

JINGZHI Avenue: AI Innovation Spine Concept Booklet

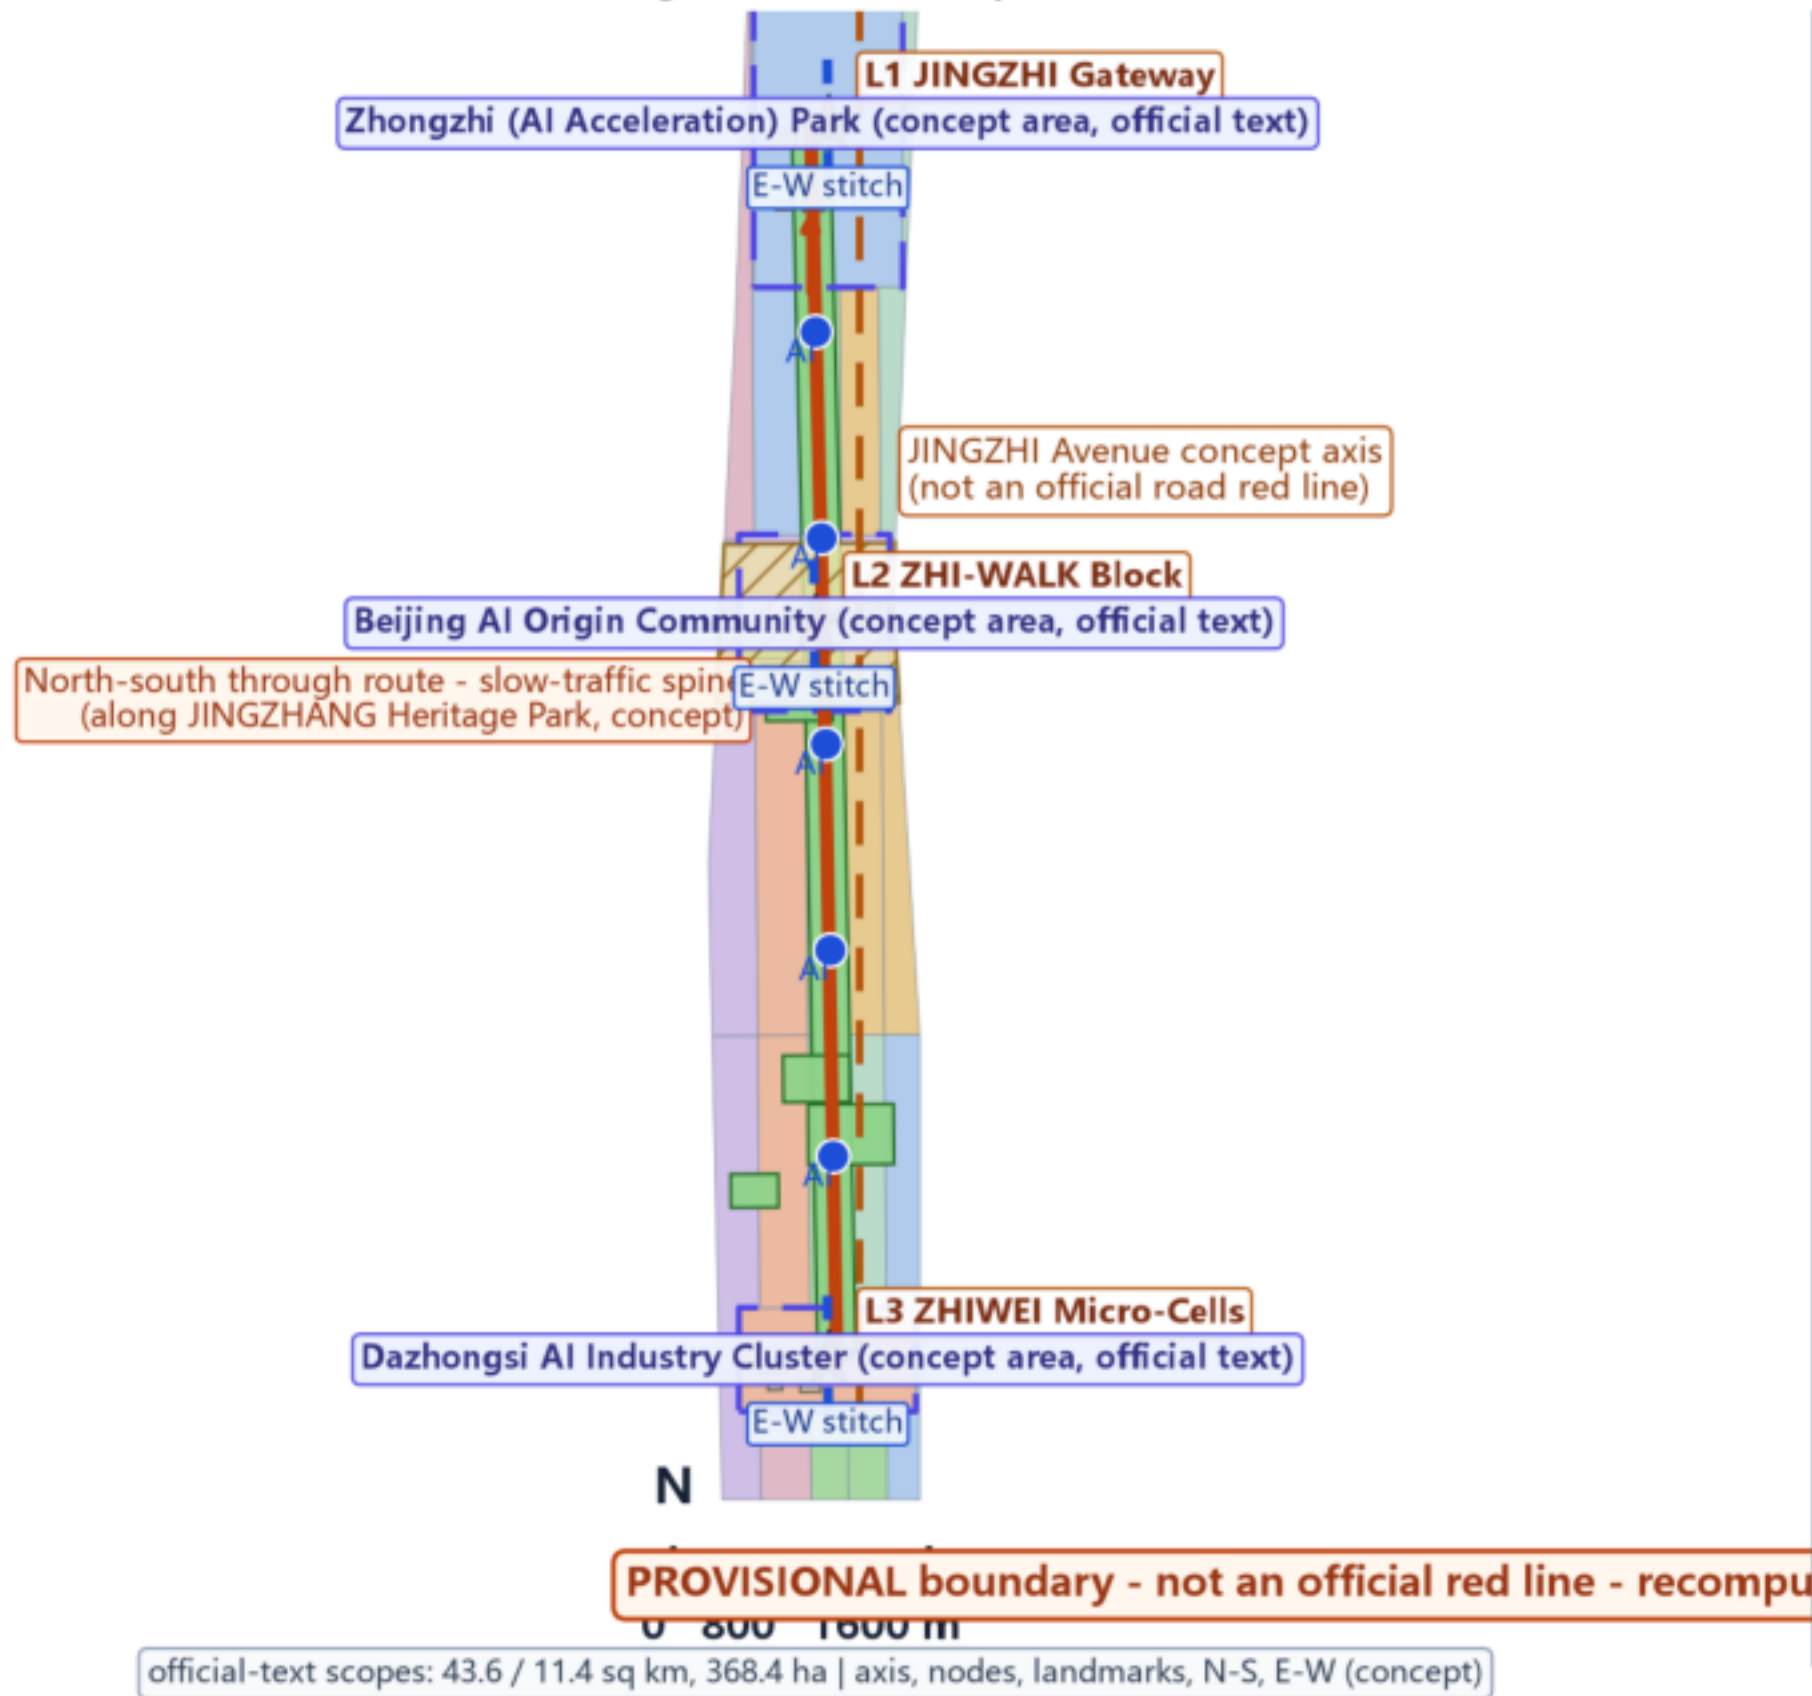

Concept suggestions - reference scheme - provisional boundary

PROVISIONAL boundary - not an official red line - recompute after official data release

Contents: overview / nodes / land use / mobility / metrics / coordination / brand

Overall overview (provisional geometry)

Overall Design Overview (provisional)

LEGEND

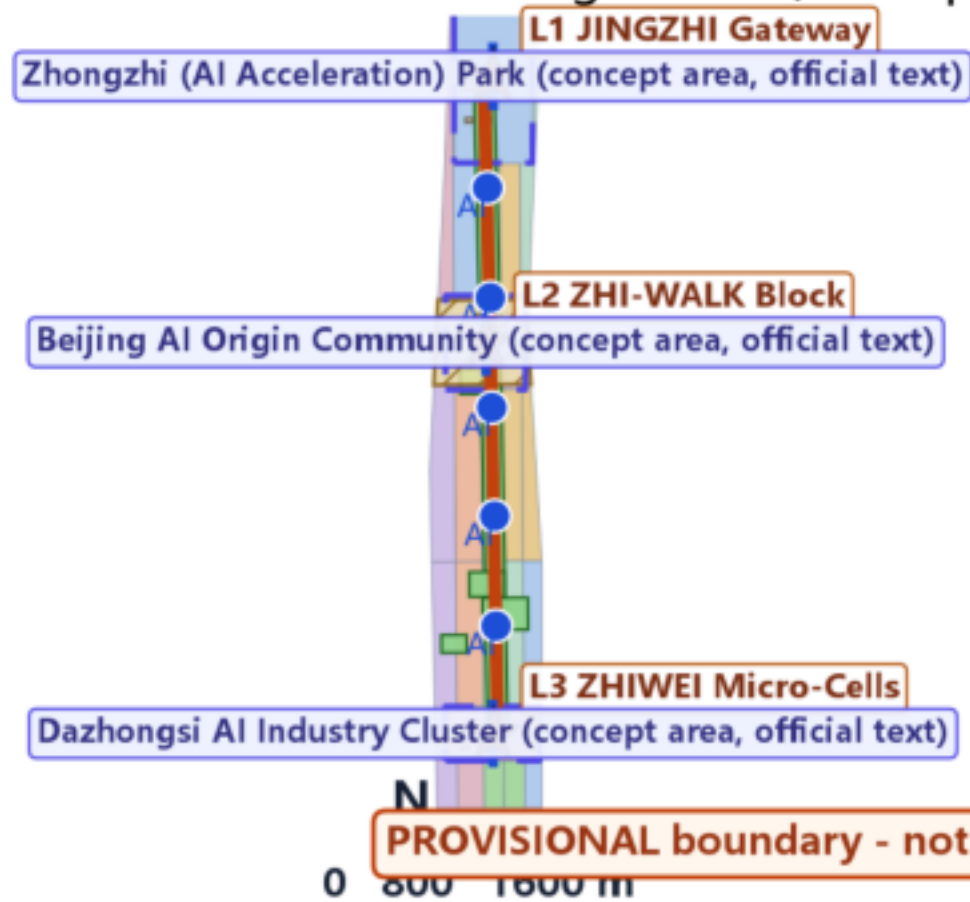

Commercial-finance (0902)	Commercial (0901)
