

Jing-Zhang Ledger Line / Board 1

Jing-Zhang Ledger Line | Aerial Concept

Centennial rail corridor as a public AI verification line with stations, wings, and blue-green public realm

Spatial Anchor

Each AI scenario is tied to a public place and reviewable layer.

Human Review

Services keep human oversight, explanation, and exit paths visible.

Provisional Data

Official geometry will trigger full recalculation.

● 1 line
public verification

● 3 stations
focus districts

● open data
recalculation

Concept rendering only. Official boundaries, metrics, task coverage and review status remain in package data files.

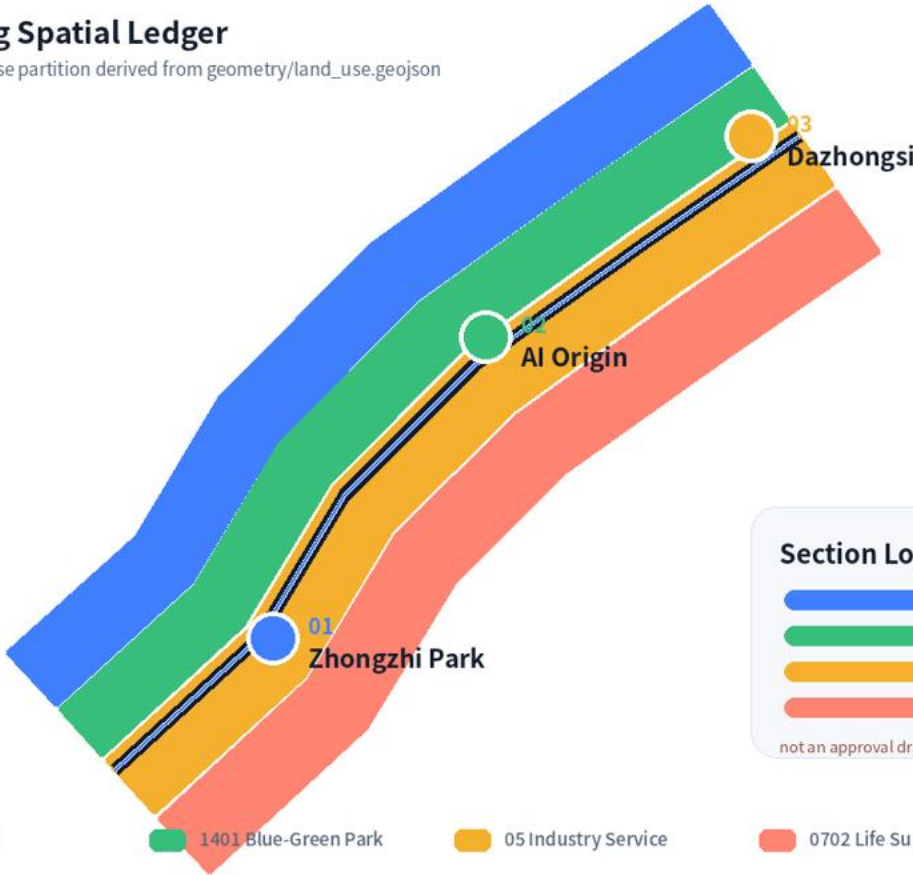

Jing-Zhang Ledger Line / Board 2

Land Use Structure | Line, Stations, Ledger Wings

R&D, blue-green public realm, industry service, and life support as a recalculable spatial structure; not statutory zoning

Jing-Zhang Spatial Ledger

conceptual land-use partition derived from geometry/land_use.geojson

Use Mix

provisional boundary basis

0802 AI R&D

267.5 ha / 23.4%

research origin, open-source lab, full-stack testing

1401 Blue-Green Park

258.9 ha / 22.7%

heritage park, sponge garden, slow mobility

05 Industry Service

336.6 ha / 29.5%

showcase, data exchange, commercial service

0702 Life Support

278.3 ha / 24.4%

community service, talent support, daily amenities

Official redline, detailed controls, FAR and ownership data must replace provisional geometry before statutory use.

Jing-Zhang Ledger Line / Board 3

Three Verification Stations | Public Space Concept

Three station prototypes support AI testing, release, governance, and public experience

Spatial Anchor

Each AI scenario is tied to a public place and reviewable layer.

Human Review

Services keep human oversight, explanation, and exit paths visible.

Provisional Data

Official geometry will trigger full recalculation.

1 line
public verification

3 stations
focus districts

open data
recalculation

Concept rendering only. Official boundaries, metrics, task coverage and review status remain in package data files.

Jing-Zhang Ledger Line / Board 4

AI Event Week | Blue-Green Mobility Concept

From everyday mobility to global AI event week: safe, explainable, reversible public route

Spatial Anchor

Each AI scenario is tied to a public place and reviewable layer.

Human Review

Services keep human oversight, explanation, and exit paths visible.

Provisional Data

Official geometry will trigger full recalculation.

1 line
public verification

3 stations
focus districts

open data
recalculation

Concept rendering only. Official boundaries, metrics, task coverage and review status remain in package data files.

Jing-Zhang Ledger Line / Board 5

Metrics Evidence Chain | Layers, Recalculation, Review

Key values come from GeoJSON, metrics.json, and matrices; unknown controls remain pending official data

site area

11,412,825.386

geometry/site_boundary.geojson

green ratio

0.123

geometry/green_space.geojson,
geometry/site_boundary.geojson

public-space ratio

0.073

geometry/public_space.geojson,
geometry/site_boundary.geojson

building footprint

310,807.184

geometry/buildings.geojson

key areas

3

geometry/key_areas.geojson

FAR

pending

brief/site-package/ranges/planning_limit
s.json

Recalculable

Site, green, public-space, building, and key-area values come from submitted layers.

Pending Inputs

FAR, height, road redline, utilities, and ownership require official data.

Auditable

Narrative, figures, HTML, and PDFs point back to the same structured evidence.

Updatable

When official geometry arrives, layers, metrics, and figures are recalculated together.
