

OVERALL URBAN DESIGN • ONE PUBLIC BASELINE, THREE RECEIPT LANDMARKS

OVERALL URBAN DESIGN • AN UNBROKEN PUBLIC BASELINE LINKS THREE RECEIPT LANDM

Open urban fabric is low-contrast context; the spine, stations, wings and six stitches carry the design judgement

THREE SPATIAL TYPES

- ✓ **ONE SPINE**
mobility, blue-green, staffed service
- ✓ **SIX STITCHES**
east-west public interfaces, not redlines
- ✓ **TWO WINGS**
tech service + civic problem exchange

3 OPTIONS • 1 REJECTION

- ALT-A • REJECT**
 - ALT-B • REVISE**
 - ALT-C • ADVANCE**
- geometry audit • not field performance

Map data © OpenStreetMap contributors · ODbL · 2026-08-13 · provisional boundary and design assumptions pending official base, survey and professional review

THREE SPATIAL OPTIONS • ONE PUBLIC REJECTION, ONE REVIEWABLE SELECTION

ONE REAL SPATIAL DECISION • SAME TASK, USERS AND SITE; OUTCOME IS NOT PREWRIT

21 hard-gate evaluations test public route, access, fire, retirement and staffed E-stops before occupation and reversibility

ALT-A • Central mixed bay

Places the trial in the public-cross centre, shortening equipment runs at the cost of public conflict.

REJECT

Reject: 6 hard gates fail, so the baseline cannot operate independently.

ALT-B • Split trial bays

Two bays clear the public cross, but split supervision, fire observation and retirement into two systems.

REVISE

Revise: hard gates pass, but 3 supervision and retirement fragmentation issues remain.

ALT-C • One-sided reversible bay

Keeps the public cross intact and concentrates trial, staff, E-stops and retirement on the south-east side.

ADVANCE

Advance: every hard gate passes and the public cross, fire access and retirement remain independent.

ALT-C • 1:500 ASSEMBLABLE PROTOTYPE • PUBLIC CROSS STAYS; AI ENTERS SOUTH-EAST

LOCATABLE WITHOUT LEGEND

- B01 PUBLIC CROSS
- A01 ONE-SIDE BAY
- E02 STAFF + DUAL E-STOP
- FIRE FIRE ACCESS
- RETIRE INDEPENDENT RETIREMENT

AUDIT OUTPUT
ADVANCE

372m • same route length
2,496m² • trial
3,840m² • reversible buffer
24.3m • furthest E-stop—staff

prototype assumptions pending survey

DECISION IS NOT AN AESTHETIC VOTE • DRAWINGS FOLLOW THE CALCULATION

ALT-A

6 hard gates fail

13.9% route detour

ALT-B

0 hard fails, 3 revisions

94.9m supervision span

ALT-C

0 hard fails, sole advance

24.3m furthest E-stop—staff

geometry_based_design_audit - LOCAL ENU - input 3c4c466bf8dc2b03... - not proof of field safety, transport or public acceptance

1:200 SECTION + 1:50 NODE • TRIAL EQUIPMENT NEVER NARROWS THE PUBLIC ROUTE

Prototype dimensions, accessibility, fire, utilities and equipment interfaces require professional review against formal survey.

FROM DESIGN DECISION TO CIVIC ADOPTION • PERMIT, DUTY, STOP, RECOVERY

FROM DESIGN DECISION TO CIVIC ADOPTION • PERMIT, DUTY, STOP, RECOVERY

ALT-A

REJECT • 6 HARD GATES FAIL

ALT-B

REVISE • 3 FRAGMENTATION FLAGS

ALT-C

ADVANCE • ALL HARD GATES PASS

90-DAY ENTRY GATES • ANY FAILED PERMIT, ROLE OR BASELINE BLOCKS TRIAL

DAY 0–15

survey, ownership, entrances, fire, utilities, access, traffic

DAY 16–30

build routes, waiting, shade, staffed service and evidence porch

DAY 31–45

record seven consecutive ordinary-service days

DAY 46–75

timed trial only after eight permits and four duty roles close

DAY 76–90

stop drill, retire equipment, restore space, public review

RACI, PERMITS + ASSET EXIT • DESIGN STATUS IS NOT FIELD ADOPTION

ASSET

VENUE

BASELINE

SAFETY

DATA

PUBLIC

8 PERMITS

venue / title / fire / access / power / network / traffic / device

ZERO-TOLERANCE STOP

severe event, baseline regression, missing role or permit

RECOVERY + ASSETS

equipment returns; civic assets stay; data archived or deleted by rule

ADOPT / REVISE / STOP • only field evidence and a human committee may fill this; field performance remains unknown

84 / 84 state contracts remain appendix evidence; geometry decision is not a field result.
