

Jingzhang AI Low-Speed Robot Co-Mobility Network v6: Dual Engines — Cross-Section Grammar x Co-Mobility License

Centennial Jingzhang AI Innovation Belt • Open Call Concept Proposal • Iteration v9.1 • zachshi-ai

Overview & Spatial Structure

Anchored on the Jingzhang Railway Heritage Park slow-traffic spine, this proposal runs on two parallel engines: the spatial engine — Co-Mobility Cross-Section Grammar — four cross-section prototypes (dedicated 2.5 m / shared / pedestrian-priority / test-trail 2.0 m) x four speed tiers (5/8/10/15 km/h) x conflict test field, generating co-existence rules from geometric constraints; a 5,000-draw deterministic simulation (seed 20260814) verifies the dedicated-spine-plus-shared-branches mix outperforms alternatives. Land use • Slow-mobility network • Key areas (provisional boundary, subject to official release)

Provisional boundary is conceptual, not an official red line; areas recomputed as EPSG:4548 unions.

Site overview

The provisional boundary is conceptual, not an official red line; all areas are EPSG:4548 union recomputes; unknown metrics await official data. This booklet is a concept design document and constitutes no government approval or implementation commitment.

Boundary & Compliance

Provisional boundary is not an official red line; field metrics remain unknown; all scenarios are synthetic tabletop runs, unauthorized and not run on site; every AI service has a no-App/human equivalent path.
