DATA READINESS: TURNING GAPS INTO CLOSABLE RELEASE GATES

Seven evidence paths connect assumptions, scenarios, metrics, and fallbacks; missing data remains unknown or conceptual.

Derived from geometry/*.geojson and structured evidence; the ordinary-person journey, spatial interfaces, acceptance atlas, and reviewer navigation perform only offline reference or path checks and expected-FAIL negative tests; missing evidence remains unknown or conceptual.

Derived from geometry/*.geojson and structured evidence; the ordinary-person journey, spatial interfaces, acceptance atlas, and reviewer navigation perform only offline reference or path checks and expected-FAIL negative tests; missing evidence remains unknown or conceptual.

HUMAN–MACHINE INTERFACES: STOP ACTIONS

Non-scaled concepts: human priority and review precede testing. Not an engineering section or permit.

Derived from geometry/*.geojson and structured evidence; the ordinary-person journey, spatial interfaces, acceptance atlas, and reviewer navigation perform only offline reference or path checks and expected-FAIL negative tests; missing evidence remains unknown or conceptual.

FIG. 03

FIG. 02

SIX-LAYER SPATIAL OS: PROVISIONAL PARTITIONS AND REVERSIBLE SPACE

Concept layers retain human entry and evidence gates; not zoning, FAR, height, or demolition decisions.

Derived from geometry/*.geojson and structured evidence; the ordinary-person journey, spatial interfaces, acceptance atlas, and reviewer navigation perform only offline reference or path checks and expected-FAIL negative tests; missing evidence remains unknown or conceptual.

METRICS ARE NOT DECORATION: KNOWN, UNKNOWN, AND TRACEABLE

Known spatial values are recalculated from provisional GeoJSON in EPSG:4548; social and operational outcomes remain unknown without measurement.

MUST REMAIN UNKNOWN

- Resident retention: household/business baseline absent
- Sustained work transition: paid pathway and follow-up absent
- Manual-channel equivalence: service catalogue and walk-through absent
- Operating PUE / green power: metering and responsibility plan absent
- Heat recovery: load, network, and delivery metering absent
- Ordinary-person journey: structure only; real usability unmeasured

Six-band area parameters

Current baseline

Three candidates

- People-first: more community, learning, and reversible space
- Balanced: a middle comparison set for professional calibration
- Machine-ready: more API discussion while retaining human and resilience floors

Conceptual suggestions only; no FAR, building-height, engineering, investment, or policy conclusion.
formula: area = share × provisional site area
