

01 Jing-Zhang Open Pulse | spatial concept & structure

One public spine, three evidence stations, six-stage civic pulse

JING-ZHANG OPEN PULSE
V3.3 · PROVISIONAL / CONCEPT ONLY

CORE QUESTION

AI cities should make questions, tests, decisions, exits and contributions public.

CIVIC PULSE

- 01 Question Public need
- 02 Permission Human mandate
- 03 Bounded test Time + place
- 04 Human decision Vetoable
- 05 Public receipt Readable evidence
- 06 Scale / repair / retire Ordinary route

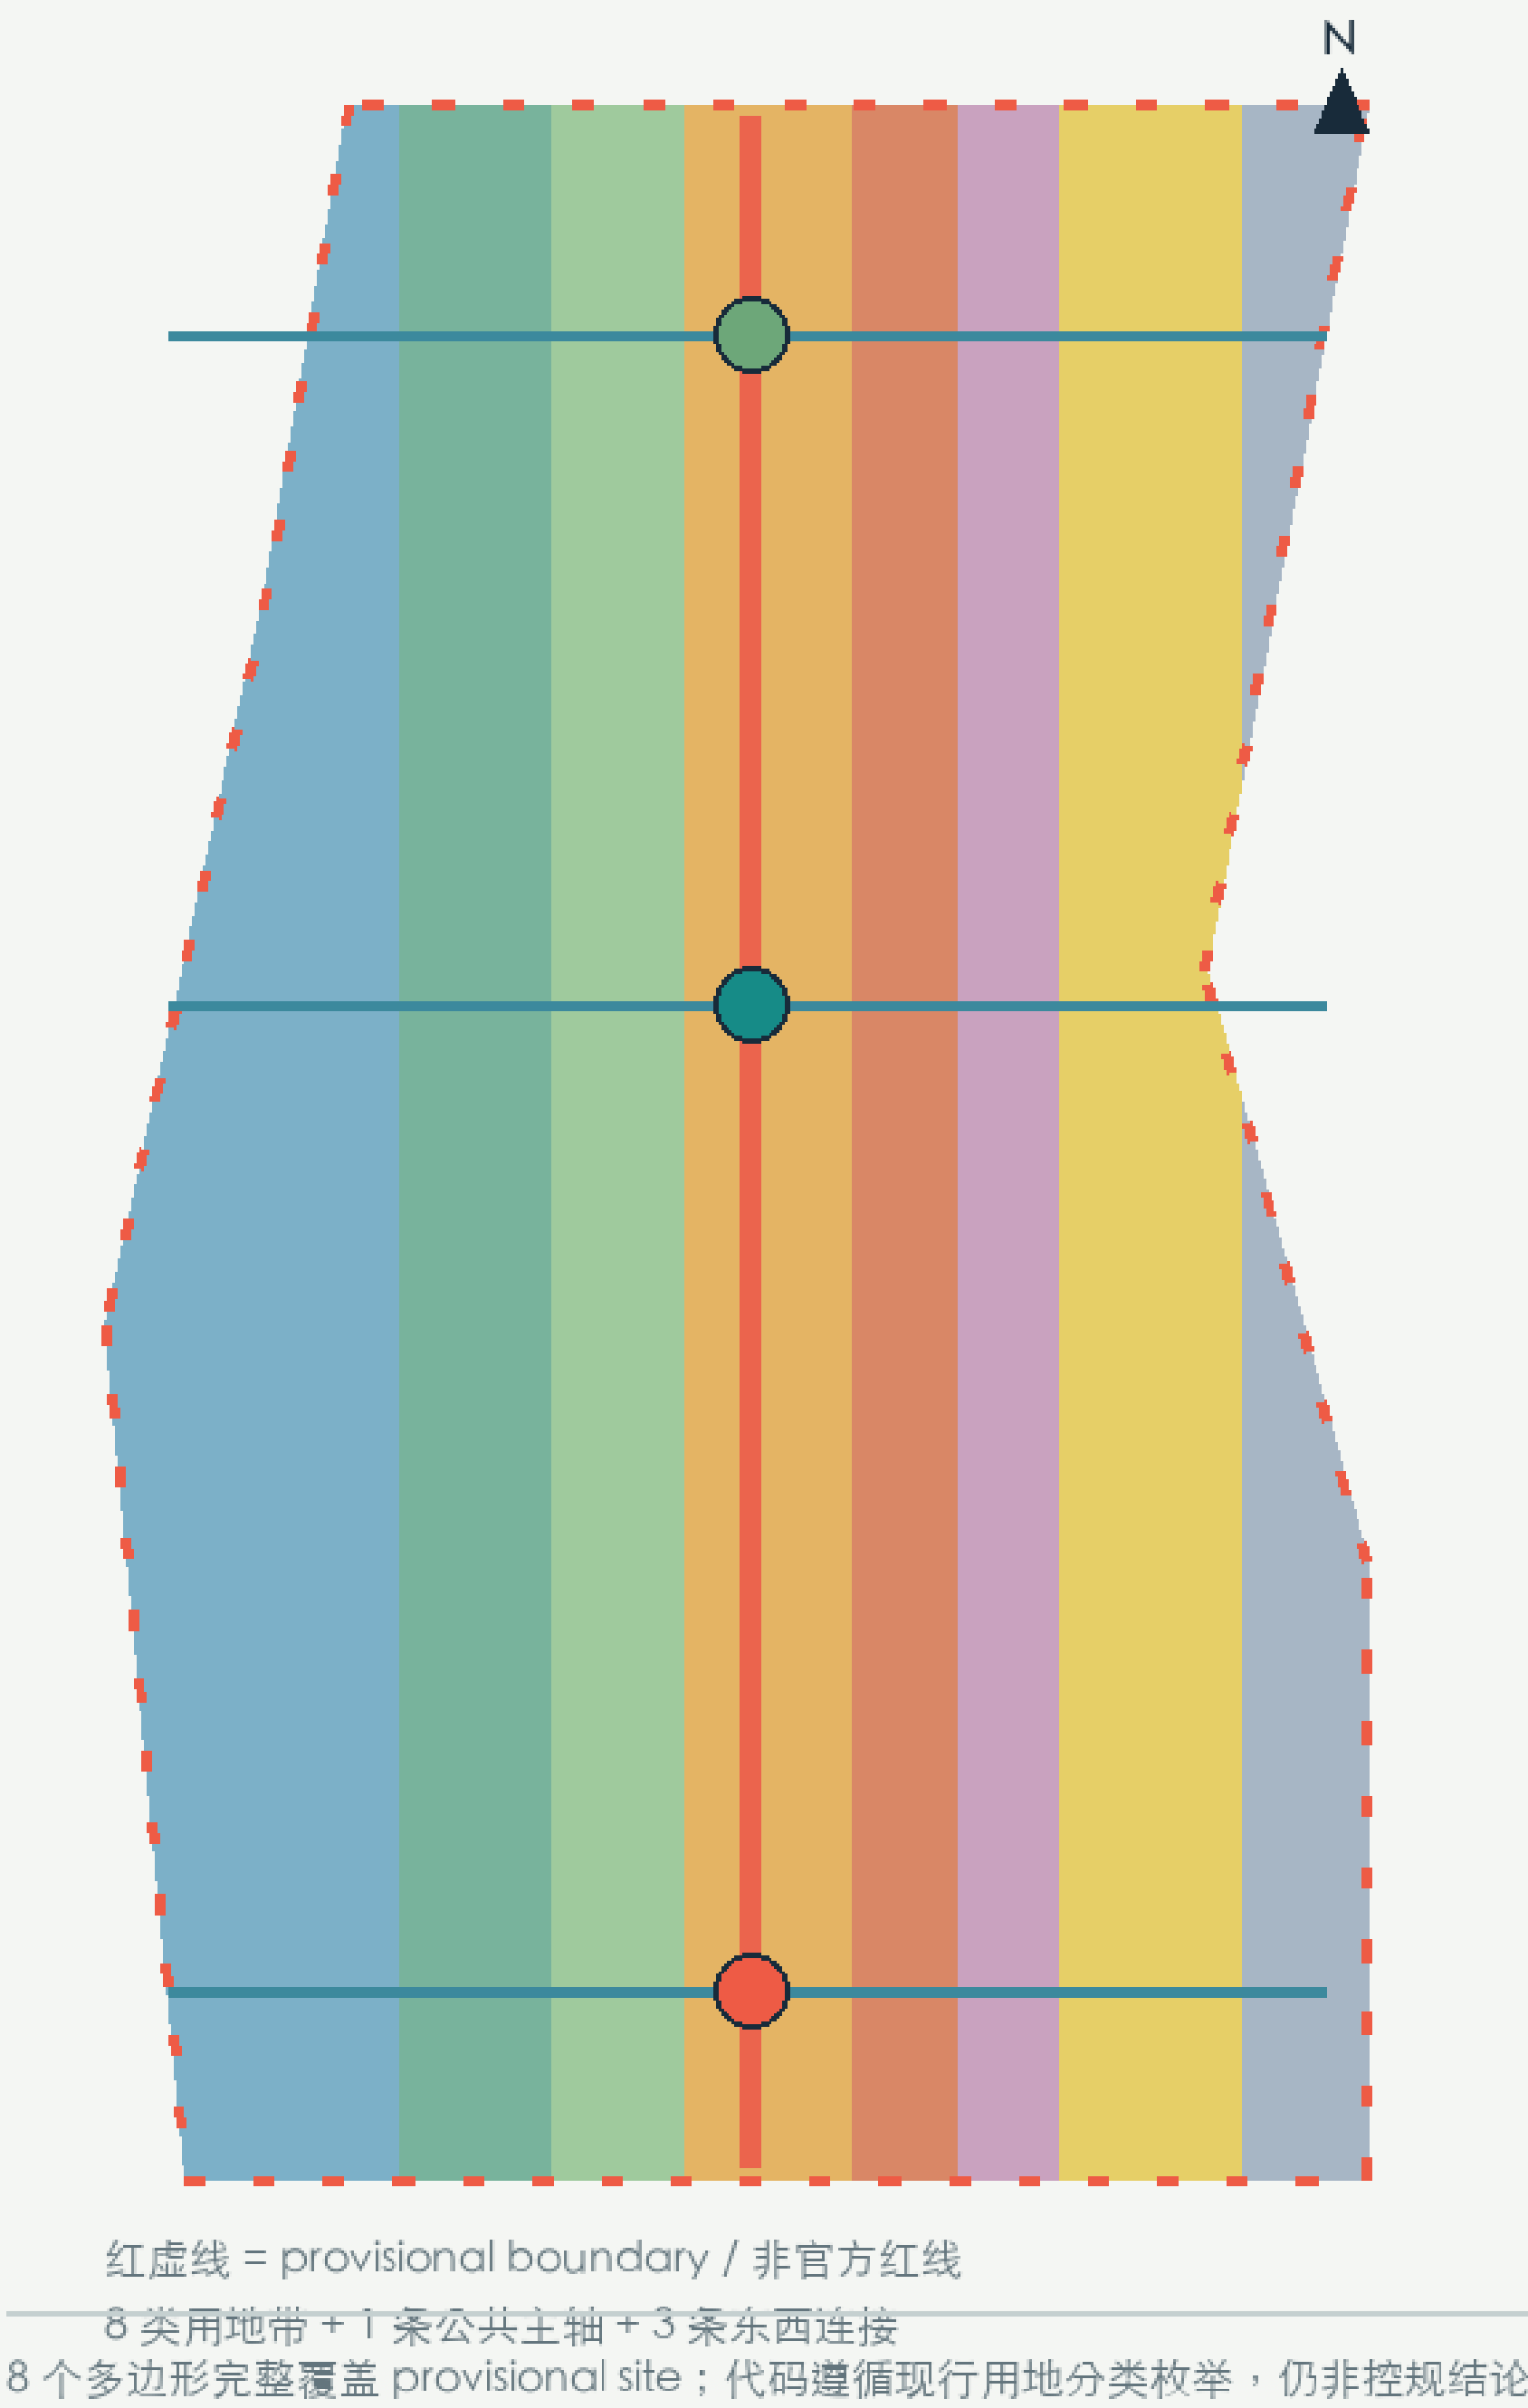

11.41 km ² provisional study area	13.01 km concept slow-mobility chain	8 land-use partitions	3 evidence stations
---	---	--------------------------	------------------------

Dashed red boundary and all geometry are provisional; replace official polygons and recompute all layers, metrics, PDFs and HTML.
Geometry-driven review figure · source: package GeoJSON · not an official redline

02 完整用地分配 | 主骨架不是剩余空间

一张可复算的 8 类用地表，把公共主轴翻译成空间接口。

JING-ZHANG OPEN PULSE
V3.3 · PROVISIONAL / CONCEPT ONLY

用地构成 / LAND-USE MIX

科研用地	0802	23.4%
公园绿地	1401	12.0%
防护绿地	1402	10.7%
商业服务	05	13.1%
教育用地	0804	8.4%
广场用地	1403	8.0%
社区配套	0702	14.7%
道路用地	1207	9.7%

空间翻译 / SPATIAL TRANSLATION

- 01 公共主轴 连续慢行、风路与雨水边缘
- 02 三站节点 验证、转译、城市体验三种角色
- 03 四类接口 普通路径、急停、维护和回执

红虚线 = provisional boundary / 非官方红线
8 类用地带 + 1 条公共主轴 + 3 条东西连接
8 个多边形完整覆盖 provisional site；代码遵循现行用地分类枚举，仍非控规结论。

