

JINGZHI AVENUE - AI Innovation Spine (A0 concept boards)

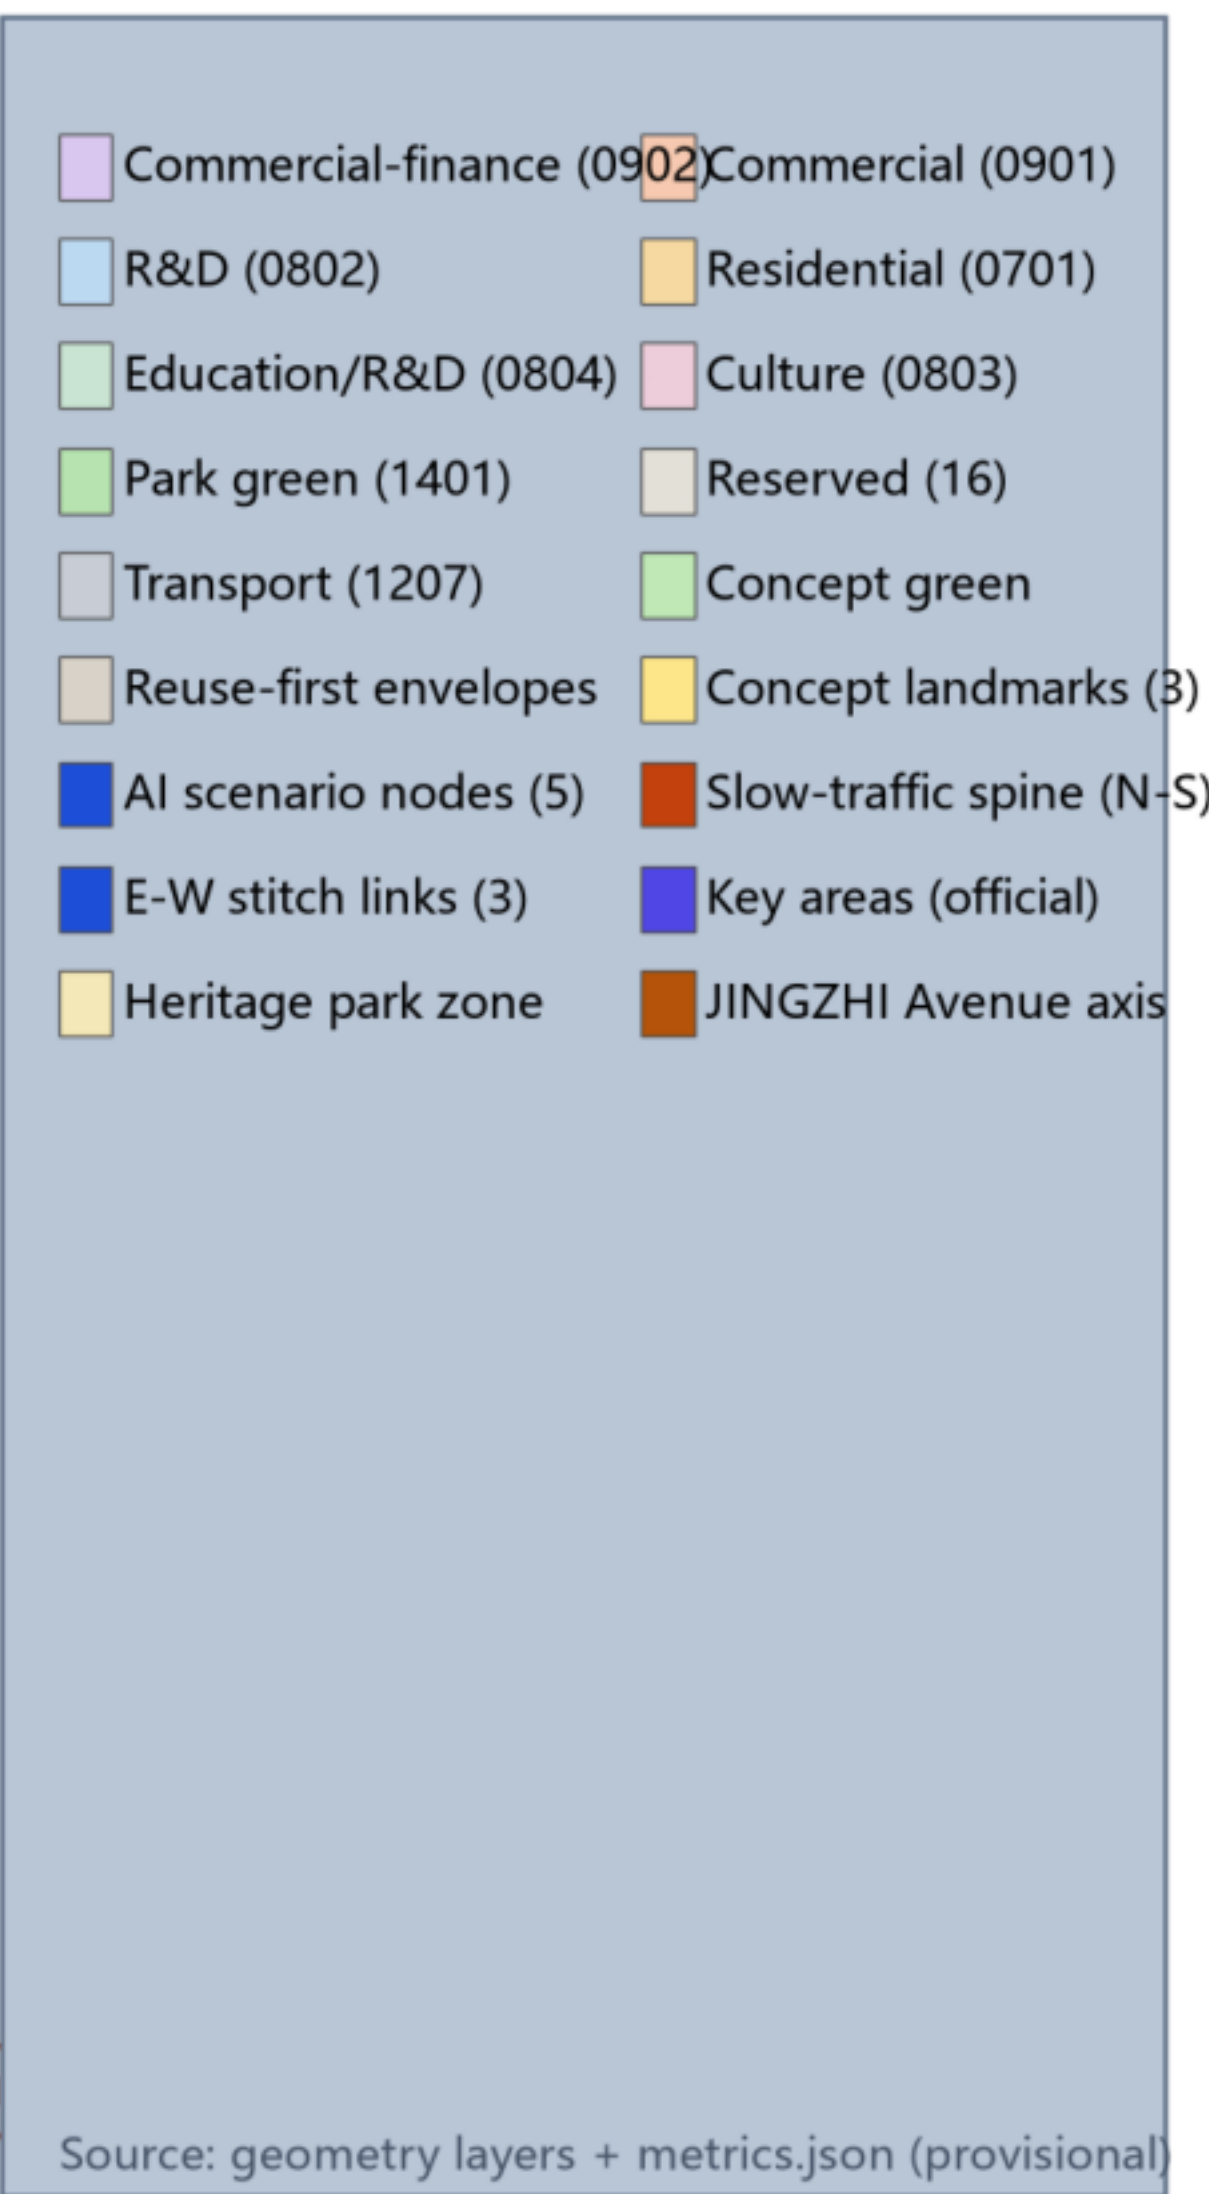

One axis - three nodes - three scenario families - three phases (all conceptual)

Overall Overview (concept)

