

MAKE JINGZHANG / 00000

Overall Concept | A Public Lifecycle Chain for Civic AI Devices

OPEN 01

2026

DESIGN CLAIM

Make visible, maintain open: the life of every civic AI device becomes a public urban matter.

1 + 3 + 2 + 12

One maker spine · three maker yards · two service wings · twelve testable scenarios

01

1 Zhongzhiyuan | Controlled Test Yard

02

2 AI Origin | Open Make Commons

03

3 Dazhongsi | Use and Repair Market

Eight-field device passport

Device passport: purpose | place & users | version, materials & licence | data/model | test evidence | accountability & takeover | maintenance & spares | retirement & knowledge return

EVIDENCE

GeoJSON → metrics.json → matrices → bilingual narrative / figures / PDFs

STATUS

Concept proposal; official boundaries and statutory controls pending.

Provisional boundaries only; no statutory-redline or precise Dazhongsi station-interface claim.

MAKE JINGZHANG / 000000

Metrics and Evidence | What Is Known, Assumed and Updated

OPEN 01 2026

DESIGN CLAIM

43.6 km² coordinated research, about 11.4 km² overall design and three key areas; boundary confidence is recorded separately from task scope.

EVIDENCE

GeoJSON → metrics.json → matrices → bilingual narrative / figures / PDFs

EVIDENCE CHAIN

STATUS

Concept proposal; official boundaries and statutory controls pending.

EXPLICITLY UNKNOWN

FAR, height, density, setbacks, ownership, utilities and rail-safety controls are not filled with plausible guesses.

UPDATE TRIGGERS

Official GIS/CAD, building and heritage survey, road/rail redlines, utilities, seasonal baselines and independent public review.

Every displayed value is reproducible from metrics.json and GeoJSON; unknown controls remain null.

MAKE JINGZHANG / 00000

Overall Concept | A Public Lifecycle Chain for Civic AI Devices

OPEN 01 2026

1 + 3 + 2 + 12

One maker spine · three maker yards ·
two service wings · twelve testable
scenarios

01
1 Zhongzhiyuan | Controlled Test Yard

02
2 AI Origin | Open Make Commons

03
3 Dazhongsi | Use and Repair Market

Eight-field device passport

Device passport: purpose | place & users |
version, materials & licence | data/model |
test evidence | accountability & takeover |
maintenance & spares | retirement &
knowledge return

DESIGN CLAIM

Learn from innovation clusters,
distributed production, prototyping
and mixed renewal; add repair and
retirement instead of copying forms.

EVIDENCE

GeoJSON → metrics.json →
matrices → bilingual
narrative / figures / PDFs

STATUS

Concept proposal; official
boundaries and statutory controls
pending.

Provisional boundaries only; no statutory-redline or precise Dazhongsi station-interface claim.

MAKE JINGZHANG / 00000

Land-use Structure | A Shared-edge Conceptual Programme Mosaic

OPEN 01 2026

0802 AI research & controlled testing	116.7 ha
05 Industry services & repair market	332.9 ha
0701 Mixed housing & daily services	142.0 ha
0804 Open education & skills	171.4 ha
0803 Rail culture & remanufacturing	178.1 ha
1401 Maker spine & open park	200.3 ha
Recalculation logic	EPSG:4548 projected partition; shared edges avoid pseudo-overlap; total closes to the provisional site.

DESIGN CLAIM

A 1401 maker green spine organises research, services, housing, education and rail culture; all zones are conceptual.

EVIDENCE

GeoJSON → metrics.json → matrices → bilingual narrative / figures / PDFs

STATUS

Concept proposal; official boundaries and statutory controls pending.

Conceptual programme partition—not statutory land use, property parcels or road redlines.

MAKE JINGZHANG / 00000

Three Maker Yards | From Controlled Testing to Open Repair

OPEN 01 2026

DESIGN CLAIM

Zhongzhiyuan uses safety, human takeover and removability as the first evidence gate before public use.

EVIDENCE

GeoJSON → metrics.json → matrices → bilingual narrative / figures / PDFs

STATUS

Concept proposal; official boundaries and statutory controls pending.

