

Site overview & conceptual network

Evidence chain and package

Three key areas + Physarum spine

Key areas and Physarum spine

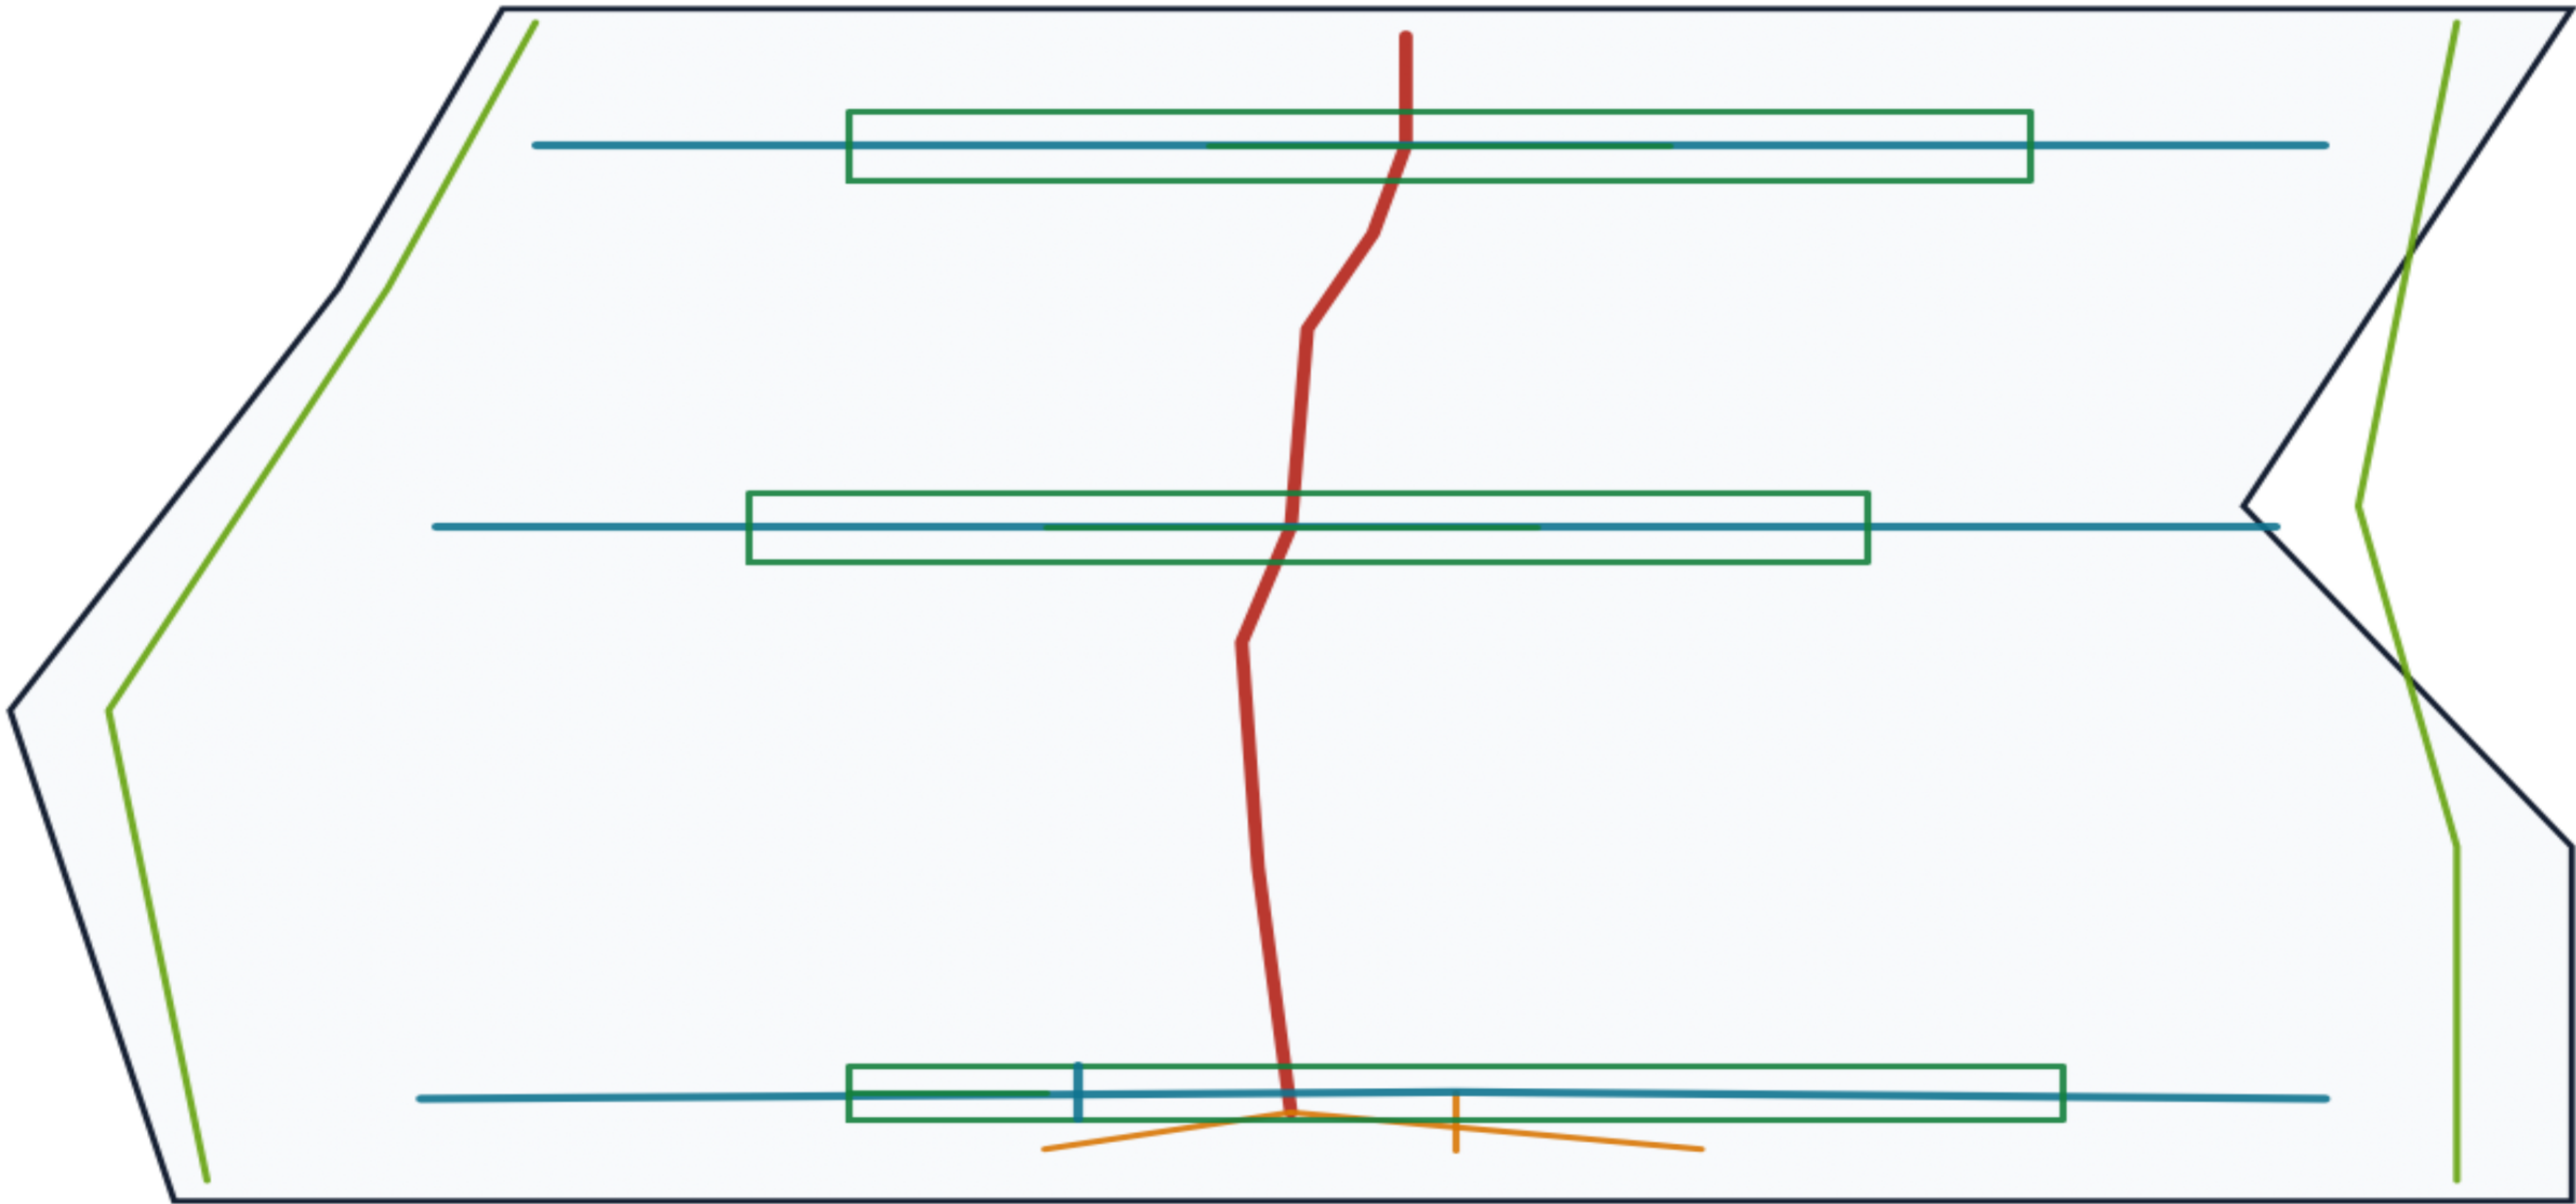

Method: Bio-Physarum adaptive network (Tero et al. 2010) + NSGA-II multi-objective | Method validation (real Physarum run): 167-edge network / efficiency 19.20 / heritage objective f3≡f2 (degenerates to cost; no independent site heritage conclusion)

Method: Bio-Physarum adaptive network (Tero et al. 2010) + NSGA-II multi-objective

