

Jing-Zhang Civic Intelligence Loop

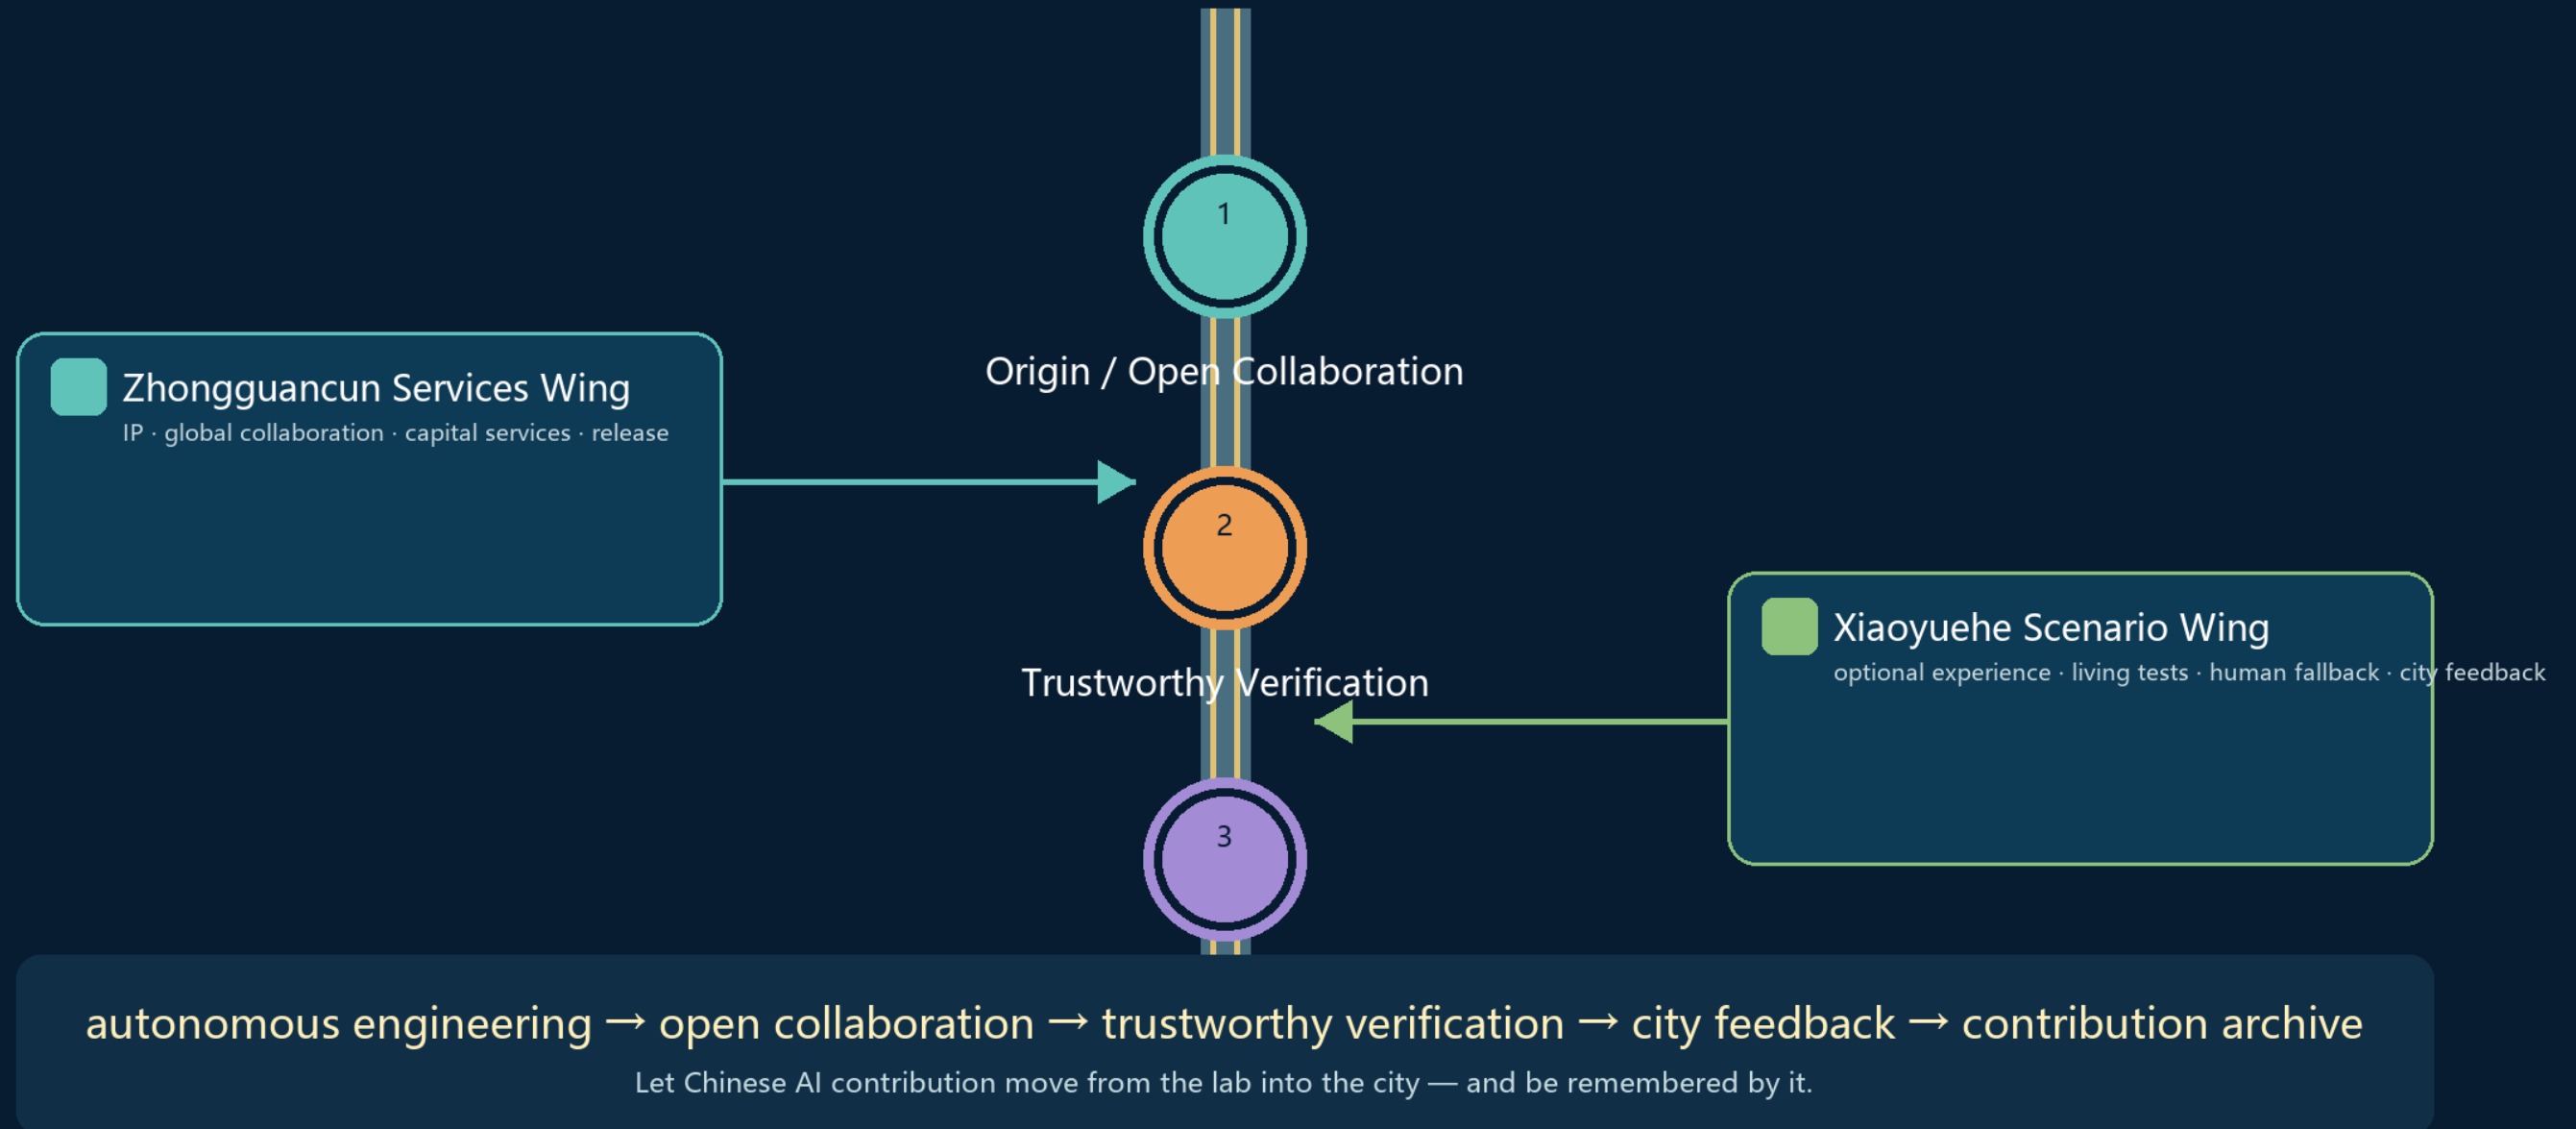

From railway engineering spirit to civic infrastructure for trustworthy AI

Concept proposal booklet · 2026

01 One Spine · Three Stations · Two Wings

The heritage park becomes civic knowledge infrastructure where contribution is visible