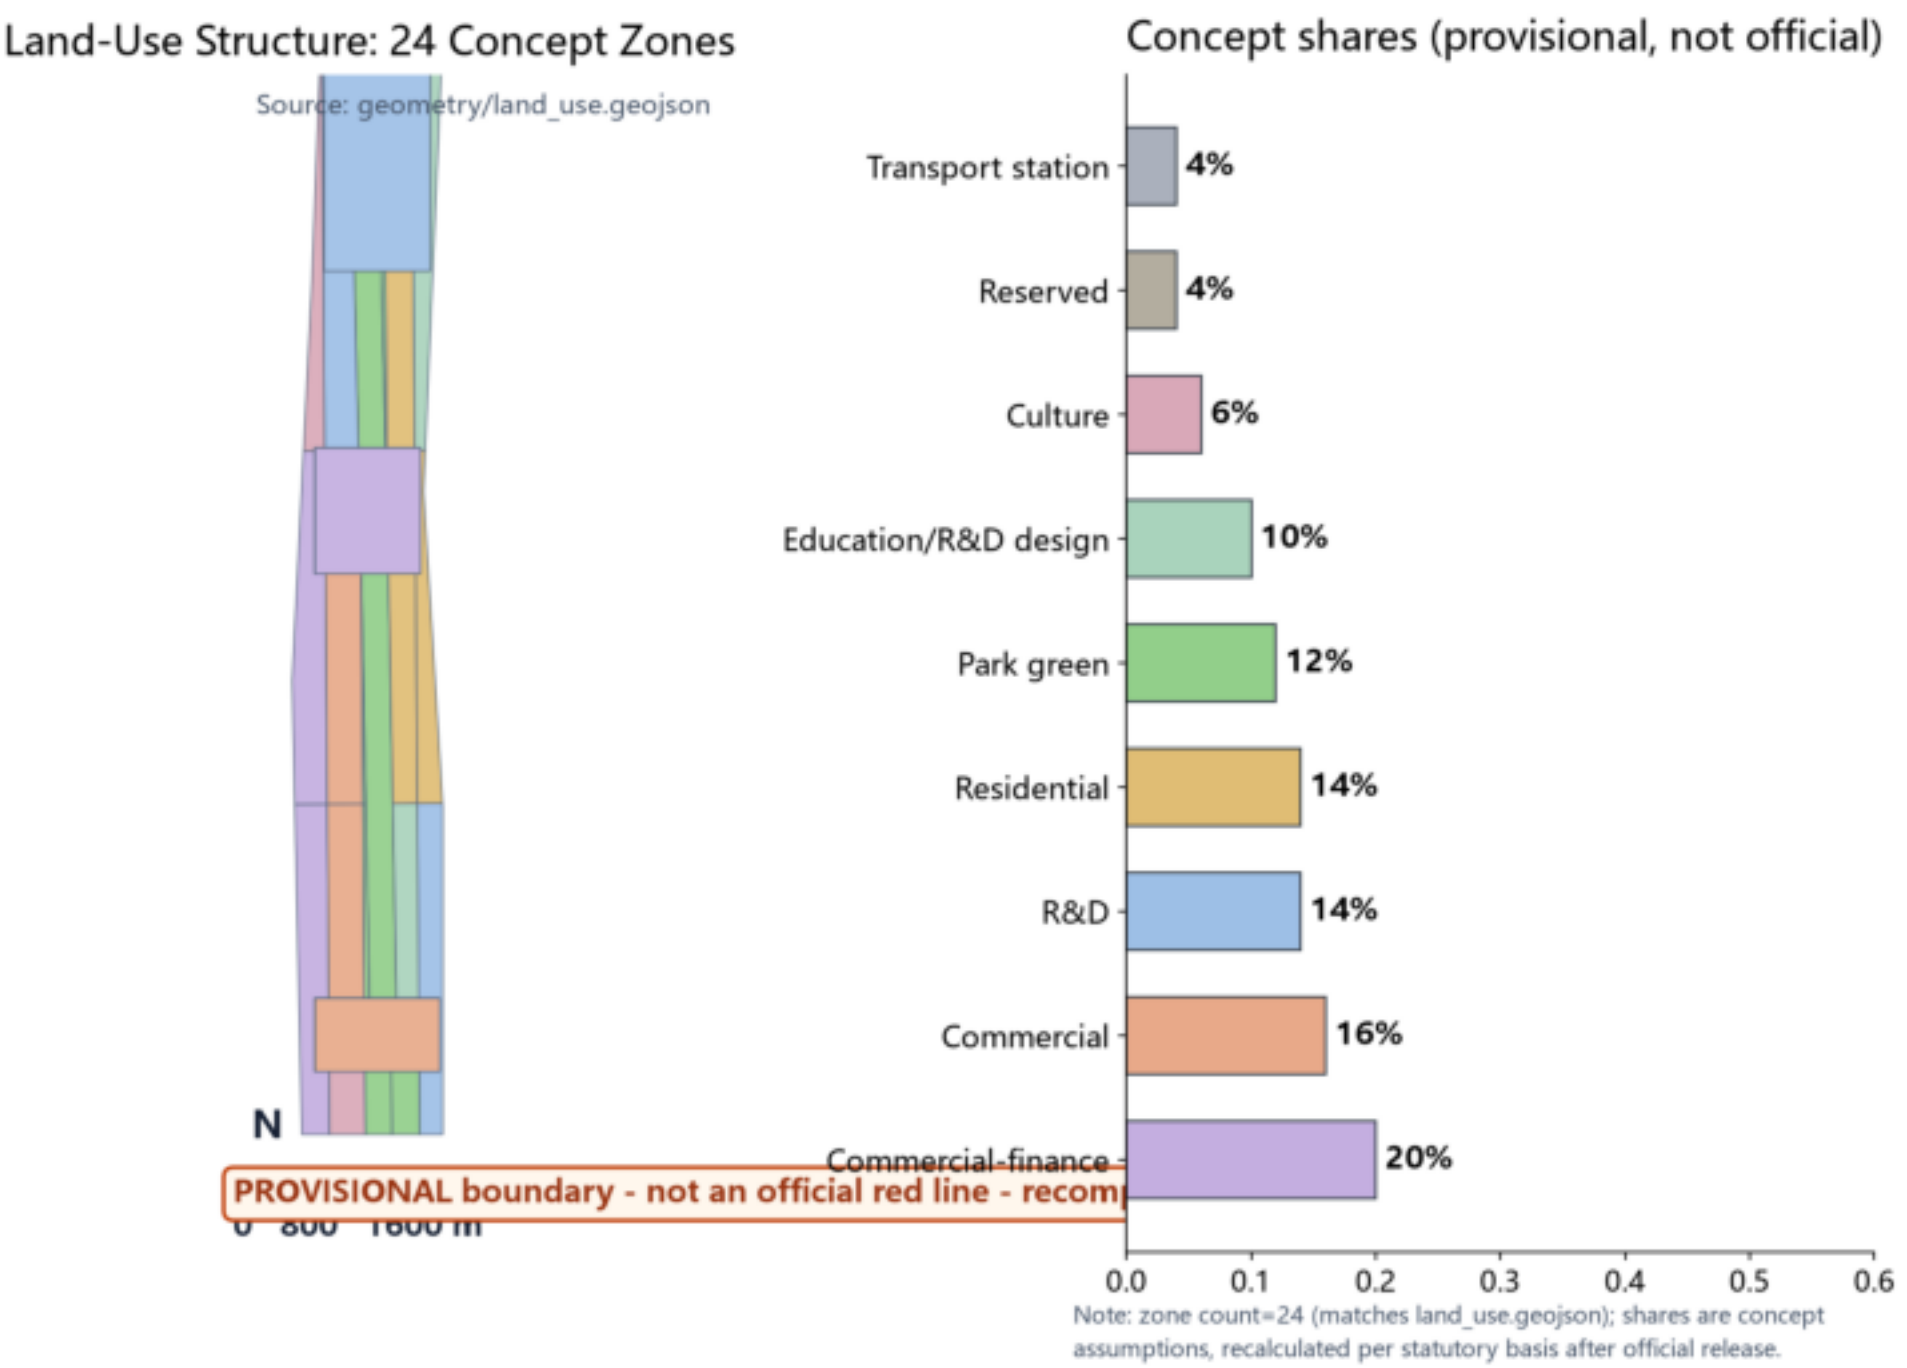

Overall Design Overview (provisional)

