Date	2026-08-12
Status	Formal Submission / formal 提交
Boundary	Provisional / 临时边界 (intake eligible)

Design Basis and Three-Level Scope Framework

设计依据与三层范围工作框架

- Authority: Qualification Pre-Announcement, Beijing Planning & Natural Resources Commission, Haidian Branch
- Three-level scope: Coordinated Research 43.6 km² / Overall Design 11.4 km² / Key Detailed Design 368.4 ha
- Three key areas: Zhongzhiyuan (192.1 ha) / Beijing AI Origin Community (104.3 ha) / Dazhongsi (72.0 ha)
- Overall concept: Jing-Zhang AI Vein Symbiosis Belt - one belt, three cores, multi-point scenarios, blue-green ring
- Evidence chain: GeoJSON > metrics.json > compliance_matrix > proposal.md > figures > HTML > PDF
- All spatial proposals are conceptual suggestions, not statutory planning or government-approved conclusions.

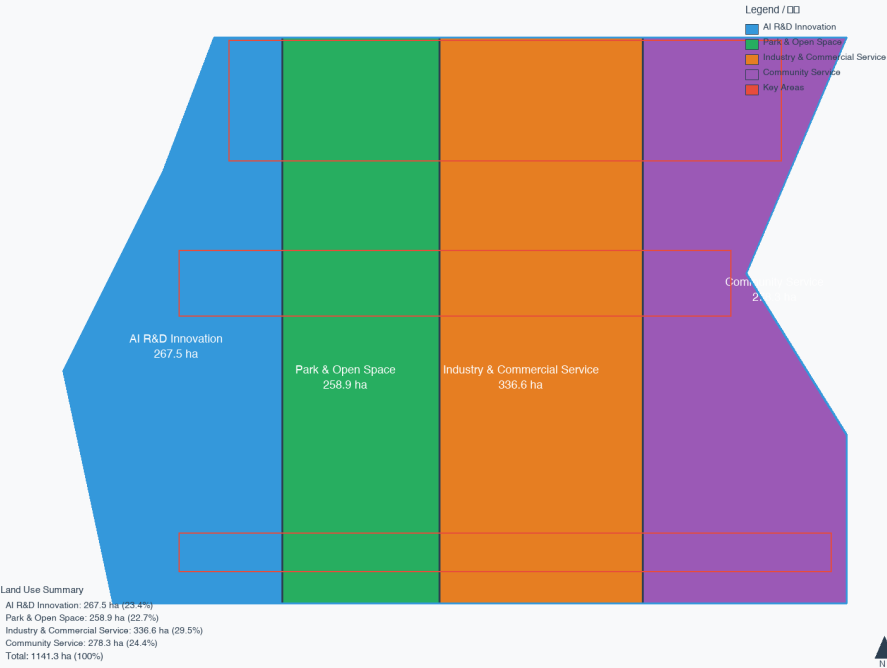

Overall Spatial Structure and Land Use Layout

总体空间结构与用地布局

- Land use zones: AI R&D / Park & Open Space / Industry & Commercial / Community Service
- Complete boundary coverage, gap-free partition, shared edge coordinates between adjacent polygons.
- Building footprint: 31.1 ha (medium confidence)
- Green ratio: 12.3% | Public space ratio: 7.3%
- FAR, building height, building density: status=unknown (pending official regulatory conditions)
- Classification per: National Territorial Space Survey, Planning, and Use-Control Classification Guide

Jing-Zhang AI Vein · Land Use Structure

Complete coverage, gap-free zoning partition

Three Key Areas Detailed Design

三处重点区域详细设计

Zhongzhiyuan: Garden-type full-stack innovation district - national platforms, industry display, Qinghe culture

AI Origin: Campus-adjacent transformation & talent community - open-source, incubation, talent zone, station integration

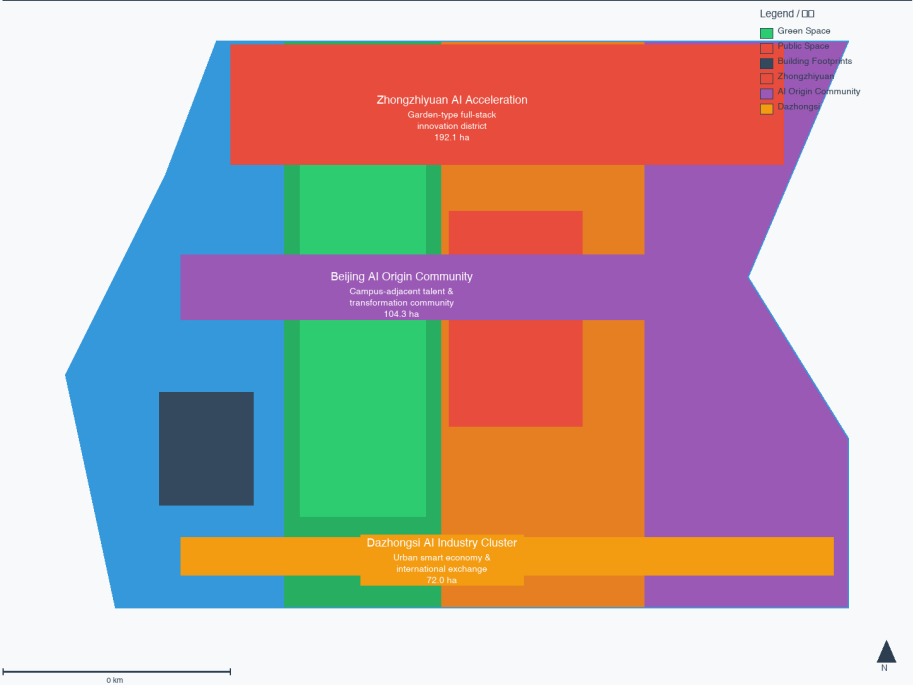

Dazhongsi: Urban smart-economy & international exchange - leading enterprises, AI agents, data factors, 4-quadrant connectivity

Key-area detailed design must reach comprehensive planning implementation scheme depth.