Jing-Zhang Contribution Walk

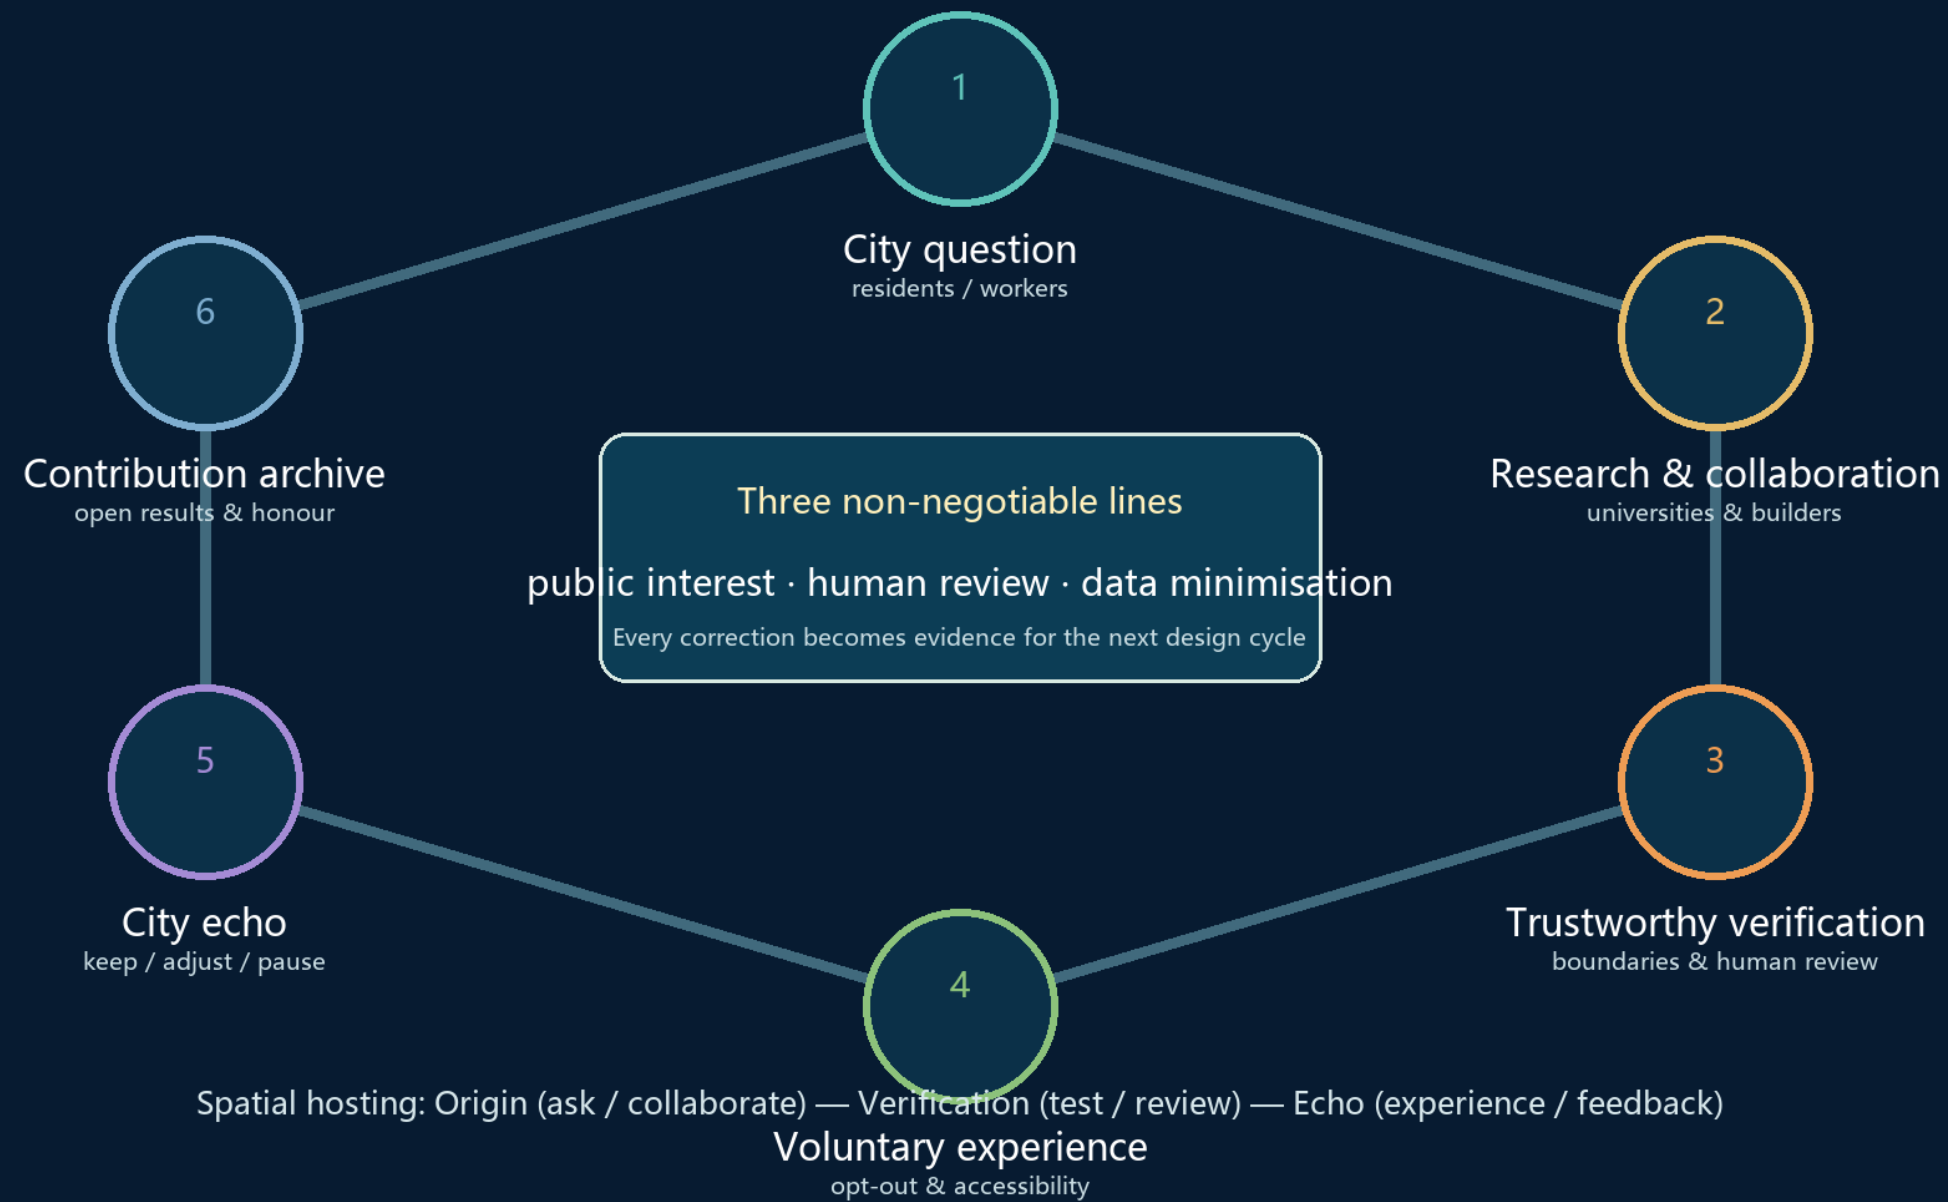

Conceptual spatial diagram; provisional constraints are for exploration only, not an official boundary, statutory plan, or delivery commitment.

Concept proposal; provisional constraints only.

02 Trusted Contribution Loop: from city question to public memory

Not an AI display: a legible chain of contribution, boundary and correction

Conceptual spatial diagram; provisional constraints are for exploration only, not an official boundary, statutory plan, or delivery commitment.

Concept proposal; provisional constraints only.