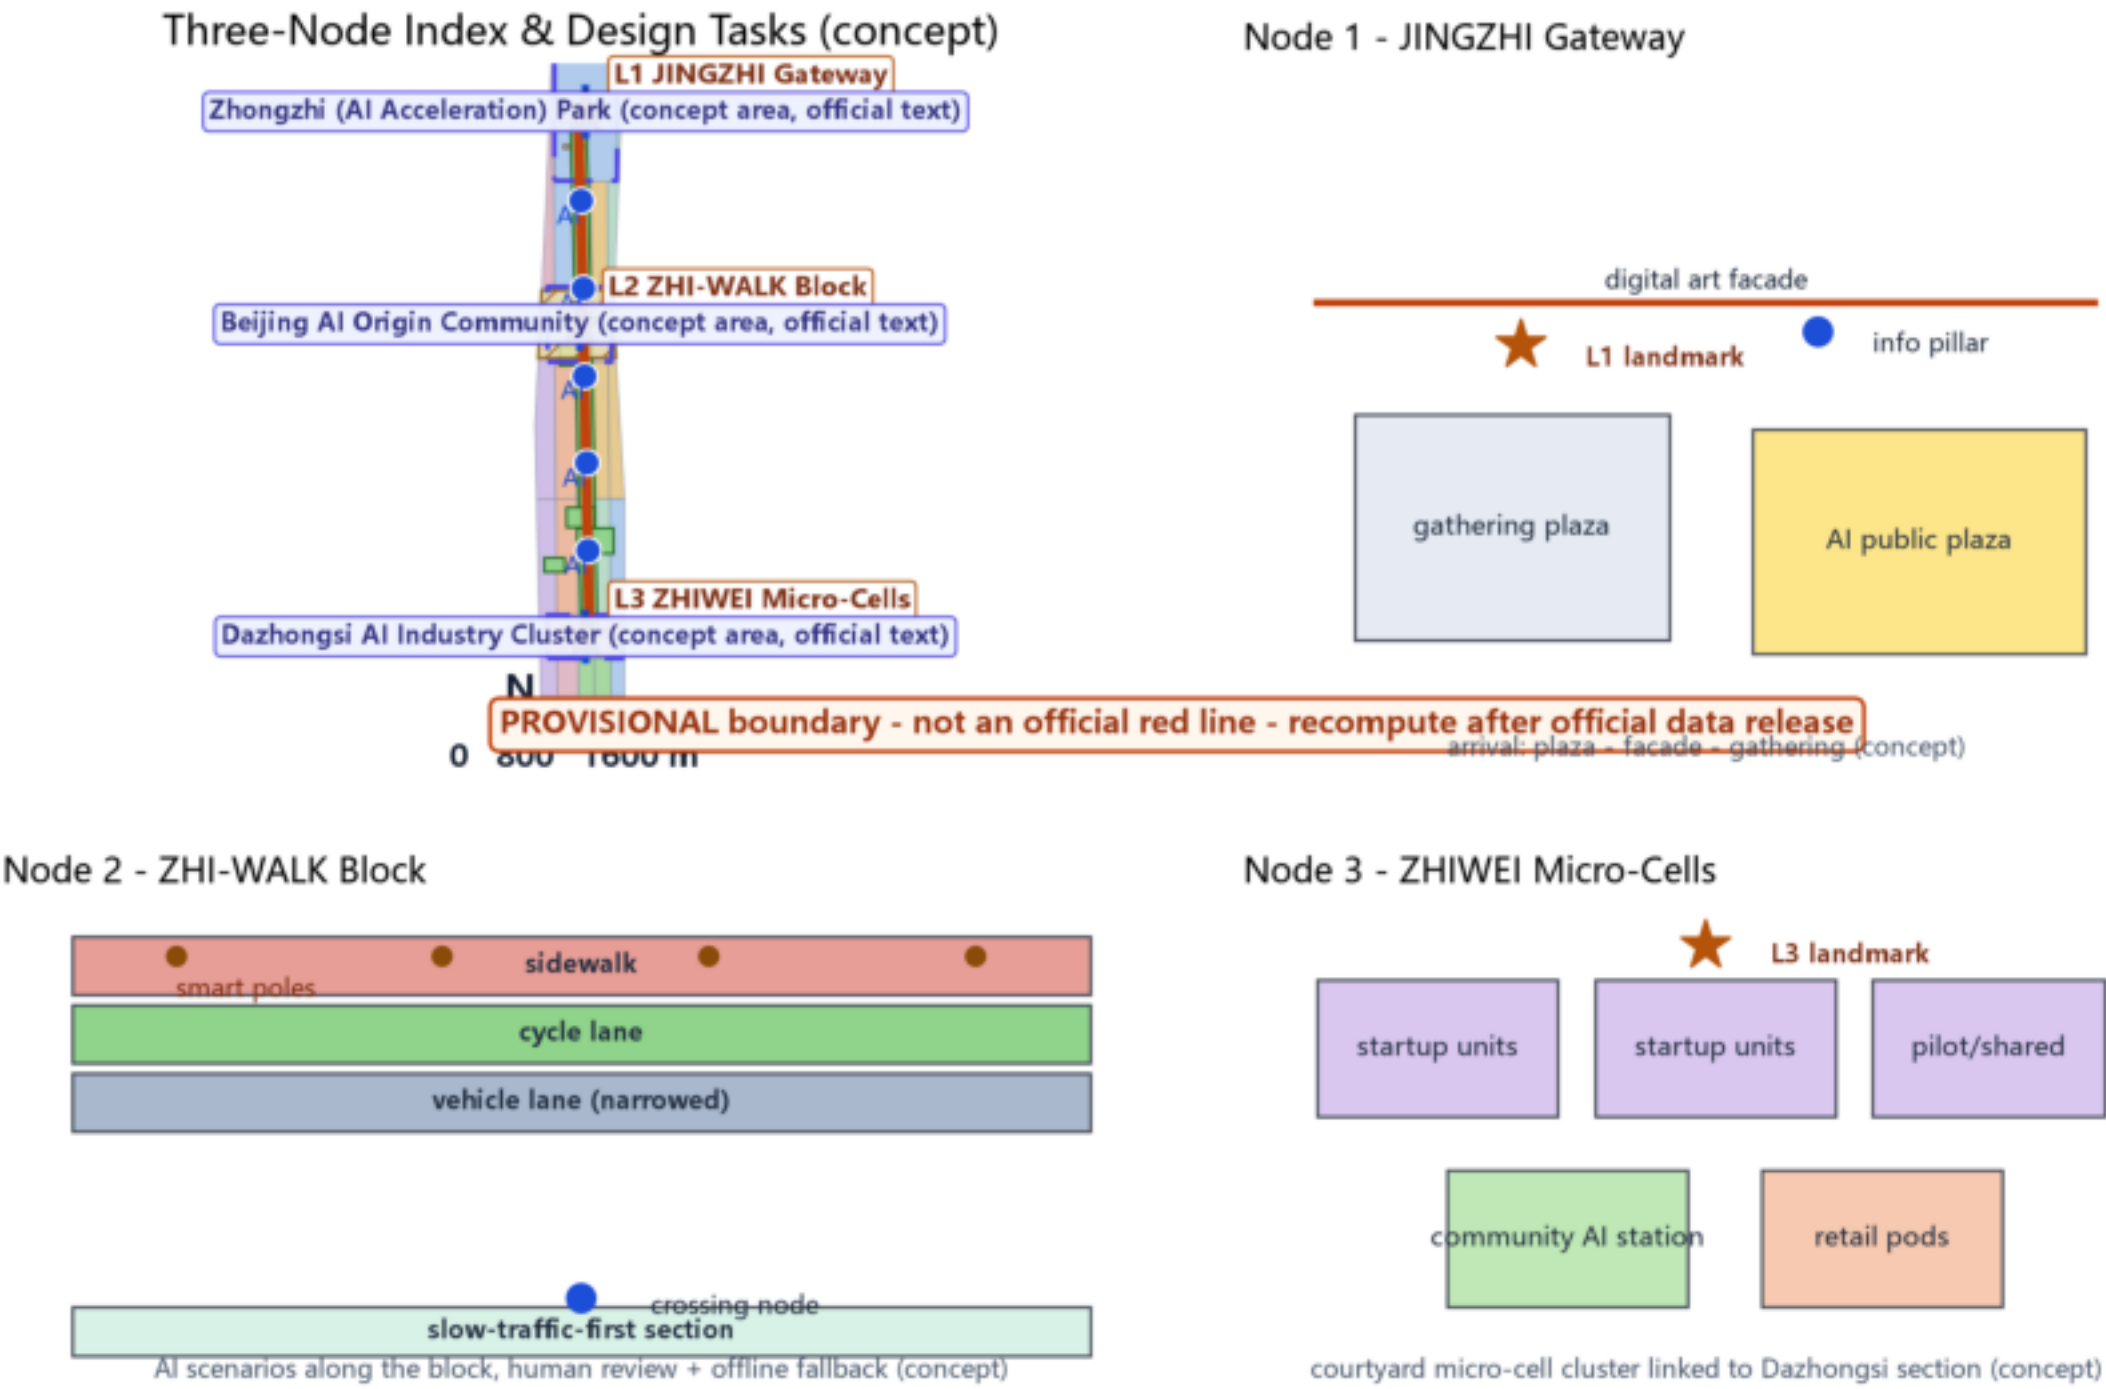

LEGEND

Land Use (24 zones)

Three Nodes Index (concept)

Three-level scope (official text): ~43.6 sq km coordinated research / ~11.4 sq km overall design / ~368.4 ha key areas (Zhongzhi ~192, AI Origin ~104, Dazhongsi ~72 ha).

One axis three nodes: JINGZHI Avenue axis; Node 1 JINGZHI Gateway / Node 2 ZHI-WALK Block / Node 3 ZHIWEI Micro-Cells.

Heritage-park AI public space along the N-S spine; 3 east-west stitch links; Dazhongsi section hosts AI-native business scenarios; 3 concept landmarks marked ★.

All geometry is on the provisional boundary (no official GIS/CAD polygon published); not a statutory plan; full recompute after official release.