Eight polygons cover the provisional site; codes follow the current land-use enum, not statutory controls.

English translation of figure text

The source graphic is preserved above; this panel translates its detected text.

02 / Complete land-use allocation | the spine is not leftover space

An auditable eight-class land-use table turns the public spine into a spatial interface.

Research land 23.4%; public green 12.0%; protective green 10.7%; commercial services 13.1%; education 8.4%; square 8.0%; community facilities 14.7%; roads 9.7%.

Spatial translation: 01 public spine = continuous walking, wind and rainfall edges; 02 three nodes = validation, transfer and city experience;

03 four interfaces = ordinary route, e-stop, maintenance and receipt.

Eight polygons cover the provisional site; codes follow the current land-use enumeration, not statutory controls. Recompute after official polygons arrive.

03 THREE PROOF STATIONS | ONE SPINE, THREE ROLES

The same spatial frame shows provisional key-area geometry, anchors, human gates and stop rules.

JING-ZHANG OPEN PULSE
V3.3 · PROVISIONAL / CONCEPT ONLY

All three anchors are provisional review geometry, not official redlines or implementation commitments.

ENGLISH GEOMETRY READOUT

01 / Zhongzhiyuan — the longest north–south provisional polygon; trusted testing.

02 / AI Origin — a shorter transfer band; open conversion and ordinary services.

