

# JING-ZHANG HANDOVER LINE

A railway shift handover becomes a civic AI accountability protocol

SITE OVERVIEW

THREE HANDOVER YARDS

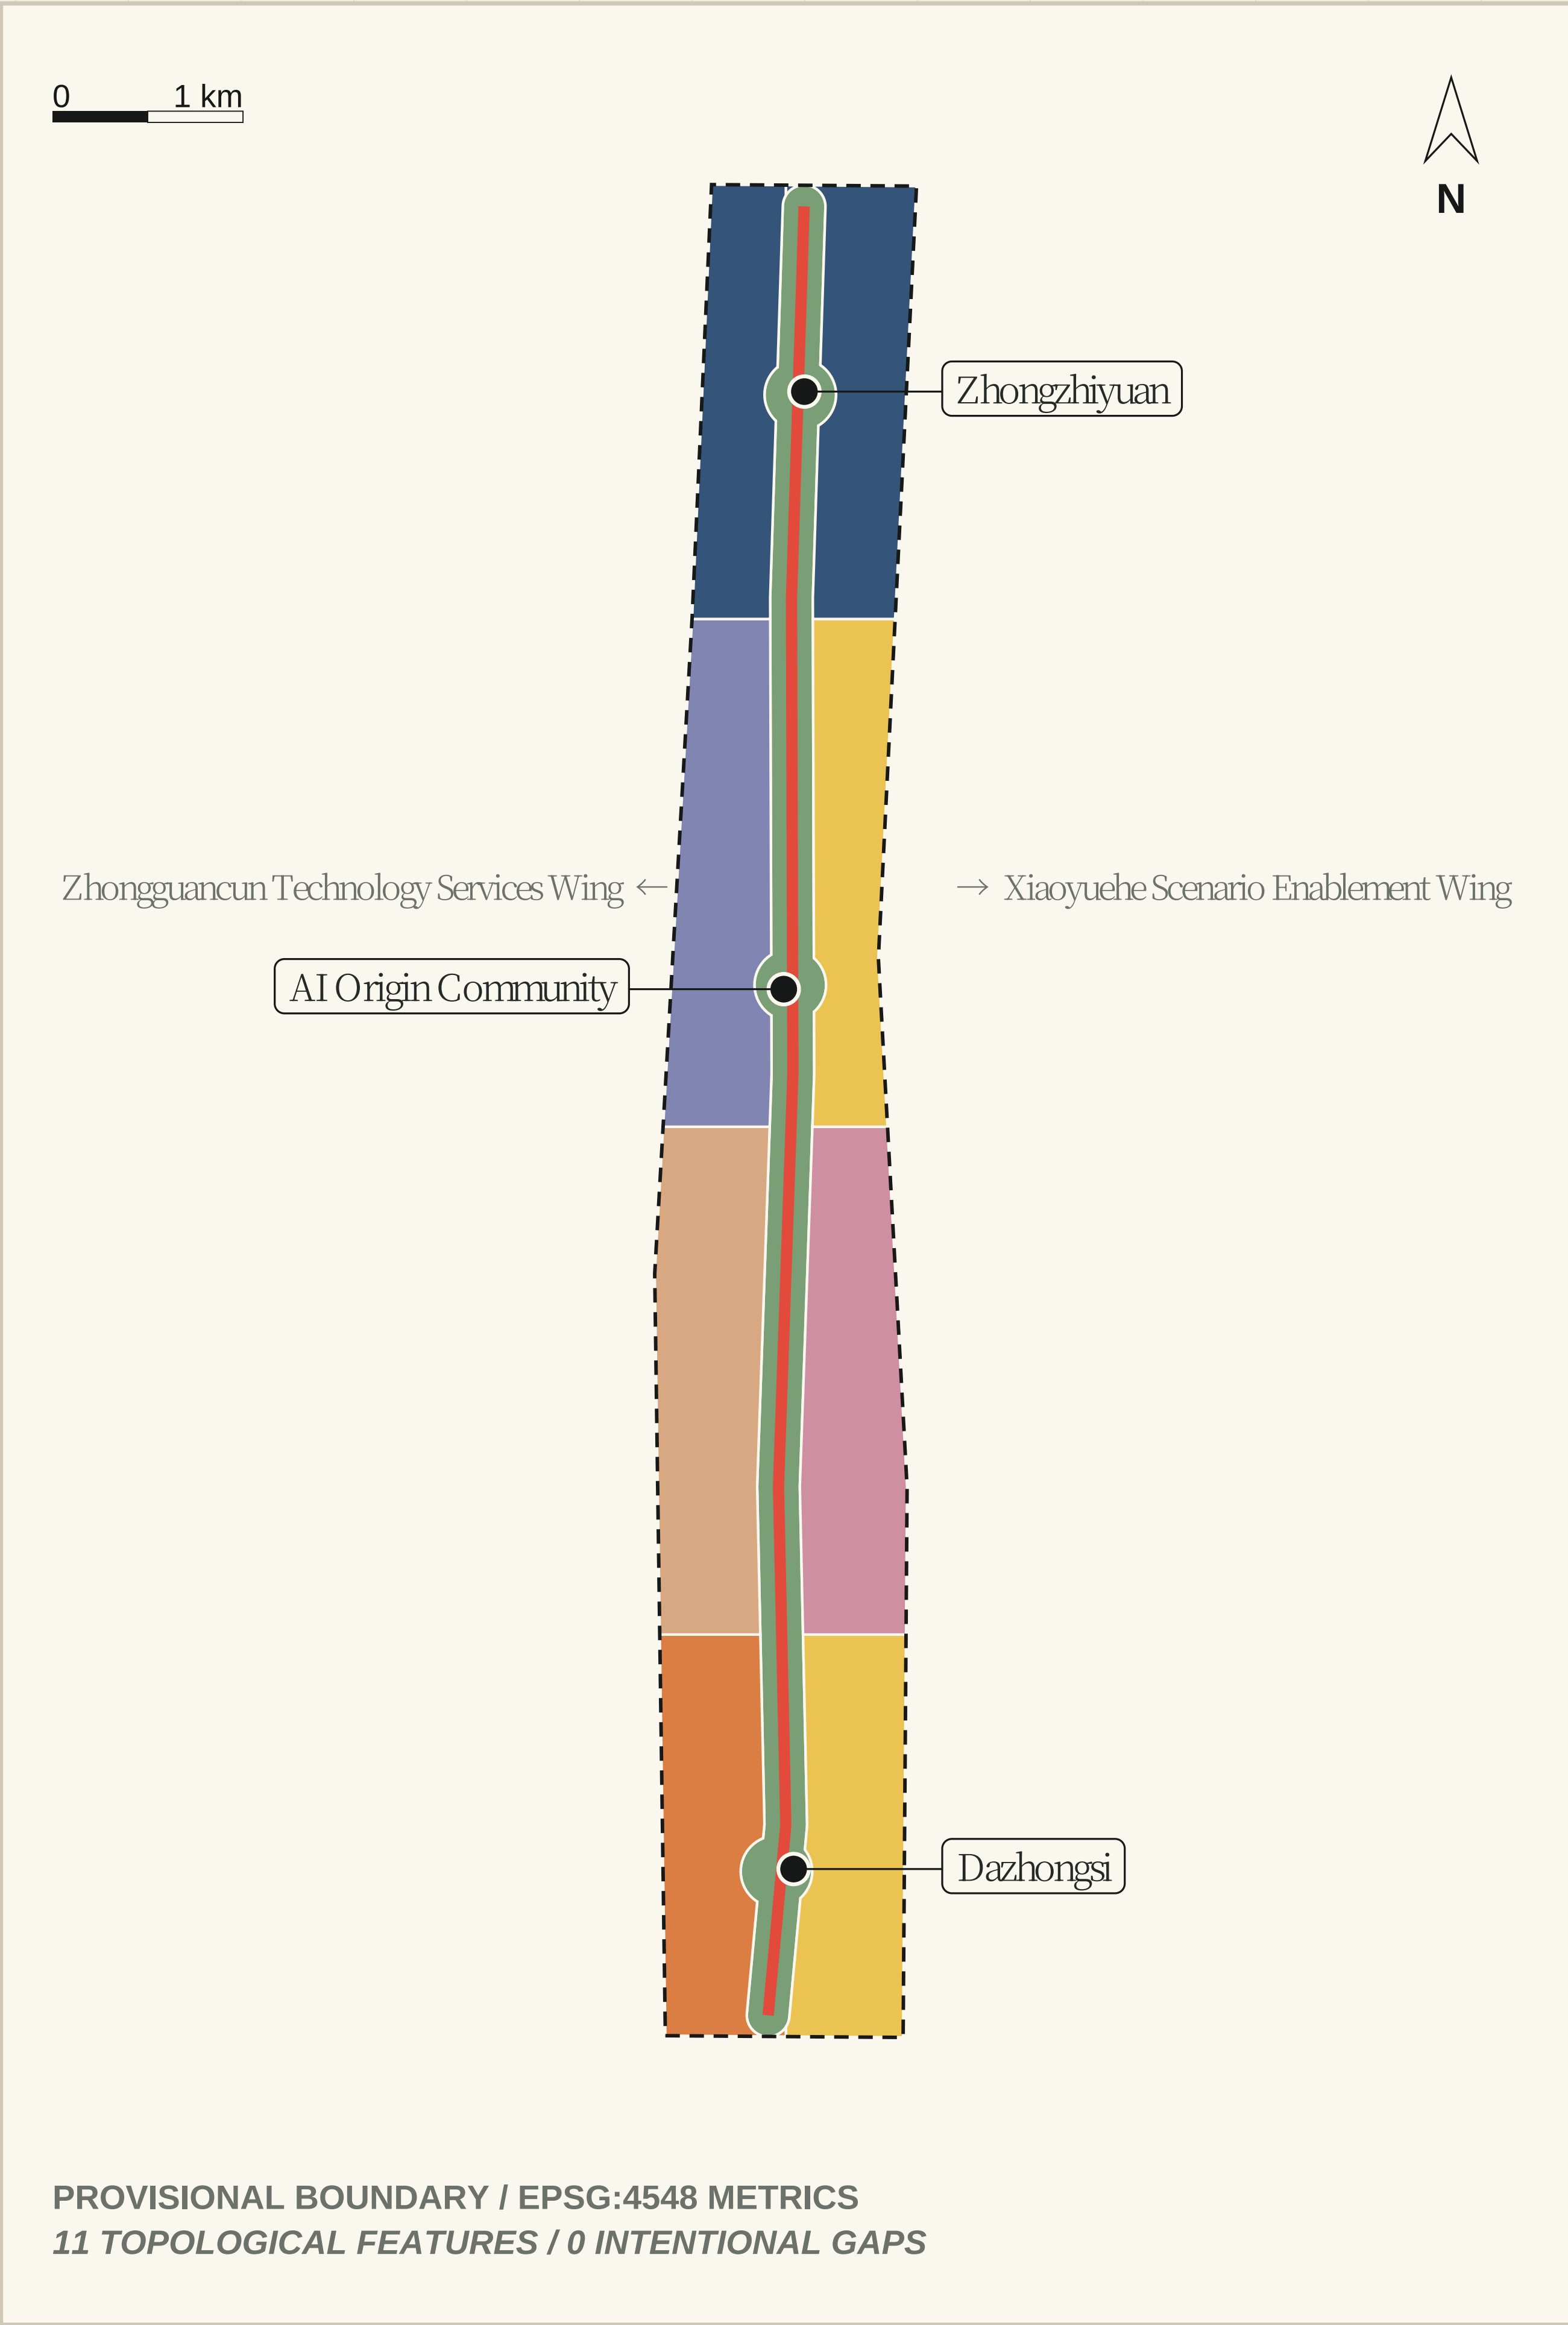

# Three Scopes, Land-use Topology and Key Areas

Full coverage without statutory fiction; three yards, three shifts of duty

## Land-use topology and three scopes

### LAND USE

- 0802 R&D / validation
- 0804 Learning / open source
- 05 Tech services / business
- 0701 Talent living
- 0702 Community service
- 0803 Culture / civic service
- 1401 Continuous parkland
- Handover Line main axis
- Handover yard node

