

Right-to-Question Public AI Loop

V0.3 PROTOTYPE

A conceptual public route that connects notice, walking, questioning, human review, and public return. It is not a redline plan.

Zhongzhiyuan

Memory and evidence entry

Read the public question and its limits

AI Origin

Question commons

Residents, researchers, and carers describe a break

Dazhongsi

Review and service corner

Human explanation, revision, response, reversible signage

Provisional spatial anchors only. Replace all polygons and recalculate after official or cleared geometry is available.

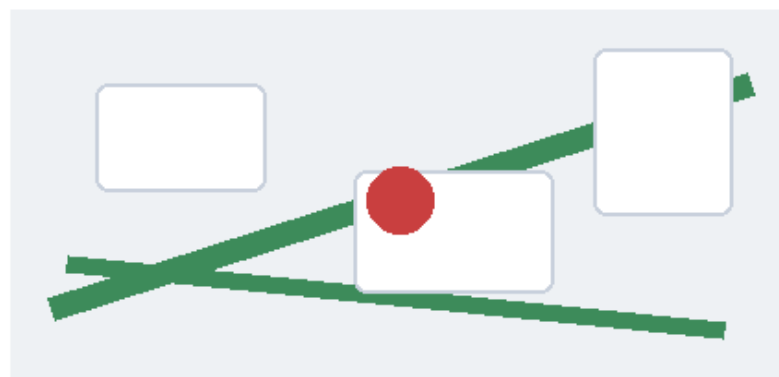

Three Prototype Atlas: Three Public Interfaces

PROTOTYPE ATLAS

Each conceptual mini-plan joins spatial action, user sequence, operating responsibility, and a hard stop. It is not an engineering or regulatory plan.