01

Zhongzhiyuan | Controlled Test Yard

PRIMARY USERS

Research teams / device makers / reviewers

EVIDENCE TO ADVANCE

Gate: safety, takeover, removability

02

AI Origin | Open Make Commons

PRIMARY USERS

Residents / students / founders / maintainers

EVIDENCE TO ADVANCE

Gate: usable, accessible, understandable

03

Dazhongsi | Use and Repair Market

PRIMARY USERS

Commuters / merchants / repair groups

EVIDENCE TO ADVANCE

Gate: maintainable, accountable, retireable

All three polygons are provisional; yard locations move after official boundary, access and engineering surveys.

MAKE JINGZHANG / 00000

Three Maker Yards | From Controlled Testing to Open Repair

OPEN 01 2026

01

Zhongzhiyuan | Controlled Test Yard

PRIMARY USERS
Research teams / device makers / reviewers

EVIDENCE TO ADVANCE
Gate: safety, takeover, removability

02

AI Origin | Open Make Commons

PRIMARY USERS
Residents / students / founders / maintainers

EVIDENCE TO ADVANCE
Gate: usable, accessible, understandable

03

Dazhongsi | Use and Repair Market

PRIMARY USERS
Commuters / merchants / repair groups

EVIDENCE TO ADVANCE
Gate: maintainable, accountable, retireable

DESIGN CLAIM

AI Origin puts residents, students, founders and maintainers in one understandable, optional co-making process.

EVIDENCE

GeoJSON → metrics.json → matrices → bilingual narrative / figures / PDFs

STATUS

Concept proposal; official boundaries and statutory controls pending.

All three polygons are provisional; yard locations move after official boundary, access and engineering surveys.

MAKE JINGZHANG / 00000

Three Maker Yards | From Controlled Testing to Open Repair

OPEN 01 2026

01

Zhongzhiyuan | Controlled Test Yard

PRIMARY USERS

EVIDENCE TO ADVANCE
Gate: usable, accessible, understandable

03

Dazhongsi | Use and Repair Market

PRIMARY USERS
Commuters / merchants / repair groups

EVIDENCE TO ADVANCE
Gate: maintainable, accountable, retireable

DESIGN CLAIM

Dazhongsi gates deployment through maintainability, accountability and retirement; its location moves with official geometry and station access.

EVIDENCE

GeoJSON → metrics.json → matrices → bilingual narrative / figures / PDFs

STATUS

Concept proposal; official boundaries and statutory controls pending.

All three polygons are provisional; yard locations move after official boundary, access and engineering surveys.

MAKE JINGZHANG / 00000

Mobility and Blue-green Public Space | Make Maintenance Routes Public

OPEN 01 2026

17.5%
Continuous green spine
Shade, rain gardens, accessible movement and device display

1.98%
Public maker yards
Three visible, optional and human-overridable shared places

8 FIELDS
Maintenance first
Every device needs a maintainer, spares and retirement route

DATA STILL NEEDED
Road/rail redlines, station interfaces, parking demand, utilities and accessibility baseline.

DESIGN CLAIM

A continuous green spine links three public yards so accessible movement, rainwater, display and maintenance share space.

EVIDENCE

GeoJSON → metrics.json → matrices → bilingual narrative / figures / PDFs

STATUS

Concept proposal; official boundaries and statutory controls pending.

Lines express connectivity—not engineered alignments, transport capacity or confirmed station interfaces.

Eight-field device passport

Device passport: purpose | place & users |
version, materials & licence | data/model |
test evidence | accountability & takeover |
maintenance & spares | retirement &
knowledge return

DESIGN CLAIM

Four industry tests and eight
public-life scenarios; each must
answer an eight-field passport,
non-digital fallback and failure exit.

EVIDENCE

GeoJSON → metrics.json →
matrices → bilingual
narrative / figures / PDFs

STATUS

Concept proposal; official
boundaries and statutory controls
pending.

Provisional boundaries only; no statutory-redline or precise Dazhongsi station-interface claim.