R&D (0802)	Residential (0701)
Education/R&D (0804)	Culture (0803)
Park green (1401)	Reserved (16)
Transport (1207)	Concept green
Reuse-first envelopes	Concept landmarks (3)
AI scenario nodes (5)	Slow-traffic spine (N-S)
E-W stitch links (3)	Key areas (official)
Heritage park zone	JINGZHI Avenue axis

Source: geometry layers + metrics.json (provisional)

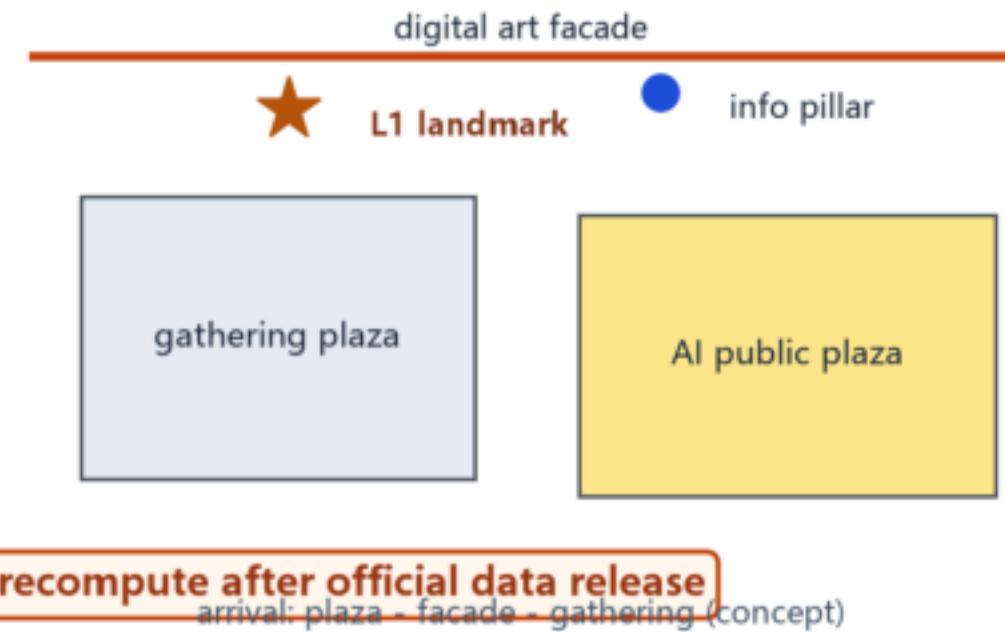

PROVISIONAL boundary - not an official red line - recompute after official data release