**43.6 km<sup>2</sup>** → **11.4 km<sup>2</sup>** → **3 YARDS**  
RESEARCH Industry + future city      OVERALL DESIGN Spatial + delivery system      KEY AREAS Detailed validation

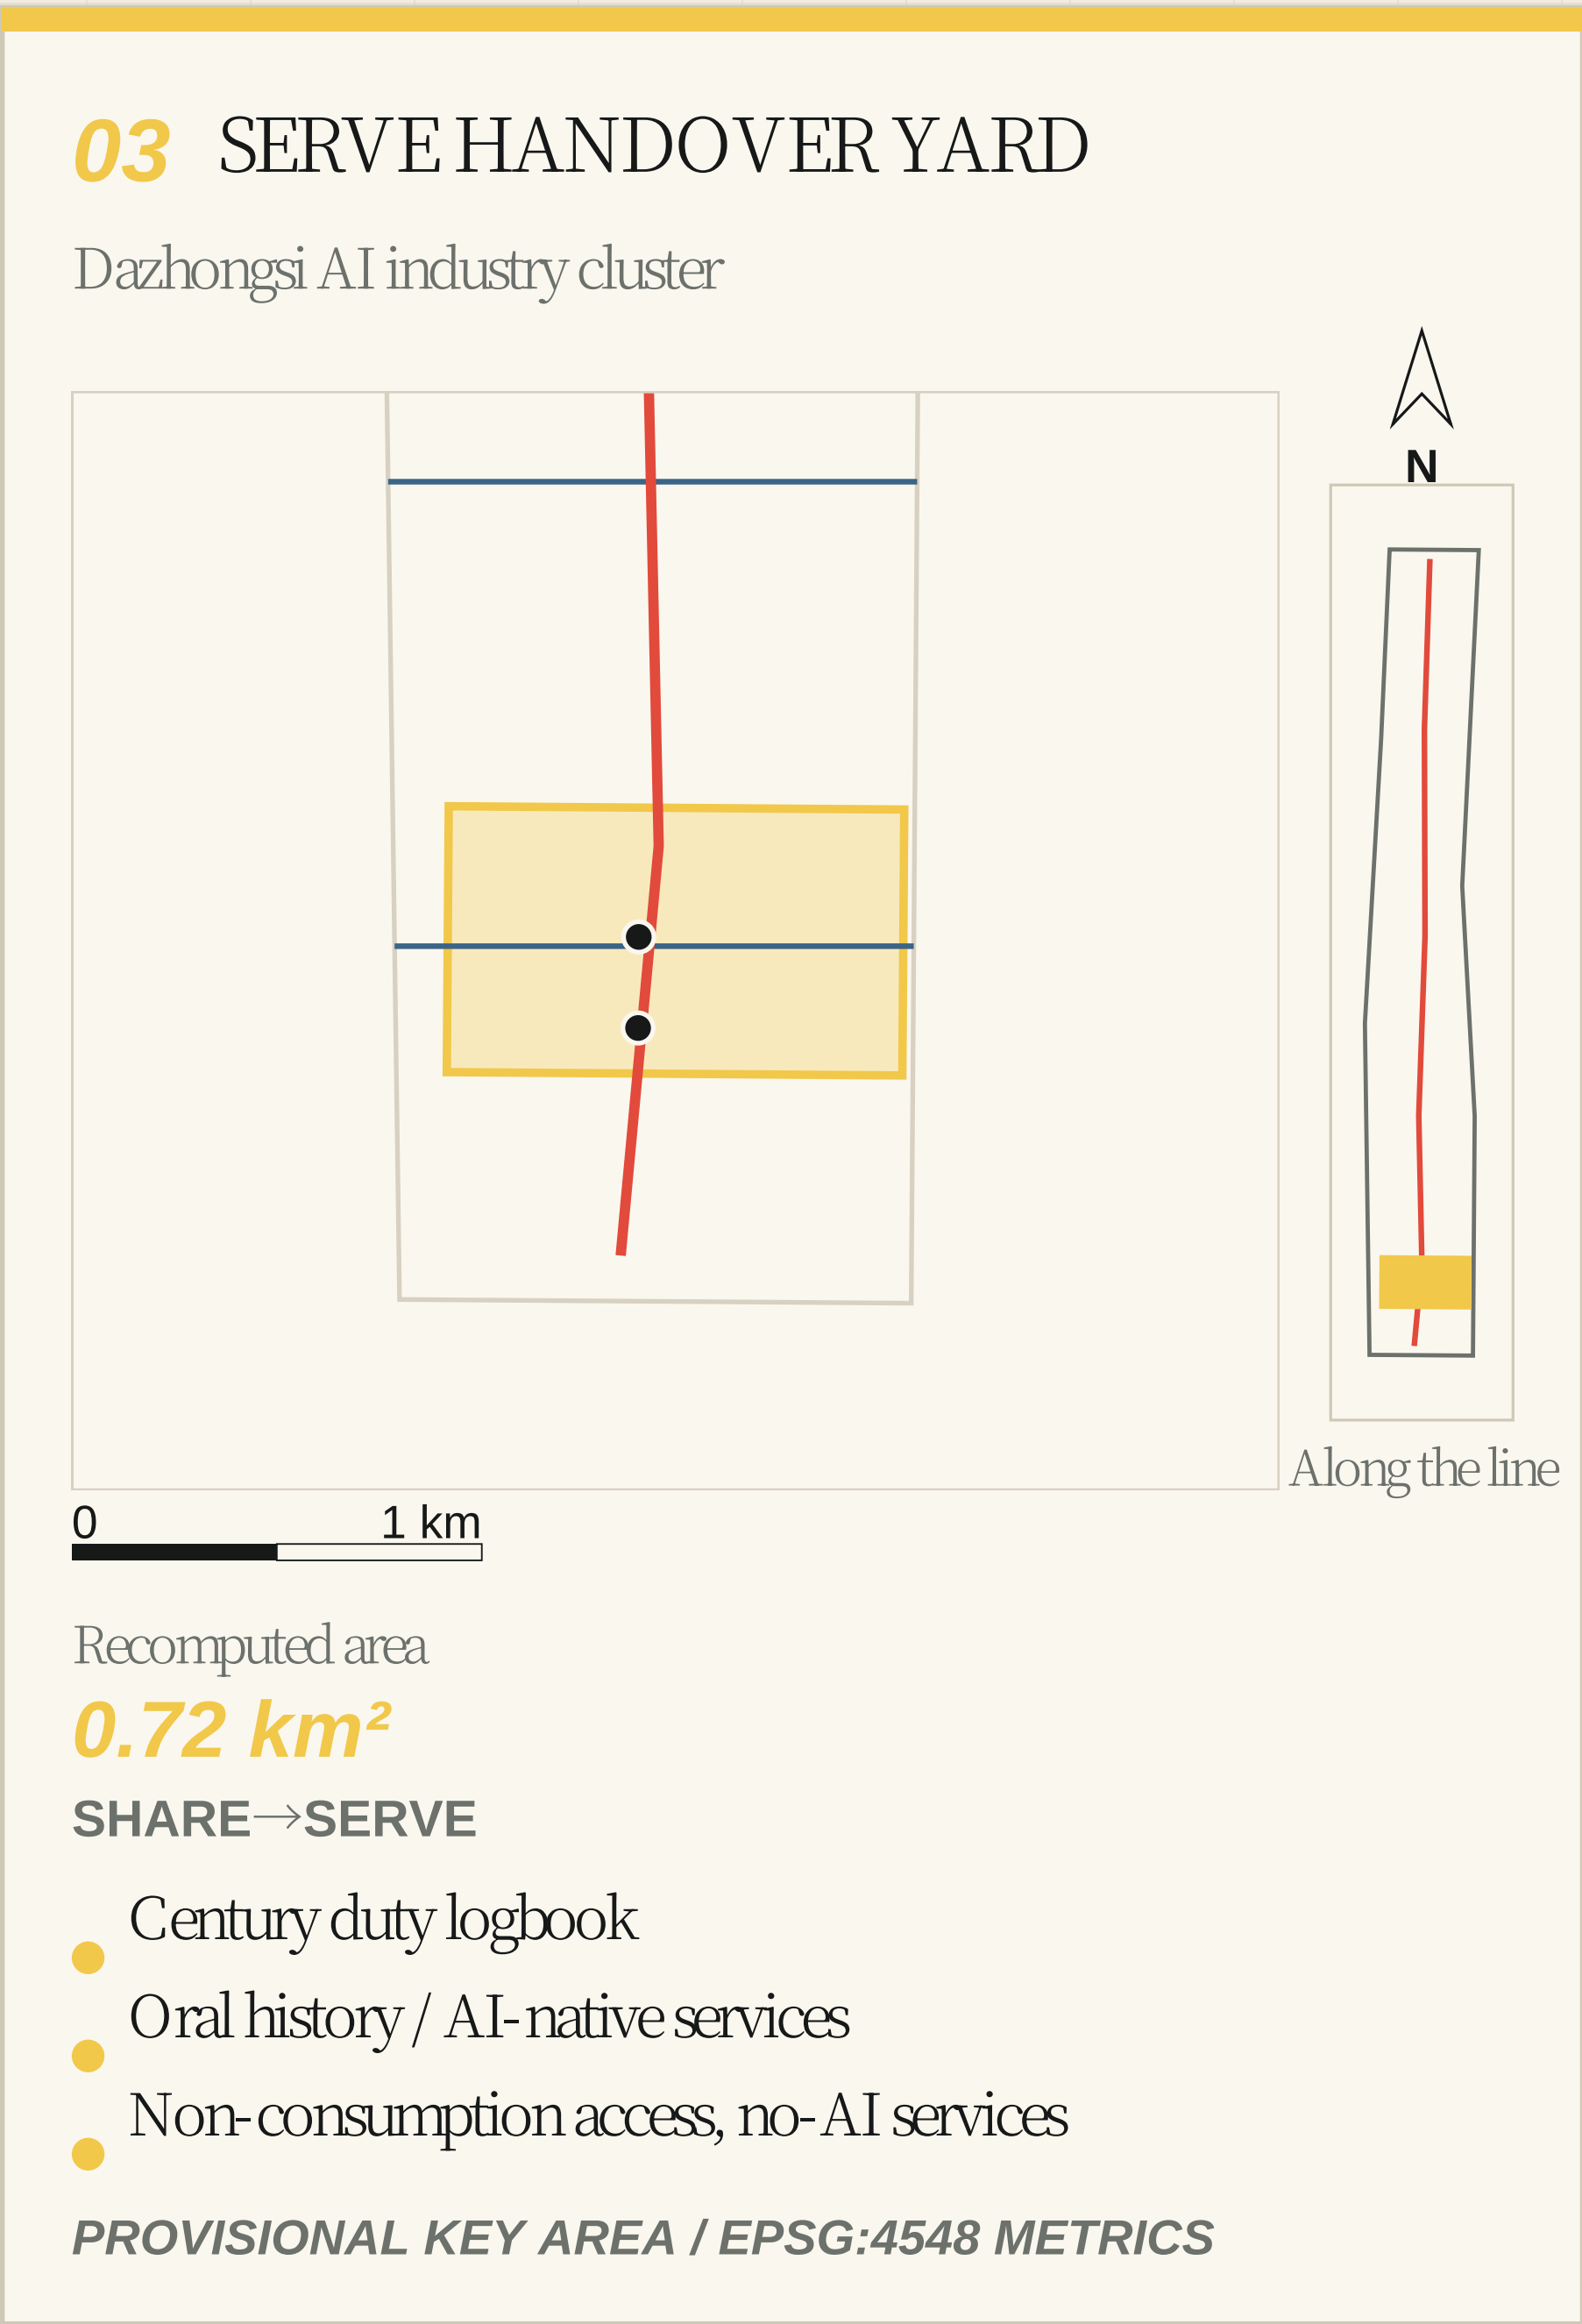

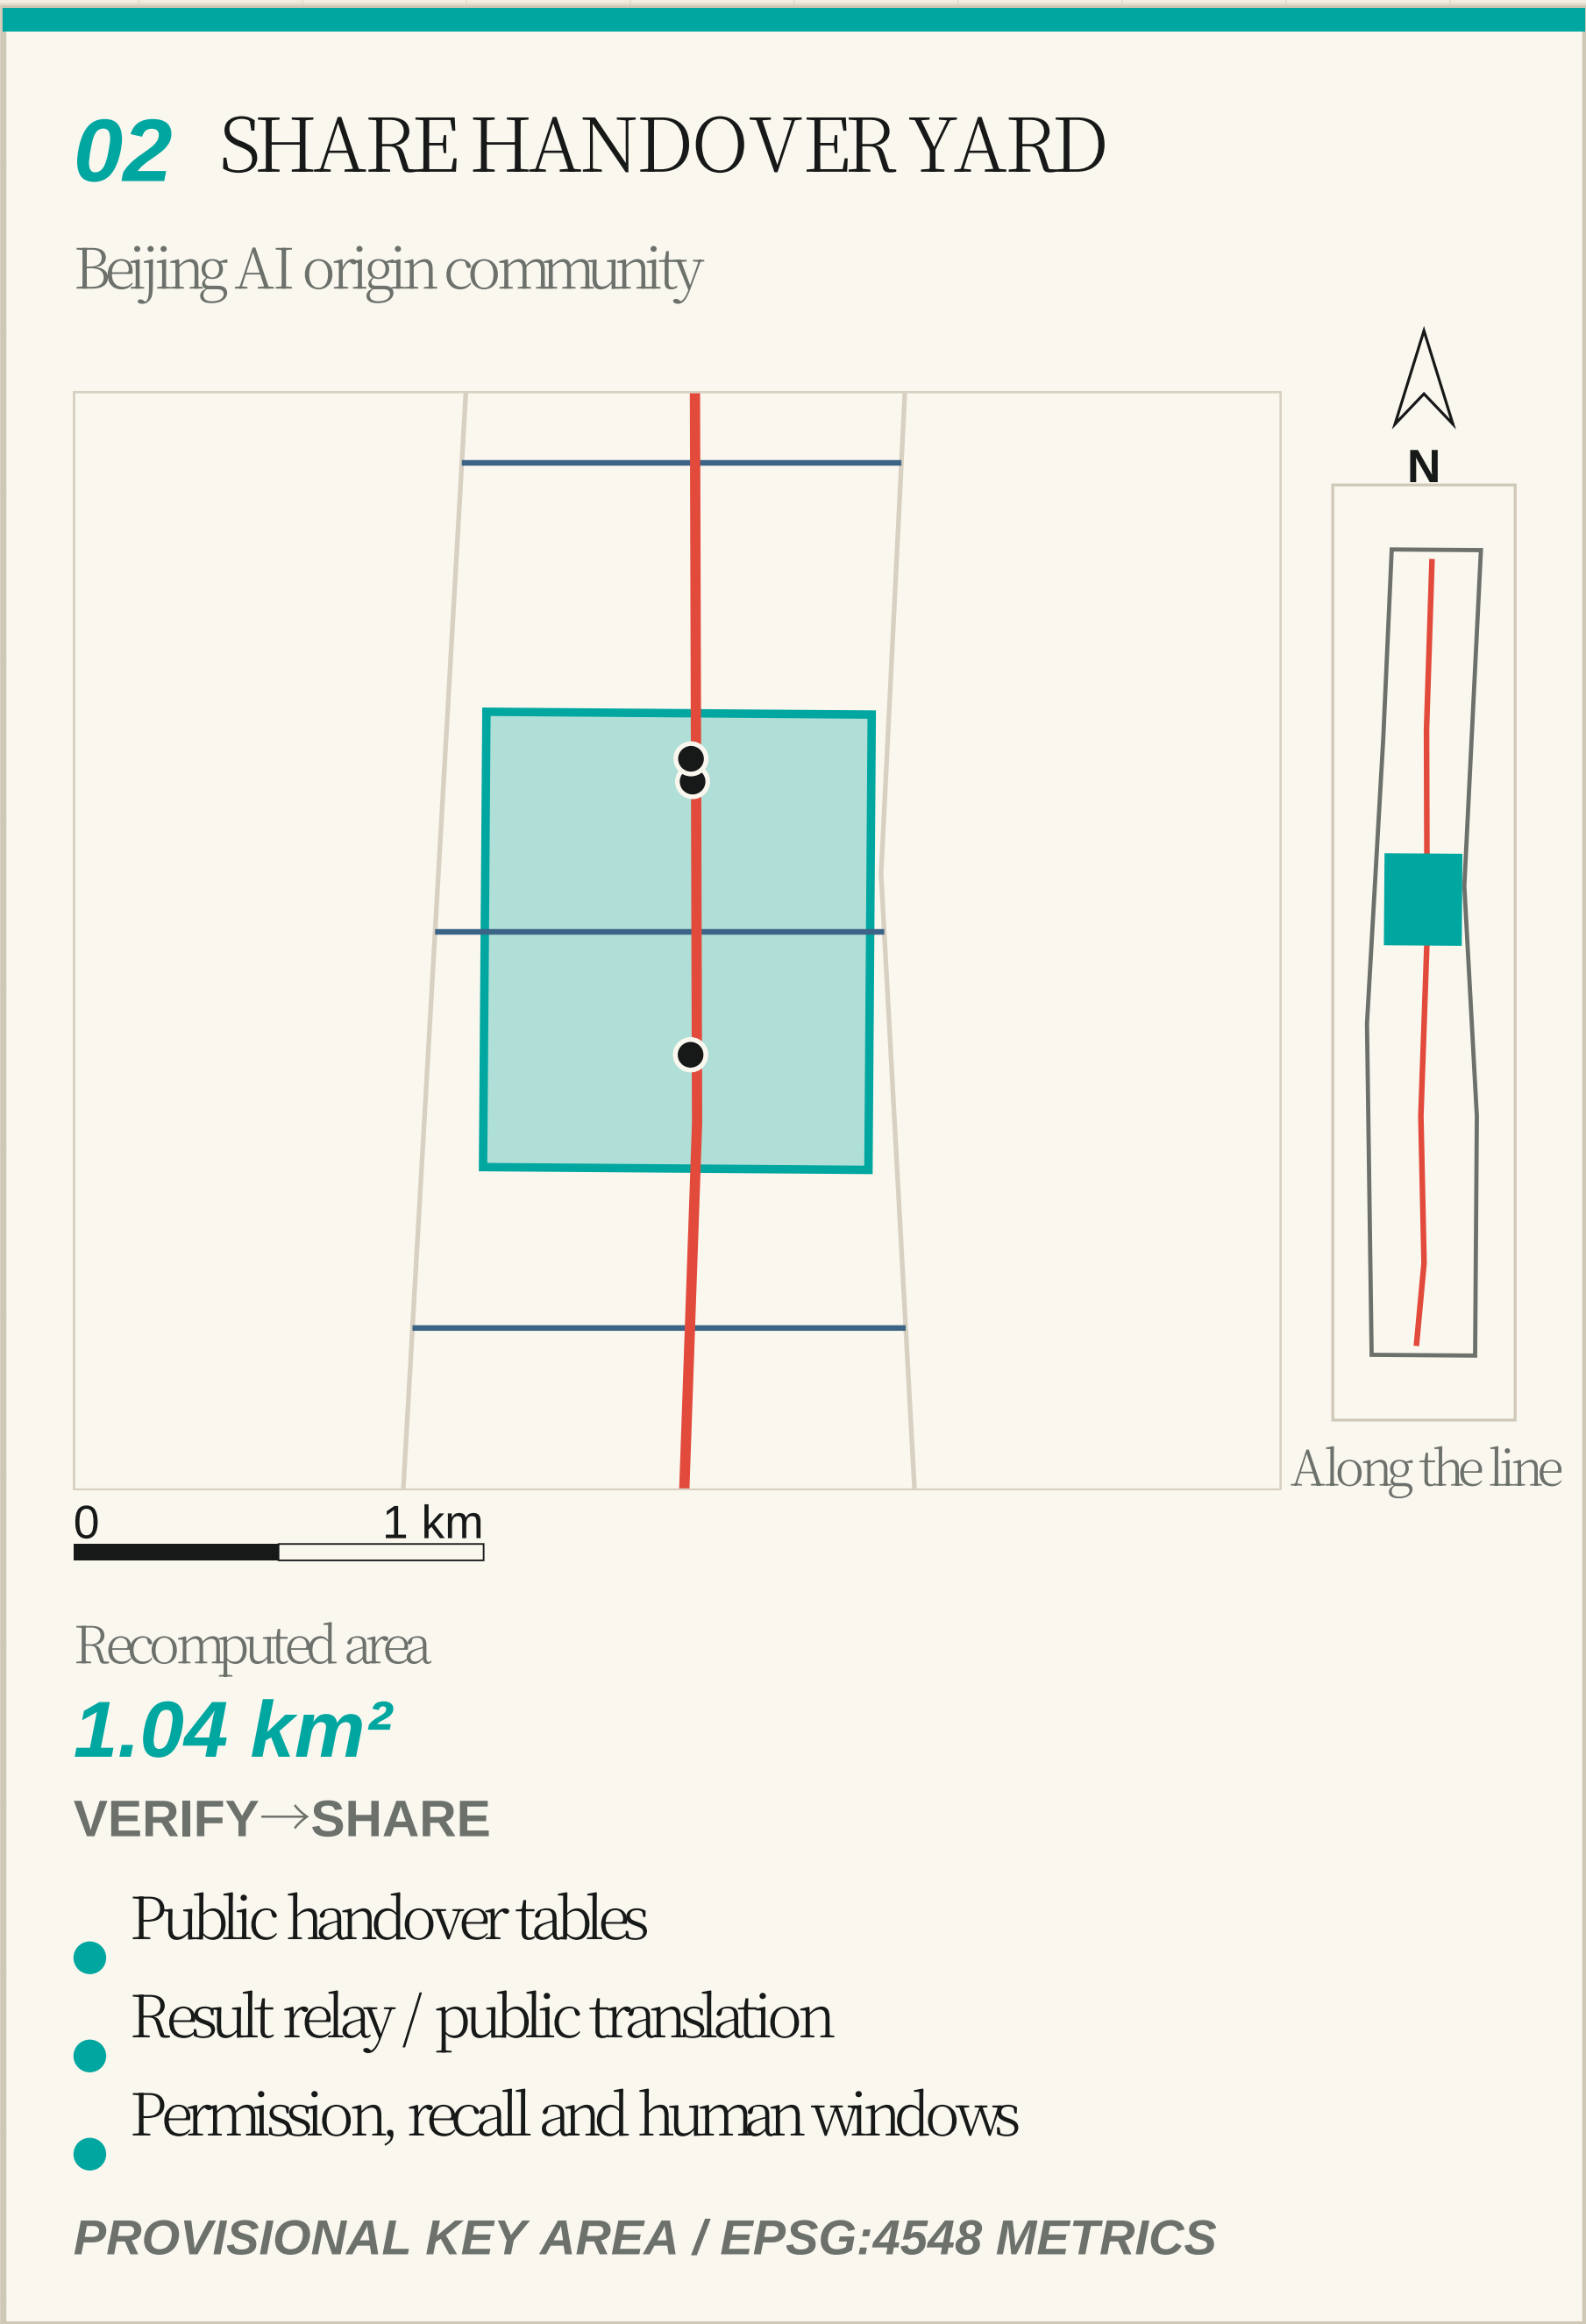