03 / Dazhongsi — a compact east–west experience band; station interface and rollback.

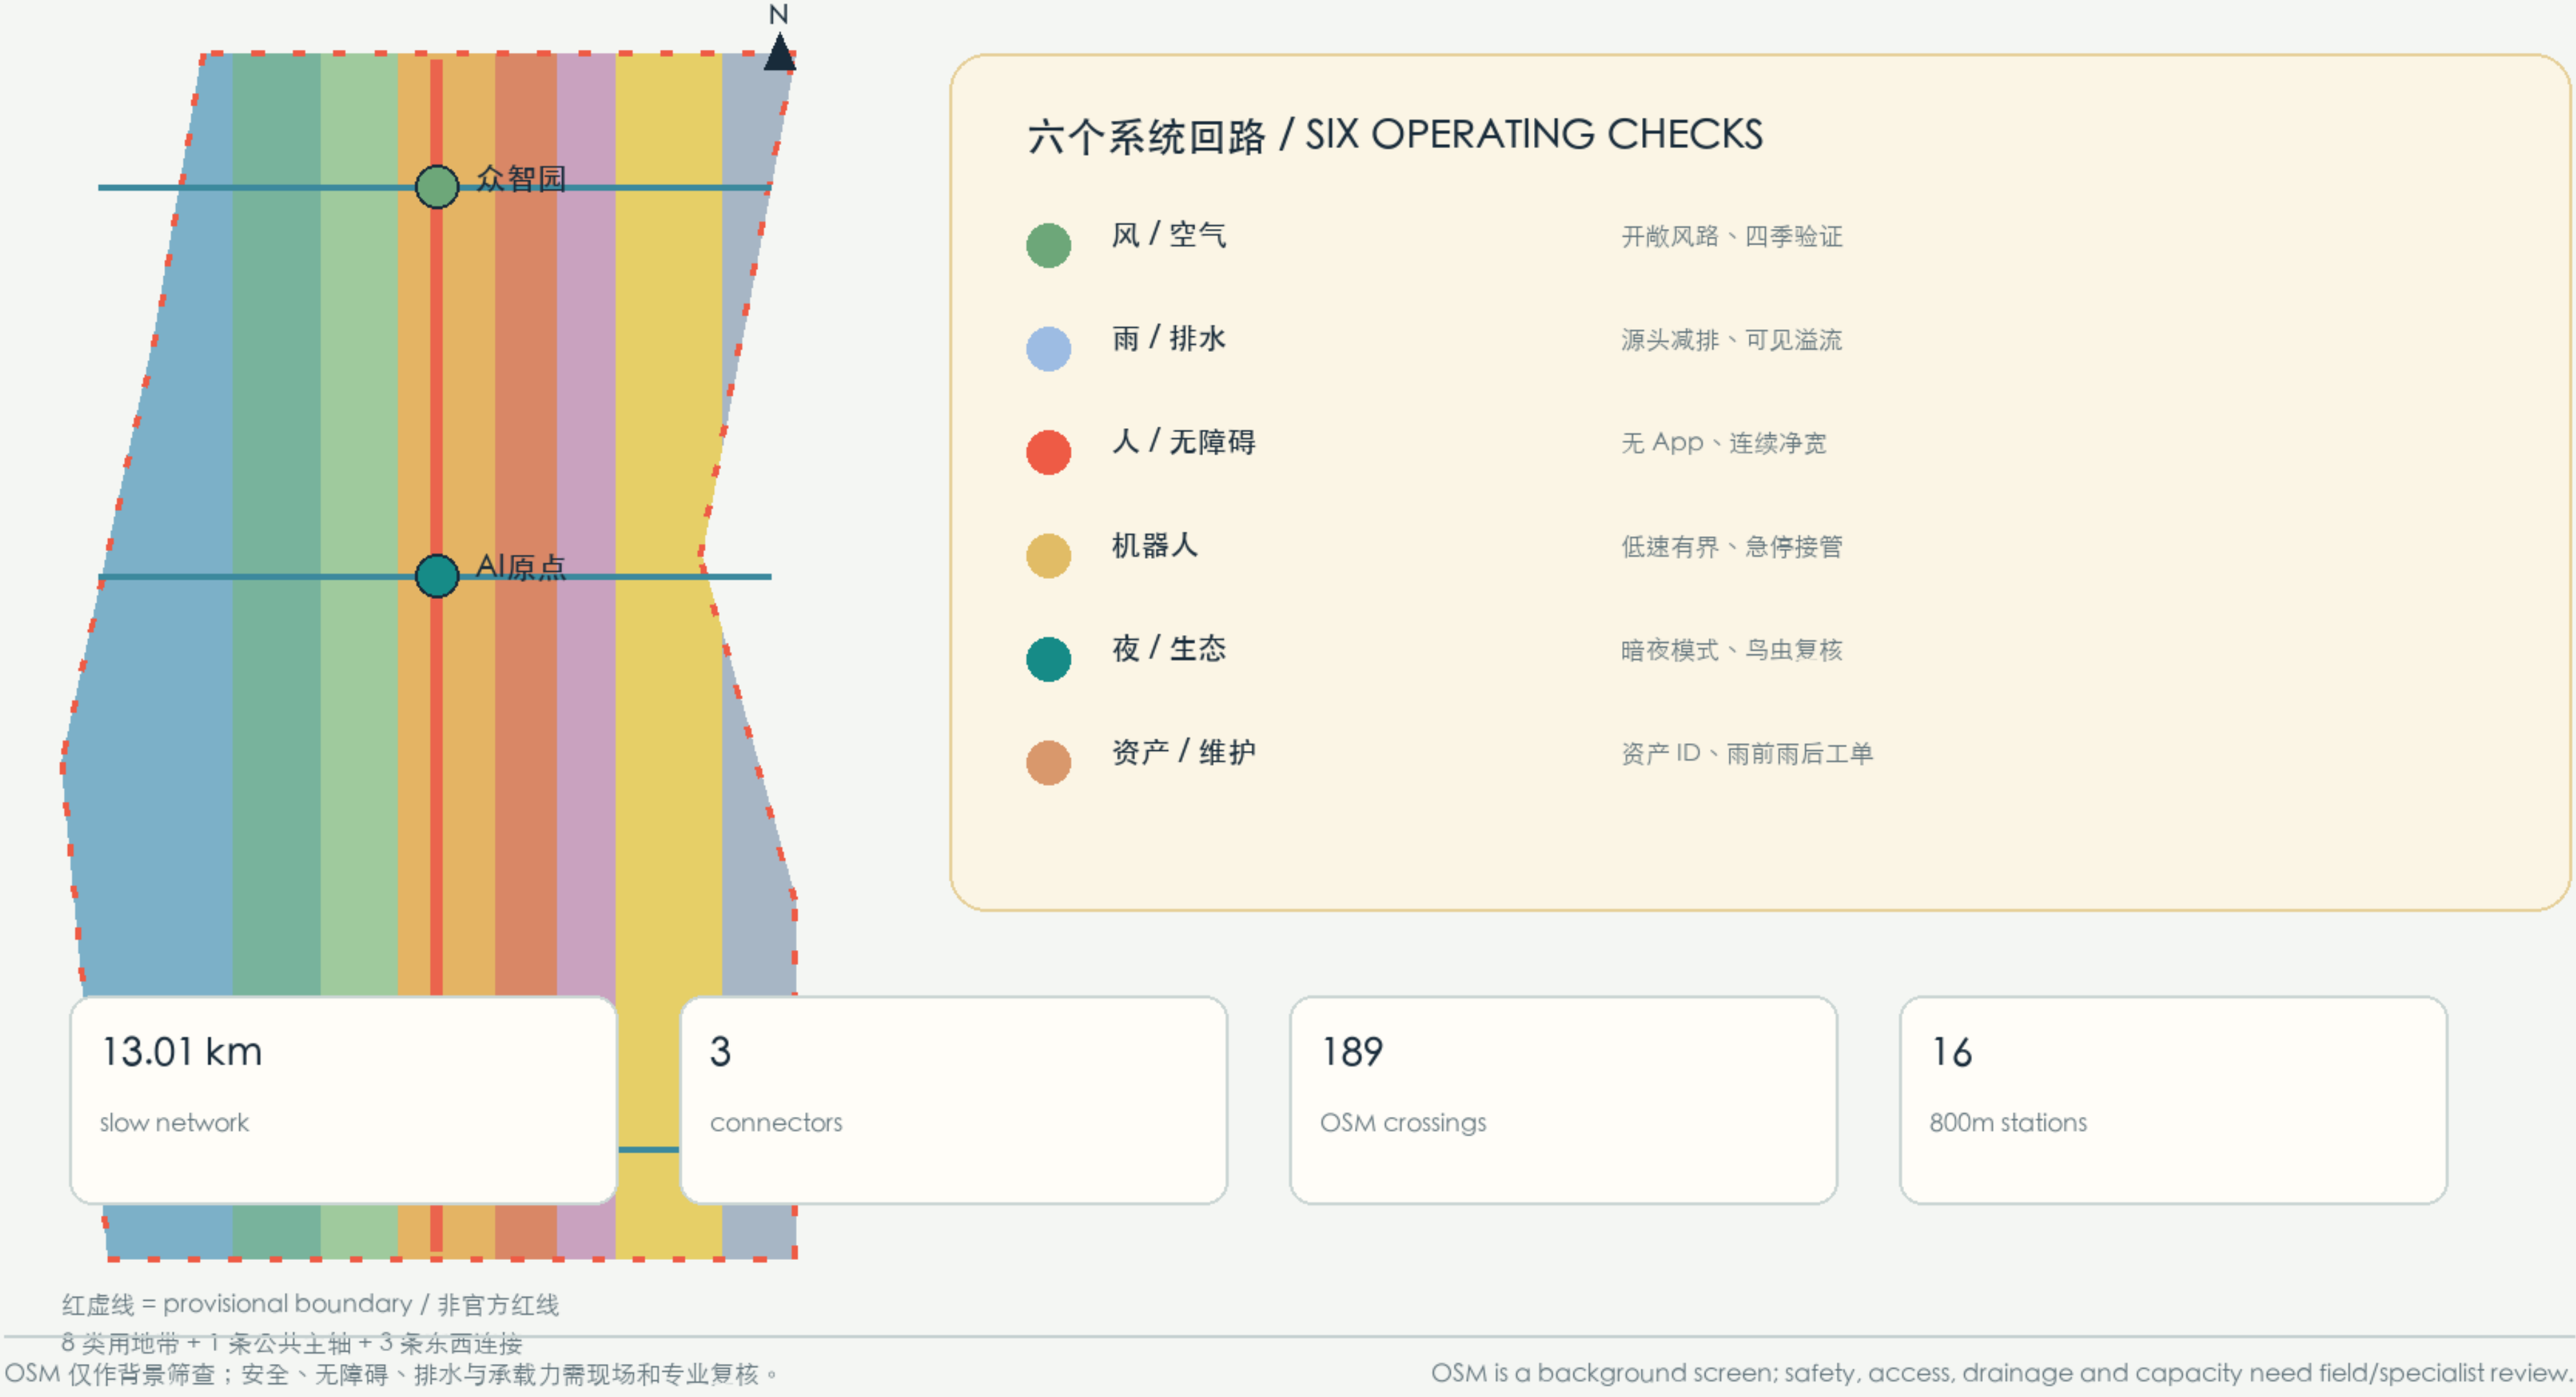

Shape and relative position are shown for review only. Replace official polygons and recompute all layers, metrics, drawings and HTML.

