

An AI innovation belt for everyday public services

ONE CIVIC SPINE • THREE NODES • TEN REUSABLE SCENARIOS

JING-ZHANG CIVIC LOOP

An AI innovation belt for everyday public services

ONE CIVIC SPINE • THREE NODES • TEN REUSABLE SCENARIOS

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • VERIFY AGAINST OFFICIAL GIS AND PROFESSIONAL REVIEW

PUBLIC PROPOSITION

**Passage, human explanation,
a no-account alternative, exit
and appeal come before AI.**

THREE SCALES

43.6 km² coordinated study
11.4 km² overall design
368.4 ha key areas

Published magnitudes only;
not calculated from provisional GIS.

CONCEPT PROPOSAL

Provisional geometry; not statutory planning, heritage siting,
construction, investment, procurement or operating approval.

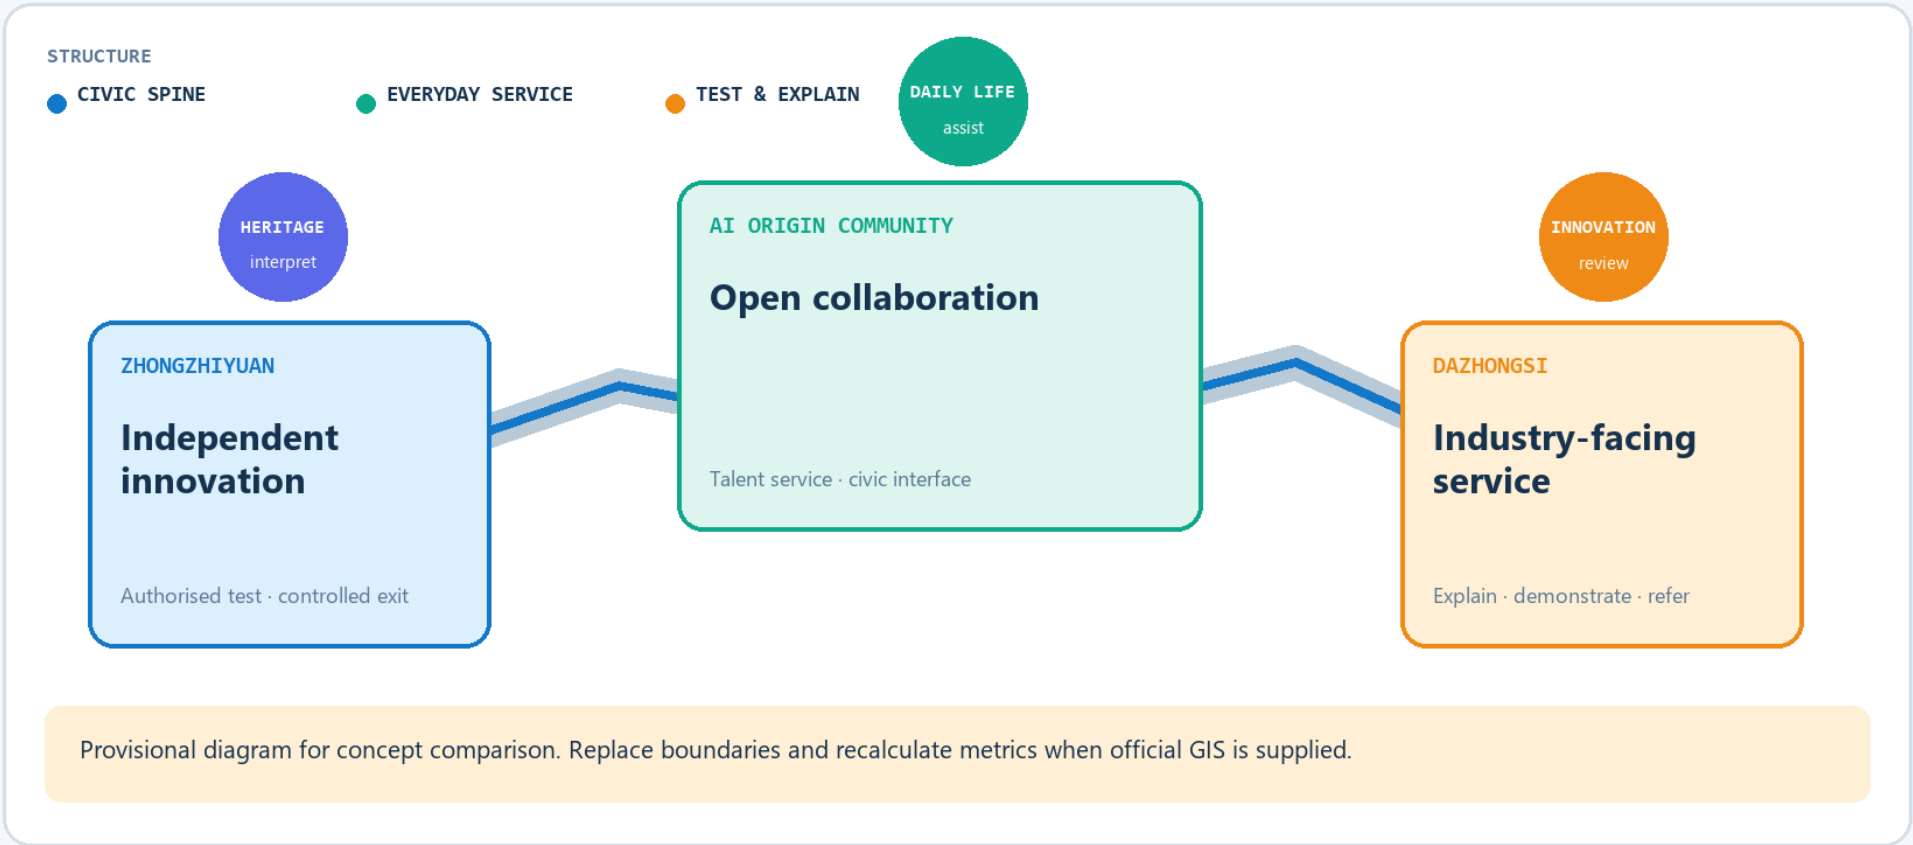

One civic spine, three complementary nodes

A spatial service loop with explicit alternatives, exits and review owners

JING-ZHANG CIVIC LOOP • SPATIAL CONCEPT

One civic spine, three complementary nodes

A public-service loop links heritage, park life, innovation and industry

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

V1.1

ONE CIVIC SPINE

Existing heritage park as everyday public space

THREE NODES

test / collaborate / explain

TEN SCENARIOS

human and non-AI alternatives remain

SIX FIRST AUDITS

breaks / crossings / shade
tactile path / rest / signs

BOUNDARY RULE

Replace official site/key-area polygons, then recalculate every dependent land-use layer, metric, drawing and compliance claim as one controlled update.

