

# JINGZHANG GROWTH MESH

An AI talent and  
enterprise community  
from park to city to  
network

# Falsifiable delivery brief

Location interfaces form a multi-anchor network; six agents compile problems into projects while four human gates control release and exit.

|                                                                                                                                                                                    |                                                                                                                                                                                                       |

# Multi-agent urban-renewal control plane

AI planning value is not faster imagery; it makes evidence, project contracts, public safeguards and exit decisions traceable.

# District-health evidence grades

Grade evidence before survey, design or stop decisions; inference never impersonates field fact.

E0 | 已公开

Jingzhang planning: about 9 km, complex crossings and multiple actors; AI belt: about 37 km<sup>2</sup>, three zones/two wings and a 1-2 km interface. Sources: official planning records

E1 | 临时派生

Provisional GeoJSON and public records derive the three-core service chain, six seams and 15 located projects for option comparison only—not rights, works, capacity or cost.

E3 | 现场待核

Measure buildings, structure/fire, rights, flows, access, user demand, operating cost and maintenance. Each needs a raw record, owner, date and sign-off state.

Problem → task

Structure/fire create professional surveys; mobility creates walks/counts; service gaps create interviews; rights conflicts create negotiation registers. None directly creates works.

Task → project

Only a named problem owner, spatial object, cause, resource, operator, acceptance evidence and stop condition permit reserve status; otherwise return.

Deny / stop

Incomplete E3 cannot generate permanent works, totals, field outcomes or government conclusions; conflict, uncontrolled risk, no demand or no public value triggers step-back/exit.

# Operating scheme and project-contract map

A five-level duty chain binds service catalogues, public duties, accounts, acceptance evidence and stop gates to three first contracts.

## OPS-A1 OPERATIONS AND PROJECT CONTRACTS

Space is governed by who provides what, who pays, what counts as completion and when a service stops.

### A | ANNUAL SERVICE CATALOGUE AND SEPARATE ACCOUNTS

| SERVICE                           | PUBLIC DUTY                         | OPERATING INCOME                | COST ACCOUNT                     | MINIMUM EVIDENCE / STOP GATE                                |
|-----------------------------------|-------------------------------------|---------------------------------|----------------------------------|-------------------------------------------------------------|
| Shared verification lab           | inclusive hours / safety            | equipment + task service        | equipment / sign-off / insurance | structure and fire sign-off; suspend until incident closure |
| Open-source lounge / night school | non-purchase seats / community time | membership + course + F&B share | curation / tutor / noise         | repeat projects and sessions; reduce hours after nuisance   |
| First-order enterprise service    | problem catalogue / transparent fee | professional + event service    | compliance / match / venue       | dual-signed demand; delist undisclosed conflicts            |

### B | MINIMUM PROJECT CONTRACT FIELDS — APPLIES TO ALL 15 PROJECTS

Operating account = space + equipment + professional services + events – staff – energy – maintenance – insurance – public-service floor.

Non-binding operating model; legal entities, amounts, rent, investment and procurement require formal authority and market inquiry.

PROVISIONAL CONSTRAINT | CONCEPT PLAN | PROFESSIONAL VERIFICATION REQUIRE

# Location, innovation anchors and regional interfaces

The location dividend comes from interface density among research, transit, services and public realm—not a larger footprint.

MAP-A1

## REGIONAL POSITION AND INNOVATION ANCHORS

A continuous innovation belt linking universities, institutes, transit and three differentiated cores.

Base map © OpenStreetMap contributors, ODbL; anchors checked against official public sources; provisional constraint.

### Official scope facts

Approx. 37 km<sup>2</sup> coordination area; about 9 km heritage corridor; 1–2 km urban interface.

### Innovation density

Public sources identify 2,000+ AI enterprises and a dense university–research–enterprise talent network.

密集网络。

### Public-realm base

Underground high-speed rail releases ground space for a north–south green and heritage corridor.

### Planning response

Z: verification; O: incubation; D: first orders; west service wing and east testbed wing.

Legend: □ university/research ○ transit ● three cores □ Jingshang axis

PROVISIONAL CONSTRAINT | CONCEPT PLAN | PROFESSIONAL VERIFICATION REQUIRE

# Problem evidence and health-check grades

E0 public evidence, E1 inference and E3 field tasks remain separate; every problem has a survey and stop gate.

