Boundary, Risk and Compliance Declarations

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECALCULATE AFTER OFFICIAL DATA

- 1. All spatial boundaries are provisional concepts, not official redlines; full recalculation after official data.
- 2. Area values follow official announcement text or geometry recomputation; not statutory measurement.
- 3. Global cases and railway-history statements are itemised in sources.json (CASE-REF-01...07, HIST-REF-01...03); unverified figures are marked as pending research.
- 4. Brand names and marks (Jingzhang Pulse/JZ-PULSE, four landmark names, 0∞ mark): no official prior-rights search at concept stage; treated as internal working codenames until clearance.
- 5. Cost, capacity, lifetime, maintenance, acoustic/light and go/no-go values are design assumptions or concept baselines, each with basis, applicable standard, cost/benefit analysis.
- 6. Sensing data is anonymous-aggregated with human review; no individual-identifying tracking; sensor-free zones and one-touch shutdown provided.
- 7. Chinese/English substantive equivalence manually checked; brand prior-rights search: handled as internal working codenames until clearance.