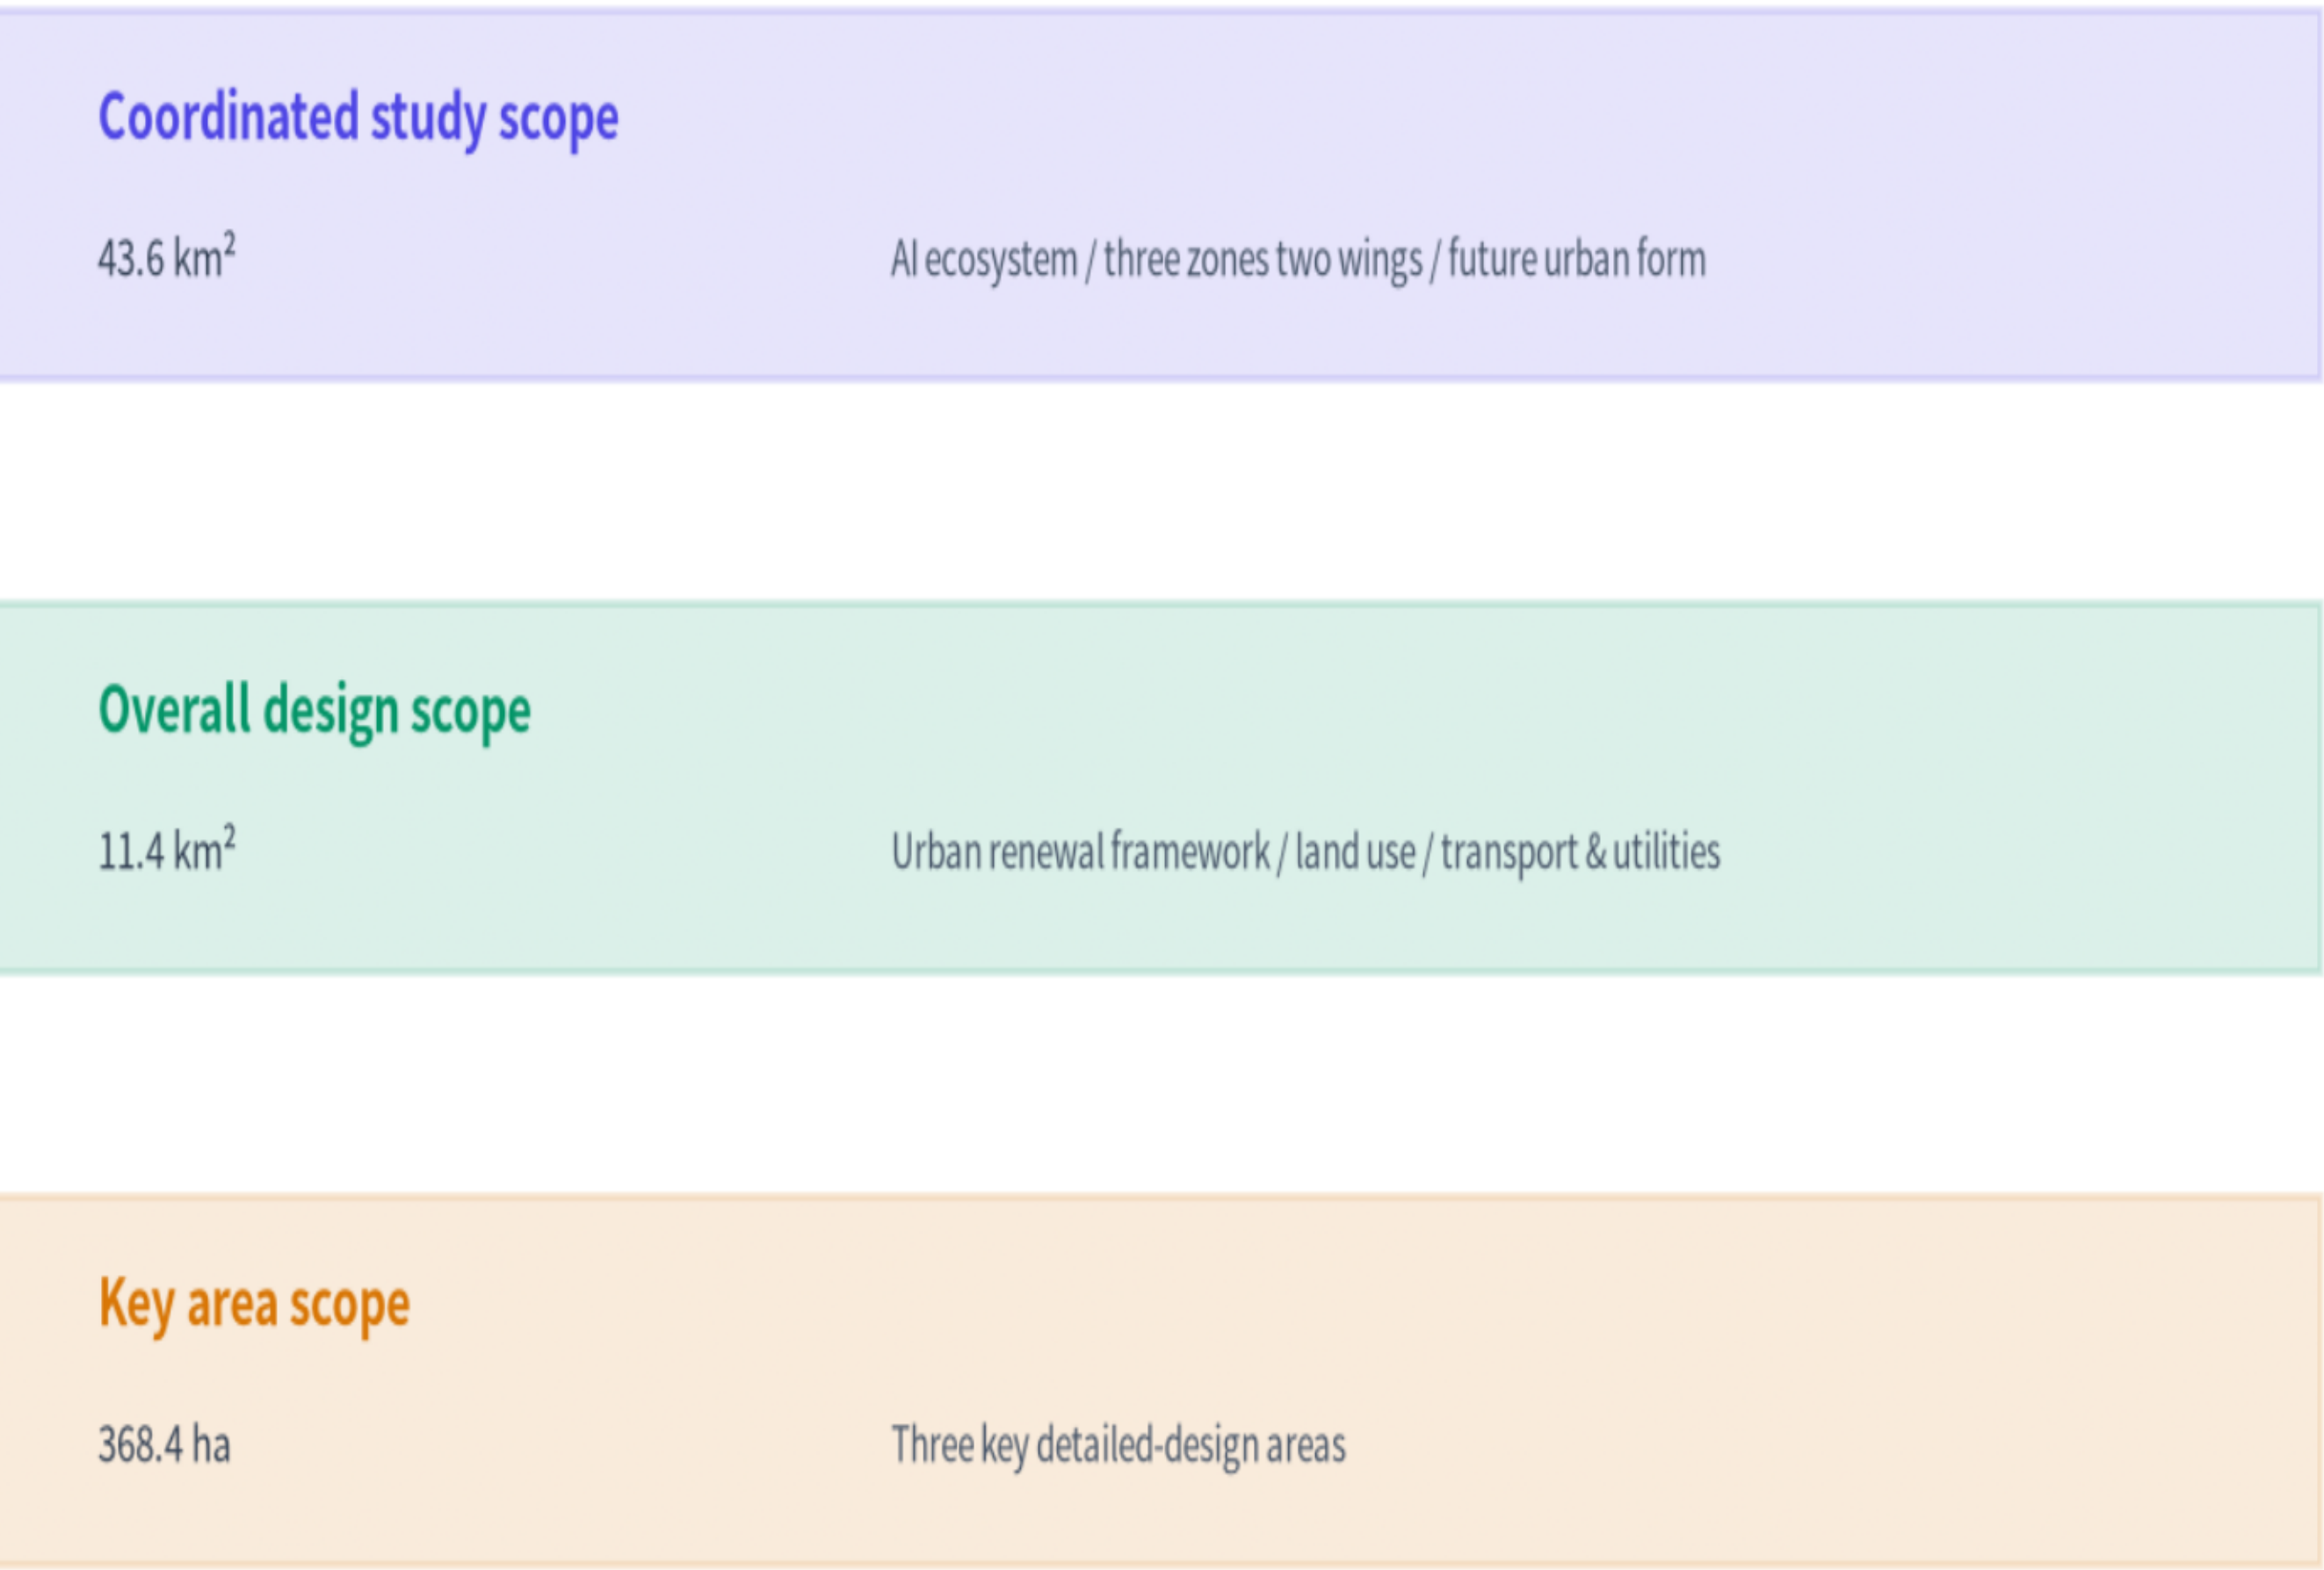

Mobility & blue-green public space

Mobility and blue-green public space

Three-level scope & spatial structure

Three-level scope and spatial structure