MAP-A2

## URBAN HEALTH CHECK: PROBLEMS REQUIRE EVIDENCE

Official text, public imagery and provisional geometry are graded separately; unknowns remain field tasks.

### E0 官方现状证据 | 轨道13号线与京张高铁多次变化竖向关系

规划解读明确指出：纵横交错、堵点断点、横向道路复杂交点、权属主体多，需要分段实施。

### E0 公开实施图：横向慢行补链

### E0 公开产业图：原点社区密集锚点

P1

Complex horizontal and vertical movement

E0

Official evidence: Line 13, cross streets, bottlenecks and breaks.

Action: surveyed node sections before dimensions.

P2

Multiple rights and delivery actors

E0

Railway, universities, institutes, districts and communities.

Action: bind coordination, delivery, operation and acceptance.

P3

One solution cannot fit all segments

E0

Official material confirms varied functions and demands.

Action: verification / incubation / conversion by segment.

P4

No continuous three-core service chain

E1

Derived from separated provisional cores and distinct public functions.

Action: shared catalogue, first-order receipts and links.

P5

Dense talent needs everyday support

E0

Public figures: 1,000+ scientists, 13k+ developers, 100k+ students, 400+ firms.

Action: affordable space, night community, family support.

P6

Interface quality and actual demand

E3

No site photos, counts, accessibility audit or interviews yet.

Action: 24-hour observation, audit and stakeholder interviews.

E0 official/primary public | E1 derived | E3 field verification required, E3 cannot trigger construction investment.

Evidence: Beijing planning authority (2021); Haidian public sources; geometry/" .geojson; OSM location base.

PROVISIONAL CONSTRAINT | CONCEPT PLAN | PROFESSIONAL VERIFICATION REQUIRE

# One axis, three cores, two wings and 15 located projects

Validation north, incubation central, conversion south; wings add services and public scenarios, with projects located on the plan.

MAP-A3

## MASTER PLAN: ONE AXIS, THREE CORES, TWO WINGS, 15 PROJECTS

The heritage axis supports walking, ecology and memory; the cores form verification-incubation-first-order conversion.

### Z | Trusted verification

Z1 shared lab; Z2 domestic compute adaptation; Z3 robot test ring; Z4 standards; Z5 public interface.

### O | Community incubation

O1 open-source lounge; O2 founder residence; O3 night school; O4 family support; O5 co-creation hall.

### D | First-order conversion

D1 scenario orders; D2 enterprise hall; D3 compliance clinic; D4 capital demo; D5 developer exchange.

### Six east-west stitches

Prioritise transit, universities, parks, communities and river; dimensions await survey.

### Three nested scopes

37 km<sup>2</sup> coordination fact → provisional design area → three focus areas.

Derived from the official three-zone/two-wing brief and provisional GeoJSON; not statutory planning or title boundary.

PROVISIONAL CONSTRAINT | CONCEPT PLAN | PROFESSIONAL VERIFICATION REQUIRE

# Three scopes and site evidence

Coordinated study, overall design and key areas form one strategy-to-delivery chain.

# Five-stage growth loop

Space release—scenario insertion—community aggregation—project generation—entity reproduction.

# Anchor-community-enterprise network

Convert talent relations into projects and projects into durable entities.

# Mobility, blue-green and public scenarios

The heritage park is the ecosystem's public living room; anonymous passage and accessibility come first.

CORE-04 MOBILITY-BLUE/GREEN, 12 SCENARIOS + 7-PERSONA JOURNEYS

Every scenario binds space, operator, data class, human release, failure exit and public value

# Pre-compliance clinic

Project contract: works trace to problems; results trace to evidence and ownership.

|                                                                                                    |                                                                                                                   |                                                                                                                  |
|----------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| <div>Problem</div> <div>AI firms lack compliance judgment before opening and scenario launch</div> | <div>Cause</div> <div>AI advice may replace professional judgment and cross-discipline issues lack sign-off</div> | <div>Measure</div> <div>AI only organizes material; qualified professionals review, sign and record limits</div> |

# Six implementation loops

Diagnosis, policy, actors, funding, build-operation and review all must close.

# Project library and mainline

Library—renewal plan—implementation plan—joint review—parallel approval.

# One map, two tables, six lists

Place planning, rights, works, funding, operation and risk on one work surface.

