

1 + 3 + 2 + 12

One maker spine · three maker yards ·
two service wings · twelve testable
scenarios

01

1 Zhongzhiyuan | Controlled Test Yard

02

2 AI Origin | Open Make Commons

03

3 Dazhongsi | Use and Repair Market

Eight-field device passport

Device passport: purpose | place & users |
version, materials & licence | data/model |
test evidence | accountability & takeover |
maintenance & spares | retirement &
knowledge return

Provisional boundaries only; no statutory-redline or precise Dazhongsi station-interface claim.

Provisional site

11.413 km²

Maker green ratio

17.55%

Public maker-space ratio

1.98%

Conceptual building units

18

Scenario cards

12

Industry test scenarios

4

EVIDENCE CHAIN

01
Provisional geometry

02
Shared-edge layers

03
Projected recalculation

04
Matrix mapping

05
Bilingual outputs

EXPLICITLY UNKNOWN

FAR, height, density, setbacks, ownership, utilities and
rail-safety controls are not filled with plausible guesses.

UPDATE TRIGGERS

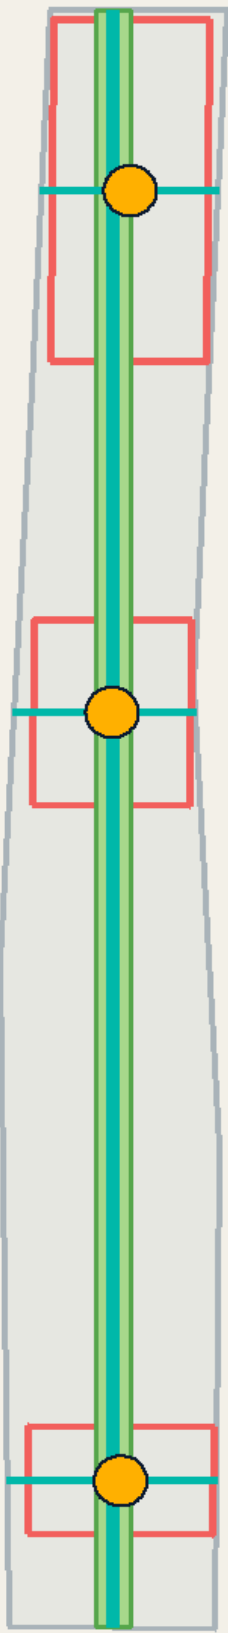

Official GIS/CAD, building and heritage survey, road/rail
redlines, utilities, seasonal baselines and independent public
review.

Every displayed value is reproducible from metrics.json and GeoJSON; unknown controls remain null.

0802 AI research & controlled testing	116.7 ha
05 Industry services & repair market	332.9 ha
0701 Mixed housing & daily services	142.0 ha
0804 Open education & skills	171.4 ha
0803 Rail culture & remanufacturing	178.1 ha
1401 Maker spine & open park	200.3 ha
Recalculation logic EPSG:4548 projected partition; shared edges avoid pseudo-overlap; total closes to the provisional site.	

Conceptual programme partition—not statutory land use, property parcels or road redlines.

17.5%	Continuous green spine Shade, rain gardens, accessible movement and device display
1.98%	Public maker yards Three visible, optional and human-overrideable shared places
8 FIELDS	Maintenance first Every device needs a maintainer, spares and retirement route
DATA STILL NEEDED Road/rail redlines, station interfaces, parking demand, utilities and accessibility baseline.	

Lines express connectivity—not engineered alignments, transport capacity or confirmed station interfaces.

Three Maker Yards | From Controlled Testing to Open Repair

OPEN 01

2026

01

Zhongzhiyuan | Controlled Test Yard

PRIMARY USERS
Research teams / device makers / reviewers

EVIDENCE TO ADVANCE
Gate: safety, takeover, removability

02

AI Origin | Open Make Commons

PRIMARY USERS
Residents / students / founders / maintainers

EVIDENCE TO ADVANCE
Gate: usable, accessible, understandable

03

Dazhongsi | Use and Repair Market

PRIMARY USERS
Commuters / merchants / repair groups

EVIDENCE TO ADVANCE
Gate: maintainable, accountable, retireable

All three polygons are provisional; yard locations move after official boundary, access and engineering surveys.