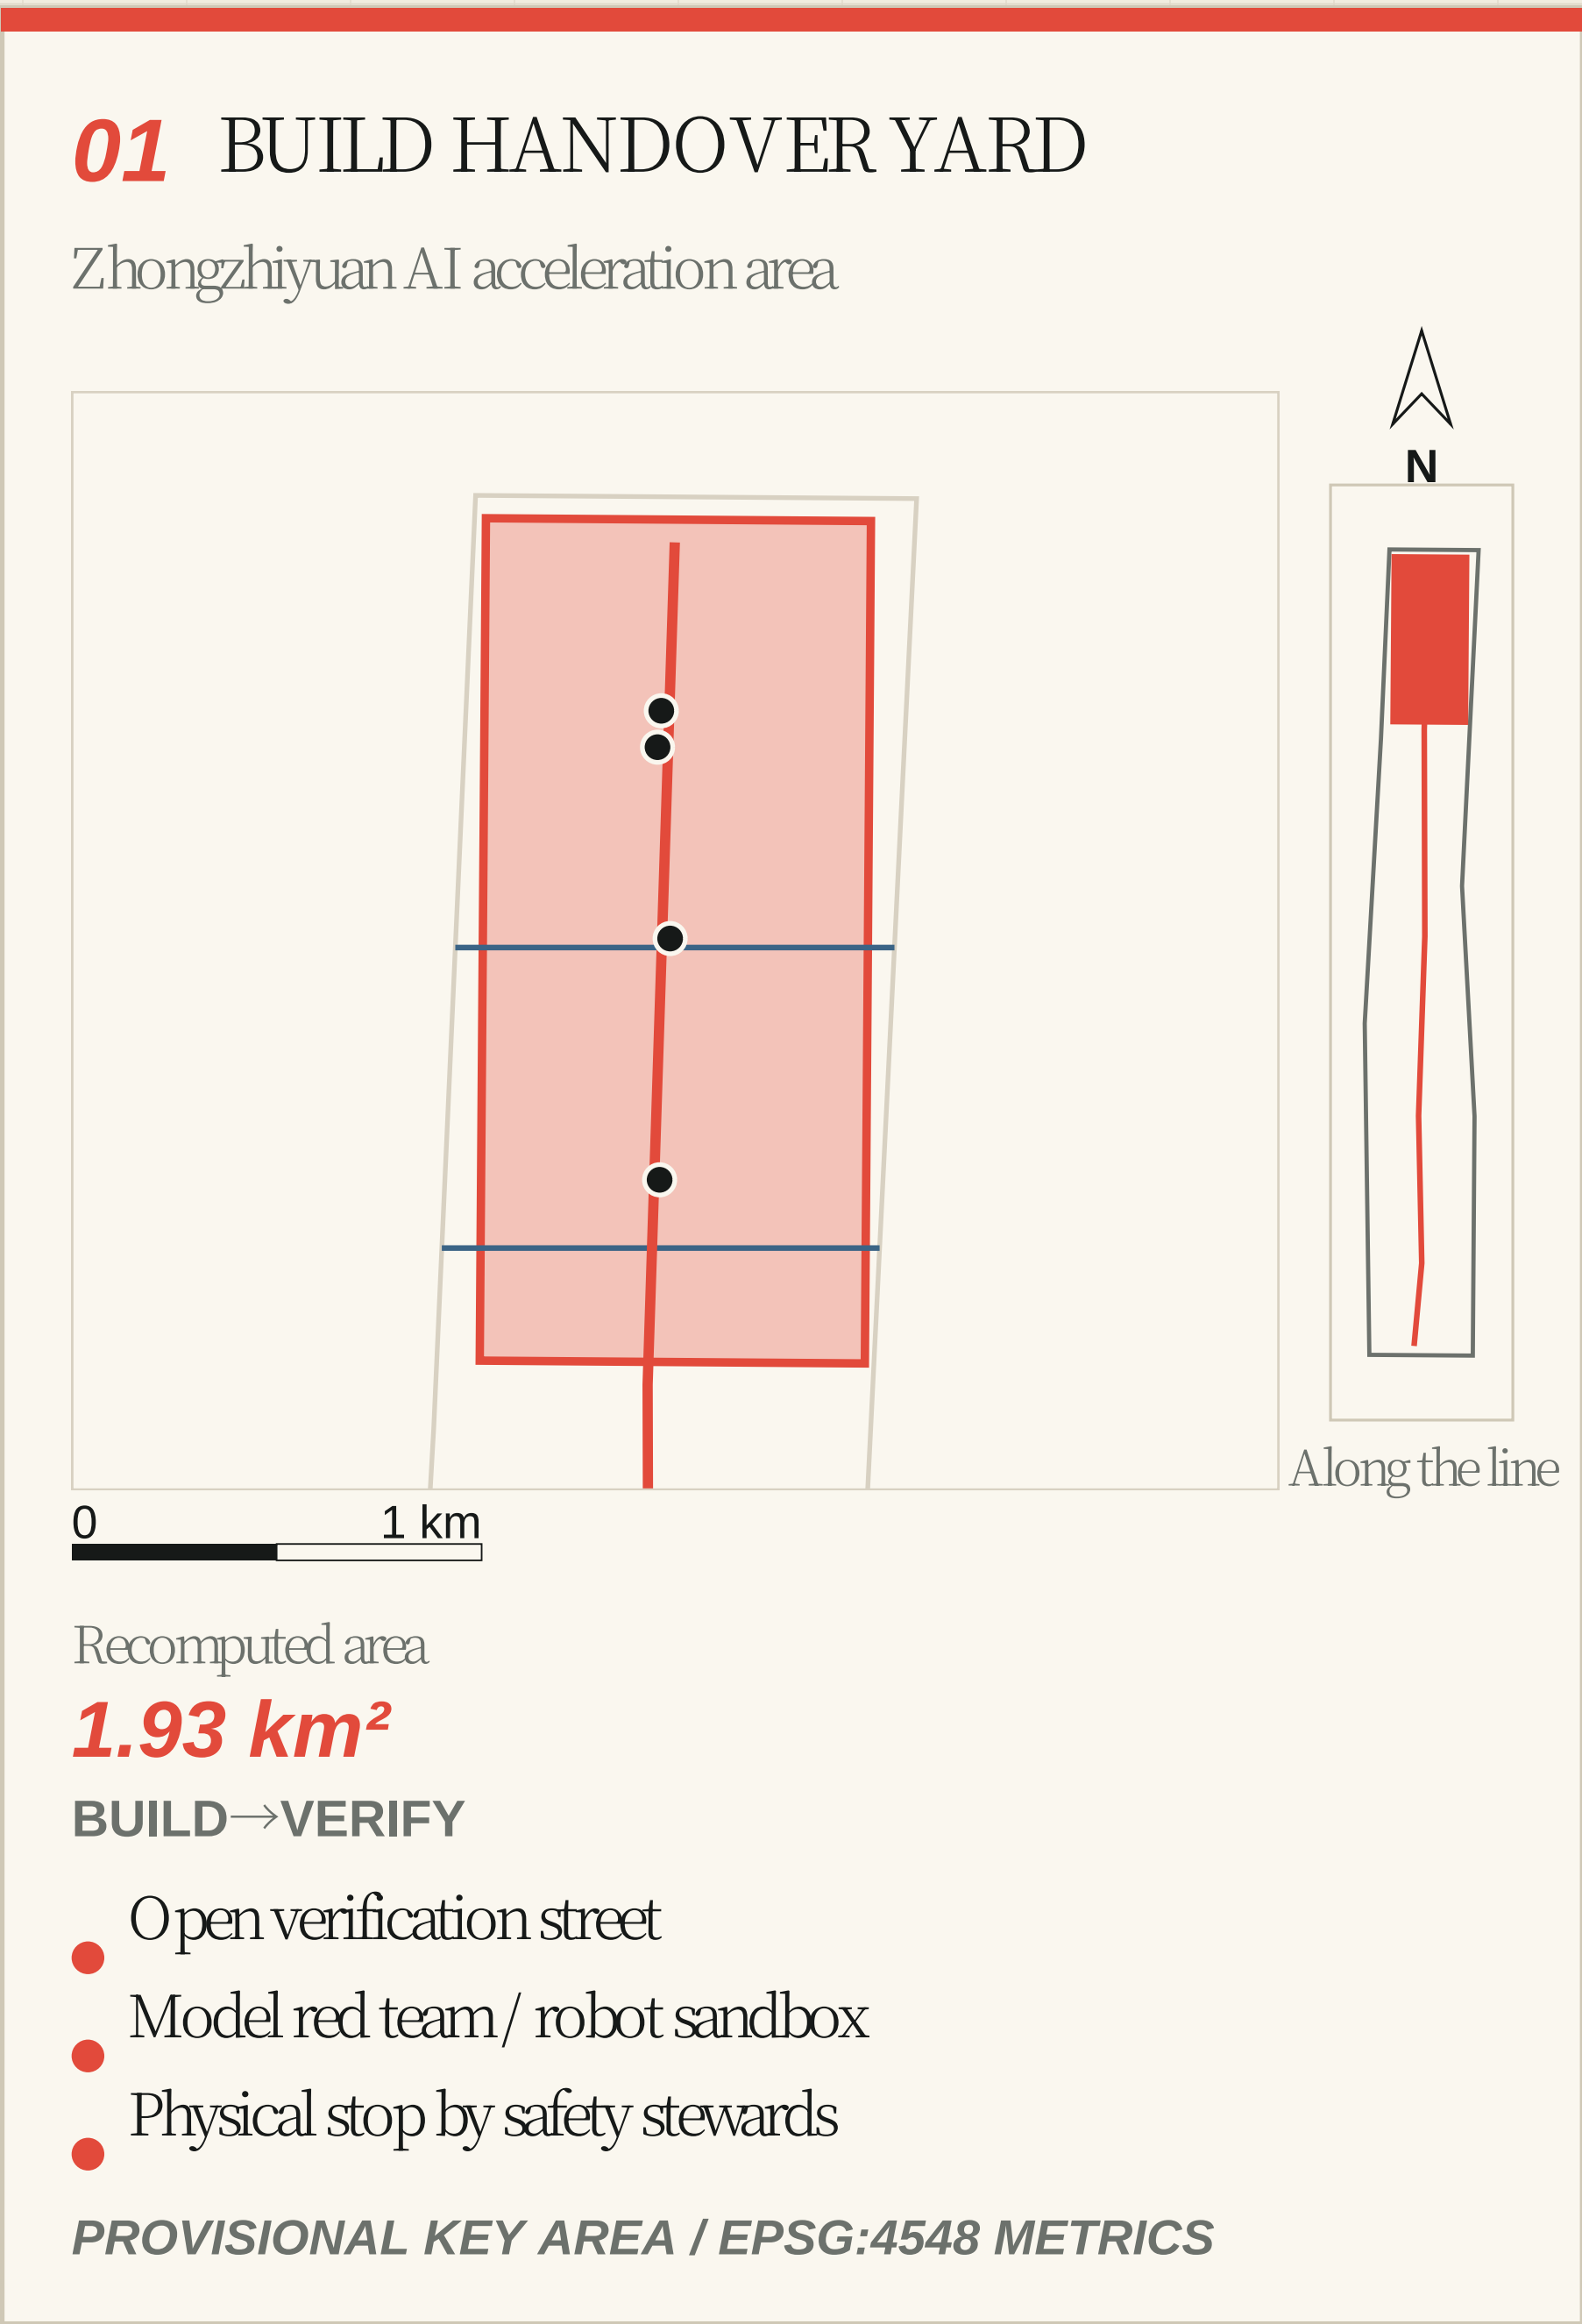

Design recommendation: all zones recalculate when official boundaries arrive; no ownership or statutory land-use claim.