PROVISIONAL / CONCEPT ONLY · package GeoJSON remains authoritative

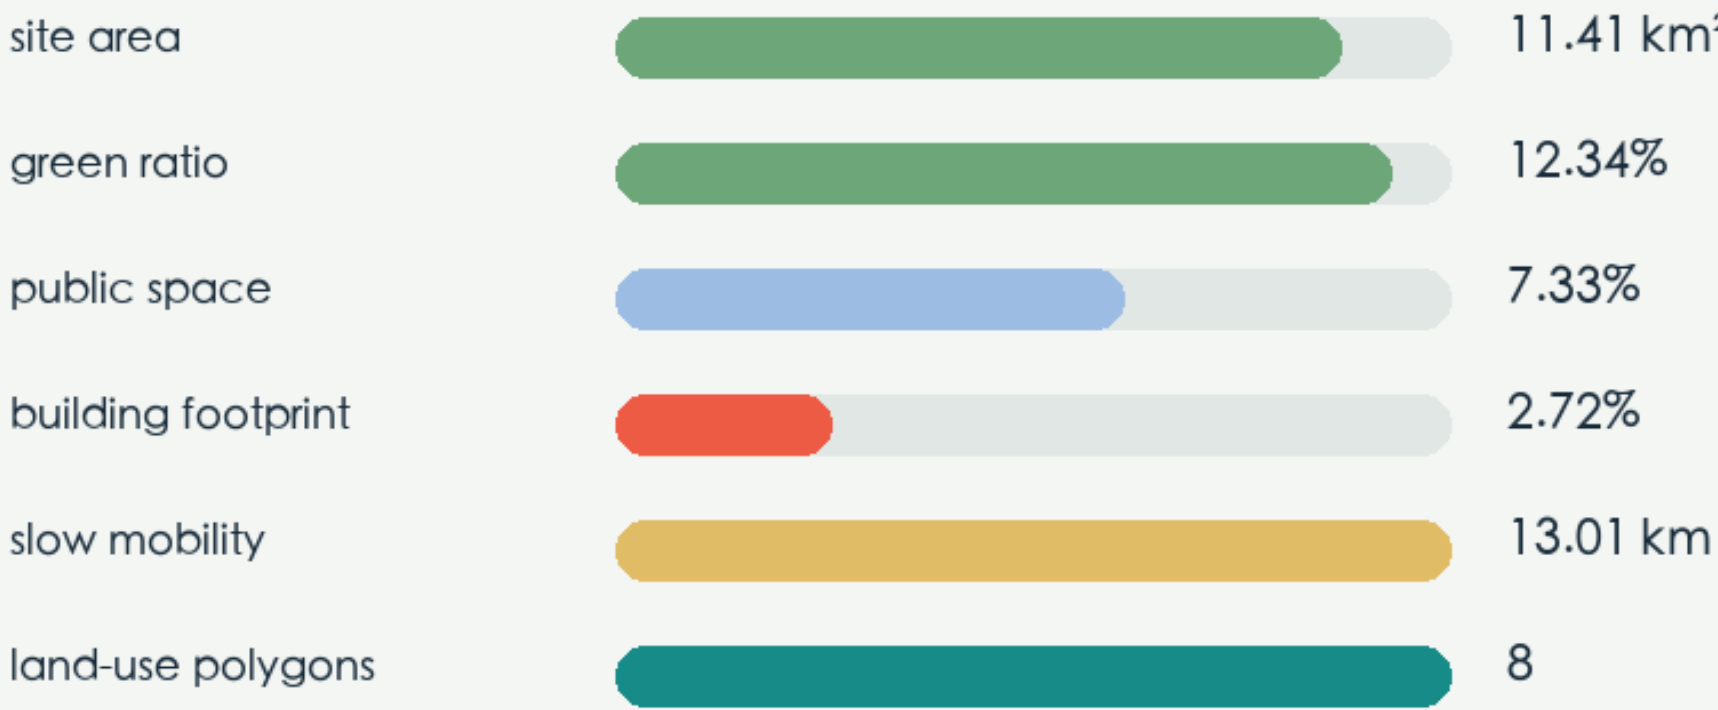

04 步行、雨水、人和机器人共享一条公共缝合

六个系统回路，把气候、具身智能和维护写进空间而非口号。

JING-ZHANG OPEN PULSE
V3.3 · PROVISIONAL / CONCEPT ONLY

提交几何 / SUBMISSION GEOMETRY

三态 / THREE STATES

- 01 普通服务
纸面、人工、被动构件
- 02 有界测试
责任人、急停、最小数据
- 03 退出 / 修复
冻结、回执、复原

K01—K06 / 构件 → 智证回执

K01	三站	纸图 + 人工	无 App
K02	原点/钟寺	树荫 + 座椅	无障碍
K03	众智圈	清流 + 溢流	雨洪
K04	原点/钟寺	纸面回执	清权
K05	众智圈	人工配送	急停
K06	原点/钟寺	纸质档案	撤回

所有数值为设计/复算接口；unknown、design_target 与 provisional 不代表现场绩效。

Values are design/recompute interfaces; unknown, design_target and provisional are not field performance.

English translation of figure text

The source graphic is preserved above; this panel translates its detected text.

05 / Metrics first: can it be recomputed?

Three states, eight land uses, six components, one auditable evidence contract.

Submission geometry: site area 11.41 km²; green ratio 12.34%; public space 7.33%; building footprint 2.72%; slow mobility 13.01 km; land-use polygons 8.

K01—K06 / component → evidence receipt: K01 three stations → paper map + human → no app; K02 AI Origin / Dazhongsi → tree pit + seat → step-free; K03 Zhongzhiyuan → clear flow + backflow → rain; K04 AI Origin / Dazhongsi → paper receipt → Qinghe; K05 Zhongzhiyuan → human dispatch → e-stop; K06 AI Origin / Dazhongsi → paper archive → withdrawal.

Three states: ordinary service = paper, human, passive; bounded test = responsible person, e-stop, minimal data; exit / restore = freeze, receipt, restoration.

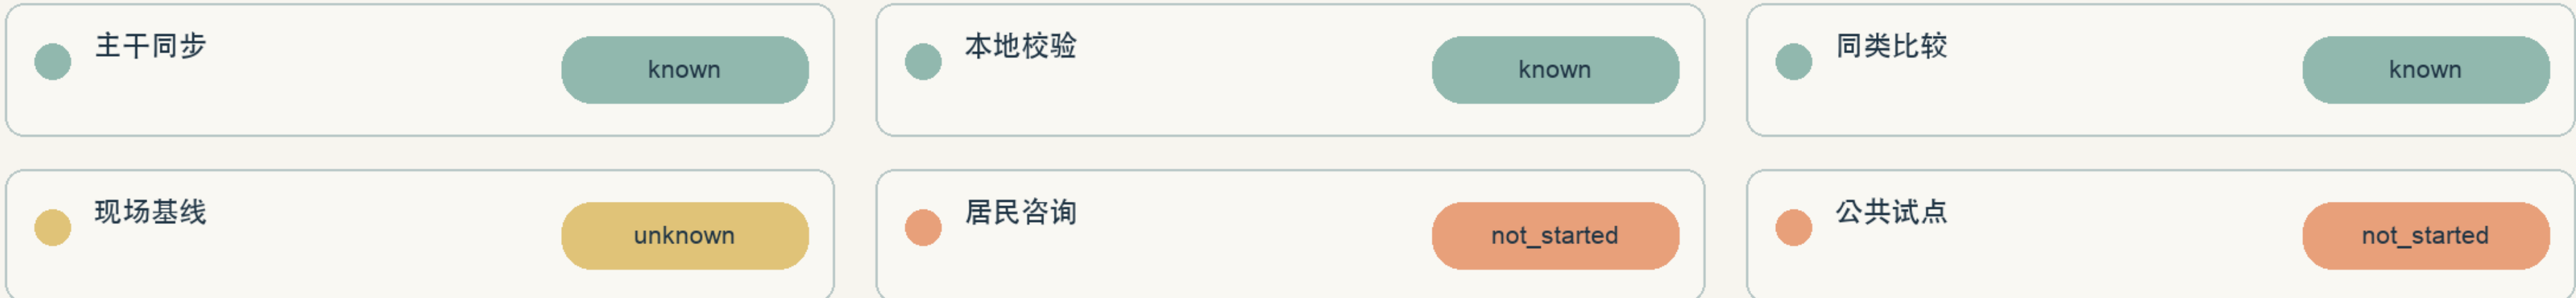

All values are design and recompute interfaces; unknown, design_target and provisional do not represent field performance.

06 / 建设与参与：每个窗口都能回退

把概念交给证据、责任与退出闸门；当前未知状态保持可见

当前参与状态 / CURRENT PARTICIPATION STATE

任何一项缺证据、责任人或普通路径兜底 → STOP / 恢复普通公共使用

JSON 索引：construction-readiness.json + participation-cycle.json · 仅为概念证据 · 不构成许可或现场结果

English translation of figure text

The source graphic is preserved above; this panel translates its detected text.

06 / Construction and participation: every window can exit

Turn concepts into evidence, responsibility and stop gates; keep unknown states visible.

CR-01 Data and site lock: question, user and versioned boundary → ownership, survey and conflict table → stop when ownership, fire or responsible party is unclear.

CR-02 Public path and passive interface: permitted site and management piece → barrier-free route and maintenance schedule → stop on access, maintenance conflict or ponding.

CR-03 Heat, water and lifeline: geometry version and calibration plan → heat/water/drainage/fire review → stop when calibration has no safe route.

CR-04 Bounded, human-led window: permission, responsibility and human baseline → opening, complaint and event log → stop after a major incident or failed handover.

CR-05 Retain, adapt or exit: window end or publication stop → public comparison, clearance and restoration → stop when evidence is insufficient or responsibility is vacant.

Current participation state: main sync known; local verification known; peer comparison known; field baseline unknown; resident consultation not started; public pilot not started.

JSON index: construction-readiness.json + participation-cycle.json. Concept evidence only; not a permit or field result.