# Five stages of operations-first

Positioning, design, investment, construction and handover are tested by future use and operation.

# Funding and unit accounts

Separate public, quasi-public and commercial accounts; invent no totals, rents or payback.

# 90-day minimum credible pilot

Validate rules, ownership, takeover, appeal and exit before scaling works.

D0-15

Baseline, rights, demand and risk; stop if unclear

D16-30

Charter, data class, acceptance and appeal

D31-60

Three industrial tests produce reproducible sheets

D61-75

Public test, accessibility, co-governance and first order

D76-90

Anonymous audit and continue/adjust/exit decision

# Pre-opening completeness rehearsal

All 310 synthetic fixtures returned the expected block/review decision; this is not field performance or government acceptance.

## 7 health checks

7 complete contracts + 42 missing-field fixtures = 49 cases

## 12 scenario contracts

12 complete contracts + 84 missing-field fixtures = 96 cases

## 15 project contracts

15 complete contracts + 150 missing-field fixtures = 165 cases

## Decision

310/310 expected matches; any missing field returns the item

## Field result

0; remain null before operation and never impersonate field performance

# Long-term operation and performance review

From property to industry operation, reviewed through output, use, benefit and sustainability.

# Culture I | Railway: connection

Independent engineering, problem-solving and linear connection form the narrative base.

Space

Heritage axis, component index, dates and observation edges

Rule

Survey first; no fake reconstruction or over-commercialization

Program

Engineering walks, open-source milestone and public science

# Public-node naming and wayfinding

A memorable hierarchy follows trace—origin—growth—exchange.

Jingzhang Trace

Heritage walk, engineering marks, open-source milestone

Origin Lanes

Co-creation hall, clinic, night school, family support

Growth Gateway

First-order hall, compliance station, milestone steps, growth rings

Exchange Nodes

Wing services, accessible wayfinding and global node wall

# Honor display system

Display public contribution, not commercial ratings, investment advice or unauthorized co-branding.

Open-source milestone

Licensed, reviewable contributions with public return

Global node wall

Written-confirmed nodes and withdrawable content

Enterprise growth rings

Anonymous aggregate stages of test, first order, growth and return

Process

Authorize—verify—display—annual review—withdraw

# Public-space component library

Components are composable, maintainable and removable; basic access precedes spectacle.

A Access

Continuous paving, ramps, tactile and physical signs

B Stay

Seats, shade, lighting, water and charging

C Heritage

Relic cases, date index and replaceable panels

D Scenario

Closable interfaces, visible collection status and offline fallback

E Operation

Maintenance ID, owner, inspection cycle and replacement log

# Annual programs and developer community

Programs serve project generation; event count and footfall never replace outcomes.

Spring | Open Validation Week

Equipment catalogue, three tests and safety review

Summer | Origin Open-source Se

Clinics, residency outcomes and intergenerational work

Autumn | First-order and Stand

Demand, validation, procurement review and standards

Winter | Jingzhang Developer W

Rail curation, bilingual exchange and annual review

# International attraction and conversion

Internationalization is not eventization; it completes bilingual problems, licenses, validation and follow-up duties.

|                                                                                                   |                                                                                                  |

| No baseline, no score • named owner • acceptance evidence • continue / adjust / step back / exit  |                                                                                                  |

# Limits, responsibility and next step

The scheme is an investigation and pilot brief, not statutory planning, construction documentation, funding commitment or government approval.

|                                                                                                                                   |                                                                                                                          |
|-----------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <div>Now</div> <div>Replace polygons, run 7D survey, rights register, interviews and 90-day protocol</div>                        | <div>Professional sign-off</div> <div>Planning, architecture, structure, fire, access, traffic, cost, law and data</div> |
| <div>Do not infer</div> <div>Corporate participation, resource opening, investment, rent, schedule or government commitment</div> | <div>Review</div> <div>Comparable review at handover, six months, one year and three years</div>                         |

An aerial, high-angle view of a city street scene. The street is wide and paved, with a tram visible in the lower left. On either side of the street are modern, multi-story buildings with large glass windows and flat roofs. The buildings are interspersed with trees and greenery. In the background, more city buildings and a park area with a large circular plaza are visible. The overall scene is a concept proposal for urban renewal.

# LET ENTITIES GROW

The first half of urban renewal makes space new; the second helps entities grow.

Completed using Agent • concept proposal only
