

Industrial infrastructure that returns urban AI equipment to accountable service

One asset returns only after its evidence chain closes

FAULT → R0–R5 → HOLD / RETEST / HANDOVER → ACCOUNTABLE HUMAN RELEASE

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

SYNTHETIC RULE REPLAY 8/8 | FIELD RUNS 0 | NOT SAFETY, PERFORMANCE, OR AUTHORIZATION

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

EVIDENCE | 27 sources · 23 mapped tasks · 15 complete design-depth items · 9 GeoJSON files

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

01 / RETURN-TO-SERVICE RELEASE

What is formed, what remains missing, and what is tabletop-only

SEPARATE DESIGN QUANTITIES, STATUTORY CONTROLS, READINESS, AND FIELD PERFORMANCE

05 / REALITY + EVIDENCE

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

- R0–R5 decides HOLD, retest, qualified handover, or accountable release.
- 8/8 synthetic rule decisions match; field runs zero.
- Co-repair, warranty, after-sales, and mending the city support one responsibility loop.

02 OVERALL DESIGN | one spine, three works, nine zones, two circuits

Industrial infrastructure that returns urban AI equipment to accountable service

Nine zones form a spatial service process, not a set of generic industry labels

02 / LAND USE + PROCESS

Land uses are clipped by the provisional boundary; nine polygons cover it with 0.001 sqm gap and zero overlap

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

One asset returns only after its evidence chain closes

01 / RETURN-TO-SERVICE RELEASE

FAULT → RD-RS → HOLD / RETEST / HANDOVER → ACCOUNTABLE HUMAN RELEASE

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

SYNTHETIC RULE REPLAY 00 | FIELD RUNS 01 | NOT SAFETY, PERFORMANCE, OR AUTHORIZATION
Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.
COMMUNITY-DISPLAY-ONLY · 2026-08-14

- Nine zones cover the current provisional boundary.
- Public service, controlled process, and risk outbound movement remain layered.
- All statutory controls await official inputs.

EVIDENCE | 27 sources · 23 mapped tasks · 15 complete design-depth items · 9 GeoJSON files

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

Industrial infrastructure that returns urban AI equipment to accountable service

Three key areas form one professional handoff, not three similar parks

03 / KEY-AREA HANDOFF

ENTRY EVIDENCE → PROFESSIONAL WORK → RECEIPT → PAUSE / RESUME; NO AREA RELEASES ALONE

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

ZHONGZHIYUAN | system diagnostics and recertification

1.929 km² · PROVISIONAL

Whole-system fault reproduction, fleet interfaces, and safety regression retest

ENTRY: official area/survey / lawful site rights

OUTPUT: whole-system baseline / regression evidence

PAUSE: Unsafe isolation, failed emergency stop, uncontrolled route, or missing responsible operator.

AI ORIGIN | instruments, protocols, and skills

1.043 km² · PROVISIONAL

Interchangeable-part evidence, instrument calibration, protocols, and skills

ENTRY: official area/survey / lawful use

OUTPUT: part evidence / calibration/reference record

PAUSE: Reference invalid, environment uncontrolled, data/IP rights unresolved, or compatibility dimension missing.

DAZHONGSI | terminal after-sales and circular procurement

0.720 km² · PROVISIONAL

Public intake, accessibility retest, accountable release, and procurement feedback

ENTRY: official station/area anchoring / lawful site/use

OUTPUT: intake/warranty record / service-continuity record

PAUSE: No staffed fallback, inaccessible public route, unresolved complaint, erasure failure, or incomplete gate trail.

1 Robots/mobile 2 Scientific instruments 3 Edge AI/sensors 4 Public-service equipment 5 Shared parts/spares

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

Nine zones form a spatial service process, not a set of generic industry labels

02 / LAND USE + PROCESS

Land uses are clipped by the provisional boundary; nine polygons cover it with 0.001 sqm gap and zero overlap

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

- 01 Repair park and equipment-passport corridor

14031 · 1.889 km²
- 02 Terminal diagnostics and circular procurement services

00 · 1.338 km²
- 03 Public-equipment quick repair and delivery services

0912 · 1.028 km²
- 04 Material-passport and repair culture exhibition

0003 · 1.058 km²
- 05 Sensor and intelligent-terminal refurbishment R&D

0802 · 1.210 km²
- 06 Repair skills and certification training

0804 · 1.140 km²
- 07 Shared diagnostics for scientific instruments

0802 · 1.033 km²
- 08 Robot-system diagnostics and pilot testing

0802 · 0.843 km²
- 09 Shared modules, spares, and equipment services

00 · 1.286 km²

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY DISPLAY ONLY · 2026-08-14

EVIDENCE | 27 sources · 23 mapped tasks · 15 complete design-depth items · 9 GeoJSON files

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

- Dazhongsi outputs intake, continuity, and R5 receipt.
- AI Origin outputs parts, calibration, and negative findings.
- Zhongzhiyuan outputs system regression and R4 evidence.
- All three extents remain provisional rough polygons.

Industrial infrastructure that returns urban AI equipment to accountable service

01 / RETURN-TO-SERVICE RELEASE

Three key areas form one professional handoff, not three similar parks

ENTRY EVIDENCE → PROFESSIONAL WORK → RECEIPT → PAUSE / RESUME; NO AREA RELEASES ALONE

03 / KEY-AREA HANDOFF

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

- Four of twelve cards are industry testing and validation scenarios.
- Seven personas include non-app, accessibility, and resident users.
- AI remains explainable with human takeover.

Industrial infrastructure that returns urban AI equipment to accountable service

Public movement, ordinary equipment logistics, and licensed outbound transfers remain separated

04 / MOBILITY + BLUE-GREEN

Roads are conceptual centre lines, not road red lines, engineered sections, or confirmed station links

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

Three key areas form one professional handoff, not three similar parks

03 / KEY-AREA HANDOFF

ENTRY EVIDENCE → PROFESSIONAL WORK → RECEIPT → PAUSE / RESUME; NO AREA RELEASES ALONE

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

- The civic spine links walking, cycling, intake, learning, and asset-passport interpretation.
- Equipment logistics cannot occupy the public promenade.
- Character: railway maintenance works × precision industrial atlas.

EVIDENCE | 27 sources · 23 mapped tasks · 15 complete design-depth items · 9 GeoJSON files

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

- Phase 1 protocols and skills; Phase 2 system tests; Phase 3 terminal procurement.
- RETURN-TO-SERVICE WEEK centres on failure clinics and accountable retesting, not product launches.

EVIDENCE | 27 sources · 23 mapped tasks · 15 complete design-depth items · 9 GeoJSON files

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

What is formed, what remains missing, and what is tabletop-only

SEPARATE DESIGN QUANTITIES, STATUTORY CONTROLS, READINESS, AND FIELD PERFORMANCE

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

TABLETOP RULE REPLAY: 8/8 matched; FIELD RUNS 0; RULE CONSISTENCY ONLY

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

05 / REALITY + EVIDENCE

Public movement, ordinary equipment logistics, and licensed outbound transfers remain separated

04 / MOBILITY + BLUE-GREEN

- 11.413 sq km, nine zones, fifteen modules, and seven centre lines are provisional design quantities.
- FAR, height, statutory coverage, and road red lines remain pending.
- Official polygons trigger whole-package recalculation.
