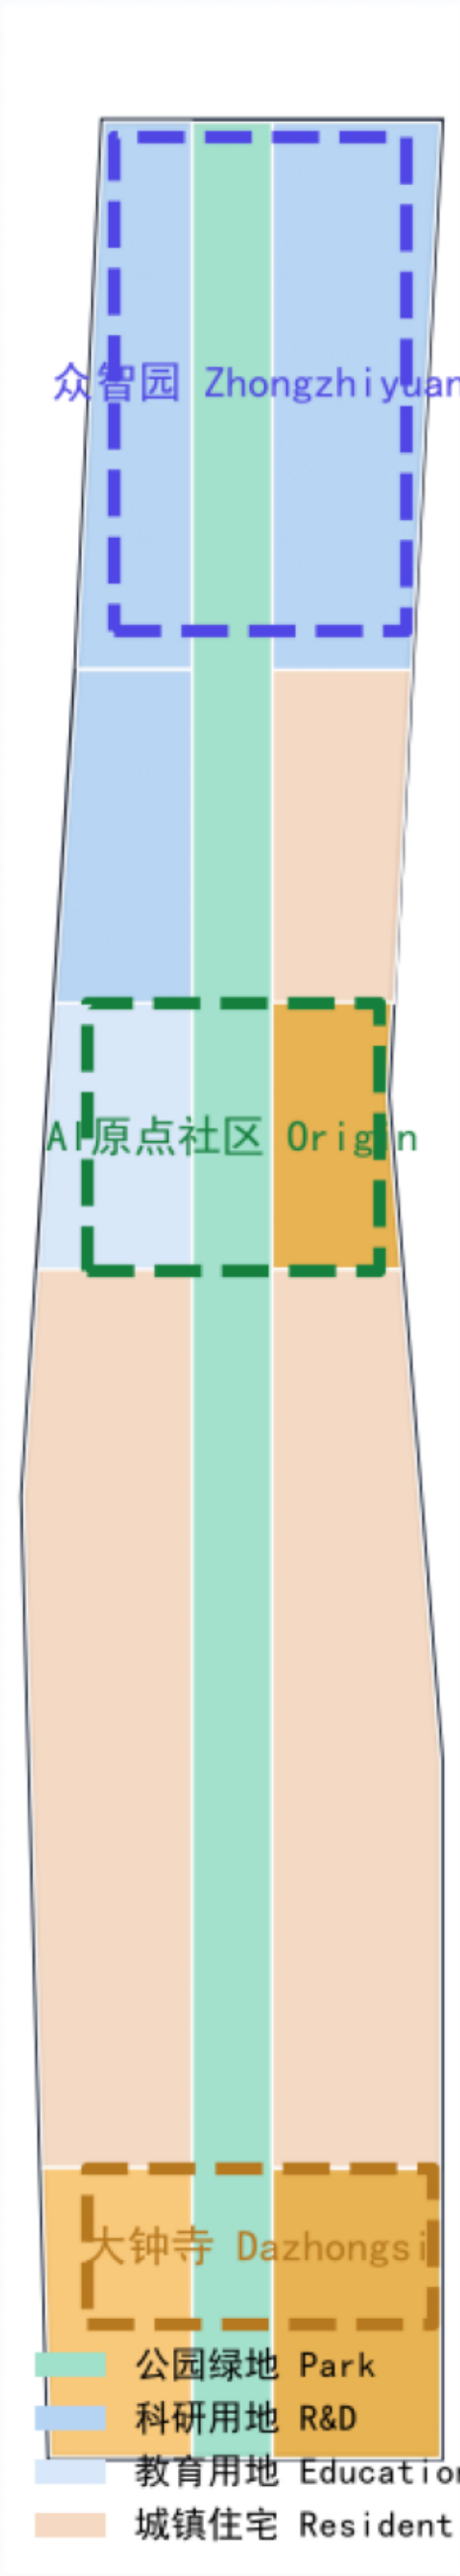

site_boundary + key_areas + land_use 分区 + 铁路主轴; provisional 边界仅作设计讨论

边界为 provisional 临时多边形，不构成官方红线

三层范围与用地分区 Land-Use Structure