Zhongzhiyuan

Memory and evidence gateway

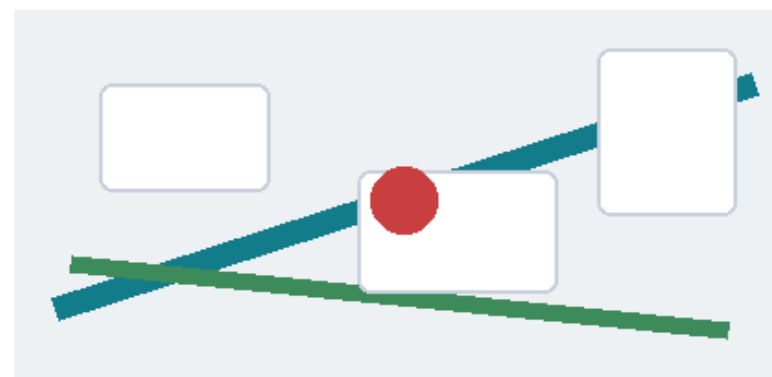

Enter - read sources - choose whether to participate

HARD STOP

No cleared venue, source basis, or human owner: do not start

AI Origin

Question and co-creation commons

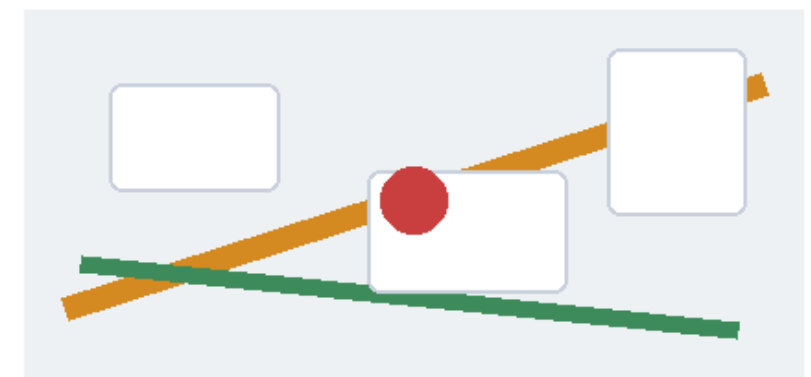

Notice - offline/anonymous feedback - co-prioritise

HARD STOP

Inaccessible feedback, profiling, or scope creep: pause

Dazhongsi

Human review and service corner

Explain - review - respond - publish a revision

HARD STOP

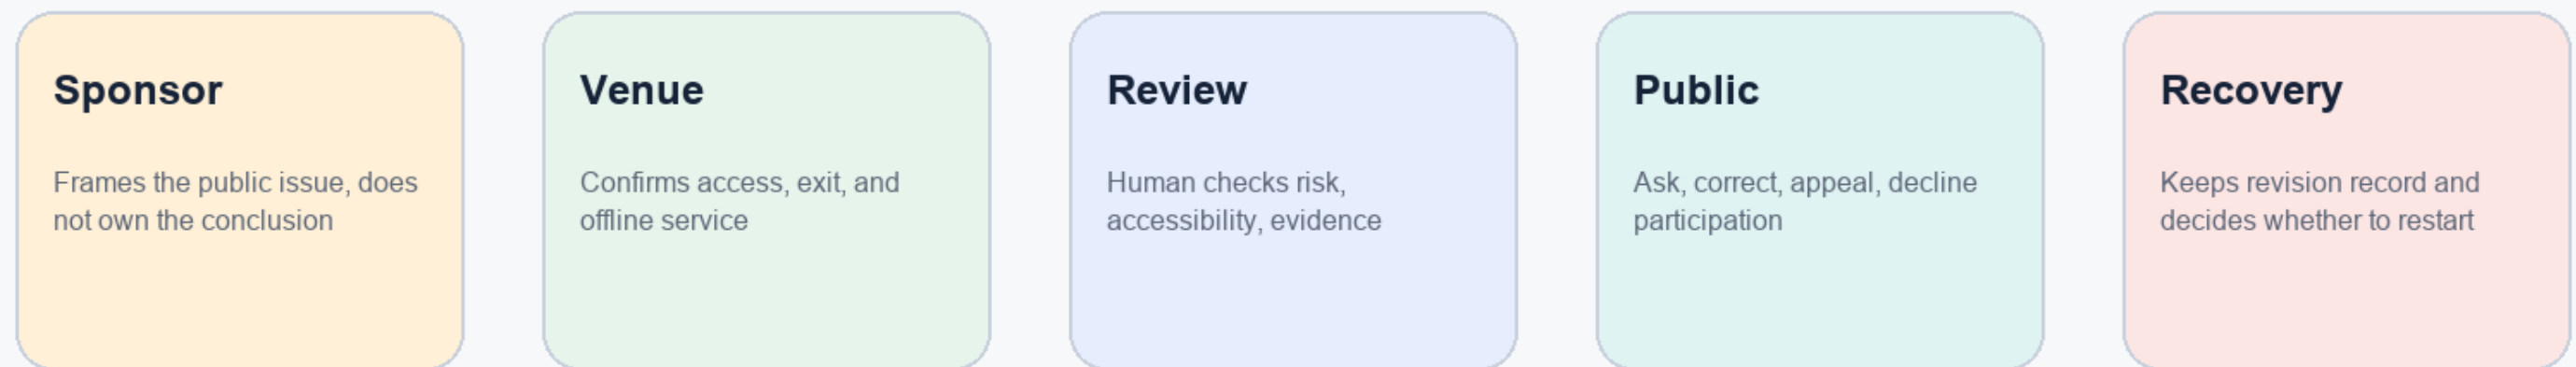

No responsible responder, appeal path, or recovery owner: stop

Plans are conceptual relationship diagrams. Provisional key-area extents remain low-contrast dashed context and must be redrawn after official or cleared plans arrive.

90-Day Pilot Charter: Approve One Small Decision, Not a Whole

DECISION CHARTER

The flagship walking-break diagnostic is a protocol with roles, data duration, appeal, pause/restart, and handover assets.