Data: land\_use.geojson and site\_boundary.geojson; codes from the public MNR subset

## Three handover yards, three shifts of duty

Each key area answers programme, space, scenario and human-takeover gates  
Extents from key\_areas.geojson; points from public\_space.geojson; one shared scale

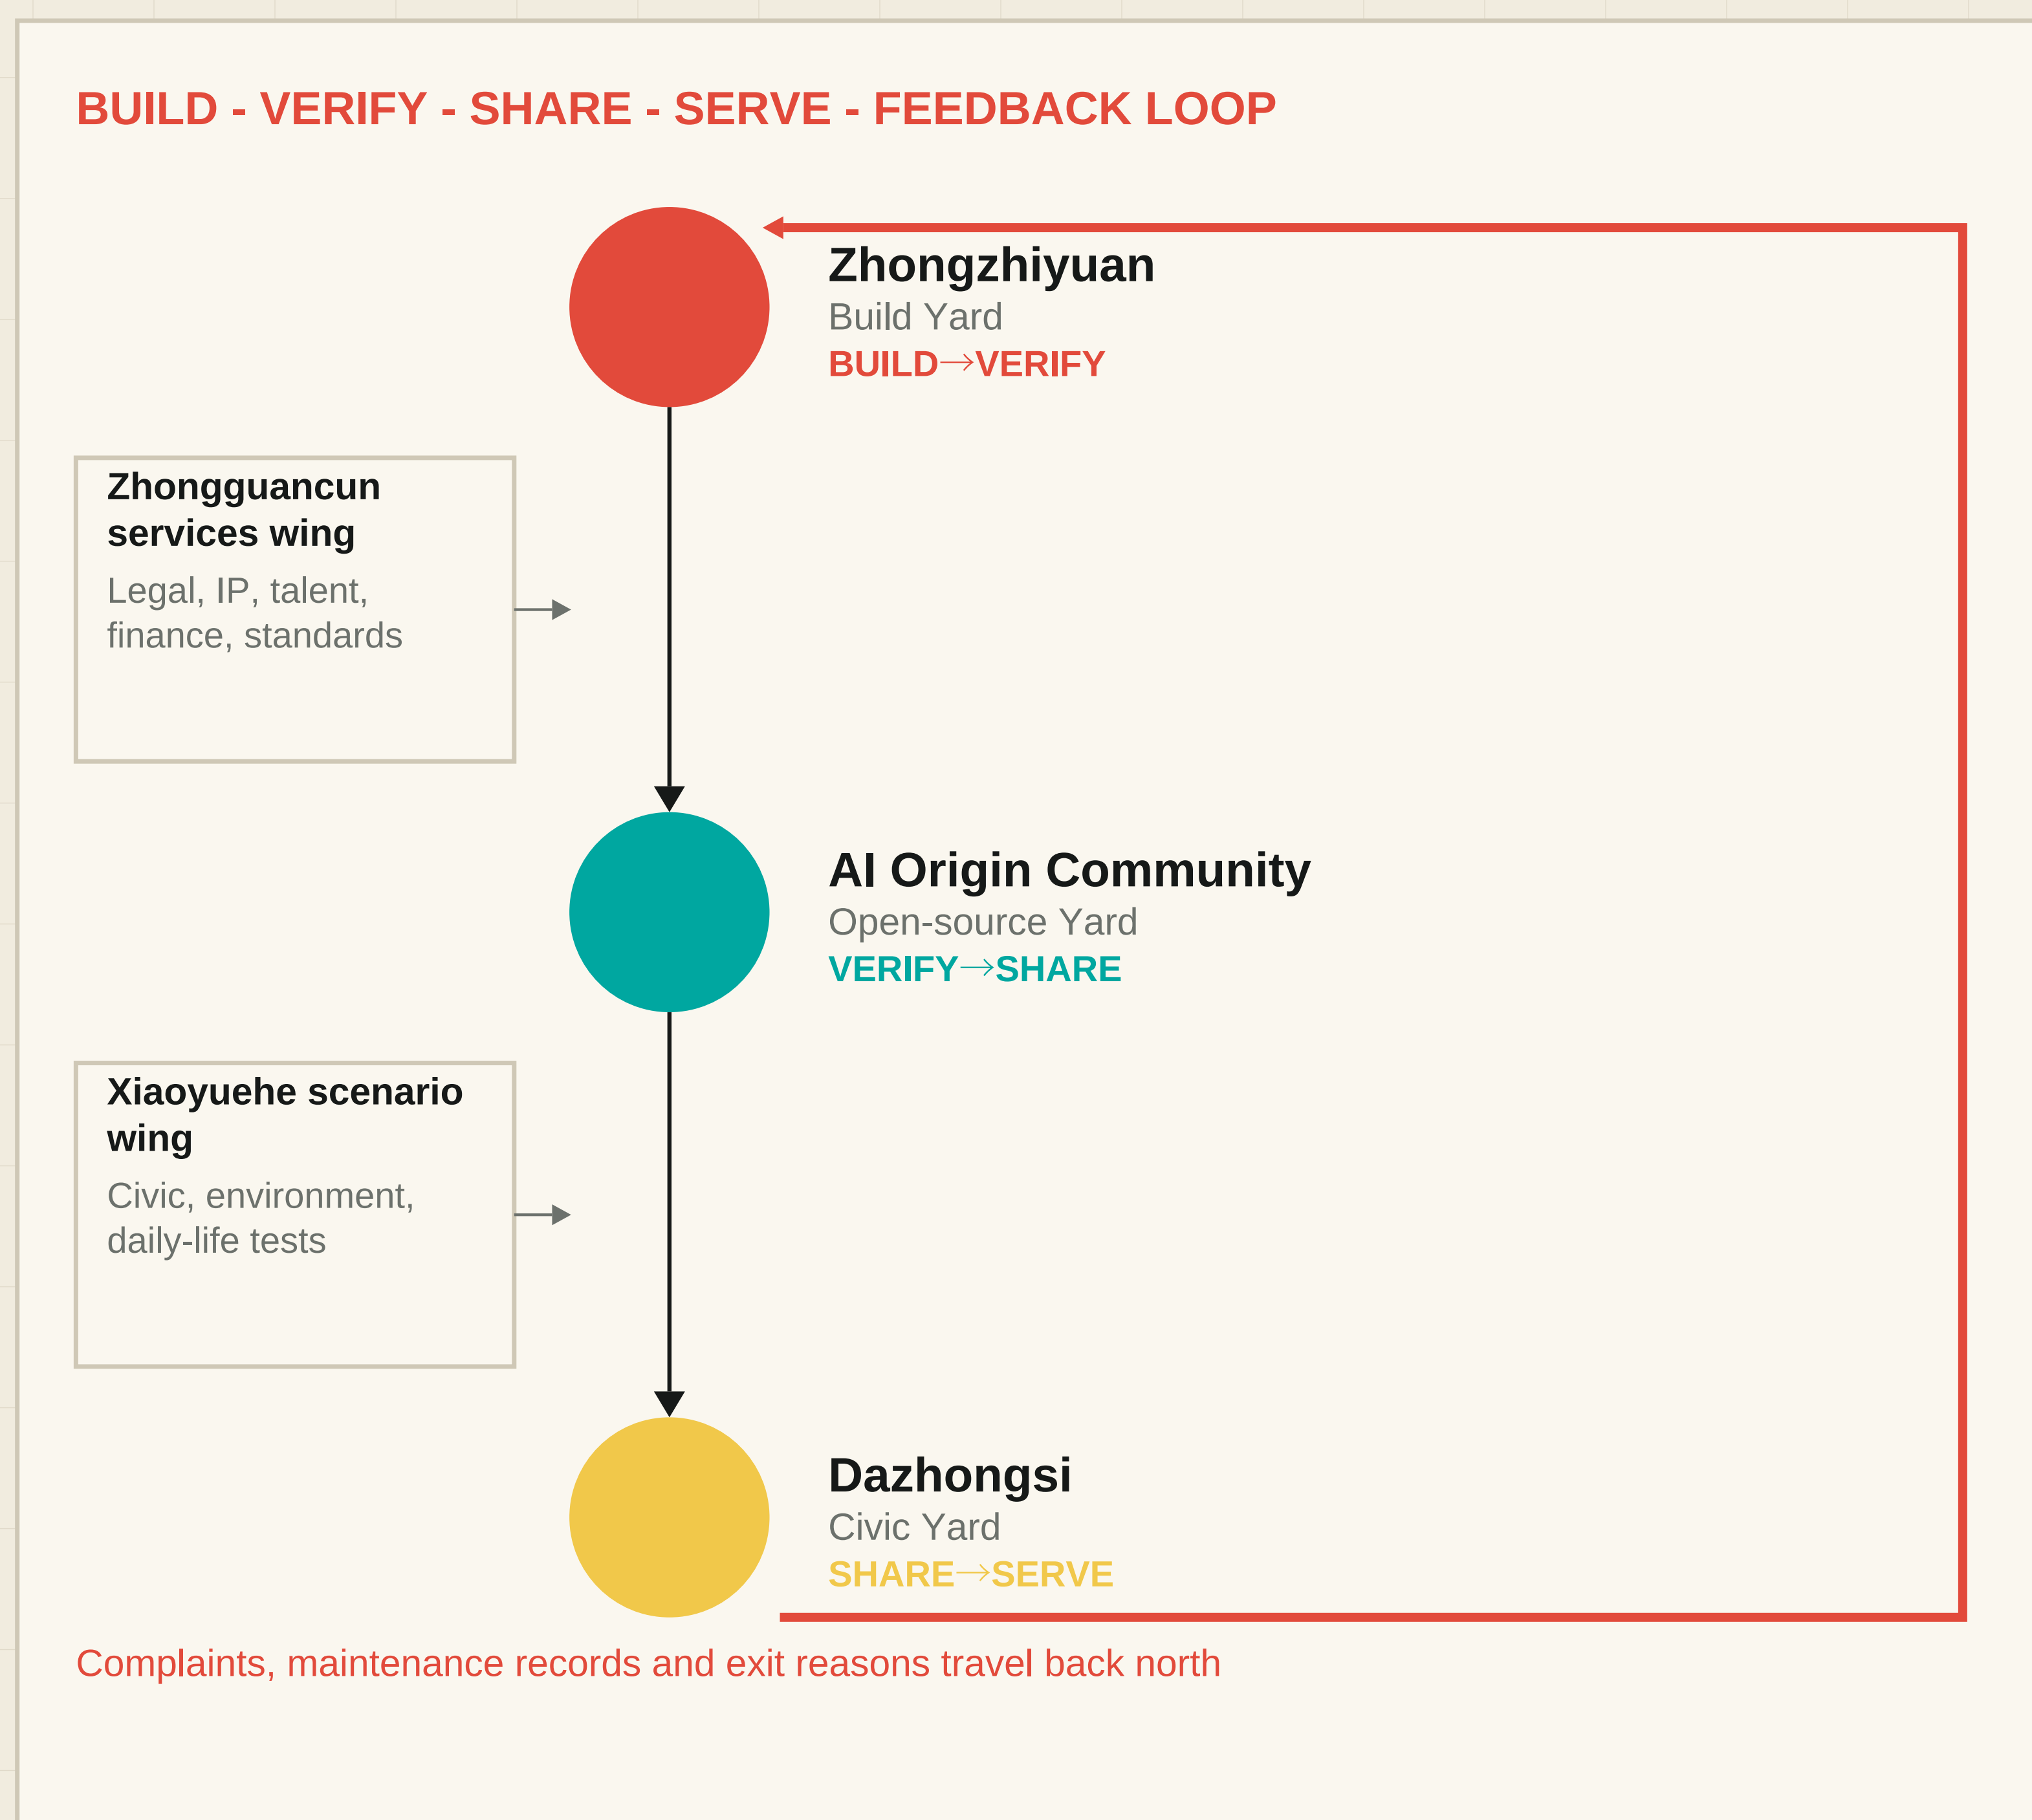

- Handover Line main axis
- East-west stitch links
- Public scenario / landmark

# Ecosystem Map and Regional Innovation Synergy

Eight shared stacks x three areas, two wings; synergy across belt-city-municipal-regional tiers