统筹研究 43.6km2 / 总体设计 11.4km2 / 重点区 368.4ha；用地分区全覆盖无缝隙

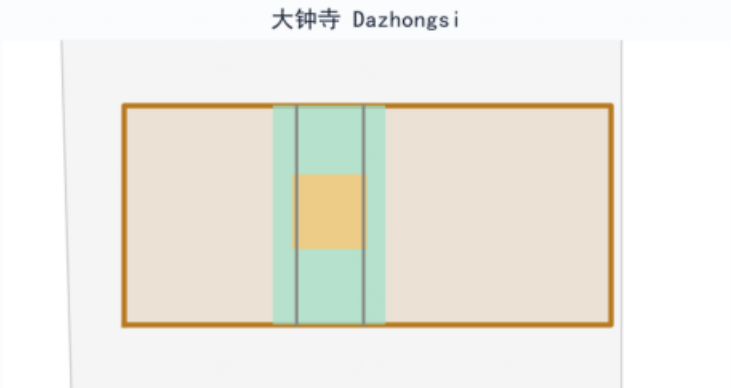

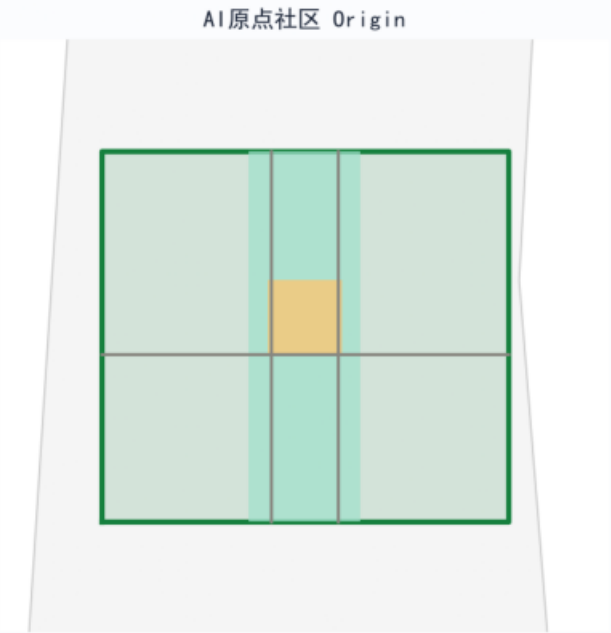

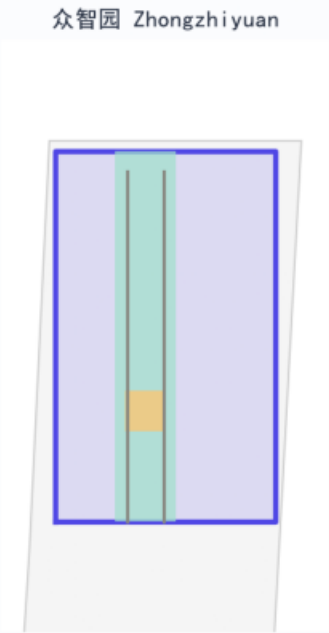