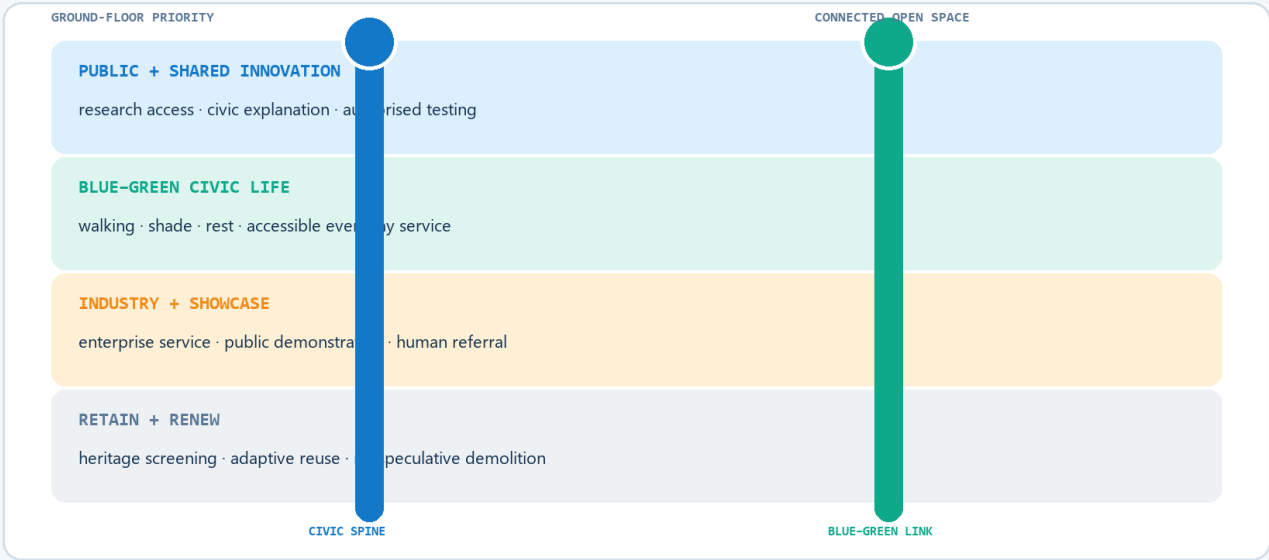

Land use, mobility and blue-green continuity

Retain first and audit everyday access before introducing technology

JING-ZHANG CIVIC LOOP · LAND-USE STRUCTURE

Land use as a civic-service gradient

Retain first, renew selectively; add only after evidence and professional review

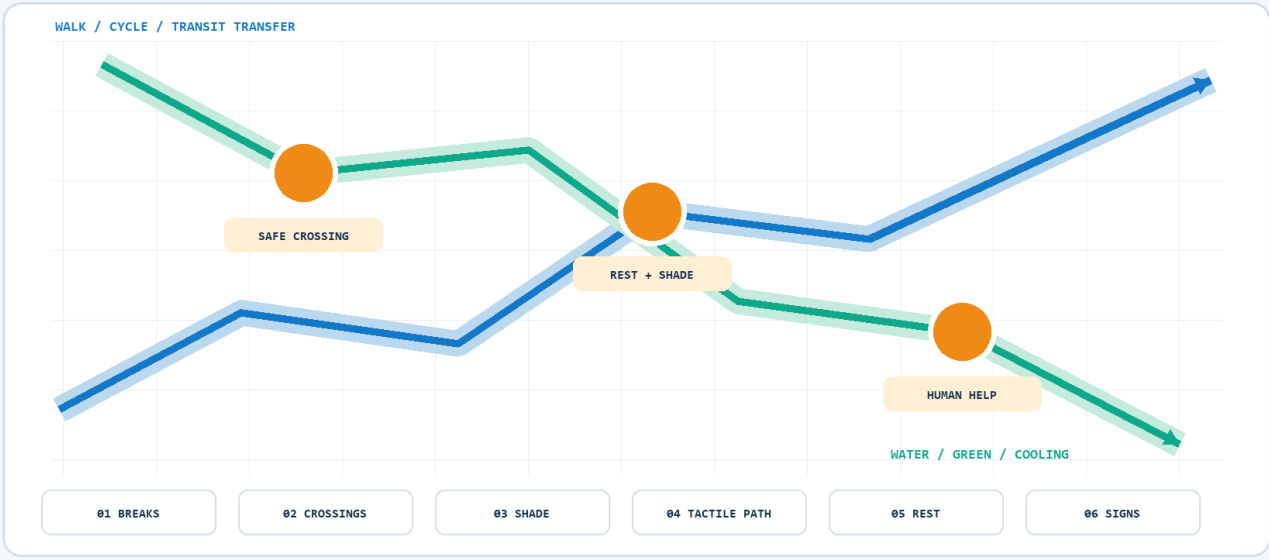

CONCEPT PROPOSAL · PROVISIONAL GEOMETRY · NOT AN APPROVAL

V1.1

JING-ZHANG CIVIC LOOP · PUBLIC REALM

Mobility + blue-green continuity

Audit six essentials before adding any AI layer

CONCEPT PROPOSAL · PROVISIONAL GEOMETRY · NOT AN APPROVAL

V1.1

LAND-USE TEST

- 1 Heritage and existing-use screen
- 2 Retain / renew / demolish register
- 3 Public-service ground-floor priority
- 4 Fire, accessibility and utility confirmation

SIX FIRST AUDITS

network breaks · crossings · shade

tactile-paving conflict · rest · signs

Every AI route keeps a paper / human path

and a stop, escalation and appeal condition.

No fixed intervention is sited before official heritage GIS and professional screening.

Accountable nodes and an evidence-to-review chain

Facts, design responses and pending statutory data remain separate

JING-ZHANG CIVIC LOOP • KEY-AREA LOGIC

Three key areas, three accountable roles

Each node has a public purpose, a non-AI path and a stop condition

01

ZHONGZHIYUAN

TEST SAFELY

- independent innovation
- authorised sandbox
- purpose + time limits
- manual shutdown

PUBLIC VALUE BEFORE TECHNOLOGY

02

AI ORIGIN COMMUNITY

COLLABORATE OPENLY

- talent service
- no-account option
- human service officer
- feedback + appeal

PUBLIC VALUE BEFORE TECHNOLOGY

03

DAZHONGSI

EXPLAIN CLEARLY

- industry-facing help
- public demonstration
- quiet waiting
- referral + review

PUBLIC VALUE BEFORE TECHNOLOGY

Concept roles only — official boundaries, ownership, heritage controls and delivery authority remain pending.