Three-node index and design tasks

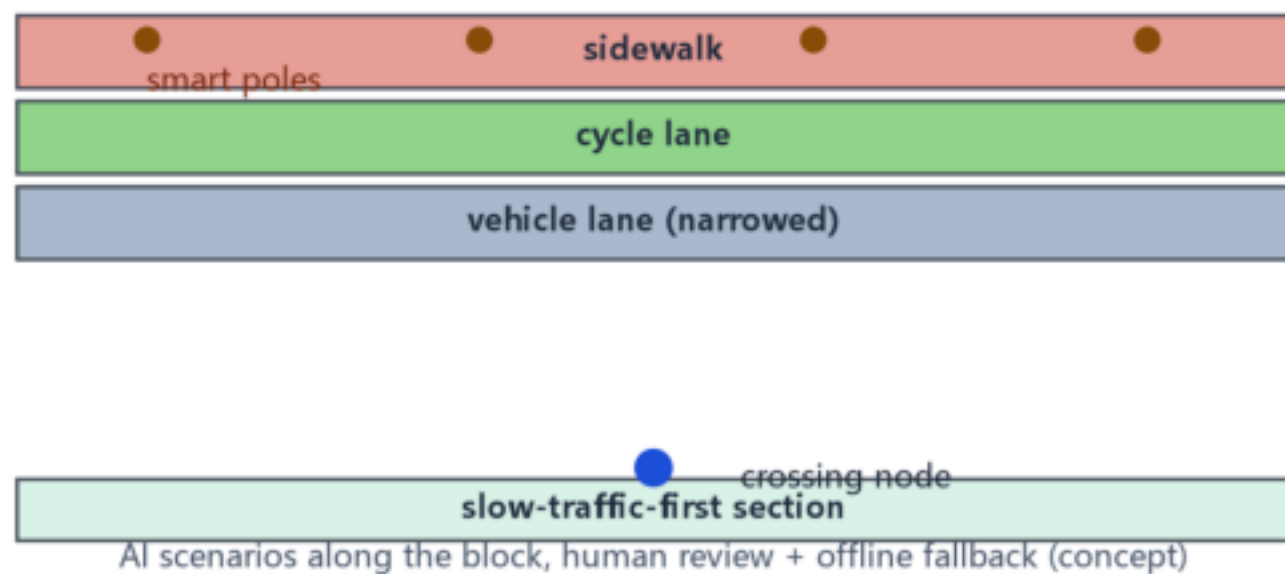

Three-Node Index & Design Tasks (concept)

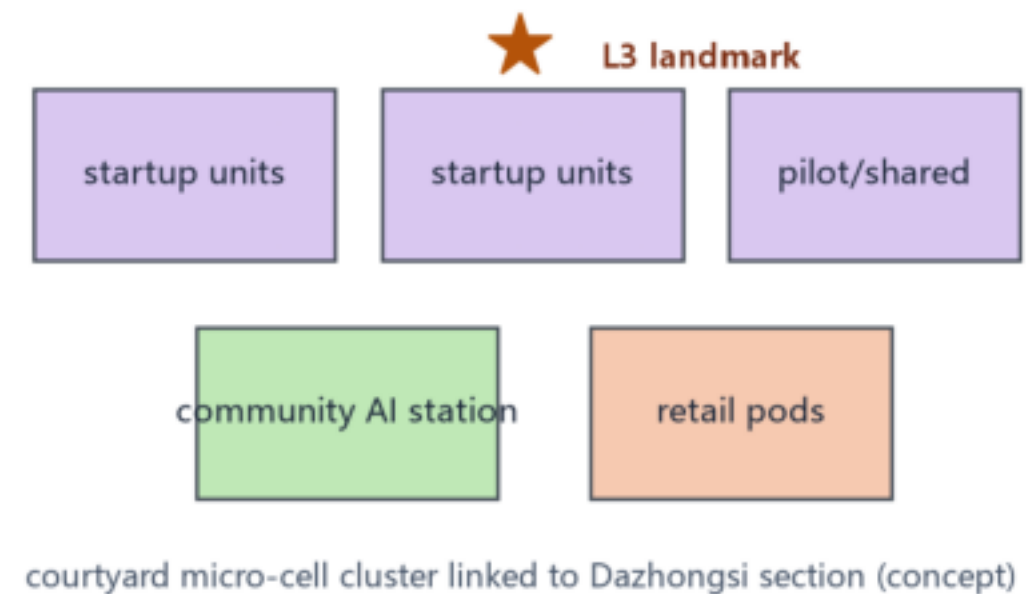

Node 1 - JINGZHI Gateway

Node 2 - ZHI-WALK Block

Node 3 - ZHIWEI Micro-Cells

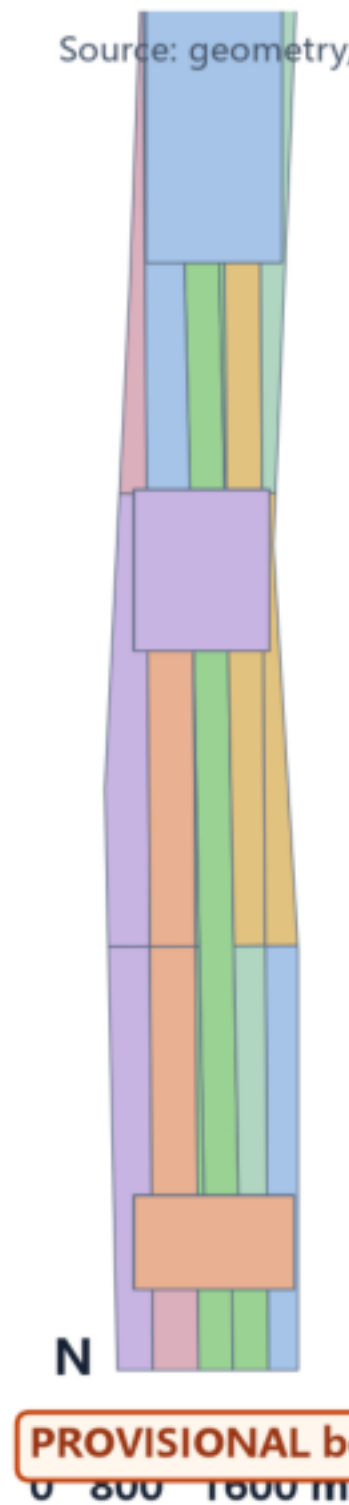

PROVISIONAL boundary - not an official red line - recompute after official data release