HTML page supports switching between three key areas.

Jing-Zhang AI Vein · Key Areas Detail

Zhongzhiyuan, AI Origin Community, Dazhongsi

AI Scenarios, User Personas, and Industry Test Verification

AI场景、用户画像与产业测试验证

10 AI scenario cards: Open-source release hall, Safety governance sandbox, Edge computing station, etc.

5 user personas: Open-source developer, Startup team, Enterprise visitor, Local resident, University faculty/student

3 industry test scenarios: Autonomous model testing, Standards workshops, Data factor circulation

All scenarios follow data-minimization, public-source, explainability, and human-review principles.

Scenarios are not slogans; they must land in specific layers and metrics.

Mobility, Blue-Green Space, and Urban Character

交通慢行、蓝绿公共空间与城市风貌

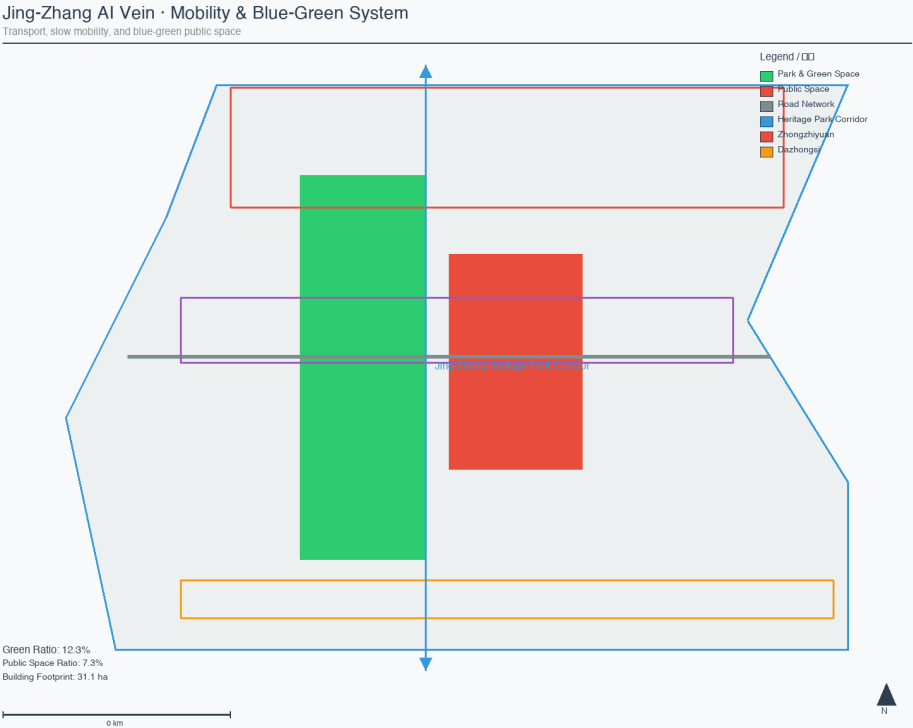

Heritage Park activity belt as blue-green backbone, north-south through, east-west connected.

Transit covers rail-station integration, road micro-circulation, slow-mobility breakpoint stitching.

Key nodes: North 5th Ring crossing, Wudaokou, Qinghua East Road, Dazhongsi Station.

Municipal facilities: distributed energy, edge computing, new infrastructure + traditional municipal.

Urban character fuses railway heritage, Zhongguancun innovation, and AI culture.

Renewal Projects, Phasing, and Metrics System

更新项目清单、分期实施与指标体系

6 renewal projects: Slow-mobility stitching, Qinghe innovation interface, Campus-adjacent street, etc.

Three phases: Near-term pilots (lightweight) -> Mid-term renewal -> Long-term governance

Core metrics reproducible from GeoJSON; unknown metrics await official conditions.

compliance_matrix.json covers all announcement 1.3-1.5 and agent.1-agent.6 mandatory tasks.

Jing-Zhang AI Vein · Metrics Evidence

From geometry recalculation to structured audit chain

Site Area [metric:site_area_sqm] 1,141.3 ha [geometry:site_boundary.geojson] known	Green Ratio [metric:green_ratio] 12.3% [geometry:green_space.geojson] known	Public Space Ratio [metric:public_space_ratio] 7.3% [geometry:public_space.geojson] known
Building Footprint [metric:building_footprint] 31.1 ha [geometry:buildings.geojson] known	Key Area Count [metric:key_area_count] 3 [geometry:key_areas.geojson] known	Floor Area Ratio [metric:floor_area_ratio] unknown [planning_limits.json] unknown

Evidence Chain

Note: All known metrics are reproducible from GeoJSON; unknown metrics await official regulatory conditions.

Risk, Copyright, and Compliance Statement

风险、版权与合规说明

- Boundary statement: All outputs are open co-creation suggestions, not statutory planning or government conclusions.
- Provisional boundary for design discussion and self-check only; not a statutory redline or approval basis.
- Copyright: All images, drawings, and data assets document source, license, and authorization.
- HTML pages load no remote scripts, map tiles, external fonts, or APIs.
- Data gaps: official boundary, regulatory plan, road redline, ownership, municipal, heritage conditions pending.