## EIGHT SHARED STACKS / INTERFACE AND DUTY OWNER VISIBLE

|                                                                                           |                  |
|-------------------------------------------------------------------------------------------|------------------|
| Land                                                                                      | Zhongzhiyuan     |
| Reversible space supply                                                                   |                  |
| Space                                                                                     | All three        |
| Open labs, validation workshops, community rooms                                          |                  |
| Industry                                                                                  | Zhongzhiyuan     |
| Model, chip, robot and vertical-app interfaces                                            |                  |
| Finance                                                                                   | Services wing    |
| Transparent navigation; no subsidy promised                                               |                  |
| Talent                                                                                    | Origin Community |
| Universities, developers, maintainers, residents                                          |                  |
| Compute                                                                                   | Zhongzhiyuan     |
| Edge metering first, access on demand                                                     |                  |
| Data                                                                                      | All three        |
| Consent, minimisation, withdrawal, audit                                                  |                  |
| Scenarios                                                                                 | Scenario wing    |
| Problems, test rules, results, exit records                                               |                  |
| No company list, investment or output figures: industry metrics are defined, not assigned |                  |

|             |                                                                                                                                                                                |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| WITHIN BELT | Three areas and two wings organise the research-validation-service loop; objections and shutdown reasons travel back north.                                                    |
| WITHIN CITY | Connects to the official “two zones and one belt” framework, matching Zhongguancun technology supply to this belt’s validation and scenario demand.                            |
| MUNICIPAL   | Future Science City, Huairou Science City and BDA form an original-research / engineering-validation / scale-delivery division; this belt is the public-validation output end. |
| REGIONAL    | Compute, energy and scenario interfaces reserved toward Zhangjiakou and other Beijing-Tianjin-Hebei nodes; feasibility to be confirmed by authorities.                         |

## Eight stacks x three areas / two wings — placement matrix

| Shared stack | Zhongzhiyuan                                                                        | Origin Community                                                                    | Dazhongsi                                                                             | Services wing                                                                         | Scenario wing                                                                         |
|--------------|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| Land         |  |                                                                                     |                                                                                       |                                                                                       |                                                                                       |

# Renewal structure and building decisions

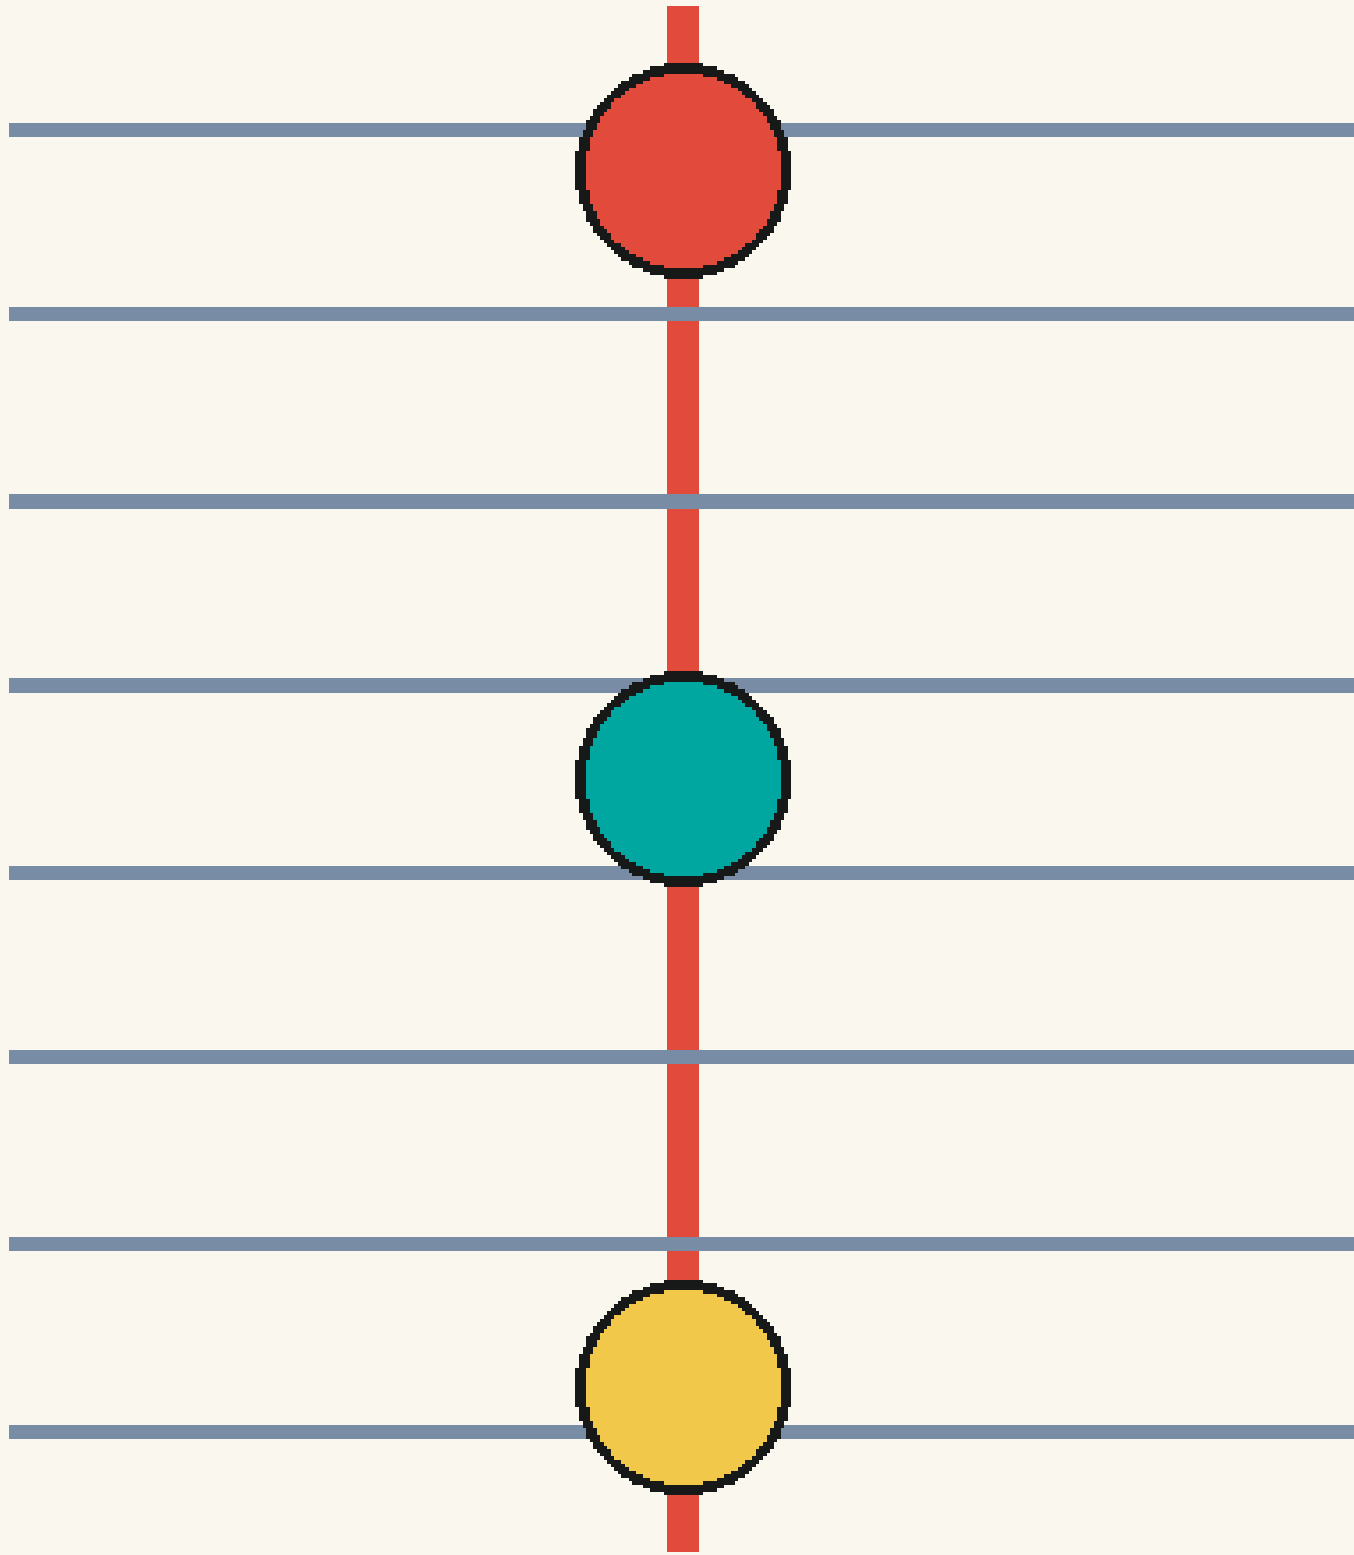

One spine, eight stitches, three yards; priority areas in three tiers, buildings in four steps

F / 07

## Renewal structure and priority areas

One spine, eight stitches, three yards; priority areas in three tiers

### RENEWAL SPATIAL STRUCTURE

Handover Line / organising spine  
East-west stitch links x8  
Handover yards x3

### PRIORITY RENEWAL AREAS

#### TIER 1

Three yards and their walkable surroundings  
One lead body, owners join by agreement

#### TIER 2

Stitch-spine junctions and low-efficiency park edges  
Packaged renewal units, unified public edge

#### TIER 3

Remaining frontage along the line  
Wayfinding, shade and edge tidying only

### TWENTY TYPOLOGY TEST CELLS (10 EACH SIDE)

#### Validation workshop

5  
26.6%

#### Shared service stack

5  
26.6%

#### Open R&D court

5  
23.4%

#### Community room

5  
23.4%

Retain-first adaptive reuse 14 - awaiting survey 6

Source: submitted buildings/roads/key\_areas/phasing geometry; conceptual, no demolition conclusion

JING-ZHANG HANDOVER LINE / PACKAGE v1.15

### R / RETAIN

#### Keep in use

Keep in use and complete the condition record.

### A / ADAPT

#### Low-impact repair

Fire safety, energy, accessibility and open ground floor first.

### I / INSERT

#### Removable trial

Removable elements and short-term use only.

### D / INVESTIGATE

#### Not demolition

Awaits survey, structure, ownership, fire and heritage review.