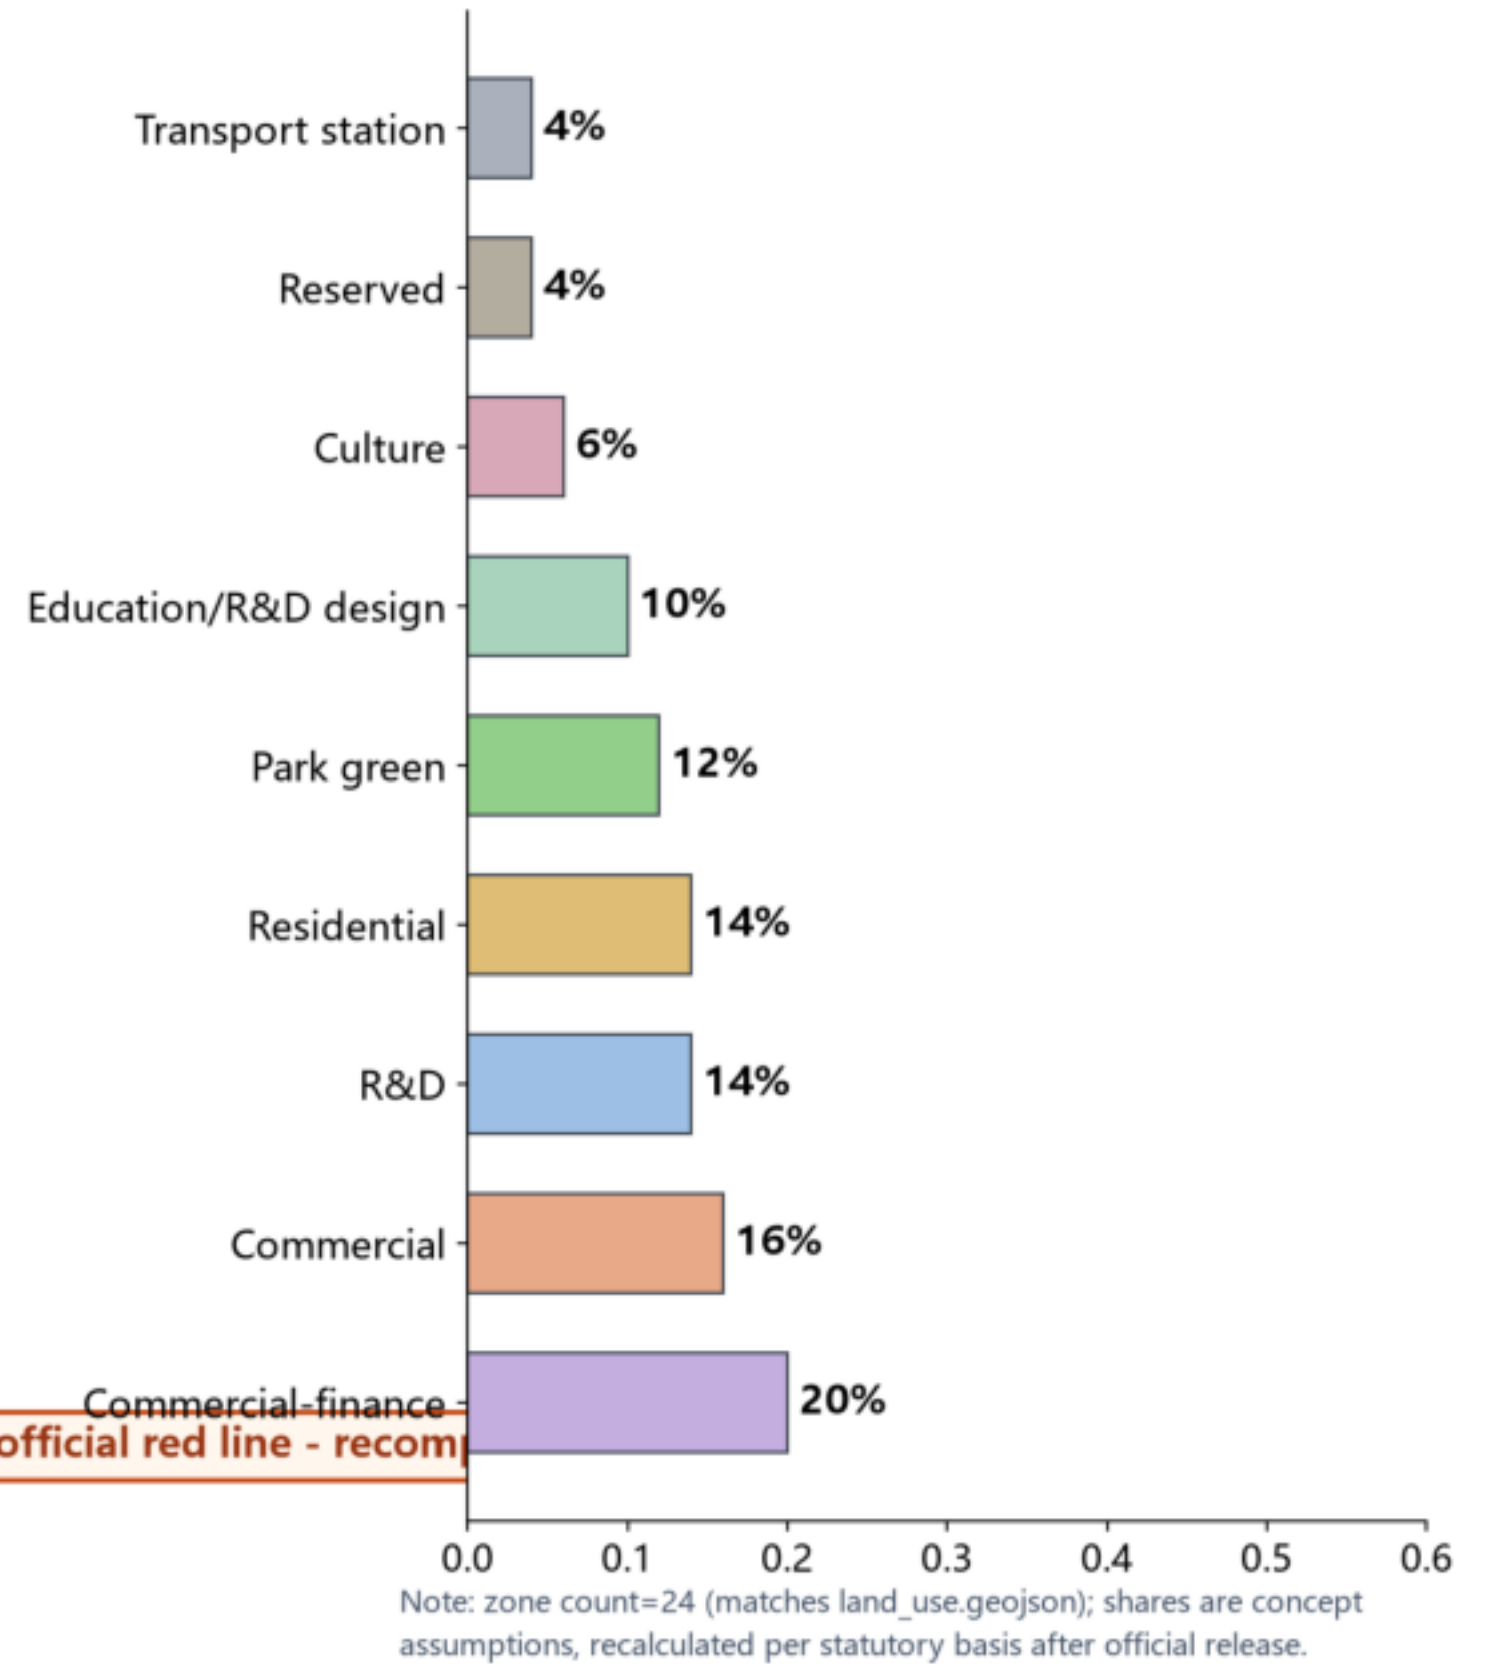

Land-use structure (24 concept zones)