03 Three Stations, not galleries: three public working interfaces

Calm and professional by day; open to the city at nights and weekends

01 Origin Station

Beijing AI Origin

city-question desk
open-source collaboration table
railway engineering guide

researchers & global visitors
ask, explain, collaborate

Rights baseline: opt out / human service / challenge a decision

02 Verification Gallery

Zhongzhiyuan

visible test bench
standards & boundary wall
human-review window

builders & city workers
test, correct, record

Rights baseline: opt out / human service / challenge a decision

03 City Echo Field

Dazhongsi

optional service experience
feedback table
contribution release night

residents, families & visitors
experience, feedback, remember

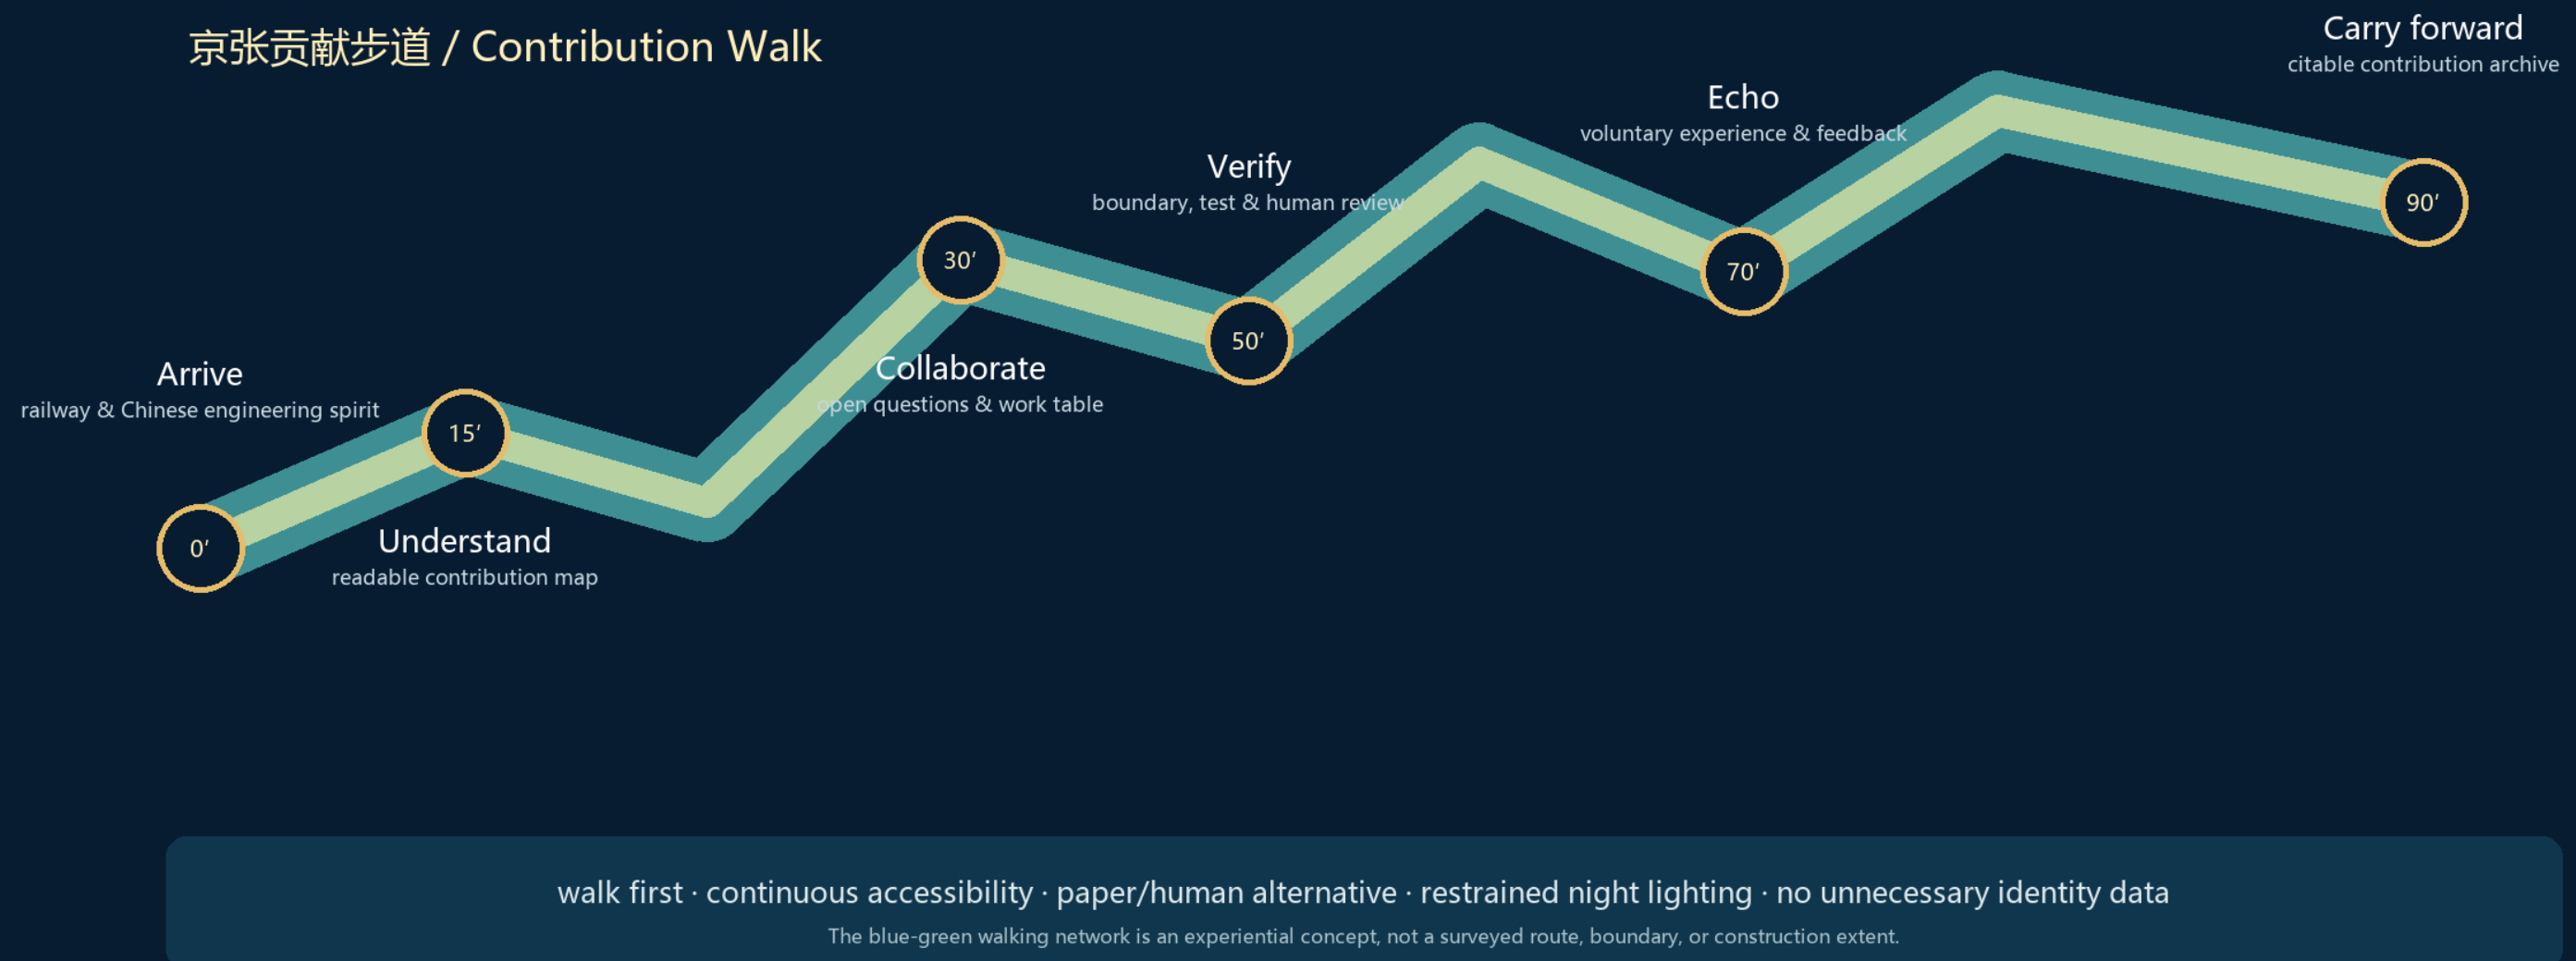

Rights baseline: opt out / human service / challenge a decision

Conceptual spatial diagram; provisional constraints are for exploration only, not an official boundary, statutory plan, or delivery commitment.

Concept proposal; provisional constraints only.

04 90-minute global visitor journey: see, participate, carry forward

A walk-first heritage park as the frame; AI appears only when wanted

Conceptual spatial diagram; provisional constraints are for exploration only, not an official boundary, statutory plan, or delivery commitment.

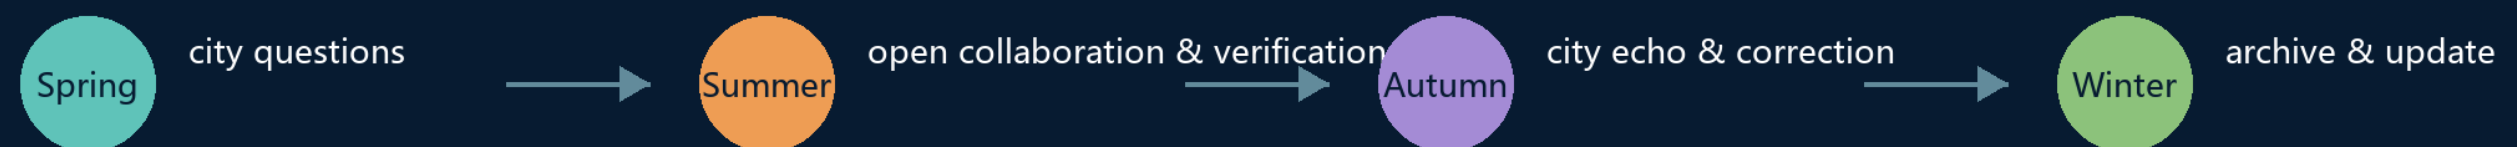

Concept proposal; provisional constraints only.

05 Evidence and operating rhythm: make trust checkable in daily practice

No unprovable promises: organise delivery as known / pending / publicly checkable

Evidence state	Content	Who can check
Known	open-call tasks, public materials, submitted files	organiser / public / jury
Pending	official boundary, ownership, flows, sector data	recalculate when supplied
Design commitment	human review, optional participation, contribution record	users / operators

京张智脉贡献季 / Jing-Zhang Contribution Season

Each season discloses at minimum: question source, test boundary, human-review method, feedback and correction record.

Conceptual spatial diagram; provisional constraints are for exploration only, not an official boundary, statutory plan, or delivery commitment.