Identity system · two rails / three nodes / two switches

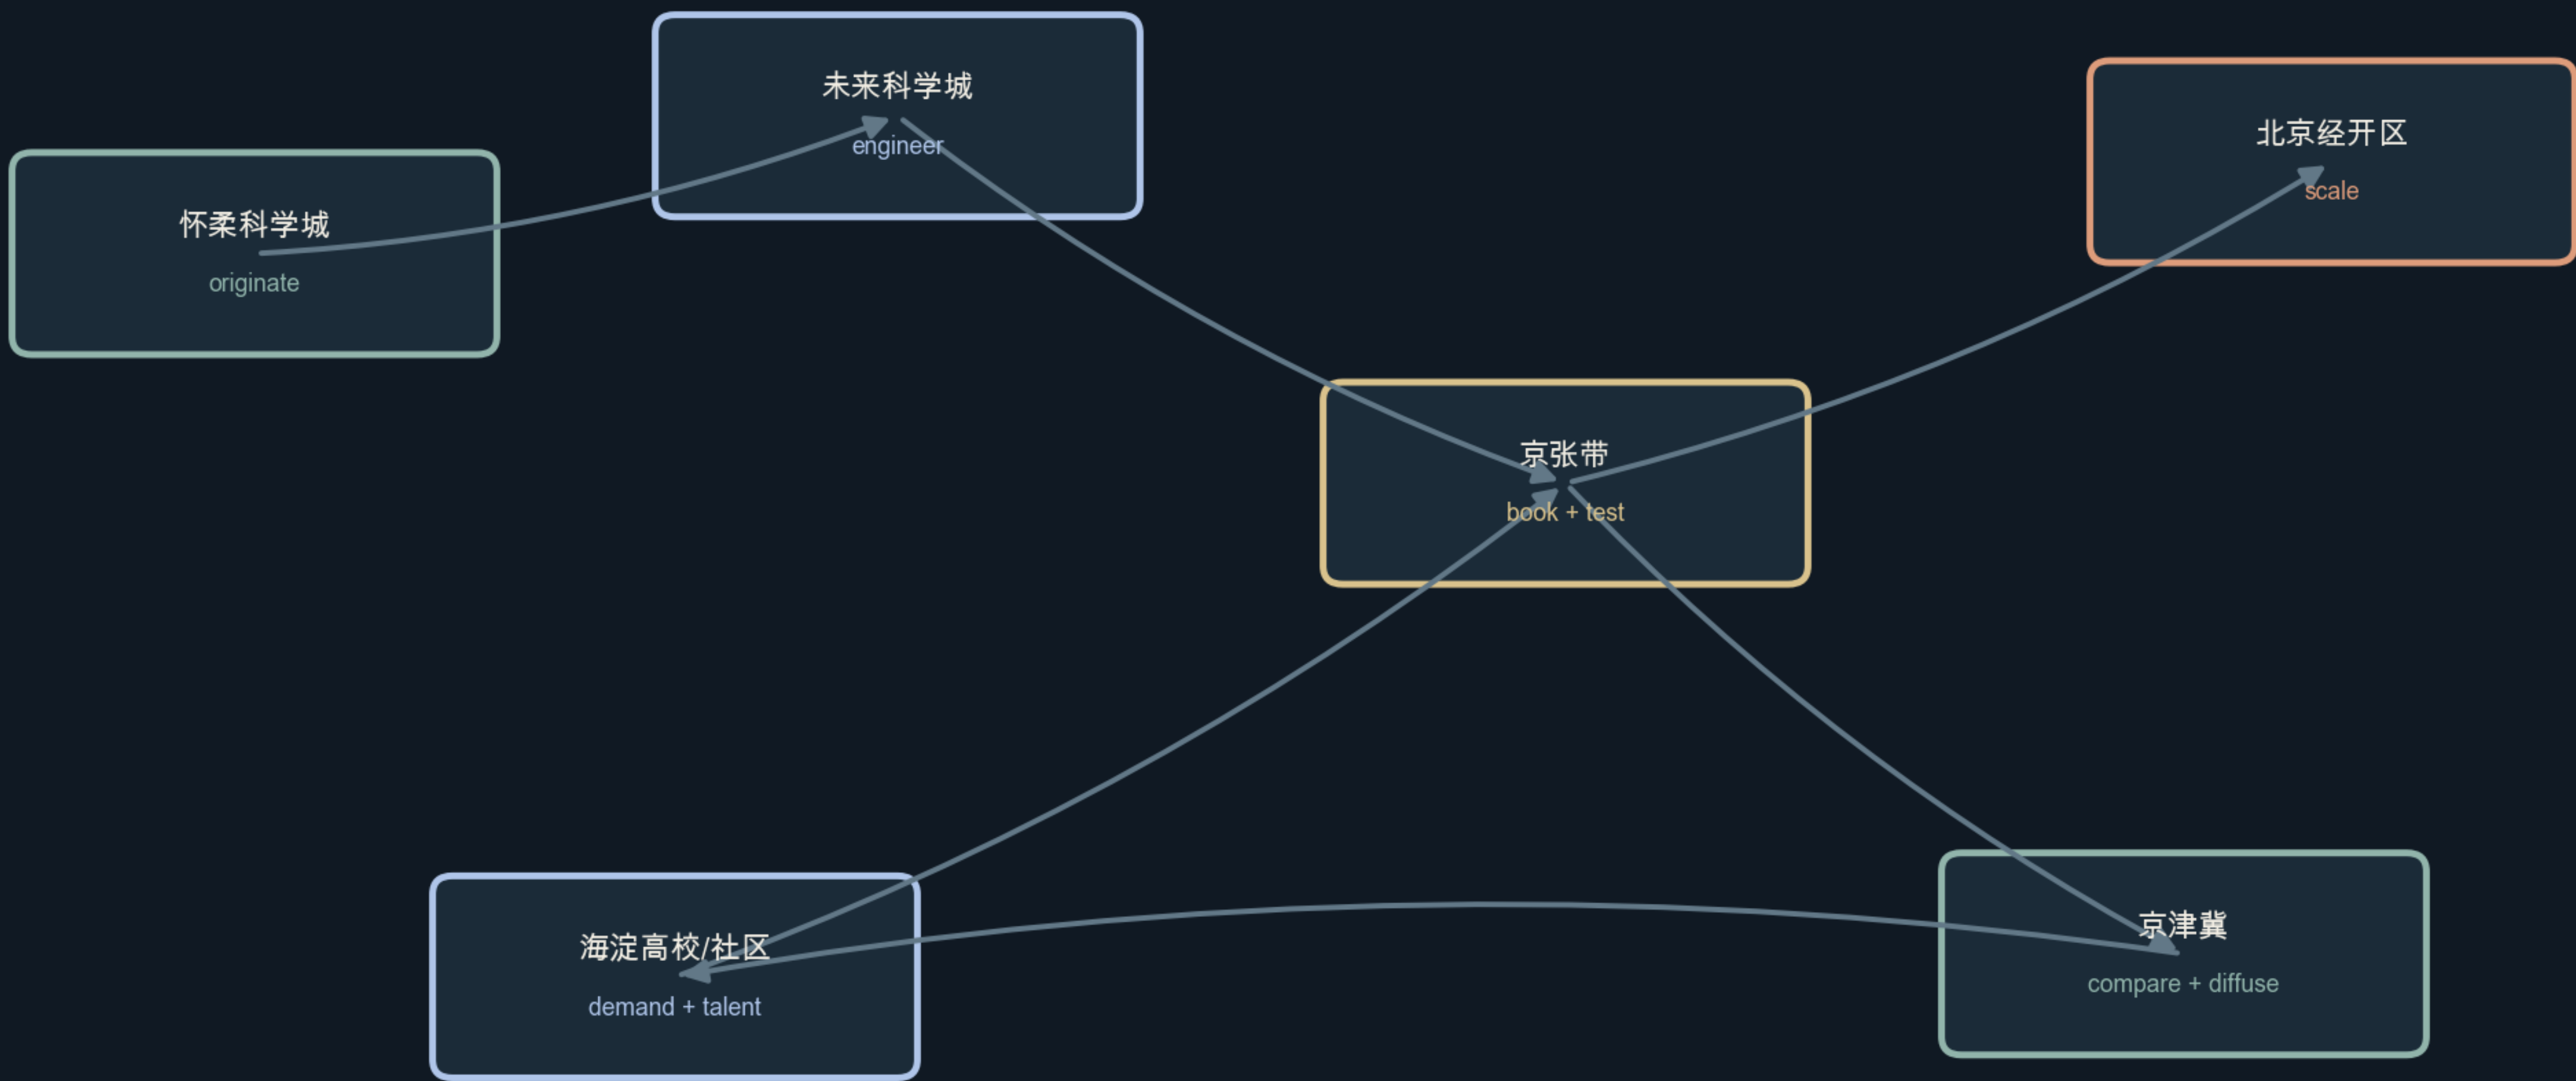

Construction rule: two parallel rails · three public nodes · two switch diamonds.