Land-Use Structure: 24 Concept Zones

Source: geometry/land_use.geojson

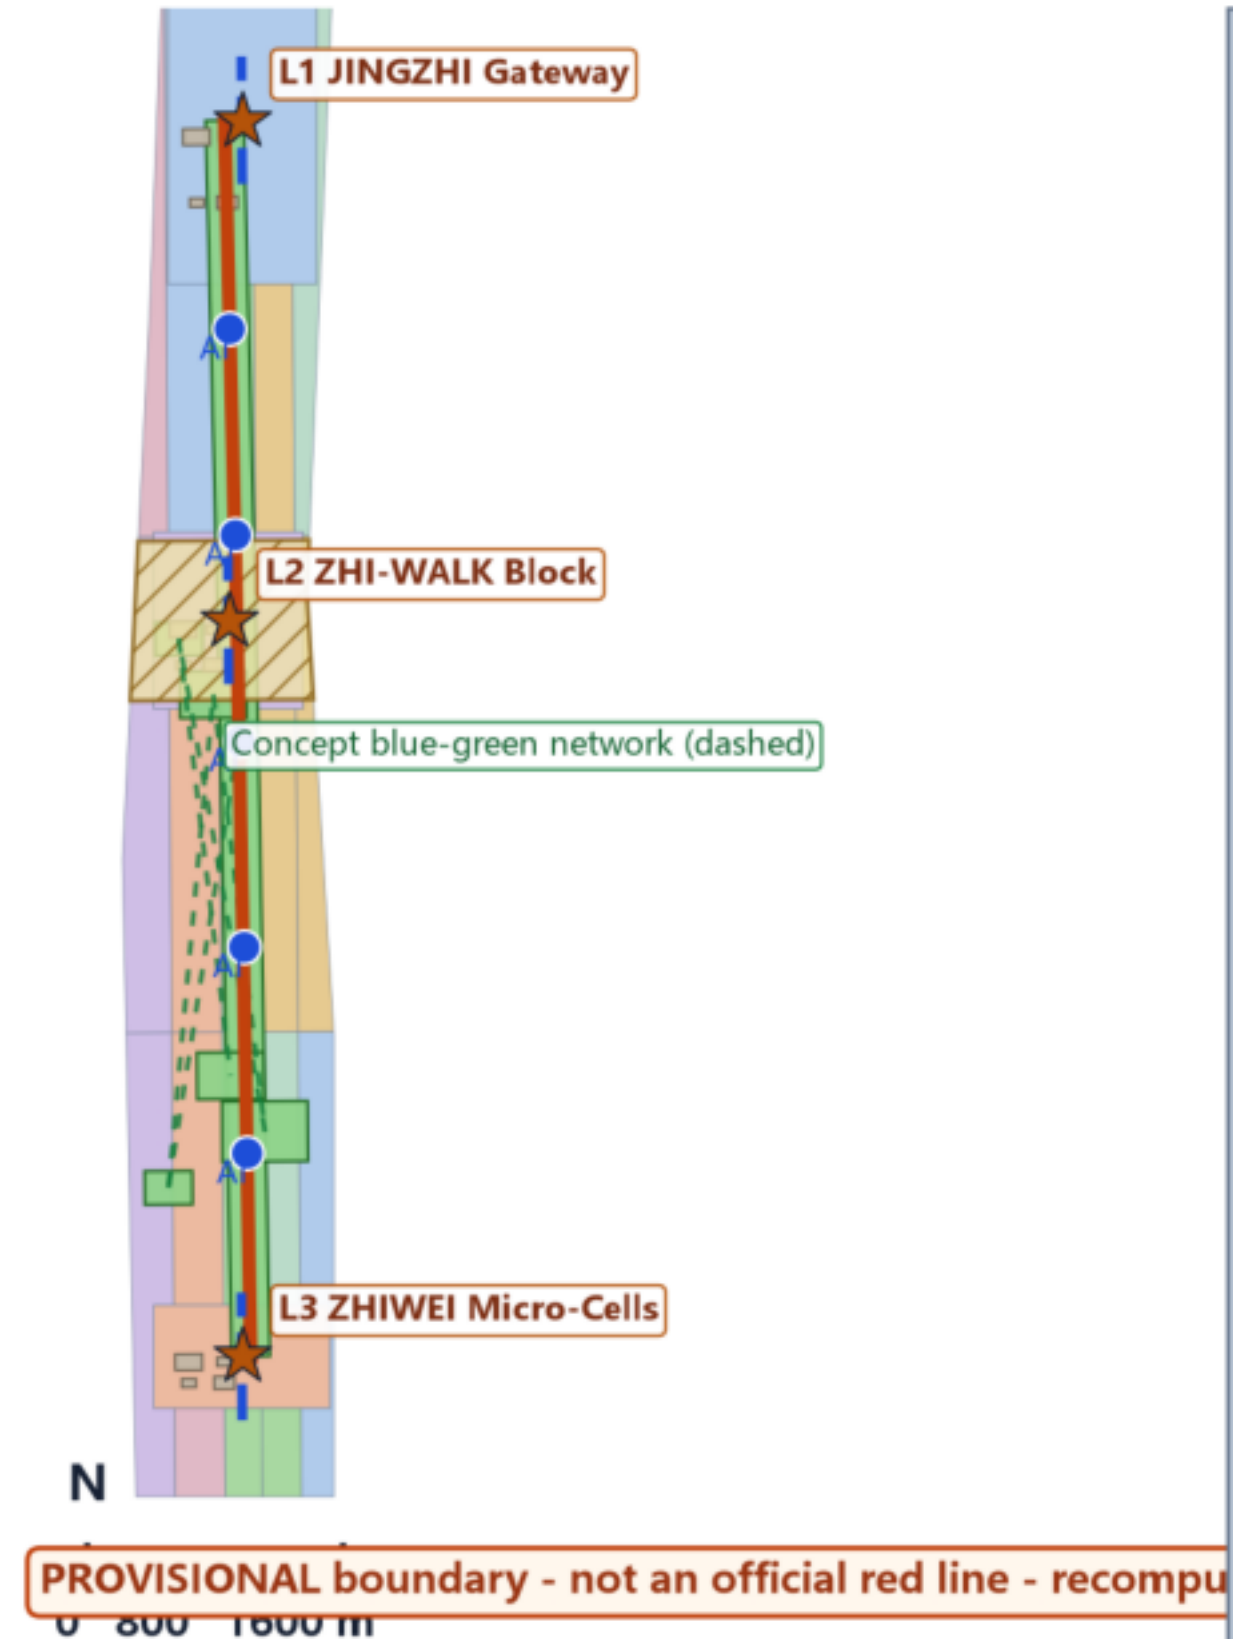

Concept shares (provisional, not official)

PROVISIONAL boundary - not an official red line - recompute after official data release

Mobility & blue-green analysis

Mobility & Blue-Green Analysis (concept)

Legend and concept notes

- Green / pocket parks
- Heritage Park zone
- Slow-traffic spine (N-S)
- E-W stitch links
- Landmarks (3)
- AI scenario nodes (5)
- Green-blue links

Slow-traffic-first (concept)

Sidewalk + cycle + narrowed lanes;
crossing network; 5-10 min walk to rail.

Blue-green hierarchy

One belt (park) - one axis (avenue) -
many parks; nodes carry green.