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

V1.1

Evidence → Design → Review

Official facts constrain decisions; missing GIS remains pending.

VERIFIED FACTS

- Phase I: 2.5 km / 16.8 ha
- 17 existing talent services
- Published heritage controls

DESIGN RESPONSE

- Repair gaps before adding tech
- Extend rather than duplicate service
- Movable, low-impact interpretation

PENDING EVIDENCE

- Official boundaries and approved GIS
- Heritage-control polygons
- Title, utilities and operating owner

Context only: 3.111m residents | 92 national key labs | 123 registered large models

Full sources, dates, rights and limitations: sources.json

No source photograph, map, logo or interface asset is copied.

REVIEW GATES

EVIDENCE

official fact
standard / registered source

DESIGN

spatial response
service rule / alternative

CONTROL

stop condition
human handoff / appeal

RECALCULATE

GIS
area / metrics / drawings / matrices

A claim advances only when its evidence, affected geometry, metric and review owner can be traced together.

Five comparison cases and a guarded delivery path

Transfer methods only – no foreign controls, quantities, finance or commitments are imported

Punggol

test platform + university / industry / community

Barcelona 22@

innovation embedded in everyday mixed use

Amsterdam Nieuwe Meer

transit + living + work + service

Kendall / Volpe

open space and community benefit up front

Paris-Saclay

research + life + public realm + infrastructure

PHASING

P0

official data and authority

P1

paper signs and human service

P2

controlled tests with stop / appeal

P3

deepen only with evidence; otherwise retire

DELIVERY RULE

Start with reversibility, record failures, publish review owners, and deepen only after data, authority, safety and public-value evidence are jointly confirmed.

Full URLs, publication/retrieval dates, rights notes and transfer limits: sources.json