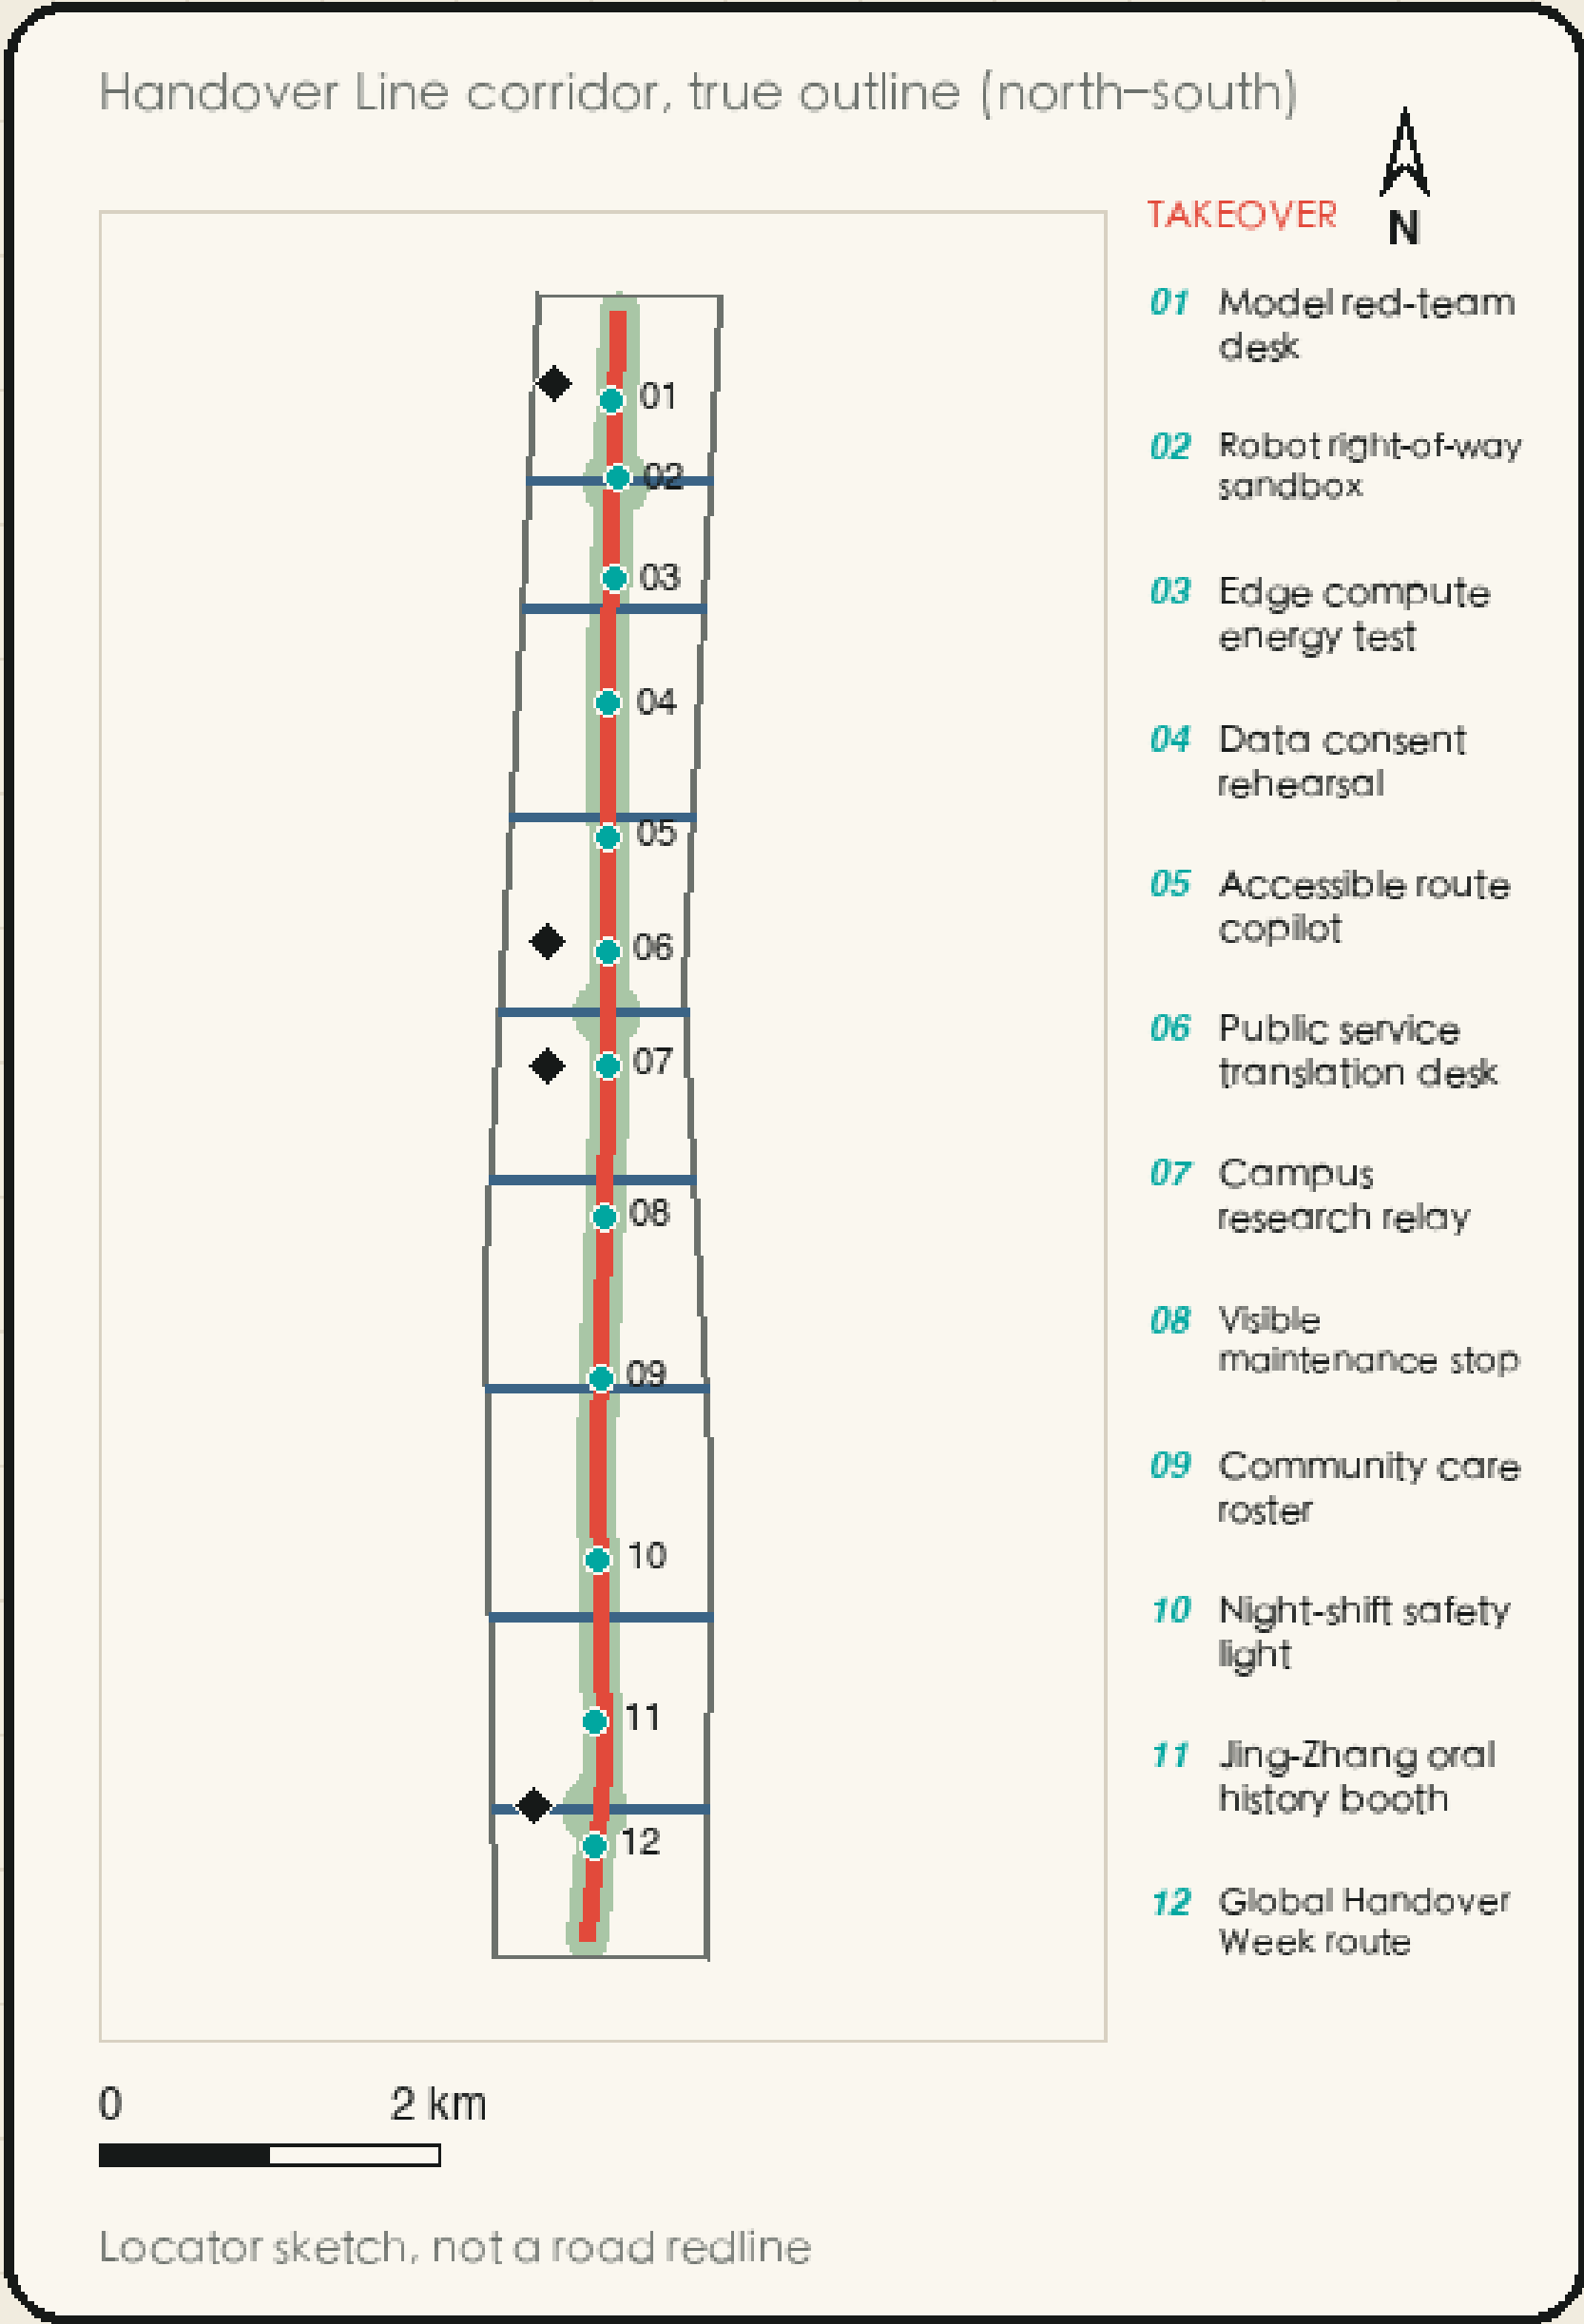

# Twelve reversible scenarios and human takeover

Movement, blue-green ground, human takeover and no-AI equivalents

F / 04

## One spine, eight stitch links, twelve takeover points

The smart layer is removable; basic access and human service stay available

### MOVEMENT / SERVICE

- Continuous walk-cycle spine
- East-west stitch links (8)
- Blue-green comfort ground
- Human-takeover scenario node (SCN)
- Civic landmark point

### A OFFLINE BY DEFAULT

Static signs, light, tactile maps and human help do not rely on a model.

### B GRADED TAKEOVER

Low confidence, boundary breach, objection or outage calls the duty person.

### C EXIT IS RECORDED

Shutdown cause, deletion and service continuity enter the public logbook.