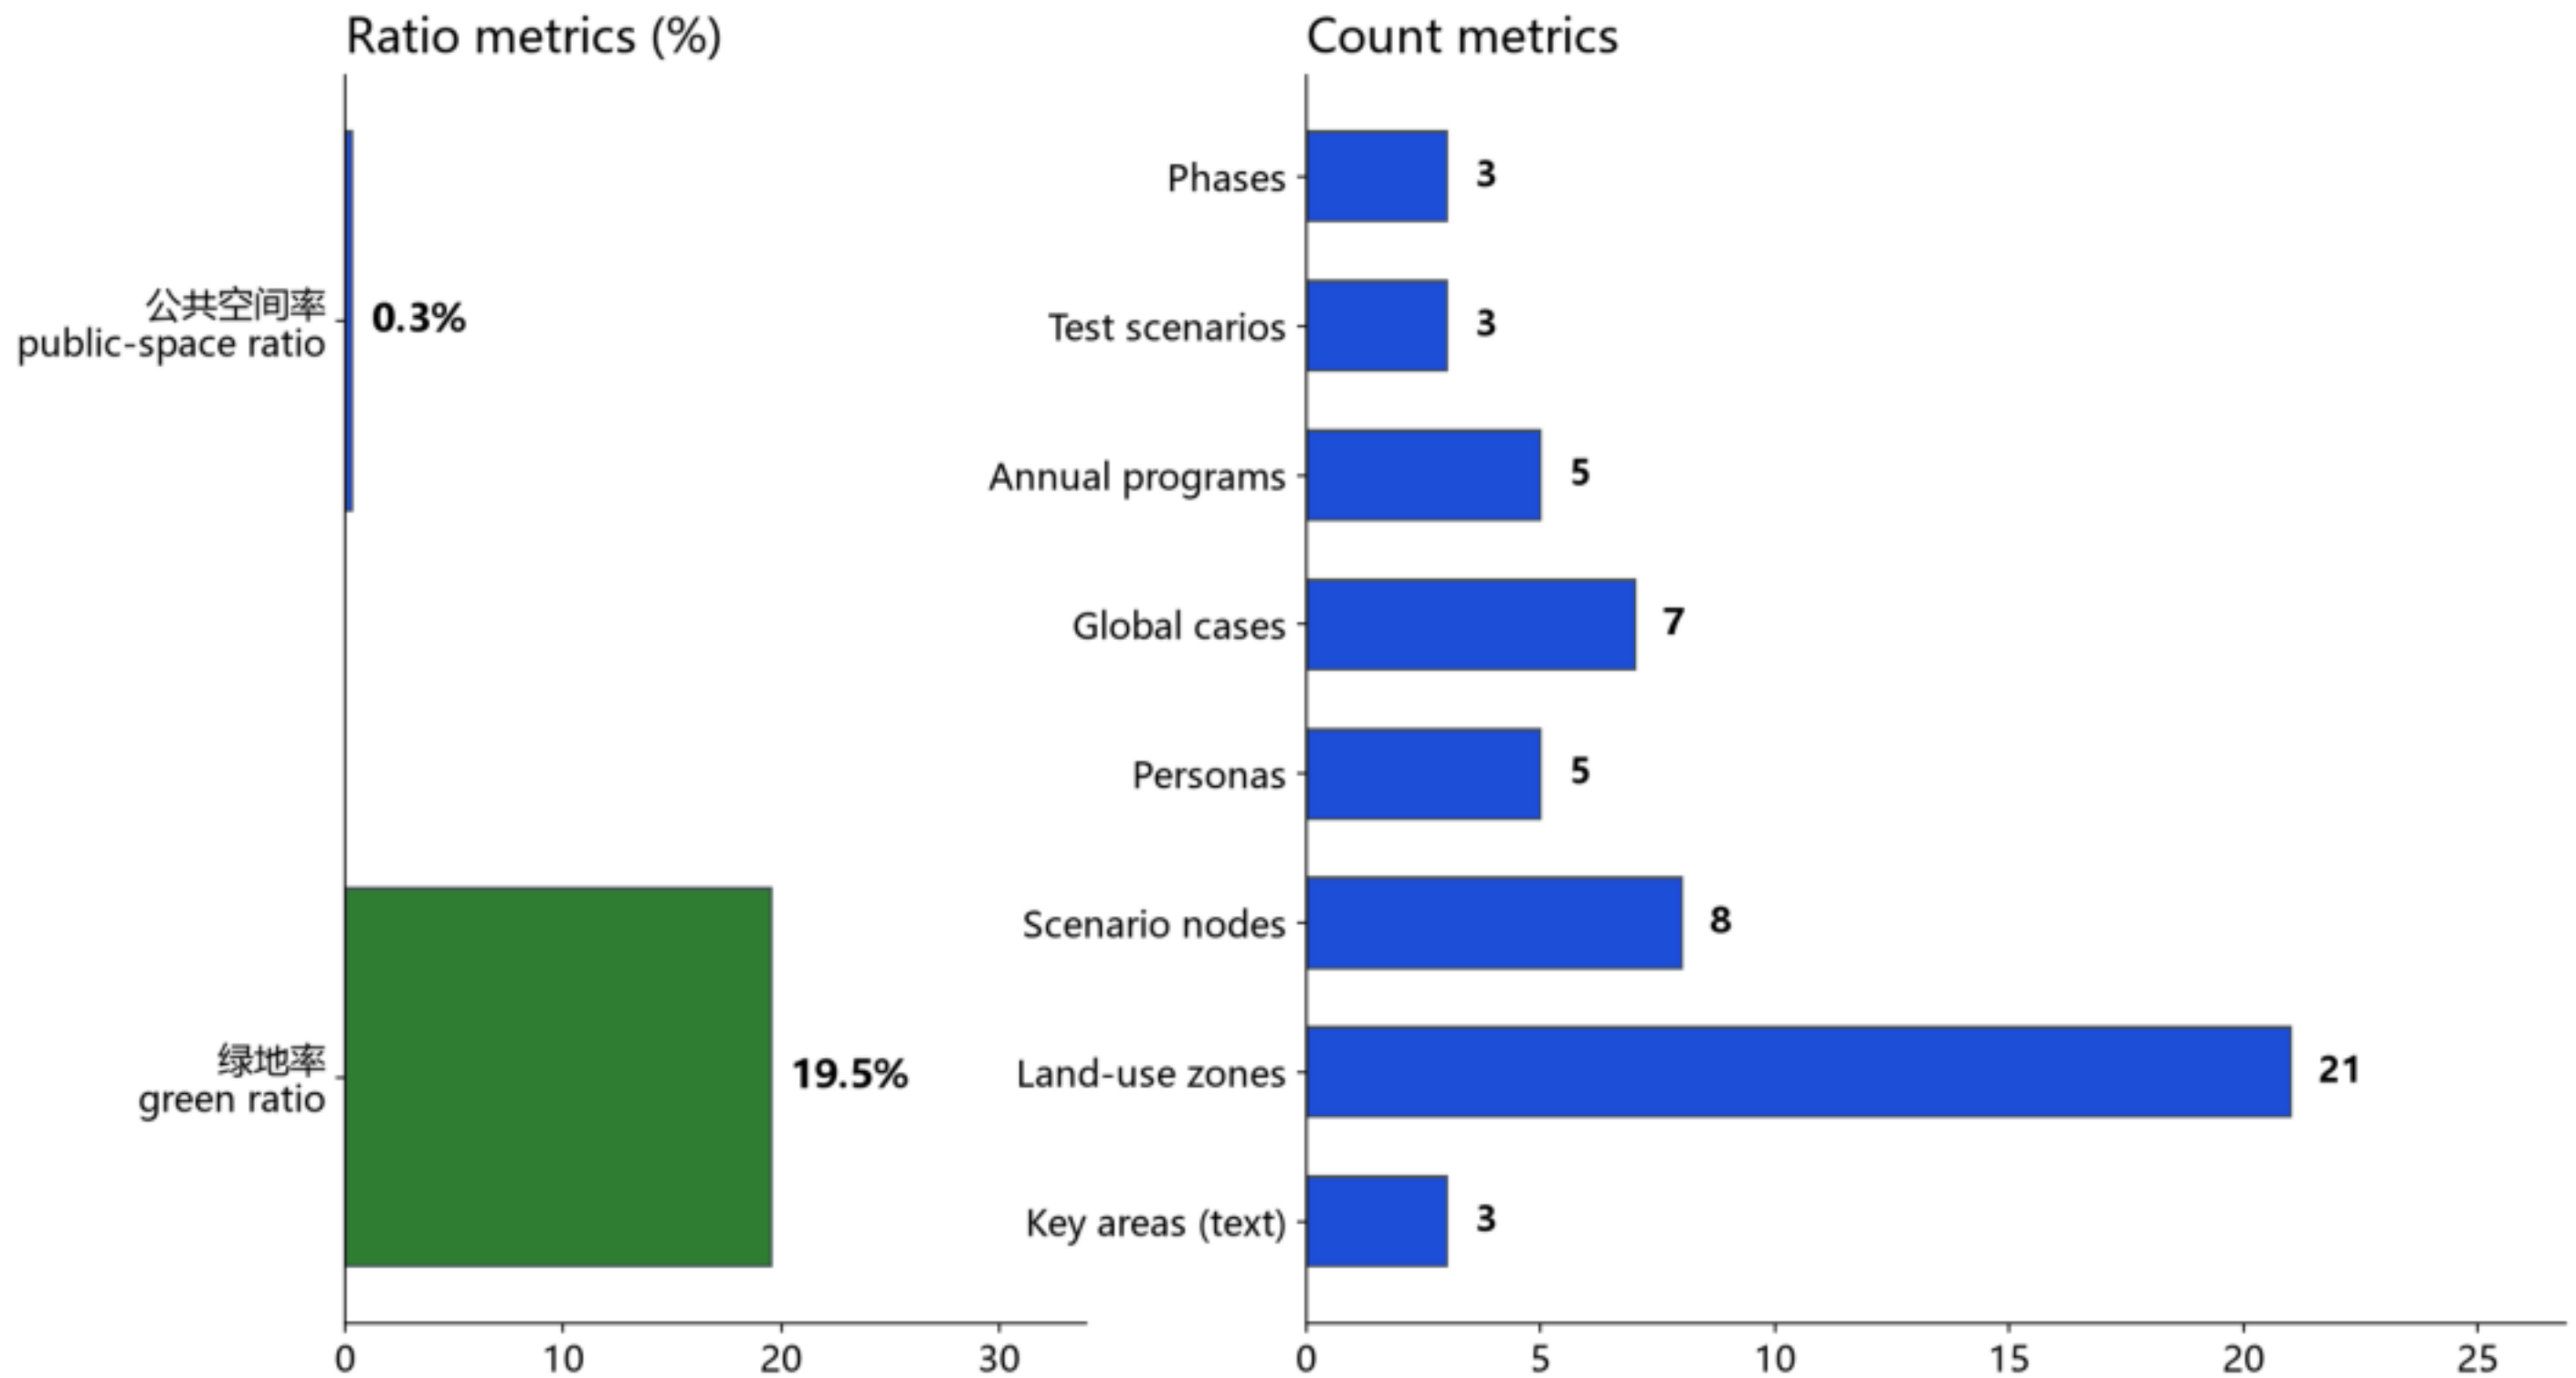

Facility boundary

Modular reversible; anonymized
aggregate + human review, no tracking.

PROVISIONAL boundary - not an official red line - recompute after official data release

Core metrics evidence

Core Metrics Evidence (from metrics.json, provisional recompute)