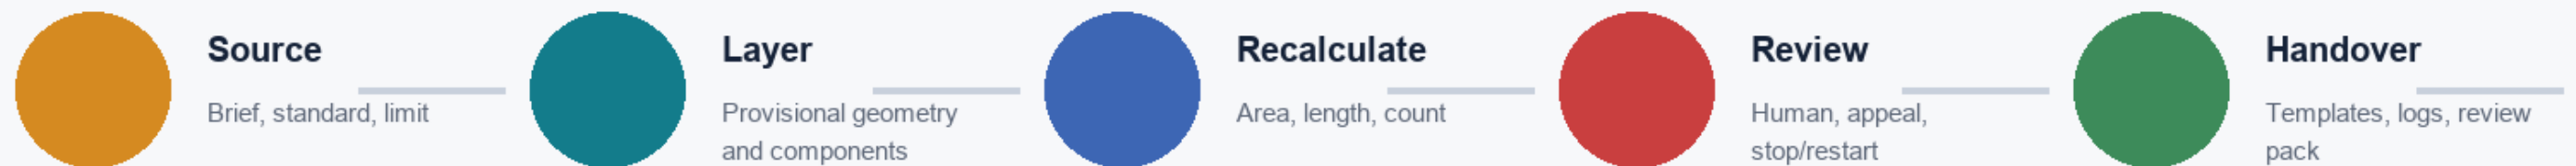

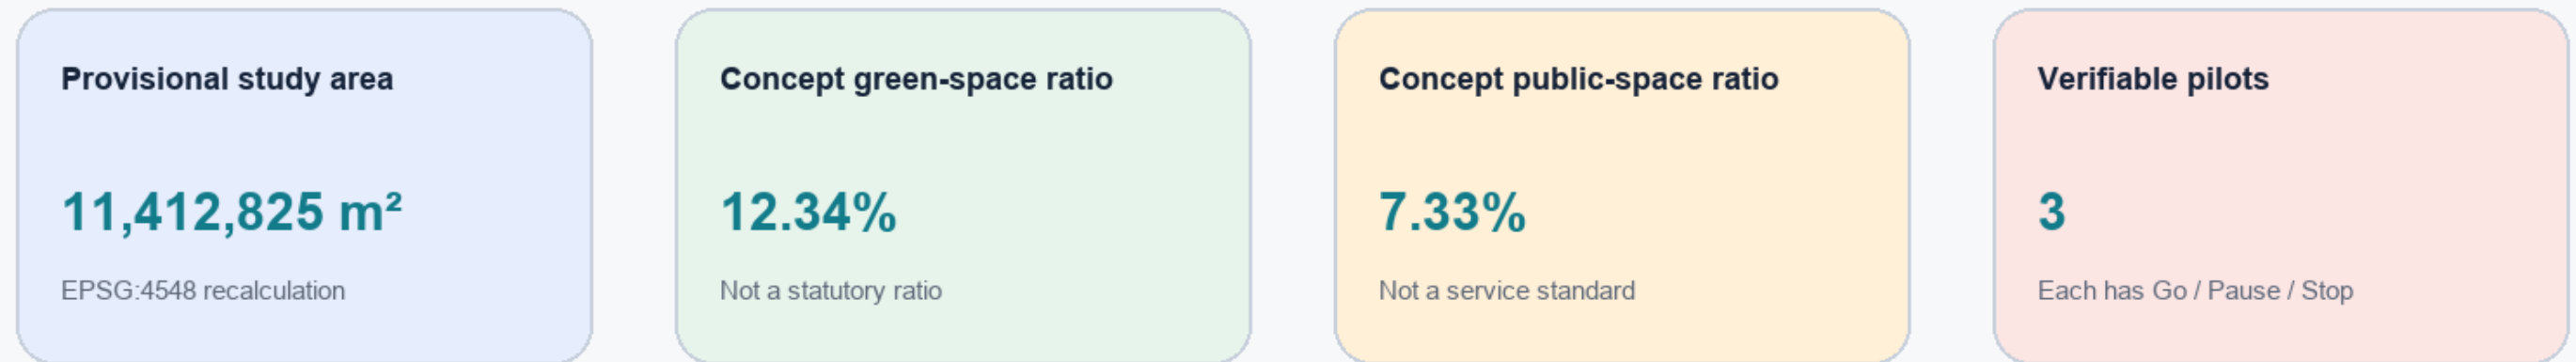

Four gates

Failing a critical gate is not solved by tuning an algorithm: pause or stop, state the reason, and retain human service.

Metrics Are Not Promises: They Form a Recalculation and Pilot Evidence Chain

Spatial values are recalculated from provisional geometry in EPSG:4548. Pilot measures are public-service evidence, not investment or demand forecasts.

Unknowns remain unknown: statutory FAR, height, road redlines, ownership, utilities, and investment are not made credible by invented numbers.

Concept Visuals for Four Public Prototypes

CONCEPT VISUALS

User-provided generative concept visuals express public experience only; they are not site records, surveys, permits, or built projects.