### SECTION The handover section: order and adjacency only, no dimensions

| Handover counter                                                                                                                                  | Accessible walk                                                                     | Takeover Kiosk Zero                                                                        | Retained track                                           | Machine-only lane                                                                       | Planting and rest                                                    |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|----------------------------------------------------------|-----------------------------------------------------------------------------------------|----------------------------------------------------------------------|
| Walking surface (continuous; no level change)<br>The staffed counter precedes the smart interface and still works once the smart layer is removed | Never interrupted by equipment, advertising, temporary occupation or charging posts | The physical stop control is reachable from the footway without downloading or registering | Set flush in the paving, a trace rather than an obstacle | Separated from walking; crossing the edge stops the machine; safety staff take priority | Non-commercial dwelling; seats and shade carry no spending condition |

Adjacency rule: counter, walk and stop control stay continuously reachable; the machine lane never comes between them

Conceptual connectivity, not road redlines or engineering feasibility; lengths calculated in EPSG:4548

JING-ZHANG HANDOVER LINE / PACKAGE v1.15

SCN-01

### Model red-team desk

Human review + paper risk log

SCN-02

### Robot right-of-way sandbox

Safety staff + physical stop

SCN-03

### Edge energy test station

Manual shutdown + offline meter

SCN-04

### Data-consent rehearsal

Paper consent + deletion desk

SCN-05

### Accessible-route copilot

Tactile map + human direction

SCN-06

### Public translation desk

Human desk + multilingual paper

SCN-07

### Campus research relay

Human curation + open catalogue

SCN-08

### Visible maintenance stop

Phone report + human dispatch

SCN-09

### Community care roster

Staff telephone roster

SCN-10

### Night-shift safety light

Fixed light + human patrol

SCN-11

### Jing-Zhang oral-history booth

Human guide + paper catalogue

SCN-12

### Global Handover Week route

Fixed signs + volunteers

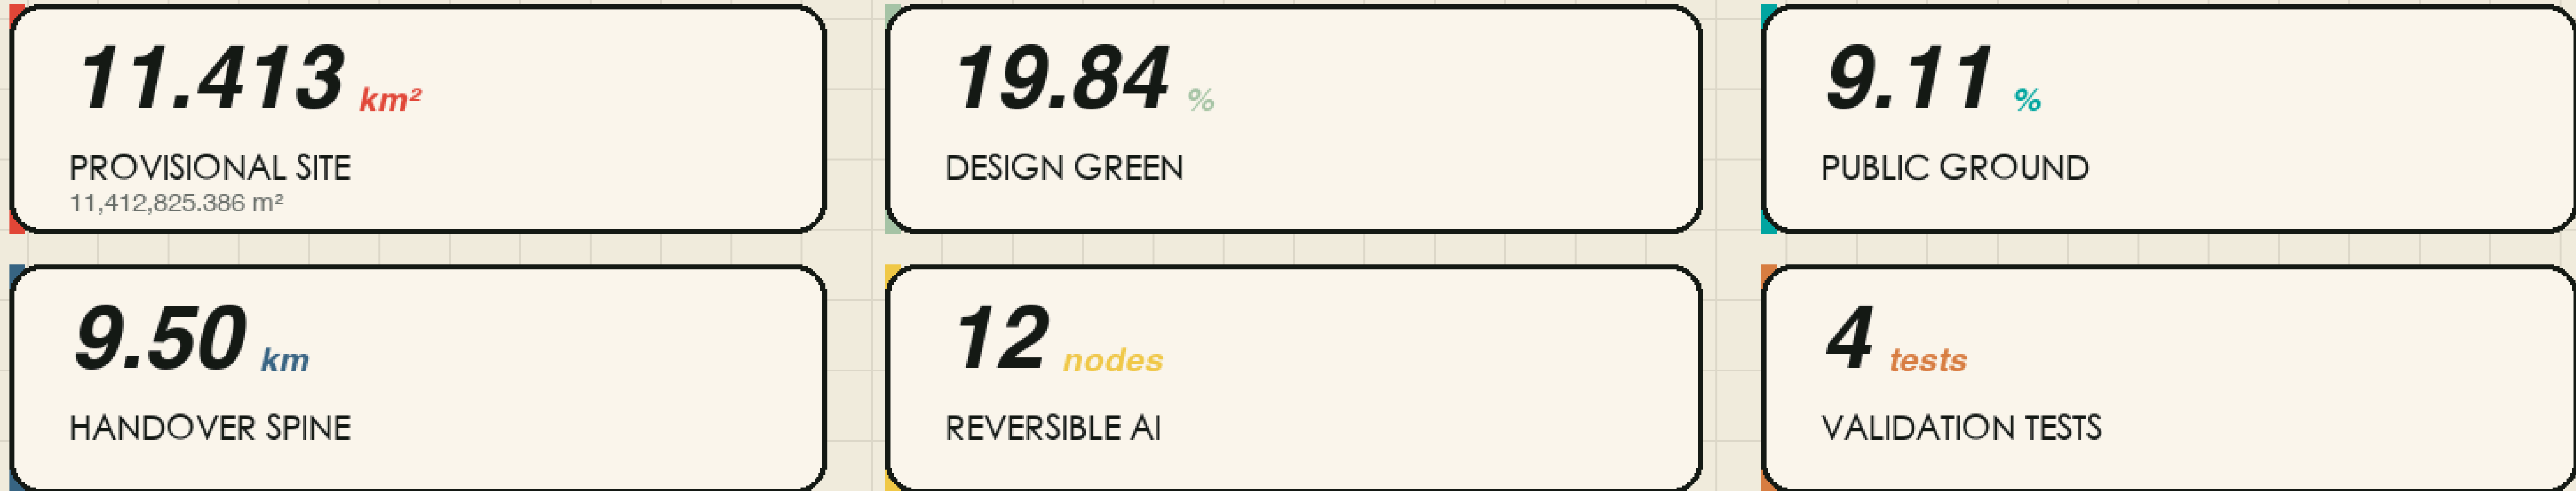

# Recalculable, exitable, continuable

Metrics, phasing, risk, sources and professional review gates

F / 05

## Every number returns to geometry, formula and assumptions

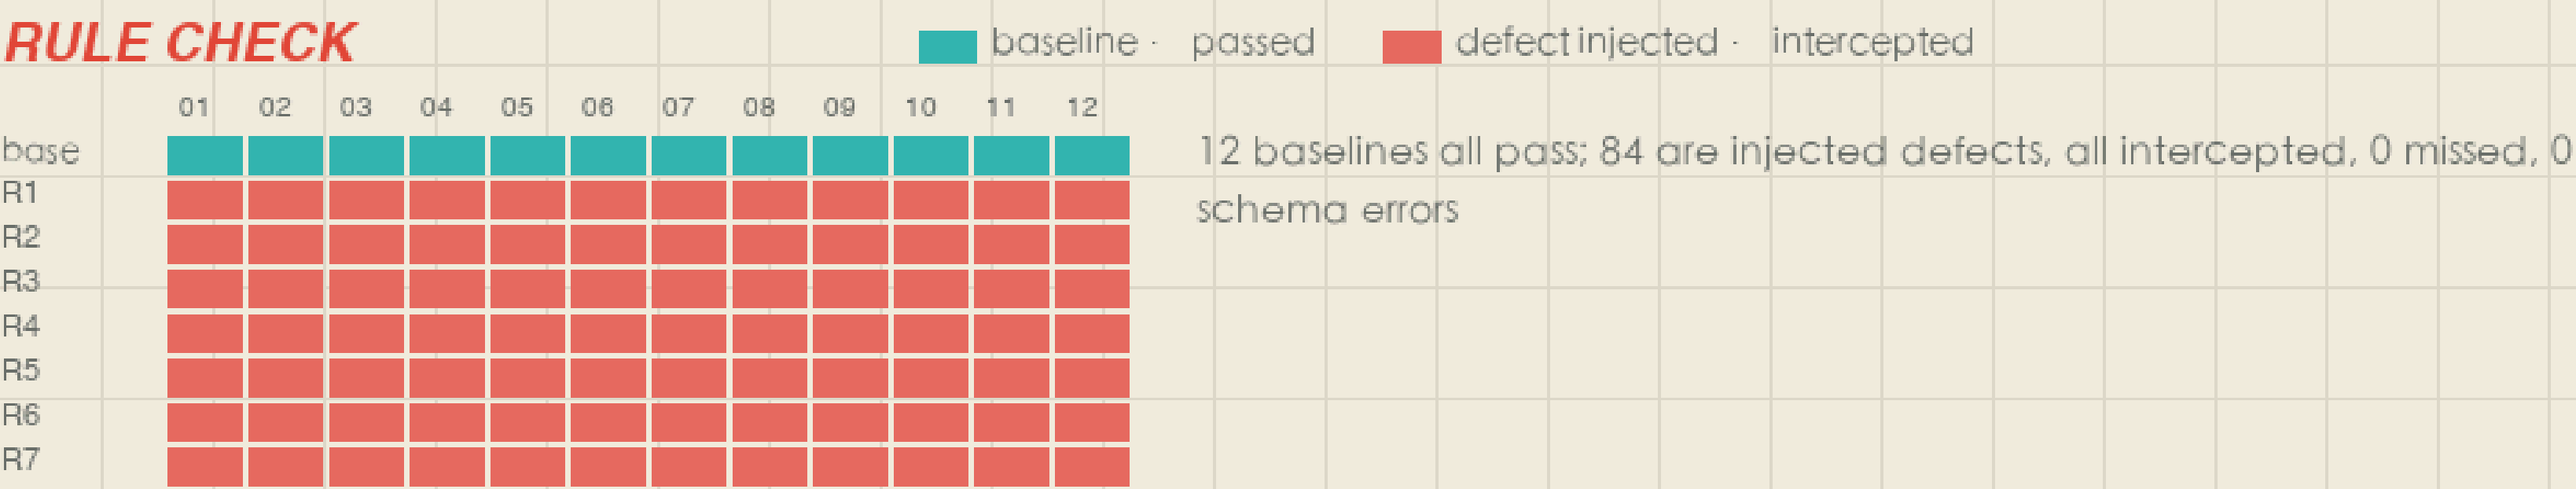

Known values recalculate; statutory FAR and height remain unknown

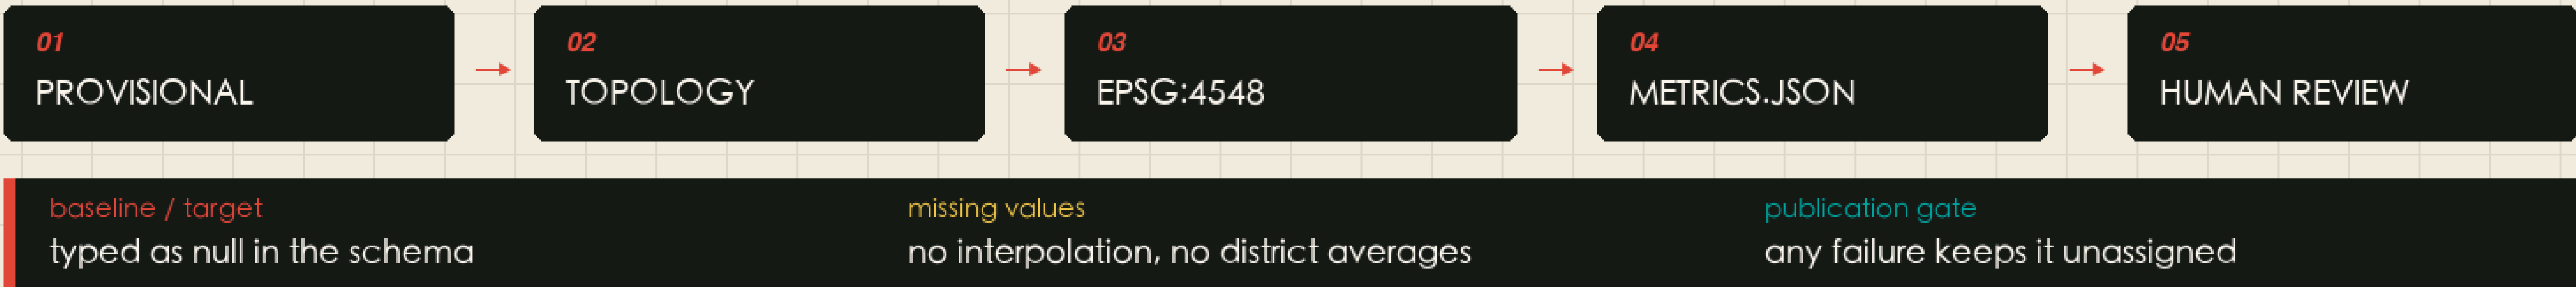

### MEASUREMENT PROTOCOL

Each of the 11 unassigned indicators states its definition, source type, collecting role, sampling unit and scope, frequency or trigger, denominator, missing-value handling, quality checks, dispute review, privacy and retention, and publication gate.

### RULE CHECK

### EVIDENCE CHAIN

metrics.json × geometry/\*.geojson × assumptions.json; displayed values are rounded

JING-ZHANG HANDOVER LINE / PACKAGE v1.15

|          |                                                                                                                            |
|----------|----------------------------------------------------------------------------------------------------------------------------|
| PHASE 01 | Return to baseline: official data, inventory, wayfinding and three low-risk human-led pilots.                              |
| PHASE 02 | Open-source yard: ground floors, research relay and community service after ownership and community review.                |
| PHASE 03 | Belt-wide operation: complex validation networks only after transport, utilities, heritage, privacy and safety conditions. |

Unknown by design: FAR, height, ownership, road redlines, utility capacity, investment and output.