用地分区为设计建议（agent_generated_design），非审定控规

Key Areas

Zhongzhiyuan / Origin / Dazhongsi

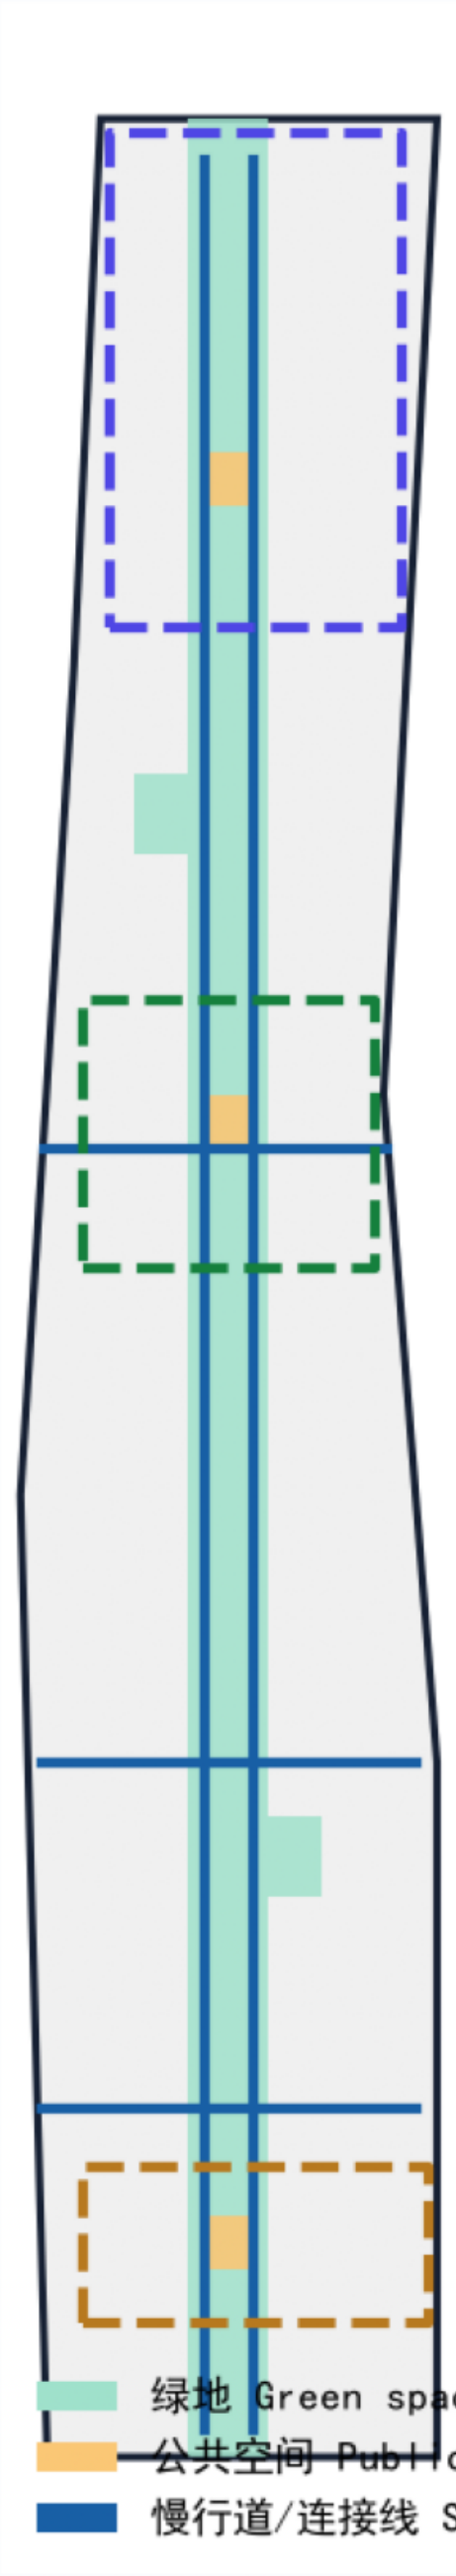

三处重点区域详图 Key Areas (众智园 / AI原点社区 / 大钟寺)