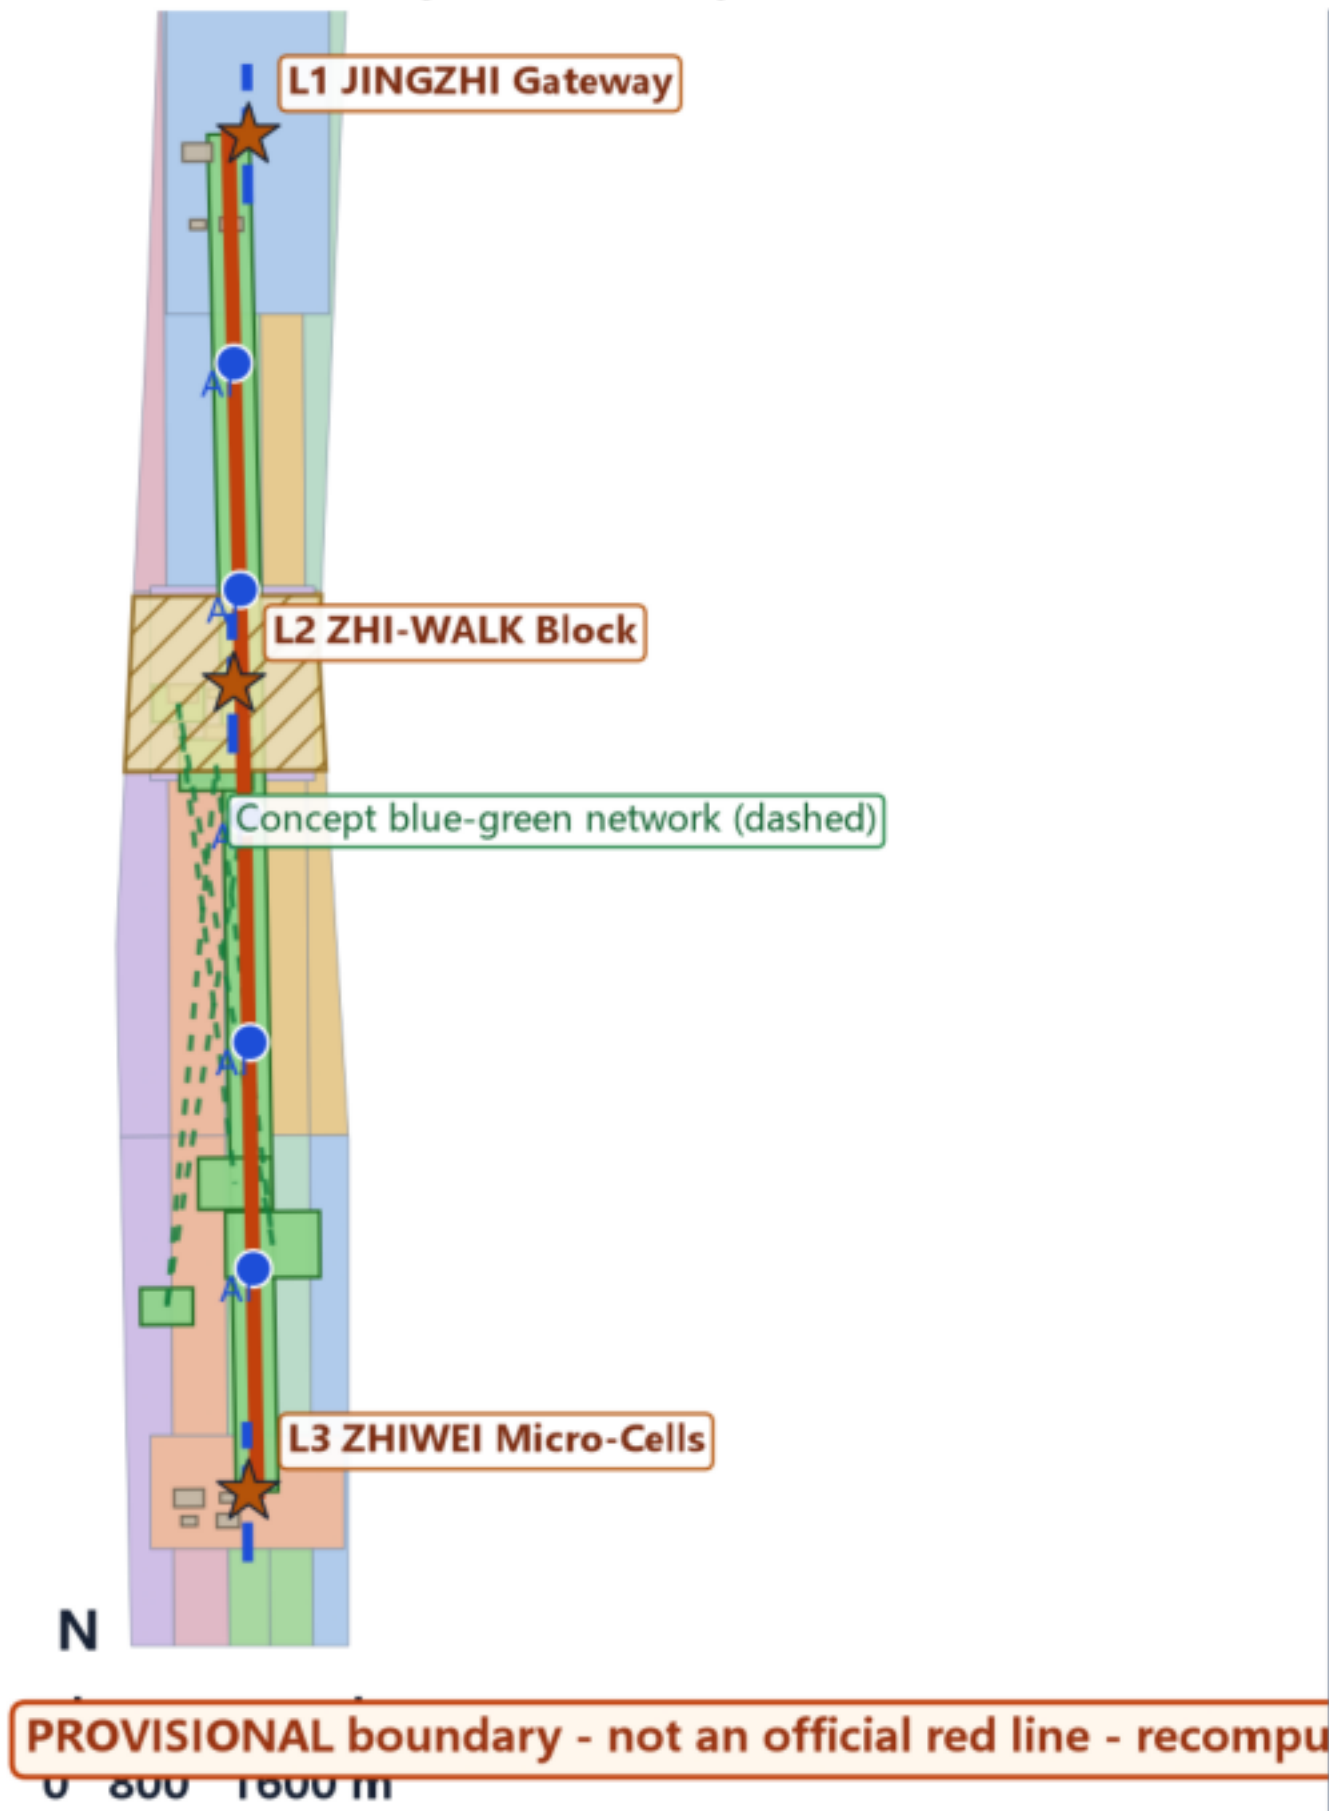

PROVISIONAL boundary - not an official red line - recompute after official data release

JINGZHI AVENUE - AI Innovation Spine (A0 concept boards)

Mobility & Blue-Green - Core Metrics - Coordination (concept)

Mobility & Blue-Green (concept)

