

Living-Experience Belt Overview

From a working dad's daily life, reimagine the Jing-Zhang AI Innovation Belt as a belt where people live well: three levels, three areas, waterfront greenway.

Six Agent Task Outputs

agent.1 naming/VI • agent.2 ecosystem cases • agent.3 scenario cards/personas • agent.4 landmarks/components • agent.5 cultural narrative • agent.6 annual operations.

AI+ Scenarios & Human Boundaries

All 10+ scenario cards state data minimization, human review and exit mechanism; human final decision for safety-related scenes; no overpromising.

Metrics & Recalculation Commitment

All areas at conceptual precision (~11.41M m²), not survey; recalculate and update all drawings when official redline is published.