交通慢行与蓝绿公共空间

Mobility & Blue-Green

共轨试验线慢行道 + 横向连接线 + 主轴绿带 + 公共空间节点

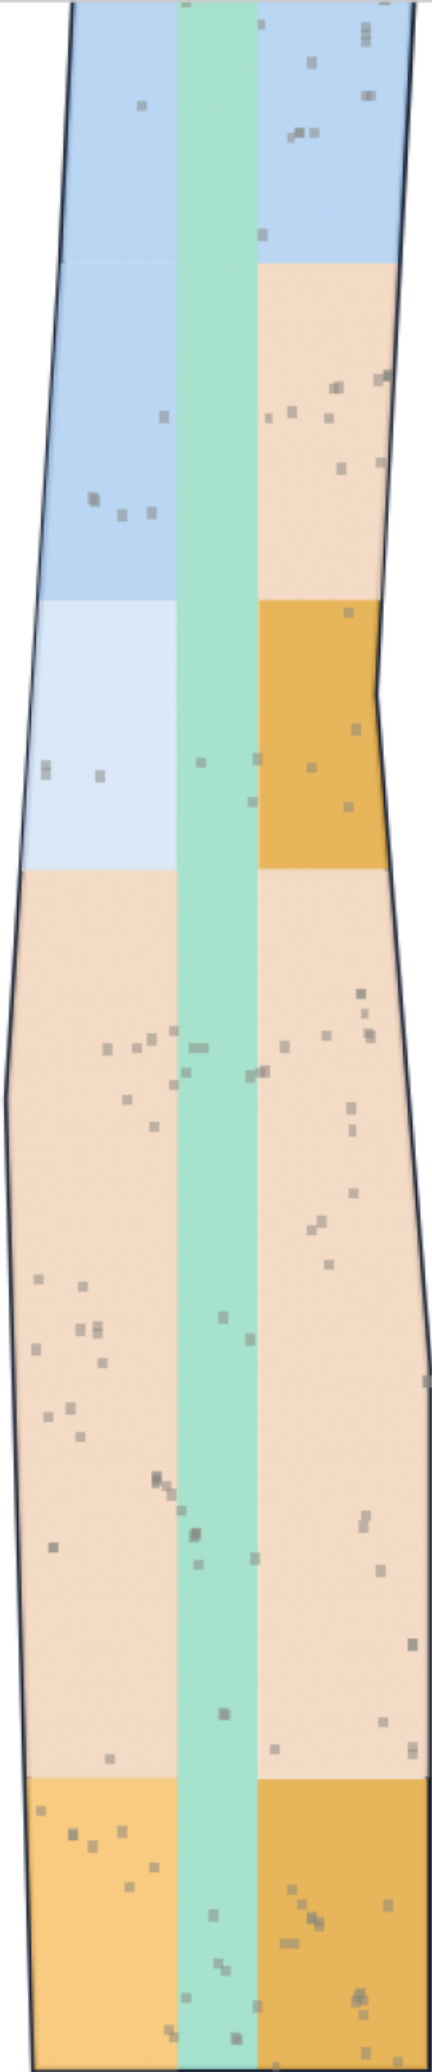

道路中心线为设计建议，非道路红线

指标复算与证据链 Metrics & Evidence

EPSG:4548 复算; human-control group design_target

所有 known 指标在 EPSG:4548 下从 GeoJSON 复算; unknown 指标标待正式数据

site_area = 11,412,825 m²
green_ratio = 0.228
public_ratio = 0.010
building_footprint = 202,166 m²
key_area_count = 3

数值见 metrics.json; 人本指标组(4项)为 design_target 待运营数据校准

Core metrics

Core metrics (recomputed under EPSG:4548)

site_area = 11,412,825 m²
land_use distribution: 1401 park green 22%, 0802 research 21%, 0701 residential 38%, 0902 business 9%, 0901 commercial 5%, 0804 education 5%
green_ratio = 0.1234, public_space_ratio = 0.0733
key_area_count = 3

Human-centric indicator group (4, design_target): employment transition rate, skill uplift coverage, community service reach, public participation rate — to be calibrated by operational data.

Compliance

Compliance and self-check

compliance_matrix.json: 23 requirements (announcement 1.3/1.4/1.5 + agent.1~agent.6)
standard_matrix.json: 6 standards
design_depth_matrix.json: 15 depth items

self-check 4 gates: deterministic validation / spatial review / visual packaging / professional evidence

Boundary: provisional polygons (PROV-SITE-001 / PROV-KEY-001/002/003); does not block content scoring; metrics recomputed after official boundaries.