Public components: status board — what is booked / who is accountable; stitch threshold — step-free, audible, tactile crossing; rain tree pit — shade + storage + work order; withdrawal bay — robot stops without blocking people.

Palette: rail graphite, public jade, open blue, civic amber, human coral.

Concept direction · no registered mark · every active component requires a passive human equivalent and a withdrawal path.

区域协同不是搬运清单，而是能力回路 / REGIONAL ECOLOGY LOOP

Eight mechanisms: land · space · industry · capital · talent · compute · data · scenario | all partnerships conceptual

许丙南 × Codex / v3.3

English translation of figure text

The source graphic is preserved above; this panel translates its detected text.

Regional coordination is a capability loop, not a transfer list.

Huairou Science City → originate. Future Science City → engineer. Jing-Zhang belt → book + test. Beijing E-Town → scale. Haidian university / community → demand + talent. Beijing–Tianjin–Hebei → compare + diffuse.

Eight mechanisms: land · space · industry · capital · talent · compute · data · scenario. All partnerships are conceptual and require separate ownership, funding, safety, rights and implementation review.

一枚令牌的完整生命周期 / TOKEN → TEST → RETURN

14 scenario rows in scenario-operation-matrix.json · thresholds are design gates, not statutory service levels

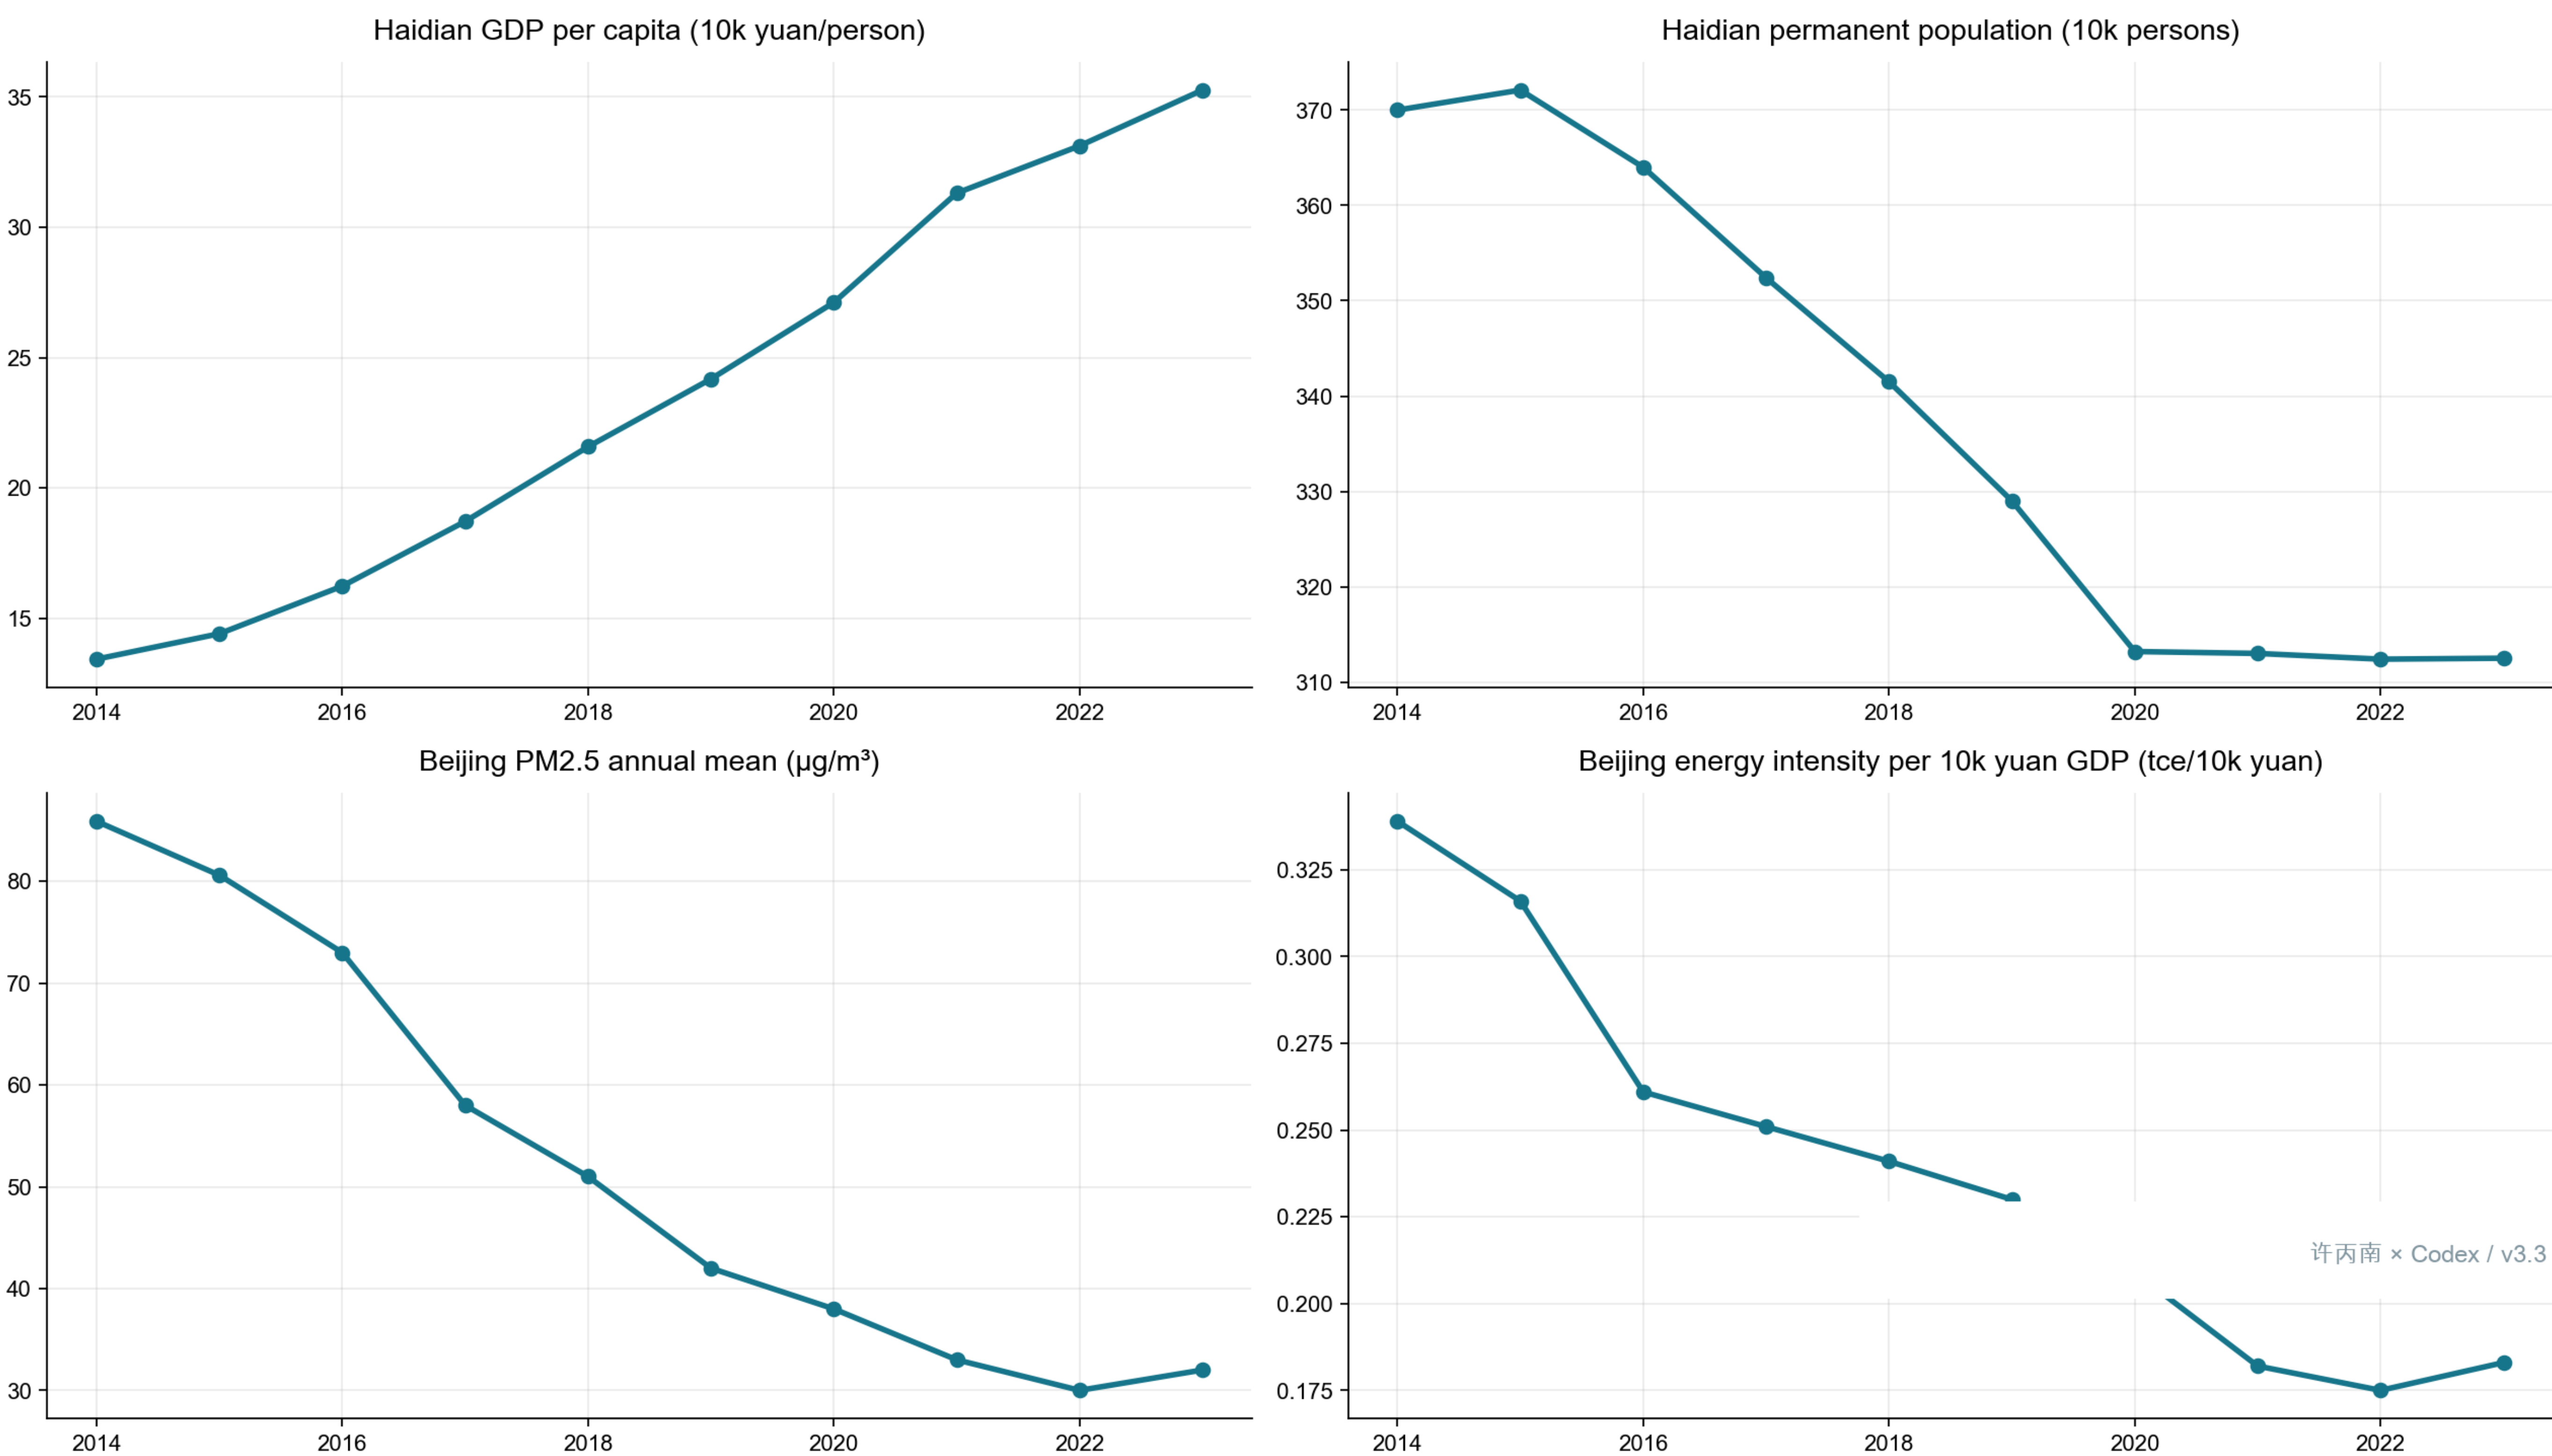

许丙南 × Codex / v3.3

English translation of figure text

The source graphic is preserved above; this panel translates its detected text.

A full lifecycle for each public token / TOKEN → TEST → RETURN
01 Request · public request
02 Review · data + access + RACI
03 Operate · bounded window + human lead
04 Review · SLA + complaint + evidence
05 Return · ordinary public use
RACI = owner + accountable lead; SLA = response + recovery clock; COST = relative band only; DATA = minimum + retention; STOP = rollback + non-AI equivalent.
14 scenario rows in scenario-operation-matrix.json. Thresholds are design gates, not statutory service levels.

Jing-Zhang Innovation Belt Quantitative Observatory: Economy – Population – Air – Energy (2014–2023)

Source boundary: Beijing/Haidian statistical yearbooks; 2014–2023 historical series. 2024/2025 city bulletins are freshness context only. Xu Bingnan × Codex / v3.0