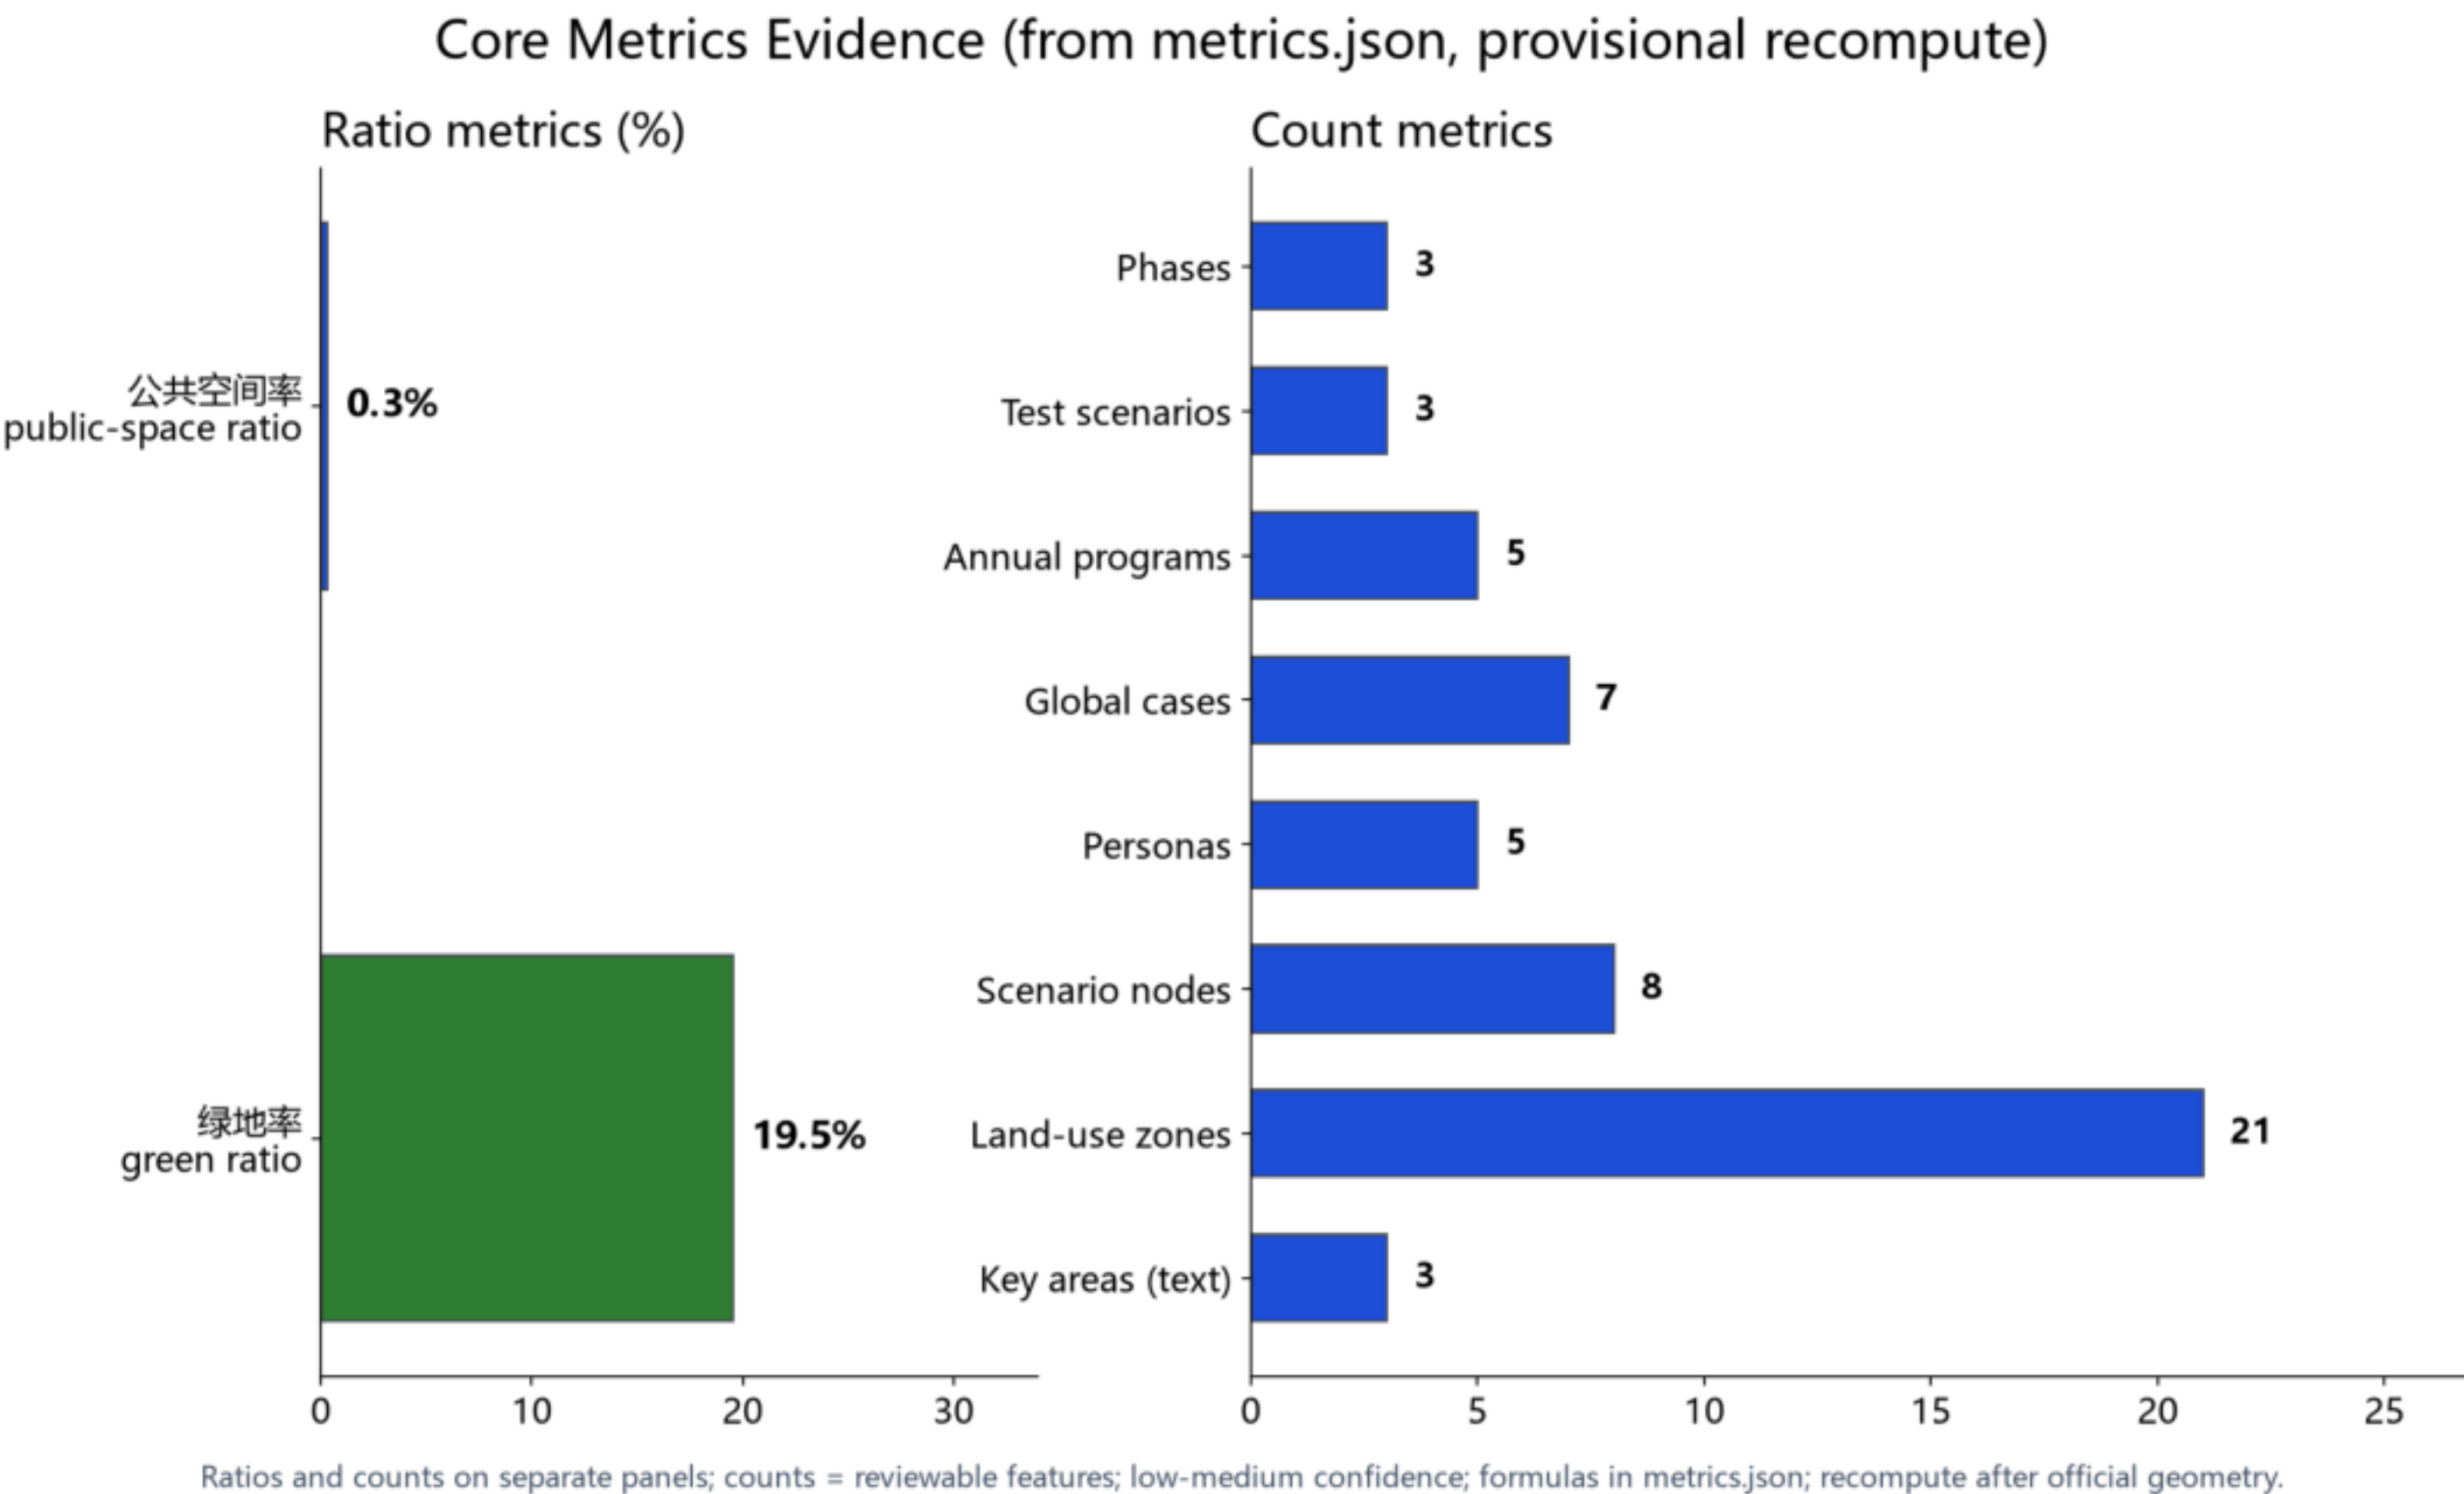

Mobility & Blue-Green Analysis (concept)

Legend and concept notes

Core Metrics (concept)

Ratios and counts on separate panels; counts = reviewable features; low-medium confidence; formulas in metrics.json; recompute after official geometry.

Metrics: ratios and counts on separate panels; low-medium confidence; machine precision in metrics.json, display basis ~11.4 sq km / ~19.5% / ~0.3%.

AI governance: street-level anonymized aggregation; no individual tracking; human review on every AI decision; scenario cards carry exit conditions and human fallback.

Coordination (concept)
