HARD CONSTRAINTS

SPILLOVER

A / B / C / D are spatial moves tied to geometry, metrics, scenario cards and release gates.

Every move can be entered, refused, paused or rolled back; unknowns stay unknown.

A

DATA GAPS THAT REMAIN UNKNOWN

resident baseline and return rate · employment-impact follow-up · human-fallback use · PUE and green-power share · heat recovery · official redline, permits and liability

unknown is not a gap to hide; it marks the next measurement, authorization and public-review gate.

Concept reference only; official boundary unavailable, spatial values remain provisional.

TRACEABLE INPUT → RECALCULATE → REVIEW

A concept input can be replaced only when source, permitted use, coverage, time, version and professional review are traceable. Any spatial-input change first triggers recalculation of geometry, metrics, figures, HTML, PDFs and self-check.

Derived from geometry/*.geojson and structured evidence; the ordinary-person journey, spatial interfaces, acceptance atlas, and reviewer navigation perform only offline reference or path checks and expected-FAIL negative tests; missing evidence remains unknown or conceptual.
