

An AI innovation belt for everyday public services

ONE CIVIC SPINE • THREE NODES • TEN REUSABLE SCENARIOS

JING-ZHANG CIVIC LOOP

An AI innovation belt for everyday public services

ONE CIVIC SPINE • THREE NODES • TEN REUSABLE SCENARIOS

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • VERIFY AGAINST OFFICIAL GIS AND PROFESSIONAL REVIEW

PUBLIC PROPOSITION

Passage, human explanation,
a no-account alternative, exit
and appeal come before AI.

THREE SCALES

43.6 km² coordinated study
11.4 km² overall design
368.4 ha key areas

Published magnitudes only;
not calculated from provisional GIS.

CONCEPT PROPOSAL

Provisional geometry; not statutory planning, heritage siting,
construction, investment, procurement or operating approval.

One civic spine, three complementary nodes

A spatial service loop with explicit alternatives, exits and review owners

JING-ZHANG CIVIC LOOP • SPATIAL CONCEPT

One civic spine, three complementary nodes

A public-service loop links heritage, park life, innovation and industry

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

V1.1

ONE CIVIC SPINE

Existing heritage park as everyday public space

THREE NODES

test / collaborate / explain

TEN SCENARIOS

human and non-AI alternatives remain

SIX FIRST AUDITS

breaks / crossings / shade
tactile path / rest / signs

BOUNDARY RULE

Replace official site/key-area polygons, then recalculate every dependent land-use layer, metric, drawing and compliance claim as one controlled update.

Land use, mobility and blue-green continuity

Retain first and audit everyday access before introducing technology

JING-ZHANG CIVIC LOOP · LAND-USE STRUCTURE

Land use as a civic-service gradient

Retain first; renew selectively; add only after evidence and professional review

CONCEPT PROPOSAL · PROVISIONAL GEOMETRY · NOT AN APPROVAL

V1.1

JING-ZHANG CIVIC LOOP · PUBLIC REALM

Mobility + blue-green continuity

Audit six essentials before adding any AI layer

CONCEPT PROPOSAL · PROVISIONAL GEOMETRY · NOT AN APPROVAL

V1.1

LAND-USE TEST

- 1 Heritage and existing-use screen
- 2 Retain / renew / demolish register
- 3 Public-service ground-floor priority
- 4 Fire, accessibility and utility confirmation

SIX FIRST AUDITS

network breaks · crossings · shade

tactile-paving conflict · rest · signs

Every AI route keeps a paper / human path

and a stop, escalation and appeal condition.

No fixed intervention is sited before official heritage GIS and professional screening.

Accountable nodes and an evidence-to-review chain

Facts, design responses and pending statutory data remain separate

Five comparison cases and a guarded delivery path

Transfer methods only – no foreign controls, quantities, finance or commitments are imported

Punggol	test platform + university / industry / community
Barcelona 22@	innovation embedded in everyday mixed use
Amsterdam Nieuwe Meer	transit + living + work + service
Kendall / Volpe	open space and community benefit up front
Paris-Saclay	research + life + public realm + infrastructure

PHASING	
P0	official data and authority
P1	paper signs and human service
P2	controlled tests with stop / appeal
P3	deepen only with evidence; otherwise retire

DELIVERY RULE	Start with reversibility, record failures, publish review owners, and deepen only after data, authority, safety and public-value evidence are jointly confirmed.