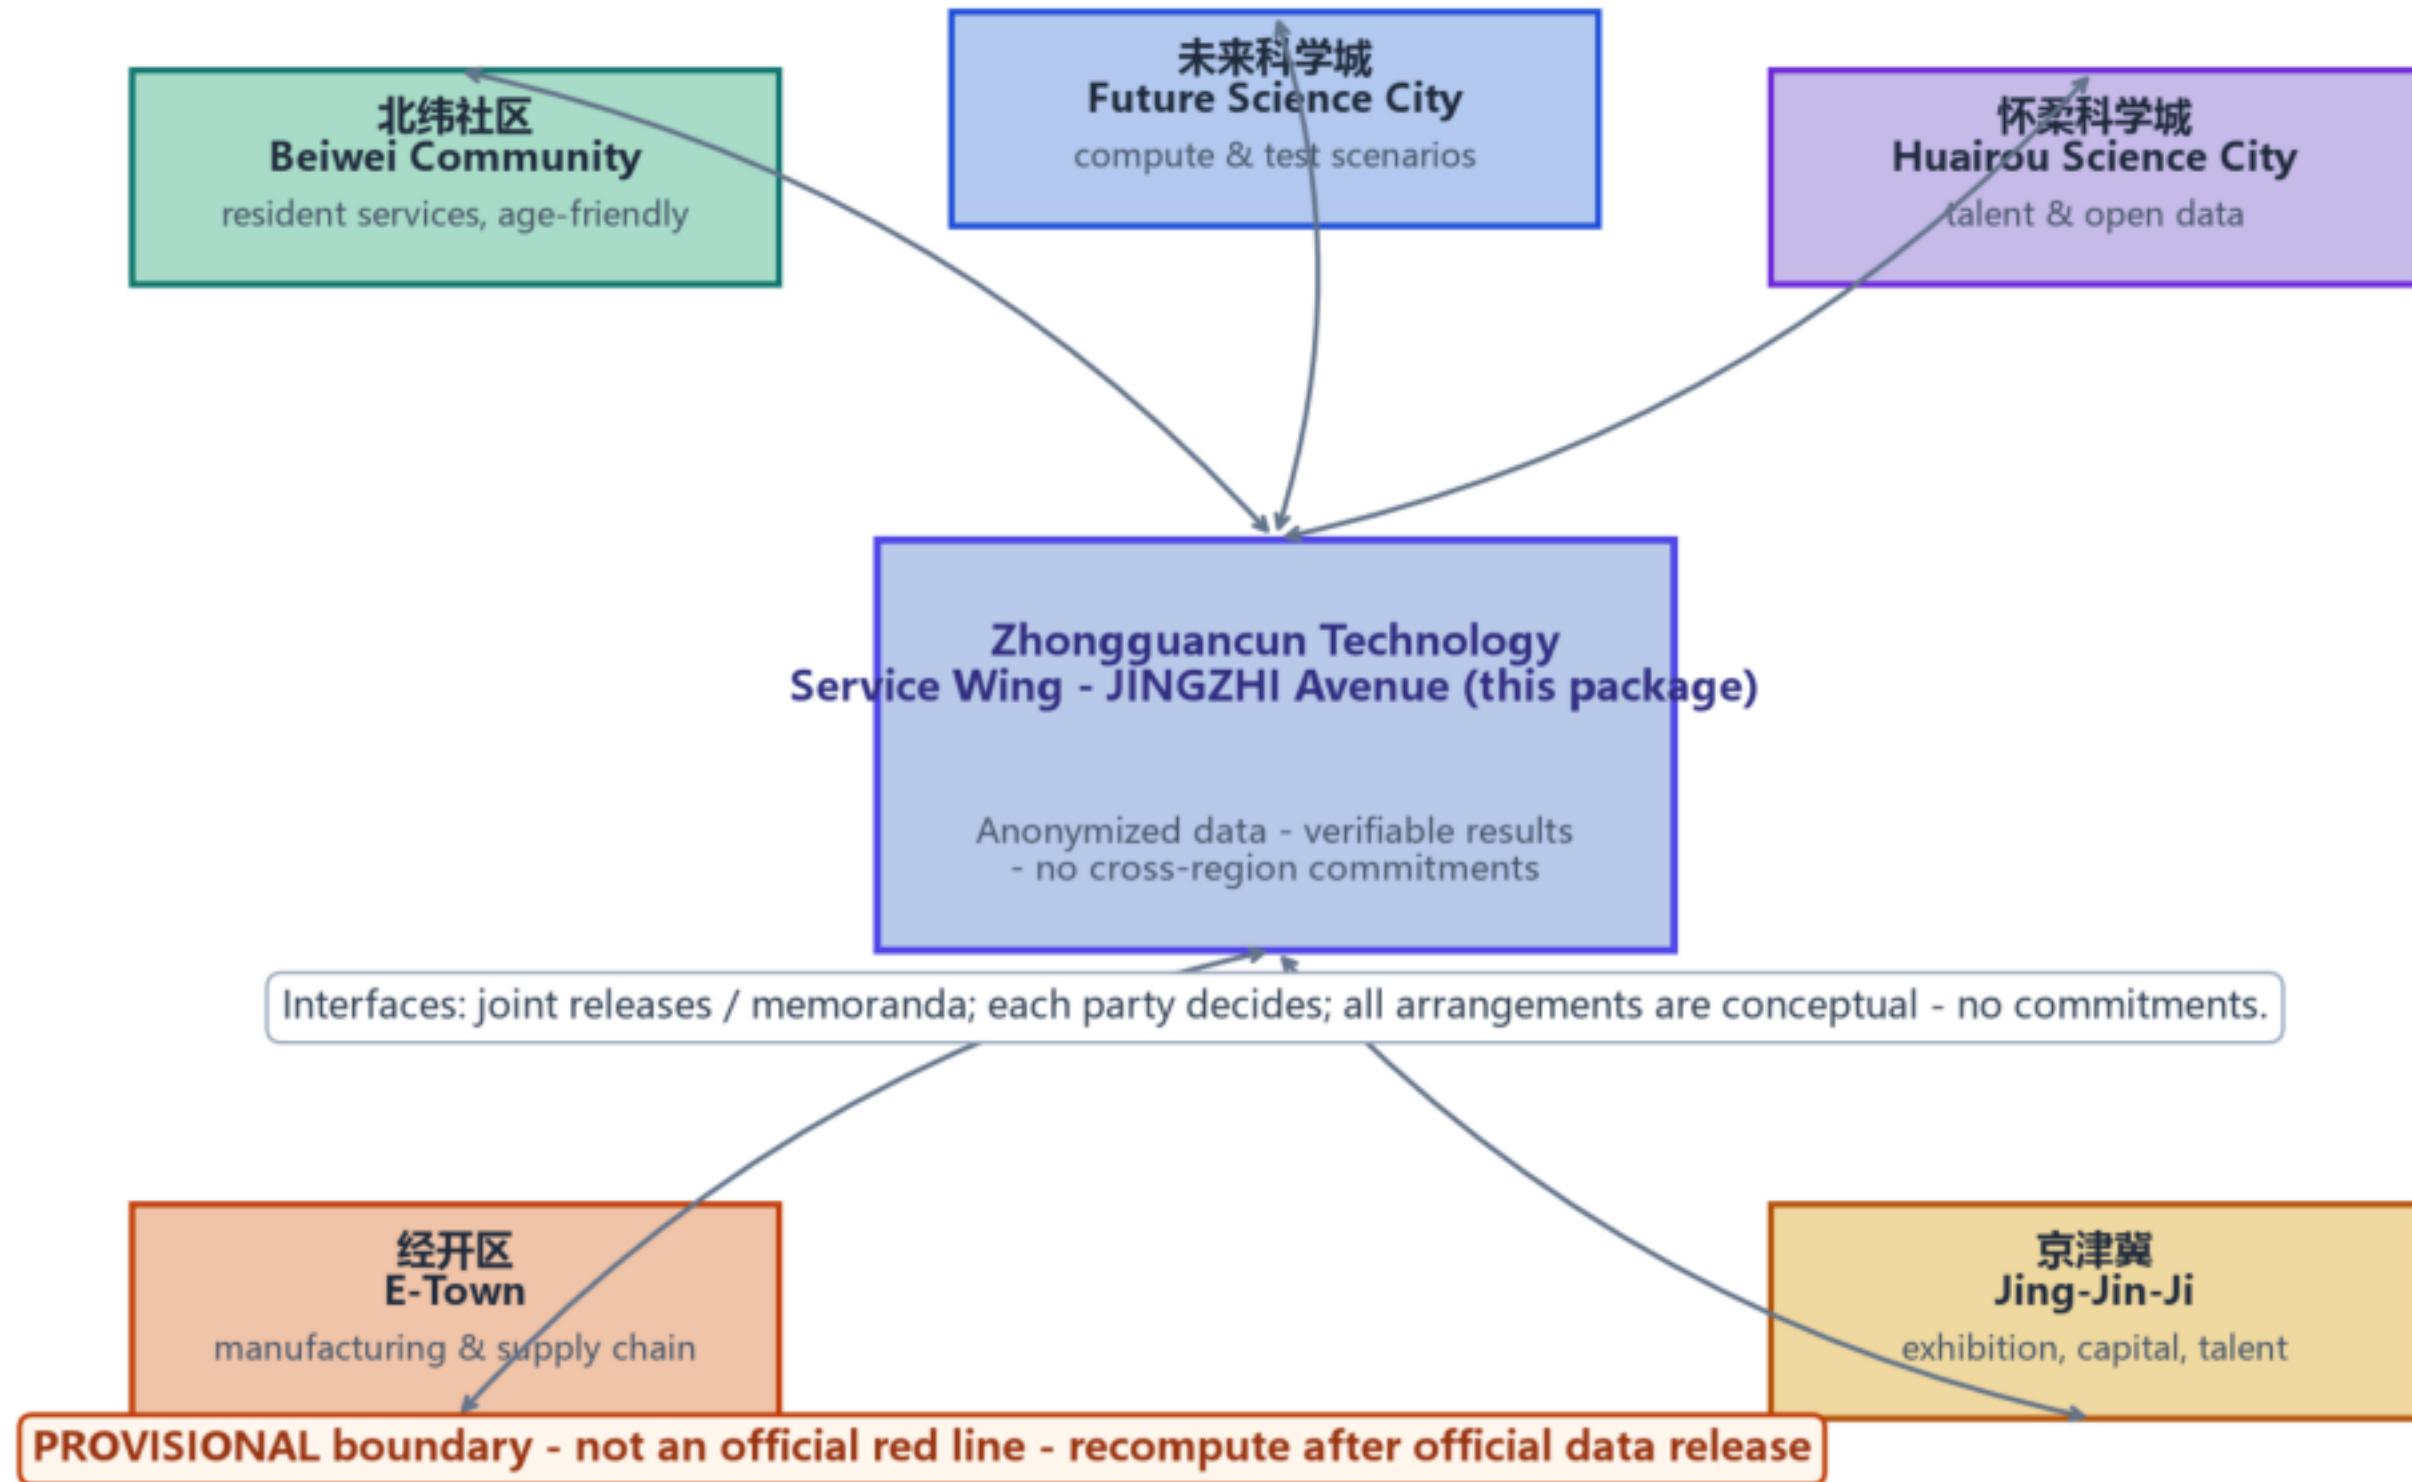

Ratios and counts on separate panels; counts = reviewable features; low-medium confidence; formulas in metrics.json; recompute after official geometry.

PROVISIONAL boundary - not an official red line - recompute after official data release

Three-zones-two-wings coordination

Three-Zones-Two-Wings Coordination Mechanism (concept)

PROVISIONAL boundary - not an official red line - recompute after official data release

Brand mark direction (concept)

PROVISIONAL boundary - not an official red line - recompute after official data release
